Program-
mes of
Instruction.

PROGRAMMES OF INSTRUCTION FOR PUPILS IN NATIONAL SCHOOLS, OF
the MINIMUM amount of proficiency required for each Class.

No. 1.—FOR MALE NATIONAL SCHOOLS.

I. CLASS.

I. Children in the highest division of First Class will be expected—

1. To read with correct pronunciation the lessons of the earlier sections.
2. To spell correctly the words of the lessons they shall have previously read, and to understand their meaning.
3. To know the vowel sounds.
4. To answer simple questions on the subjects of the lessons already learnt by them.
5. To name the Days of the Week, and the Months and Seasons of the Year.
6. To count correctly and intelligently up to 20.
7. To add *mentally* any two or more single digits (as $5+4+6+3$) whose sum shall not exceed 20.
8. To write and read any number up to 20.

NOTE.—So soon as Children have learned the Alphabet, or even some few of its letters, they are to commence at once to *read* as well as spell.

II. CLASS.

II. Children in the senior division of the Second Class will be expected—

1. To read with correct pronunciation, and due attention to the pauses, the lessons of the earlier sections.
2. To spell correctly the simpler words of the lessons they may have already read, and to understand their meaning.
3. To name the syllables in a word.
4. To answer simple questions on the subjects of the lessons already learnt by them, and to be able to repeat correctly and neatly such lessons as are in rhyme.
5. To distinguish readily, in an easy sentence selected in their daily lessons, the Article, Noun, and Adjective.
6. To know the outlines of the Maps of the World and of Ireland.
7. To know the Addition and Subtraction Tables.
8. To write on slate or paper in well formed round-hand.
9. To *copy* from the First Lesson Book, or write from Dictation, on slate, with correct spelling, short and easy sentences.
10. To read and set down any number of three places of figures.
11. To be able to work on slate or black-board easy questions in Simple Addition and Subtraction, none of the *given* numbers to include more than three places of figures.

NOTE.—The Children of the Senior Division should be commencing to learn the new subjects and more advanced exercises mentioned in the next Section.

SEQUEL CLASS.

III. Children enrolled One Quarter or more in either Sequel Class will be expected—

1. To read with a fair degree of ease and correctness any of the lessons already learnt by them.
2. To spell correctly the simpler words of the lessons they may have already read, and to understand their meaning.

- Appendix H.* 3. To answer simple questions on the subjects of the lessons already learnt by them.
 — 4. To distinguish readily, in any easy sentences selected in their daily lessons, the Article,
 Program- Noun, Personal Pronoun, Adjective, Verb, and Adverb.
 mes of 5. To know the Maps of the World and Ireland.
 Instruction. 6. To know the Multiplication, Pence, and Time Tables.
 7. To write small-hand on paper.
 8. To write on slate or paper, with correct spelling, one or two short sentences *dictated*
 from the Second Book.
 9. To write out from memory, in proper order, the names of the Months of the Year, with
 the number of Days in each.
 10. To read and set down any number of five places of figures.
 11. To write out from memory any part of the Multiplication Table.
 12. To be able to work easy questions in Simple Multiplication and Simple Short Division.
- NOTE.—After the expiration of the First Quarter, the Pupils of this Class should begin to learn the new subjects and more advanced exercises mentioned in the next Section.

III. CLASS.

IV. Children enrolled One Quarter or more in the Third Class will be expected—

1. To know what is meant by accent and emphasis, and to read with ease and correctness, and with due attention to the pauses.
2. To spell correctly the words of the lessons they may have already learnt, and to explain their meaning.
3. To answer simple questions on the subject-matter of those lessons, and to repeat such of them as are in rhyme neatly and correctly.
4. To distinguish readily and with certainty, in any easy sentences selected in their daily lessons, all the Parts of Speech.
5. To know the Maps of the World, Europe, and Ireland.
6. To write on paper, and to write a fair hand.
7. To know, and to be able to write down, the characters or marks used in punctuation.
8. To write down correctly easy sentences from Dictation.
9. To know Notation and Numeration well, and to repeat all the more useful Arithmetical Tables.
10. To write out from memory the Time and Money Tables.
11. To work readily, on slate or paper, questions in the Simple and Compound Rules of Arithmetic.

NOTE.—After the expiration of the First Quarter, the Pupils of this Class should begin to learn the new subjects and more advanced exercises mentioned in the next Section.

IV. CLASS.

V. Pupils enrolled One Quarter or more in the Fourth Class will be expected—

1. To read with fluency, correctness, and intelligence.
2. To answer readily on the subject-matter of the lessons they may have already read, and to explain with clearness the meaning of the words contained in them.
3. To know the Prefixes, Affixes, and principal Roots.
4. To know so much of English Grammar as to be able to parse easy sentences.
5. To know the Maps of *all* the Continents and of Ireland.
6. To know the definitions of the more common technical terms of Geography, as *Ax's*, *Poles*, *Equator*, *Latitude*, *Longitude*, *Zones*, &c.
7. To write a good hand.
8. To write correctly from Dictation sentences selected from the Third Book.
9. To know *all* the Arithmetical Tables, and to be able to write out from memory, and in a neat and correct form, any one of them.
10. To be able to work questions in Proportion, Fractions, and Practice.

NOTE.—After the expiration of the First Quarter, the Pupils of this Class should begin to learn the new subjects and more advanced exercises mentioned in the next Section.

V. CLASS.

VI. Pupils enrolled One Quarter or more in the Fifth Class will be expected—

1. To read with entire ease, fluency, and judgment, both poetry and prose.
2. To answer with intelligence and judgment on the subject-matter of the lessons already learnt by them.
3. To analyze the words of their ordinary lessons, pointing out their Roots, Prefixes, and Affixes, and to explain their meaning with clearness and precision.
4. To analyze and parse correctly compound sentences.
5. To know the Geography of the British Empire, and the *simpler* portions of the Geography Generalized.
6. To write a good hand with ease and freedom.
7. To write correctly from Dictation any ordinary sentences selected for them.
8. To write out from memory, with correct spelling and syntax, the substance of any fable or short story chosen from the Second or Third Book.

9. To know the forms of Epistolary Correspondence, and how to address, subscribe, and direct Letters, &c. *Appendix H.*

10. To know the Commercial Rules of Arithmetic, and the mensuration of plane surfaces. *Program-*

11. To know how to keep Cash, Personal, Real, and Farm Accounts, and how to write out Bills, Shop Accounts, &c. *mes of Instruction.*

12. To draw on slate or paper any of the simple plane Geometrical Figures.

NOTE I.—The *Spelling Book Superseded* should be taught to at least the III., IV., and V. Classes.

NOTE II.—Mental Calculation should be taught to all Classes.

NOTE III.—The "*Knowledge of Common Things*" is to be learnt from the Lesson Books; and the Classes should be regularly and carefully examined upon the *subject-matter* of the Lessons read by them.

NOTE IV.—*Periodic Repetitions* should be regularly instituted, the three great means of instruction being EXPLANATION, INTERROGATION, and REPETITION.

NO. 2.—FOR FEMALE NATIONAL SCHOOLS.

I. CLASS.

I. Children in the highest division of First Class will be expected—

1. To read with correct pronunciation the Lessons of the earlier sections.
2. To spell correctly the words of the lessons they shall have previously read, and to understand their meaning.
3. To know the vowel sounds.
4. To answer simple questions on the subjects of the lessons already learnt by them.
5. To name the Days of the Week, and the Months and Seasons of the Year.
6. To count correctly and intelligently up to 20.
7. To add *mentally* any two or more single digits (as $5+4+6+3$) whose sum shall not exceed 20.
8. To write and read any number up to 20.

NOTE.—So soon as Children have learned the Alphabet, or even some few of its letters, they are to commence at once to *read* as well as spell.

II. CLASS.

II. Children in senior division of Second Class will be expected—

1. To read with correct pronunciation, and due attention to the pauses, the lessons of the earlier sections.
2. To spell correctly the simpler words of the lessons they may have already read, and to understand their meaning.
3. To name the syllables in a word.
4. To answer simple questions on the subjects of the lessons already learnt by them, and to be able to repeat correctly and neatly such lessons as are in rhyme.
5. To distinguish readily, in any easy sentence selected in their daily lessons, the Article, Noun, and Adjective.
6. To know the outlines of the Maps of the World and of Ireland.
7. To know the Addition and Subtraction Tables.
8. To write on slate or paper in well formed round-hand.
9. To *copy* from the First Lesson Book, or write from Dictation, on slate, with correct spelling, short and easy sentences.
10. To read and set down any number of three places of figures.
11. To be able to work on slate or black-board easy questions in Simple Addition and Subtraction, none of the *given* numbers to include more than three places of figures.

NOTE.—The Children of the Senior Division should be commencing to learn the new subjects and more advanced exercises mentioned in the next Section.

SEQUEL CLASS.

III. Children enrolled One Quarter or more in either Sequel Class will be expected—

1. To read with a fair degree of ease and correctness any of the lessons already learnt by them.
2. To spell correctly the simpler words of the lessons they may have already read, and to understand their meaning.
3. To answer simple questions on the subjects of the lessons already learnt by them.
4. To distinguish readily, in any easy sentences selected in their daily lessons, the Article, Noun, Personal Pronoun, Adjective, Verb, and Adverb.
5. To know the Maps of the World and Ireland.
6. To know the Multiplication, Pence, and Time Tables.
7. To write small-hand on paper.
8. To write on slate or paper, with correct spelling, one or two short sentences *dictated* from the Second Book.
9. To write out from memory, in proper order, the names of the Months of the Year, with the number of Days in each.
10. To read and set down any number of five places of figures.

Appendix H
Program-
mes of
Instruction.

11. To write out from memory any part of the Multiplication Table.
 12. To be able to work easy questions in Simple Multiplication and Simple Short Division.
- NOTE.—After the expiration of the First Quarter, the Pupils of this Class should begin to learn the new subjects and more advanced exercises mentioned in the next Section.

III. CLASS.

IV. Children enrolled One Quarter or more in the Third Class will be expected—

1. To know what is meant by accent and emphasis, and to read with ease and correctness, and with due attention to the pauses.
2. To spell correctly the words of the lessons they may have already learnt, and to explain their meaning.
3. To answer simple questions on the subject-matter of those lessons, and to repeat such of them as are in rhyme neatly and correctly.
4. To distinguish readily and with certainty, in any easy sentences selected in their daily lessons, all the Parts of Speech.
5. To know the Maps of the World, Europe, and Ireland.
6. To write on paper, and to write a fair hand.
7. To know, and to be able to write down, the characters or marks used in punctuation.
8. To write down correctly easy sentences from Dictation.
9. To know Notation and Numeration well, and to repeat all the more useful Arithmetical Tables.
10. To write out from memory the Time and Money Tables.
11. To work readily, on slate or paper, questions in all the Simple Rules of Arithmetic, and in Addition, Subtraction, Multiplication, and Division of Money.

NOTE.—After the expiration of the First Quarter, the Pupils of this Class should begin to learn the new subjects and more advanced exercises mentioned in the next Section.

IV. CLASS.

V. Pupils enrolled One Quarter or more in the Fourth Class will be expected—

1. To read with fluency, correctness, and intelligence.
2. To answer readily on the subject-matter of the lessons they may have already read, and to explain with clearness the meaning of the words contained in them.
3. To know the Prefixes, Affixes, and principal Roots.
4. To know the inflections of the Noun, Pronoun, Adjective, and Verb, and to be able to parse an easy sentence.
5. To know the Maps of all the Continents and of Ireland.
6. To know the definitions of the more common technical terms of Geography, as *Axis*, *Poles*, *Equator*, *Latitude*, *Longitude*, *Zones*, &c.
7. To write a good hand.
8. To write correctly from Dictation sentences selected from the Third Book.
9. To be able to write out from memory, and in a neat and correct form, any of the more useful Arithmetical Tables.
10. To be able to work questions in the Compound Rules, Simple Proportion, and Practice.

NOTE.—After the expiration of the First Quarter, the Pupils of this Class should begin to learn the new subjects and more advanced exercises mentioned in the next Section.

V. CLASS.

VI. Pupils enrolled One Quarter or more in the Fifth Class will be expected—

1. To read with ease, fluency, and judgment, both poetry and prose.
2. To answer with intelligence and judgment on the subject-matter of the lessons already learnt by them.
3. To be able to explain the composition and meaning of the words of their ordinary reading lessons.
4. To be able to parse compound sentences.
5. To know the Geography of the British Empire, and to explain the ordinary proofs of the Earth's sphericity.
6. To write a good hand with ease and freedom.
7. To write correctly from Dictation any ordinary sentences selected for them.
8. To write out from memory, with correct spelling and syntax, the substance of any fable or short story chosen from the Second or Third Book.
9. To know the forms of Epistolary Correspondence, and how to address, subscribe, and direct Letters, &c.
10. To know Fractions, Practice, and Interest.
11. To know how to keep a Cash Account, and how to write out a short Shop Bill.

NOTE I.—The *Spelling Book Superseded* should be taught to at least the III., IV., and V. Classes.

NOTE II.—Mental Calculation should be taught to all Classes.

NOTE III.—*Needlework* should be taught to all the Children beyond the I. Class.

NOTE IV.—The "*Knowledge of Common Things*" is to be learnt from the Lesson Books; and the Classes should be regularly and carefully examined upon the subject-matter of the lessons read by them.

NOTE V.—*Periodic Repetitions* should be regularly instituted, the three great means of instruction being EXPLANATION, INTERROGATION, and REPETITION.

APPENDIX L.

I.—List of One Hundred and Forty-four Workhouse Schools in connexion on the 31st December, 1862, with the Total Number of Distinct Pupils at any time on Rolls, the Average Number on Rolls, and the Average Daily Attendance of Pupils, as returned for the Year ending 31st December, 1862.

Extract from Commissioners' Rules, as to nature of aid granted to Workhouse Schools.—"1. Such Schools are received into connexion, and grants of Books made thereto, on condition that they shall be subject to inspection by the Commissioners, or their Officers, and that all the Rules of the Board applicable to Non-Vested Schools be faithfully observed.

"2. The Commissioners award half-yearly gratuities to a certain number of the Teachers of Workhouse Schools in each District, on the recommendation of the Inspector.

"The gratuities are divided into two classes:—

For Male Teachers, { First Class, . . . Twenty at the rate of £6 a-year each.
 Second Class, . . . Twenty " £4 "

For Female Teachers, { First Class, . . . Twenty " £5 "
 Second Class, . . . Twenty " £3 "

"3. In Workhouse Schools to which farms are attached, the Commissioners award to the Agricultural Teacher, a gratuity, not exceeding £15 in one year, and make a free grant of books on agriculture. These gratuities and grants are awarded on the recommendation of the Agricultural Inspectors."

IV.—List of Three Lunatic Asylum Schools, in connexion on 31st December, 1862.

8865 Richmond, m. Dublin. | 9032 Sligo, . Sligo.
8866 Ditto, f. Ditto.

V.—LIST of ONE HUNDRED and TWENTY-NINE CONVENT and MONASTIC SCHOOLS in connexion on the 31st December, 1862, with the Total Number of Distinct Pupils on the Rolls, the Average Number on the Rolls, and the Average Daily Attendance, as returned by the Managers, for the Year ending 31st December, 1862.

Convent Schools receive aid under the conditions applicable to Non-Vested Schools, and they are subject to the same Rules and Regulations.

The members of the community may discharge the office of teachers either by themselves or with the aid of such other persons as they may see fit to employ; the salaries of such assistants to be defrayed by the community.

The Commissioners will grant aid to *one School only*, in connexion with the same Convent.

In Schools of this description, salary is regulated by the average daily attendance, and is paid in accordance with the following scale:—

Average attendance.		Salary.	Average attendance.		Salary.
30 to 50,	.	£10	301 to 325,	.	£64 5
51 to 75,	.	15	326 to 350,	.	68 10
76 to 100,	.	20	351 to 375,	.	72 15
101 to 125,	.	25	376 to 400,	.	77 0
126 to 150,	.	30	401 to 425,	.	81 5
151 to 175,	.	35	426 to 450,	.	85 10
176 to 200,	.	40	451 to 475,	.	89 15
201 to 225,	.	45	476 to 500,	.	94 0
226 to 250,	.	50	501 to 525,	.	98 5
251 to 275,	.	55	526 to 550,	.	102 10
276 to 300,	.	60	551 to 575,	.	106 15
			576 to 600,	.	111 0

Increase
at £20
per cent.

Increase
at £17
per cent.

601 upwards, Increase at £15 per cent.

As the amount of salary will in all cases depend upon the average daily attendance of pupils, as shown by the quarterly returns, Managers are to be prepared for augmentation or diminution accordingly.

VI.—LIST of One Hundred and Thirty-four Agricultural School Farms in connexion with the Board.

Extracts from Commissioners' Rules, as to nature of aid granted to Agricultural Schools.—"1. Teachers of First Class Agricultural Schools under the exclusive control of the Board, receive such amount of Salary as the Commissioners deem sufficient, according to the circumstances of each case.

"2. Masters of First Class Agricultural Schools under Local Patrons, who are competent to conduct both the Literary and Agricultural Departments, receive £10 per annum, in addition to the salary of the class in which they may be placed; but if their income from the Board, with this addition, should fall short of £30 per annum, the difference will be granted to them, so that, in all cases, such Teachers shall have secured to them for their combined services a salary of £30 a-year at least.

"3. Masters of Ordinary Agricultural Schools to receive £5 per annum, in addition to the salary of their class, provided they are competent to conduct both the Literary and Agricultural Departments, and that the Commissioners shall have previously approved of Agriculture being taught in the School.

"4. In Workhouse Schools to which farms are attached, the Commissioners award to the Agricultural teacher a gratuity not exceeding £15 in one year, and make a free grant of books on agriculture. These gratuities and grants are awarded on the recommendation of the Agricultural Inspectors."

Nineteen School Farms under exclusive management of the Commissioners.

REPORT,	iii
APPENDIX,	1

THE REPORT

OF THE

PRESIDENT OF QUEEN'S COLLEGE, BELFAST,

FOR

THE YEAR ENDING MARCH 1, 1863.

TO THE QUEEN'S MOST EXCELLENT MAJESTY.

MAY IT PLEASE YOUR MAJESTY,

The Report which I have now the honour of presenting to your Majesty affords satisfactory proof of the continued steady progress and success of this College. So far back as the Session 1852-53, the Queen's Colleges in Ireland laboured under the great disadvantages resulting from the previous years of famine. Since that period, the annual increase of the Students in attendance shows the advancement of these Colleges in public estimation, notwithstanding all the difficulties they have had to encounter. Regarding this College, the following table affords abundant proof that the education it furnishes is adapted to the circumstances of the age in which we live.

RETURN of the Total Number of Students attending Queen's College, Belfast,
since the year 1852.

Session.	Matriculated.	Non-Matriculated.	Total.	Session.	Matriculated.	Non-Matriculated.	Total.
1852-53,	101	53	154	1858-59,	160	63	223
1853-54,	114	54	168	1859-60,	199	58	257
1854-55,	118	65	183	1860-61,	239	73	312
1855-56,	119	74	193	1861-62,	299	77	376
1856-57,	136	58	194	1862-63,	335	53	388
1857-58,	153	54	207				

NUMBER of new Students, or Freshmen, Matriculated and Non-Matriculated, attending Queen's College, Belfast, for the first time, in the Session 1862-63.

Matriculated,	.	.	115
Non-Matriculated,	.	.	22
Total,	.	.	137

The total number of Students at Belfast College in 1852-53 was 154; now, there are in attendance 388. Of these, 335 are Matriculated; and it will also be seen from the return in the table that, during this Session, 137 young men entered the College for the first time, of whom 115 are Matriculated. Since the Session 1857-58, there has been an increase in the whole numbers in attendance of 181. Besides the 137 Freshmen, four other Students entered the College; but, having ceased to attend, their names have been erased from the rolls.

I have much satisfaction in stating that the new Anatomical

Rooms were given over to me by the Board of Works at the beginning of this year, and that they have been occupied since that time with great benefit and comfort to the Students. I have no doubt that, under the able management and instruction of the Professor of Anatomy and Physiology, they will continue, from year to year, to be highly advantageous to the Medical School of this College.

By the erection of part of the Anatomical Buildings in the College grounds the Students have been relieved from the inconvenience of walking to and fro, for the distance of a mile, between the Practical Rooms and the College, as formerly.

It is earnestly to be hoped that the remaining part of these buildings will soon be undertaken, so that the Anatomical and Physiological collection in the College Museum may be made available for teaching in the new buildings, and that the injury resulting from carrying preparations for lecture from place to place may be obviated.

RETURN of the Number of Medical Students in attendance in each Session.

Session.	Matri- culated.	Non-Ma- triculated.	Total.	Session.	Matri- culated.	Non-Ma- triculated.	Total.
1849-50,	28	27	55	1856-57,	36	25	61
1850-51,	20	35	55	1857-58,	35	32	67
1851-52,	25	39	64	1858-59,	45	34	79
1852-53,	29	33	62	1859-60,	56	39	95
1853-54,	29	37	66	1860-61,	70	46	116
1854-55,	39	36	75	1861-62,	81	48	129
1855-56,	33	48	81	1862-63,	89	33	122

The subjoined denominational table presents nearly the same features of religious diversity as have annually existed, in proportion to the numbers in attendance, at Belfast College.

Total,	257	312	375	388

The following return gives the number of Scholarships awarded in the present Session; and in making it, I cannot help remarking once again on the particular organization that exists in the Queen's Colleges regarding this class of exhibitions. In the Queen's Colleges, these honors have hitherto been competed for anew, every year, by those Students qualified to become candidates. It is very

different with the greater number of other universities, where the Scholarships are held for three, four, and in some of them for five years. The misapprehension which has existed respecting the number of Scholarships attached to the Queen's Colleges ought at once to be removed by a candid consideration of this fact. Forgetfulness of this arrangement has led many to regard the Scholarships as nearly treble what they really are, and thus by so much to exaggerate the real number of those placed at the disposal of the College.

SCHOLARSHIPS awarded in the several Faculties, 1862-63.

7 Senior Scholarships in Arts.	2 Agricultural Scholarships.
2 Do. Medicine.	6 Medical.
29 Junior Scholarships in Arts.	4 Law.
2 Engineering Scholarships.	

LAPSED.

1 Scholarship in Arts.	2 Scholarships, 2nd year, Agriculture.
------------------------	--

In referring to Scholarships, I must, on my own part and on that of the authorities of this College, express the deep sense of gratitude felt by us, and all the friends of enlightened education in Ireland, to Sir Robert Peel, for his noble and successful appeal to the country, which has placed at his disposal funds fully equal to £10,000 for supplementing the exhibitions founded by the sum already placed on the Consolidated Fund, for the purpose of endowing them. With a resolute determination to accomplish this great object, he encountered formidable difficulties; but his appeal to many of the leading statesmen of the country, as well as to others, was followed by a most encouraging response. It will be remembered that, at the conferring of the University Degrees in St. Patrick's Hall, in October, 1861, Sir Robert Peel, in order to evince his conviction of the immense advantage which would accrue to the youth of this country by affording exhibitions for competition, established, from his own resources, three Scholarships of £40 a-year each—one for each of the Colleges—for the space of ten years, being equivalent to a sum of £1,200. Mr. Alexander Thom, of Dublin, added to this munificent grant the generous contribution of £600. The funds accruing from these sums were in the first year competed for by the Students of the three Colleges. And of £180 thus competed for, prizes of the value of £140 were carried by Students of this College. A result still more gratifying for this College took place in the competition for the Peel Scholarships, in October, 1862. The successful candidates were—

	£
In Medicine, Alex. Porter, . . .	40
In Arts, William Park, . . .	60
„ James Brown Armour, . . .	45
„ Matthew Leitch, one of 45 and one of £30.	
„ James Shaw, . . .	45
„ William M'Laren Smith, . . .	30

In all £295 awarded to Students of this College from this fund.

Sir Robert Peel, at the meeting for conferring Degrees in 1862, gave the following detailed statement of his plan:—

“Having partly told you the names of those gentlemen who supported the plan, I will now tell you how the fund will be applied.

“The sum subscribed is £8,749. When I started the subscription I was determined to get £10,000. I commenced with a paltry £40; but, in three months, that paltry £40 grew to the prodigious dimensions of £10,000. The subscription was £8,749. In addition there was £125 a-year; and, besides, there is also a most magnificent donation from another person, which I understand, is likely to be given to one of the colleges. The name of the person I am not at liberty to announce on this occasion. Out of that sum, which is more than £10,000, if you add what is anticipated to come, we propose to give £575 a year for ten years to the students of the University; there will be a balance left of £3,000, which, with the accumulated interest of capital, will be left as a reserve fund, to be applied as may be hereafter determined. I limit the subscription to ten years, because I hope at the end of that period there may be other means of promoting the interest of the University. We propose to establish with the money three exhibitions of £60 each in the Faculty of Arts; three exhibitions of £45 each for the best answers; two exhibitions of £40 and £30 in the Faculty of Medicine; two exhibitions of £40 and £30 in Engineering; all these are to be held with scholarships, to which the students become entitled in each college. In addition, we propose to give £60 a year to the young men entering college for the first time, who may have passed the best preliminary examination. This is how we propose to distribute the magnificent fund which Irishmen alone, thus interested particularly to establish it, have so generously contributed.”

At the end of last Session the President and Council disposed of the Sullivan Scholarships for that year, amounting, as they do, to £60 annually. We kept steadily in view the enlightened desires of this generous benefactor; he having, through the Peel Fund, assigned that amount yearly for the period of his life to this College for the encouragement of science and literature. The allocation of £60 for the present Session shall soon be made by the Council.

The Queen's University in Ireland continues to hold its distinguished place amongst the educational institutions of the country. This is made apparent by the returns of the number of Students who annually graduate in the Departments of Arts, Law, and Medicine. In October, 1860, 87 degrees and certificates were conferred in St. Patrick's Hall, by the Vice-Chancellor; in October, 1861, 128 degrees were conferred, exclusive of 23 middle-class certificates given, on examination, to candidates who had not attended the Colleges. In last October, 168 of the higher degrees were conferred, together with 15 senior and junior certificates in arts, for candidates who are not members of the University;—in all 183.

Since the introduction of competitive examinations for offices in the Civil Service, the reports of this College have furnished a very distinguished array of successful Students. They have had to contend with numerous competitors from the oldest and most renowned universities in the empire. The remarkable success of a large number of our Alumni proves the admirable nature of the education imparted here, its adaptation to the wants of the community, the unflagging zeal and great ability of the Professors, and the energy and industry of the Students. Since the year 1857 sixteen Students of Queen's College, Belfast, have obtained appointments to the Civil Service of India. Of these Students,

one stood first of all competitors; one, the second; two, fourth; one, sixth; one, tenth; one, seventeenth, &c.;—as will appear from the following list :—

“In the year 1857, Beveridge, Henry, stood 1st on the entire list; Barkley, D. G., 4th; Smyth, John Watt, 10th. In the year 1859, Mulligan, John Watson, stood 2nd on the entire list; Wilson, John, 17th. In the year 1860, M'Minn, Charles Wm., stood 4th on the entire list; Porter, John Sinclair, 15th; Smyth, Thos. Watt, 35th; Spedding, Robert Deey, 40th; Parke, David Rowan, 72nd. In 1861, Patterson, Alexander B., stood 38th on the entire list; M'Watters, George, 52nd. In 1862, Barbour, D. M., besides three other gentlemen who gained high places, was placed 6th, being declared by the Examiners, the first of all the candidates in the great department of Mathematics, the first also in the Natural Sciences, and the third in Mental Science; Birkmyre, James, 34th place; Crawford, J. T., 40th place; and Hanson, T. G., 45th place.”

During the past year Mr. Andrew M. Porter, a Law Student of this College, has had the high distinction conferred upon him of being appointed Barrington Lecturer, an honour which so young a barrister has rarely attained, owing to the extensive and trying competition which that appointment involves. I can only class with this the success of Mr. James Wilson, in carrying, at the Inns-of-Court, London, against all competitors, the great law prize of first Studentship, to be held for three years. It has been obtained twice by Students of this College.

The annual competition for the special prizes in March, 1863, was well sustained and highly satisfactory. The successful men were—

William George Aston, B.A.,	.	.	.	.	£30
David Buick, B.A.,	.	.	.	.	20
Hamilton Lowry Allen, B.A.,	.	.	.	.	15

Having been requested by the Civil Service Commissioners to state the facilities offered to persons studying in this College for the examination for the Civil Service of India, I requested the Registrar to send the following statement :—

“I am directed to inform you, in reply to your letter to Mr. Stoney of the 13th ult., that the President and Council of this College sanctioned, some years back, the establishment of Special Courses for Students intending to become candidates for appointments in the Civil Service of India, the Public Service at home, and for commissions in the Royal Artillery and Engineers.

“Of these proposed courses a detailed account will be found in the accompanying paper, No. 1, pp. 1 to 4.

“Shortly after these courses were sanctioned, the Queen's University in Ireland, where the Students of this College proceed to graduate, recommended the delivery of honor or higher courses of lectures by the Professors in the several subjects which are taught in the undergraduate course; and these honor courses, in conjunction with the ordinary lectures and practical courses of instruction in the College, have been found to embrace all that is required by candidates for the Civil Engineering and Military Services. A summary of the subjects taught in the College, accompanied by other details, will be found in the pamphlet marked No. 2, pp. 52 to 59.

“Of these courses only two can be said to have been specially founded with a view to the competitive examinations, namely, Sanskrit and Hindustani, lectures in which have been regularly delivered for the last four years. See p. 52 of pamphlet marked No. 2.

“The Commissioners will find that, with this addition, our curriculum is so complete in its character, and comprehensive in its details, as to embrace fully all the requirements of the public examinations.

"The success of the candidates from this College has been a source of great gratification to the President and Professors, the more especially as it has been attained as the result of a system of general education, without the least attempt, in any single case, to cram the candidates before going up for examination.

"All the details of these special and honor courses are published annually in the College Calendar."

I cannot overlook the case of Mr. Watters, of this College, now on his way to China as an interpreter. Earl Russell placed a nomination from the three Colleges for six vacancies then existing in the hands of Lord Clarendon, the Chancellor of the Queen's University, who was pleased to ask the Presidents to return the name of one Student from each College. I selected Mr. Watters, who entered the lists with numerous candidates from the various universities, and he nobly won from all the first place. His destination will throw him into the society of Mr. Hart, a former Student of this College, whose wonderful success in the diplomatic service affords strong testimony to the discrimination of Lord Clarendon, who appointed him.

I may state generally that hundreds of Students of this College, having passed into their respective professions at home and abroad, are now enjoying an independence, and conferring, by their zeal and ability, manifold advantages on the communities amidst which their lot has been cast.

In reference to the existence of the Deans of Residences, I have only to regret that the law defining the powers and duties of those functionaries remains still in an unsatisfactory condition, and to express a hope that your Majesty's Government will speedily take the whole question into serious consideration.

From my educational opportunities I have almost arrived at the conclusion that, owing to a variety of difficulties, the Executive will not be able for some time to carry out any large or general scheme of intermediate education. Our Governors still admit the necessity for the establishment of preparatory academies, linking together the primary schools and the universities. It is, however, to be hoped that the recommendations contained in the Report of the Endowed Schools Commission may not be abandoned, notwithstanding the countervailing circumstances which have hitherto prevented them from being carried into effect. Granting the existence of difficulties standing in the way of legislation, I am reluctant to relinquish the strong hope I once entertained, that an experimental grant might be made by Parliament to supplement the voluntary efforts of benevolent individuals for the establishment of schools and academies in populous districts, now destitute of such institutions. Such a step would be regarded by the whole community with the utmost satisfaction and gratitude. A grant in aid is all that is required.

After repeated applications on the subject, the Lords of Her Majesty's Treasury have lately been pleased to augment the salaries of most of the Professors, in order to afford them some adequate remuneration for their valuable services. The Presidents of the three Colleges have long been anxious for the accomplishment of this measure of justice and expediency.

Great diversity of opinion exists regarding the sources whence the funds for this augmentation might have been advantageously drawn. When £600 per annum is deducted for this purpose from the £1,600 a-year for some years past granted by Parliament for the support of the Libraries, Museums, and general maintenance of the College, together with about £500 required for that maintenance, there will remain only a sum of about £500 a-year for the supply of books, objects, and apparatus, for the various departments. As the arrangements now entered into for increasing the professorial salaries must remain undisturbed, it is evident that the Presidents will feel called upon not to allow much time to elapse without drawing the attention of Government to the inadequacy of £500 a-year for these most important purposes.

In the year 1857, when returning thanks to the Government for extending to the College this grant of £1,600 a-year, in order to meet the above-named requirements, and to abolish an oppressive fee charged yearly on Matriculated Students, I used the following language :—"On my own behalf, and on that of the College, I have to offer cordial thanks to the Government of the country for extending to us the means of supporting and maintaining the Libraries, Museums, the Philosophical and Medical Laboratories of this College. Without this, we should have been left destitute of every requisite instrumentality to cope with other universities, or to meet the public demand on us to make proof of our efficiency. With this, the Professors have their supplies, the Students their means of improvement, and the public its great reward, whilst, for generations to come, the collections of special books and objects now judiciously selected will exist in the heart of this great province as permanent and valuable repositories of art, science, and literature."

At the period when this grant was made, this Report shows the number of Students to have been 193, whilst now they amount to 388. It must, therefore, be apparent, if this College is to keep pace with the advancement of science, and the progressive yearly increase of its Students, that a much larger sum than is now left at our disposal must at no distant day be granted, in order to meet the rapidly increasing demand for an adequate supply to the Libraries and Museums, and to carry out efficiently, for the benefit of the country at large and the public service, the paramount objects for which the Queen's Colleges were founded.

All of which is testified on behalf of this College by your Majesty's most dutiful servant,

P. SHULDHAM HENRY, D.D.,

President.

QUEEN'S COLLEGE, BELFAST,
30th April, 1863.

APPENDIX.

APPENDIX, No. 1.

*Appendix,
No. 1.*

QUEEN'S COLLEGE, BELFAST, and QUEEN'S UNIVERSITY.

THE QUEEN'S COLLEGE, BELFAST, is a Corporation under the name and style of "THE PRESIDENT, VICE-PRESIDENT, AND PROFESSORS OF QUEEN'S COLLEGE, BELFAST." It was founded under the provisions of the Act 8 & 9 Victoria, cap. 66, intituled "An Act to enable Her Majesty to endow new Colleges for the Advancement of Learning in Ireland." Under the powers given by this Act, it was determined to found three Colleges. Belfast, Cork, and Galway, were selected as the sites of these Colleges, and on the 30th day of December, 1845, letters patent were issued, incorporating them. The Presidents and Vice-Presidents of the three Colleges were formed into a Board, called "The Board of Queen's Colleges," for the purpose of drawing up the Statutes and arranging the system of education to be pursued in them.

Queen's
College,
Belfast, and
Queen's
University.

On the 4th of August, 1849, the Professors were appointed, and the Colleges opened for the reception of students on the 30th October, in the same year.

Letters Patent, constituting the Statutes, were issued on the 11th of December, 1849.

THE COUNCIL OF THE COLLEGE.

The President.

The Vice-President.

The Dean of the Literary Division of the Faculty of Arts.

The Dean of the Science Division of the Faculty of Arts.

The Dean of the Faculty of Medicine.

The Dean of the Faculty of Law.

PROFESSORS.

Literary Division of the Faculty of Arts.

The Greek Language, . . .	Charles MacDonall, LL.D., M.R.A.S.
The Latin Language, . . .	Rev. Charles Parsons Reichel, D.D.
History and English Literature, . . .	George Lillie Craik, LL.D.
Modern Languages, . . .	Mathias Joseph Frings, Ph.D.
The Celtic Languages, . . .	[Vacant.]

Science Division of the Faculty of Arts.

Mathematics, . . .	[Vacant] <i>ad interim</i> , occupied by H. J. Sharpe, Esq.
Natural Philosophy, . . .	John Stevelly, LL.D.
Chemistry, . . .	Thomas Andrews, M.D., F.R.S., M.R.I.A.
Natural History, . . .	Wyville Thomson, LL.D., F.R.S.E., F.G.S., M.R.I.A.
Mineralogy and Geology, . . .	
Logic and Metaphysics, . . .	Rev. James M'Cosh, LL.D.
Civil Engineering, . . .	James Thomson, C.E., A.M.
Agriculture, . . .	John F. Hodges, M.D., F.C.S.

Faculty of Medicine.

Anatomy and Physiology, . . .	Peter Redfern, M.D. Lond. F.R.C.S.
Practice of Medicine, . . .	John Creery Ferguson, A.M., M.B.
Practice of Surgery, . . .	Alexander Gordon, M.D.
Materia Medica, . . .	James Seaton Reid, M.D.
Midwifery, . . .	William Burden, M.D.

Faculty of Law.

English Law, . . .	Echlin Molyneux, A.M.
Jurisprudence and Political Economy, . . .	T. E. Cliffe Leslie, LL.B.

OFFICE BEARERS.

Curator of Museum, . . .	The Professor of Mineralogy and Geology.
Registrar, . . .	Rev. Richard Oulton, A.B.
Librarian, . . .	Rev. George Hill.
Bursar, . . .	Alexander Dickey, Esq.

Appendix,
No. 1.Queen's
College,
Belfast, and
Queen's
University.

DEANS OF RESIDENCES.

United Church of England and Ireland, . . .	Rev. Henry Murphy, A.M.
General Assembly of the Pres- byterian Church in Ireland, . .	Rev. Henry Cooke, D.D., LL.D.
Irish Association of Non-Sub- scribing Presbyterians, . . .	Rev. John Porter.
Wesleyan Methodists, . . .	Rev. Daniel Macafee.

The students of the College are either Matriculated or Non-matriculated. All the courses for Matriculated students in Arts, including the Departments of Civil Engineering and Agriculture, and also in the Faculties of Medicine and of Law, will be found in the Calendar, which is published annually.

Non-matriculated students, on paying the regulated class fees, and signing an engagement to observe order and discipline in the College, are permitted, without undergoing a preliminary examination, to attend any separate course or courses of lectures; but are not permitted to become candidates for Scholarships or Prizes, or to enjoy other privileges of the Matriculated students.

Students in any of the Faculties can be admitted *ad eundem* from the other Queen's Colleges, or from any University capable of granting degrees.

COLLEGIATE SCHOLARSHIPS.

In the FACULTY OF ARTS—30 Junior Scholarships, of £24 each, are awarded to Undergraduates—15 for Proficiency in Literature, and 15 for Proficiency in Science; also, 7 Senior Scholarships, of £40 each, to Graduates; also, 2 Scholarships, of £20 each, to Engineering, and 4 of £15 each, to Agricultural Students.

In the FACULTY OF MEDICINE—6 Junior Scholarships, of £20 each, and 2 Senior Scholarships, of £40 each, are awarded.

In the FACULTY OF LAW—3 Junior Scholarships, of £20 each, and 1 Senior Scholarship, of £40, are awarded.

SCHOLARSHIPS AWARDED IN THE SEVERAL FACULTIES, 1861-62.

- 7 Senior Scholarships awarded.
- 30 Junior Scholarships in Arts awarded.
- 2 Engineering Scholarships.
- 2 Agricultural Scholarships.
- 5 Medical Scholarships.
- 4 Law Scholarships.

- Lapsed—2 Senior Scholarships in Arts.
- „ 2 Agricultural Scholarships of Second Year.
- „ 1 Medical Scholarship of Third Year.

1862-63.

- 9 Senior Scholarships awarded.
- 29 Junior Scholarships in Arts awarded.
- 2 Engineering Scholarships.
- 2 Agricultural Scholarships.
- 6 Medical Scholarships.
- 3 Law Scholarships.

- Lapsed—1 Scholarship in Arts.
- „ 2 Agricultural Scholarships of Second Year.

By an order of Her Majesty in Council, of 21st May, 1855, applying to the Civil Service, it is ordained that “every person nominated to a junior situation should obtain a certificate of qualification before entering on his duties.” The ordinary classes in Queen's College embrace the branches required in this Examination for the Civil Service.

Special Courses have been arranged for students intending to become candidates for commissions in the Royal Artillery and Engineers, and for appointments to the Civil Service of India, both of which are now thrown open to public competition.

QUEEN'S UNIVERSITY IN IRELAND.

The charter founding the Queen's University in Ireland received the Royal sanction in the year 1850, and it provides that its Senate should have the power of conferring upon the students of the Queen's Colleges of Belfast, Cork, and Galway, such degrees and distinctions, in the Faculties of Arts, Law, and Physic, as are granted and conferred in other Colleges and Universities of Great Britain and Ireland. It further ordains that any of the students of the three Queen's Colleges, who shall have obtained such degrees in any of the several Faculties of Arts, Medicine, and Law, as shall be conferred by the Chancellor and Senate of the Queen's University, shall be fully possessed of all such rights, privileges, and immunities, as belong to similar degrees granted by other Universities or Colleges, and shall be entitled to whatever rank and precedence is derived from similar degrees granted by other Universities.

By the charter of the Queen's University, candidates for Degrees in Medicine are required to have attended at *least one-third of the Courses of Medical Lectures* in some one of the Queen's Colleges. For the remainder of the Courses of Medical Lectures, authenticated certificates will be received from the Professors or Lecturers in Universities, Colleges, or Schools, recognised by the Senate of the Queen's University in Ireland.

The Chancellor and Senate also have the power of admitting, by special grace, Graduates of other Universities to similar and equal degrees.

In order to obtain a degree or diploma in the Queen's University it is necessary to enter the College as a Matriculated Student, to pass the entrance or Matriculation Examination, and to pursue a fixed course of study.

The Matriculated Students may be classified as follow:—

I.	Those intending to proceed to the	Degrees of A.B. and A.M.
II.	" "	Degree of M.D.
III.	" "	Diploma of Elementary Law.
IV.	" "	Degrees of LL.B. and LL.D.
V.	" "	Diploma of Civil Engineering.
VI.	" "	Diploma of Agriculture.

THE SENATE.

Chancellor.—The Right Honorable George William Frederick, Earl of Clarendon, K.G., G.C.B., &c.

Vice-Chancellor.—The Right Hon. Maziere Brady, Lord Chancellor of Ireland, M.R.I.A., &c.

His Grace Richard, Archbishop of Dublin, D.D., M.R.I.A., &c.

The Right Honorable William, Earl of Rosse, K.ST.P., M.R.I.A., &c.

The Right Honorable Thomas Spring, Baron Monteagle of Brandon, M.A., F.R.S., Member of Senate of University of London, Comptroller of the Exchequer.

The Right Honorable Francis Blackburne, Lord Justice in Appeal, LL.D., V.C.T.C.D., M.R.I.A.

The Right Honorable David R. Pigot, Lord Chief Baron of the Exchequer, M.R.I.A., &c.

The Rev. P. Shuldham Henry, D.D., President Queen's College, Belfast.

Sir Robert Kane, F.R.S., M.R.I.A., &c., President Queen's College, Cork.

Edward Berwick, Esq., President Queen's College, Galway.

Sir Richard Griffith, Bart., LL.D., M.R.I.A., Commissioner of Public Works.

Dominic J. Corrigan, M.D., M.R.I.A., Physician in Ordinary to the Queen in Ireland.

Major-General Sir Thomas Askew Larcom, R.E., K.C.B., LL.D., F.R.S., M.R.I.A., &c.

James Gibson, A.M., M.R.I.A., Barrister-at-Law.

Robert Andrews, Q.C., LL.D.

The Right Honorable James Henry Monahan, Lord Chief Justice of the Common Pleas.

Robert Adams, A.M., M.D.

The Right Honorable Sir Robert Peel, Bart., M.P.

Secretary.—G. Johnstone Stoney, M.A.—Office, Dublin Castle.

The Senate holds its sitting in Dublin Castle, where the examinations of the students of the three Colleges, for Graduation and University Exhibitions, are annually conducted by Examiners appointed by the Senate from year to year.

General Examination of Students in Law, and also of Students in the Faculty of Arts, in Jurisprudence and Political Economy, at the close of the Lectures on these subjects.

Appendix,
No. 6.

Lectures
delivered
by Profes-
sors.

APPENDIX, No. 6.

RETURN of the NUMBER of LECTURES delivered by each Professor in the Queen's College, Belfast, in each YEAR.

	1849-50.	'50-51.	'51-52.	'52-53.	'53-54.	'54-55.	'55-56.	'56-57.	'57-58.	'58-59.	'59-60.	'60-61.	'61-62.	REMARKS.
Professor of—														
Greek,	135	232	244	246	236	240	234	235	236	350	500*	460*	440*	In addition, examining some hundreds of exercises each session.
Latin,	162	197	215	221	189	196	232	230	230	275	398	234	234	Do.
History and English Literature,	35	55	98	91	104	100	105	105	99	110	123	92	154	Besides 658 exercises.
Modern Languages,	208	330	324	307	306	305	319	340	369	307	340	372	372	
Celtic,	6	6	6	6	6	6	6	6	6	6	6	6	—	Open to the Public without charge.
Mathematics,	135	256	333	248	246	330	346	322	330	400	400	370	370	Besides two hours each week on which the Senior Scholar meets the Junior Division.
Natural Philosophy,	122	257	233	209	256	280	255	307	300	300	242	242	213	
Chemistry,	134	136	137	129	132	130	138	142	142	140	132	132	132	In addition, superintending the working pupils, of whom from eight to twelve are admitted each year by examination to the laboratory without charge.
Practical Chemistry,	36	36	36	36	36	36	36	36	34	36	36	36	36	
Natural History,	120	120	133	137	139	138	142	140	143	140	140	140	140	Including lectures in Physical Geography, delivered free to all students
Mineralogy and Geology, <i>Public</i> .	86	54	54	59	54	55	49	59	52	52	52	52	52	In addition, daily attendance as Curator in the Museum.

Logic and Metaphysics,	-	-	78	142	176	175	164	177	179	167	140	158	194	In addition, criticising above 400 Essays in each session.
Civil Engineering,	134	138	140	136	140	136	147	118	100	194	196	220	198	Including practical work under the direction of the Professor.
Agriculture,	172	206	205	212	209	213	218	186	190	166	166	156	156	Including lectures on Medical Jurisprudence and Diseases of Farm Animals, for neither of which there is any salary; in addition, practical excursions with students.
Anatomy & Physiology,	115	116	115	115	114	115	117	113	115	115	115	112	108	In addition, superintending the class of Practical Anatomy and Demonstrations and Dissections.
Practice of Medicine,	93	93	92	92	93	94	94	85	75	95	95	95	95	Besides about twenty-five lectures each session on Operative Surgery.
Practice of Surgery,	93	94	93	91	91	92	94	94	94	94	94	94	94	Besides practical instruction to students which may be required at any hour throughout the year.
Materia Medica,	92	91	91	93	90	90	92	80	84	84	84	84	84	No third year Class in 1859-60, or fourth year Class in 1860-61.
Midwifery,	92	92	92	91	90	93	93	93	93	95	90	80	80	
English Law,	24	48	72	96	96	96	96	96	96	96	72	72	96	
Jurisprudence and Political Economy,	24	48	96	120	120	120	120	120	120	96	120	120	120	

The above Return gives the number of Meetings of one hour each, in each Class. The system of instruction includes, not merely formal Lectures, but also examination in the business of the course; in some classes these examinations are held daily; in others on fixed days of the week, according to the nature of the subject. The Professors also conduct the General Scholarship Examinations; and some of them, in addition, the Matriculation and Supplemental Examinations.

* Including about 110 on Sanskrit and Hindustani.

of Subjects
and
Courses.

APPENDIX, No. 7.

AN ENLARGED DIGEST of SUBJECTS and COURSES pursued in Queen's College, Belfast.

GREEK—Professor, *Charles MacDouall*, LL.D., M.R.A.S.

In the Greek Class, as in all those which are attended during more than one session, the business, as well as the hours assigned to the Students of the different years, is necessarily different; but it is always distributed into three simultaneous processes, viz., public examinations, lectures more or less formal, and exercises written at home and commented on in the class.

In the first session, the complex and self-contained structure of the Greek language is subjected to a close analysis; carried out, on the one hand, by tracing words to their crude forms, by classifying terminations, both the primary and the flexional, and by discriminating among analogically correct forms those actually used in different ages and dialects; on the other hand, by exhibiting the methods by which words are combined in simple clauses, clauses are knit into sentences, and sentences compose periods less or more complicated. Some prose-work furnishes the materials for this analysis; while the Students read and translate it, or else re-translate off-hand passages read out in English before them by the Professor. Besides syntactical phenomena, the laws and characteristics of both epic and dramatic versification are expounded and exemplified, while a portion of the *Iliad* and some tragedy are used as text-books.

In the second session, while consecutive passages of Herodotus along with some Attic oration or philosophical treatise, and a book of the *Odyssey* along with some Attic tragedy or comedy, form the basis of prelections, the previous discipline is continued and extended; the distinctions of dialect and style are more fully elucidated; the origin, growth, and fortunes of the epos, the drama, history, and other departments of literature, are more distinctly unfolded; discussions on points of mythology, geography, chronology, archæology, æsthetics, &c., are more freely introduced and more amply treated. The Students are required to turn Herodotean Greek, at sight, into Attic, altering both the forms of words and the structure of sentences; to re-translate passages into Greek prose and verse; and also to give in original essays in both forms of composition.

Considering the variety of subjects which enter simultaneously into the first and second Sessions of the Collegiate Course, the Students generally appear to give a fair share of their attention to the Greek Language and Literature. Several times in the week a considerable number voluntarily attend extra Lectures, at which no note is taken of their presence or of their absence.

In a distinct or higher class, advanced Students, generally in the third or fourth year of their Course, are exercised in the study of more difficult works than those previously read, in the higher problems of criticism and philology, and especially in composing both prose and verse.

The following text-books have been used in the successive Sessions of College from 1849–50 to 1861–62:—*Iliad*, Books III., VI., X., XI., XII., XIII., XIV., XV., XVI., XVII., XVIII., XXI., XXII., XXIV.; *Odyssey*, Books I., XI., XII.; Hesiodus, *Theogonia*; Pindarus, *Olympia*, *Pythia*, *Nemea*; Aeschylus, *Prometheus Vinculus*, *Septem c. Thebas*, *Agamemnon*, *Choëphoroi*, *Eumenides*; Sophocles, the seven Tragedies; Euripides, *Alcestis*, *Hippolytus*, *Hecabe*, *Phœnissæ*, *Orestes*, *Bacchæ*, *Ion*, *Iphigeneia in Aulide*, *Iphigeneia in Tauris*; Aristophanes, *Nubes*, *Aves*, *Ranae*; Herodotus, Books I., II., IV.; Thucydides, Books I., II.; Xenophon, Portions of *Anabasis* and *Cyropaedia*; Platon, *Apologia Socratis*, *Gorgias*, *Phædon*, *Phædrus*, *Philebus*, *Timæus*; Aristoteles, *Poetica* and Portions of *Rhetorica*; Demosthenes, *c. Meidiam* and *de Corona*; Aeschines, *in Ctesiphontem*.

SANSKRIT AND HINDUSTANI.

The Classes for these Languages (conducted by the Professor of Greek) are at present attended chiefly by Students who either have already obtained or are preparing to compete for Appointments in the Indian Service; but the Sanskrit

Class begins to attract others also, as the importance of some practical acquaintance with Sanskrit, especially in relation to Classical Studies and to Comparative Philology, is now generally recognised

Either Class may be attended separately; or a two years' Course may be taken, in which Sanskrit alone is studied during the first year, while Sanskrit and Hindustani (including the elements of Persic) occupy the second.

Appendix,
No. 7.

Digest of
Subjects
and
Courses.

LATIN—*Professor, Charles Parsons Reichel, D.D.*

The Course read in the Latin Classes during the Session of 1860–61, was—
Senior Class.—Tacitus, Germania, and Agricola, and Annals, Book I.; Cicero, de Natura Deorum; Terence, Juvenal, Horace.

Junior Class.—Livy, Book XXVI.; Terence, Cicero's Epistles, Plautus.

The Junior Class is that composed of Students of the *First Year*; the Senior, that composed of Students of the *Second Year*.

The Professor, therefore, has each set of Students only two years, at most, under his care; no attendance on Lectures in Latin or Greek being required of Students in their Third Year.

The Professor requires the Class to prepare for each Lecture a certain portion of the authors in course of being read. The Professor sometimes translates to the Class, sometimes requires them to translate aloud, making such corrections and observations as may be necessary fully to explain the passage, and to throw light on the idiom of the author, and the structure and analogy of the language.

Besides this, full statements of the historical and legal points involved in the authors read, are furnished by him.

Voluntary Classes were held four times a-week, in which Composition is specially attended to. The attendance at these Classes has been exceedingly good.

An advanced Latin Class has been formed during the last four Sessions, attended by Students of the third or fourth year, who may wish to carry on the study of the Latin language beyond the point at which the prescribed course leaves them. This Class cannot be numerously attended, as the time of Students of the Third Year is so much taken up with their prescribed Courses in other branches, that those who attend it have to do so under the greatest difficulty; and probably nothing but the impossibility of successfully competing with Students from other Universities, without a greater knowledge of Latin than the regular College Course will enable them to acquire, has induced any Students to attend it.

HISTORY AND ENGLISH LITERATURE—*Professor, George Lillie Craik, LL.D.*

The Professor of History and of English Literature has now three Classes: one entitled the Class of the English Language, which is taught for one Term, and is attended, according to the Curriculum for Degrees in Arts, by Students of the First Year; the others entitled the Classes of English Literature and of History, taught for two Terms, and attended by Students of the Third Year.

It is important to observe, that by this arrangement there is added, to the two distinct subjects which are combined in the designation of the chair, a third subject perfectly distinct from either; each of the three, at the same time, like every other great department of human knowledge and speculation, having several subdivisions.

I. The Class of the English Language is taught by means of—

1. A Course of Lectures on the origin, history, and constitution of the language, and on the principles of Universal Grammar.
2. Examinations on a printed text-book, prepared by the Professor, entitled, "Outlines of the History of the English Language."
3. Exercises in Composition, both in prose and verse; and
4. A Course of Critical Readings, directed more especially to the philology of the language, both in its principles and in its details.

The business of the Class, thus conducted, may be stated to comprehend the subjects of Universal Grammar, or the Philosophy of Language generally, with the elements of Comparative Grammar and of Linguistic Etymology, the Philology of the English Language, and the Practice of English Composition.

Appendix,
No. 7.

Digest
of Subjects
and
Courses.

II. The subject of English Literature is treated both historically and in reference to the principles of æsthetic and critical science. For the history of our literature, a work of the Professor's, entitled "A Manual of English Literature and of the History of the English Language," is employed as a text-book; and a Course of Lectures is delivered on the subject of Literature as one of the forms of the Artistic. There are regular examinations both on the text-book and on the Lectures; and essays, or other exercises in writing, are exacted.

III. The teaching of History has hitherto embraced the Outlines of Historical Geography; the Elements of Chronology; a Sketch of the General History of the World; a Course of Lectures on the Science of Historical Investigation; and a minute survey, by way of illustration, of various portions of the History of England, including the progress of the constitution and of society, as well as the course of public events and transactions, with special reference to the original authorities, and to the bibliography of the subject. Examinations are regularly held, the Students being left to collect the facts necessary to be remembered from the Lectures, and from any of the common histories.

MODERN LANGUAGES.—*Professor, Wilhelm Früedersdorff, PH.D.*

French and German, between which languages the Students have an option, are taught at distinct hours.

In the First Year the Grammar is explained, and the Students are exercised chiefly in translating passages from French or German rather than in translating English passages into either language.

During the Second Year one day in each week is devoted to the study of some Foreign Classical work in prose, and a second to reading and commenting upon tragedy or poem; while the third day is occupied partly in revisal of work previously done, but chiefly in translating some English passage into French or German, and in conversation upon a literary subject introduced in a paper which has been read aloud by the Professor.

In the Third Year the Students, having been now well drilled in Grammar, are trained in Original Composition and in translating from one Modern Language into another, and their attention is also directed to the principles of Comparative Philology. French or German, as the case may be, is used exclusively in conversation.

Medical Students, of course, though meeting at different hours from others, are instructed in the same way. Some foreign work, recommended by the Medical Professors, is made a text-book—for instance, at present, Dr. Barnard's "Physiologie Expérimentale."

The disparity among the Students in point of preparation has obliged the Professor to make one or more subdivisions of each Class, and thus rendered his duties very onerous. Hence, for the present at least, he feels precluded from teaching systematically any other languages than French and German. Latterly, however, he has begun to explain the connexion between the Teutonic and Danish tongues to a class of Students who take an intelligent interest in linguistic investigations.

MATHEMATICS.—*Professor, ad interim, H. J. Sharpe.*

Attendance on this Class is prescribed to all Students in the Faculty of Arts during the first year of their Course; during the second year they are required to attend either a higher Course of Mathematics, or of Latin and Greek.

All Students in the Department of Engineering are required to attend the Mathematical Classes during two years.

Before entering, Students are required to pass an examination in the First and Second Books of Euclid, and in a small portion of Algebra. Practically they are generally well prepared in the prescribed portions of Euclid, while, on the contrary, it has been necessary, with a large portion of the Class, to commence the instruction in Algebra from the very beginning. A considerable number of the Students are Candidates for Mathematical Scholarships at entrance, and these are generally well prepared in the first six Books of Euclid, and a considerable portion of Algebra and Plane Trigonometry.

On this account the instruction of the First Year in Mathematics has been given in two Divisions. The Lower Division has been carefully taken through such portions of Euclid I., II., III., IV., VI., as they had not previously prepared, and has received instructions in Algebra as far as the progressions, and in Plane Trigonometry as far as the solution of triangles, with the use of logarithms and trigonometrical tables. The instruction of the Upper Division comprises a complete Course of Algebra and Trigonometry, with the principal historical properties of the Conic Sections, treated geometrically.

*Appendix,
No. 7.
Digest
of Subjects
and
Courses.*

The Council has sanctioned the employment of the Senior Mathematical Scholar in giving a portion of the instruction of the Lower Division. This arrangement, while it affords a greater number of hours to the Lower Division, enables the Professor of Mathematics to give more attention to the Upper Division, and has been found to work very satisfactorily.

In the Second Year the subjects of Lecture are Analytical Geometry, the Differential and Integral Calculus, and the first three sections of the Principia of Newton; and, in addition to this, when the progress of the Students has been sufficiently rapid during the early part of the Session, the solution of the simpler kinds of Differential Equations, and the principles of Analytical Geometry of Three Dimensions. Spherical Trigonometry and the Theory of Equations are not included in the subjects of Lecture, but are required from the Candidates for Science Scholarships of the Third Year.

The instruction is carried on in great part by questions, which the Students are required to work out at the time, under the eye of the Professor, the questions having reference to those portions of the subject which have just been treated in the Lectures. The Professor then corrects their work, and gives such hints and explanations as are requisite.

During the last two Sessions, at the request of a few advanced Students, a third and higher class has been formed. The subjects of lecture have been Geometry of three dimensions, Finite Differences, Calculus of Functions, Calculus of Variations, and extended courses of Definite Integrals, Differential Equations, and Theory of Probabilities.

THE PHYSICAL CLASSES—*Professor, John Stevelly, LL.D.*

The subjects taught in the Physical Classes are distributed under three subdivisions: Mathematical Physics, Experimental Physics, and Natural Philosophy applied.

The subjects comprised in the Course of Mathematical Physics are—Mechanics (under its several statical and dynamical subdivisions), Hydrostatics, Hydraulics, Pneumatics, Acoustics, Optics, and Astronomy. The Students who attend this class are the Matriculated Students who are seeking a Degree in Arts, the Engineering Students of the Second Year, and Non-Matriculated Students, some of whom are Candidates for the ministry in the Presbyterian Churches. Attendance at the Lectures three days in each week is imperative on all those Students, and one hour in each week is occasionally employed in asking questions from prescribed parts of Galbraith and Haughton's Manual. Two days in the week attendance is optional, when Analytical Mechanics and the higher branches of Physics are taught. In the Lectures, attendance on which is imperative, such mathematical proofs and illustrations only are introduced as a person reasonably prepared in the six first Books of Euclid and Elementary Algebra might easily comprehend. The teaching is by prelection; and although no text-books are prescribed, the ordinary elementary works on the several subjects are pointed out and referred to. At the Lectures, attendance on which is voluntary, the demonstrations and investigations are pursued in a more systematic and mathematical method, so as to require a knowledge of Analytic Geometry, Conic Sections, and the Differential and Integral Calculus. Text-books are used for the guidance of the Students attending these Lectures, who are chiefly those who are intending to compete for Honors. These text-books are Earnshaw's and Todhunter's Statics, Wilson's Dynamics, Tait's Dynamics of a Particle, Miller's Hydrostatics, Lloyd's Optics and Lectures on the Wave Theory of Light, Herschell's Astronomy, and two of Airy's Tracts, with occasional reference to Du Hamel's Cours de Mecanique, and to Poisson's Works.

Appendix,
No. 7.Digest
of Subjects
and
Courses.

The Class of Experimental Physics is attended by the same Students, and also by Agricultural Students of the Second Year, and by Medical Students of the Third Year. The subjects of these Lectures are taught entirely without mathematical demonstration, by the aid of experiments, illustrations, drawings, and models, and such works as Lardner's Hand-book, Golding Bird's Physics, Webster's Physics, Miller's Chemistry, Vol. I., Arnott's Elements, Biot, Ganot, Pouillet, Peschel, and such like standard works are referred to, and recommended to the attention of the Students. The subjects of Heat, Electricity, and Electro-Magnetism are at present chiefly taught in the Chemical Class; but the leading facts and principles are taught by selections from Biot, Pouillet, Ganot, and Miller.

The Class of Natural Philosophy applied is intended for Students in Engineering of the Third Year, by the recent University Ordinance; lectures and instructions twice in the week. The subjects embraced are the nature and estimate of work done; the kinds of work required to be done; the nature and laws of friction, and other useless resistances; the moving powers at our command, their respective nature and the laws which govern their action; the manner in which they are, by machinery, connected with and opposed to the resistances; the construction of machines; the principles of strength of materials as opposed to strains; the equilibrium of structures, frames, roofs, arches, domes; the general principles of mechanism; general maxims in the structure and working of machines; maximum effects of machines; hydraulic engines; the steam engine. The works used as guides to the studies of the Students in this Class are selections from Lloyd's and Robinson's Mechanics, Willis's Principles of Mechanism, Barlow on Materials and Construction. Hodgkinson's Experimental Researches, Tredgold, Tate's Elementary Treatises and Exercises, and selected numbers of Weale's Rudimentary Series.

CHEMISTRY—*Professor, Thomas Andrews, M.D., F.R.S., M.R.I.A.*

In the Class of Chemistry the greater part of the Course is devoted to pure Chemistry; but the Elements of the Sciences of Heat and Electricity, particularly in their relations with Chemistry Proper, are also taught. The application of these sciences to the arts are particularly referred to; and it has been the constant endeavour of the Professor to communicate to the Students as precise and accurate information as possible on the subjects treated in his Lectures, and to train them to habits of careful observation and accurate thinking. With this view a weekly examination of the whole Class is held, at which the Students are subjected to a searching examination on the business of the preceding week; and further to encourage a taste for scientific inquiry, and also to train a certain number of practical chemists, a limited number of the best Students are admitted, by examination, as working pupils into the chemical laboratory, where they have an opportunity of acquiring a knowledge of chemical analysis. This latter arrangement has now been in practice for several years, and has already been attended with the best results.

NATURAL HISTORY—*Professor, Wyville Thomson, LL.D.*

The Zoological Department of the Course occupies the First Term and greater part of the Second, and comprehends the Outlines of Anatomy and Physiology of animals, followed by Systematic Zoology, and remarks on the distribution of animals.

The Botanical part comprehends Vegetable Anatomy and Physiology, Systematic Botany, and distribution of vegetable forms. In addition to the Class Lectures, meetings are held in the Botanic Garden, and practical excursions made into the neighbouring country.

This Course comprehends chiefly Lectures on the structure and form of continents and islands; the distribution of mountain systems, rivers, and lakes; the ocean, its currents, temperature, &c.; the atmosphere, its currents, &c.; rain, snow, &c. The preceding subjects are considered in relation to the geographical distribution of animals and plants.

These different branches are illustrated by specimens, or drawings, or both, as the case may be.

LOGIC AND METAPHYSICS—*Professor, Rev. James McCosh, LL.D.*

*Appendix,
No. 7.*

LOGIC.

Students attend this Class four days each week during twelve weeks of the Second Session. On two of these days there are examinations on a text-book of Formal Logic, with short prelections on the said text-book, and also the oral explanation of philosophic terms, the reading of Essays by the Students, and the criticism of them by the Professor. On the other two days the Professor delivers written Lectures. This Course of Lectures is divided into two parts: FIRST, GENERAL LOGIC, or an Exposition of the Laws of Thought in general, that is, whatever be the object of thought, embracing Notions, Judgment, and Reasoning; SECONDLY, PARTICULAR LOGIC, or the Development of the Laws of Thought, as directed to particular classes of objects, comprising Demonstrative Evidence, Probable Evidence, Induction, Analogy, Teleology, and the Relation of the Organon of Bacon to that of Aristotle. The prominent topic in the second part is the Method of Induction, which is treated under the heads:—I. The Means, being generally Systematic Observation, and more particularly Analysis. Observation Proper. Experiment, Hypothesis, Explication of the Conception. II. The End, being the Discovery of Classes (as in Natural History, &c.), or Causes (as in Natural Philosophy, &c.). III. The Canons of Classes and Causes by which we may reach the End by the Means. The Students are required to give in a short written essay once a fortnight. At the Pass Examination, at the close, about one-half of the questions bear upon subjects discussed in the text-book, and the other half upon topics explained in the lectures.

*Digest
of Subjects
and
Courses.*

METAPHYSICS.

This Class meets four days each week, and an hour each day, during the first two terms of the Session, and is attended by Students of the Third Year. On one of these days there is a rigid examination, with interspersed remarks by the Professor, on the second half of the Epitome of the History of Philosophy, sanctioned by the University of France (translated by Henry). In this part of the text-book there is an abstract of the doctrines of the more eminent philosophers who have flourished in this country, and on the Continent of Europe, from the time of Bacon to the present day. On another of these days there is an examination on the written lectures, together with the reading and criticism of essays; the Students being required to give in a carefully written essay every fortnight to the Professor, who reads it at home, and selects certain portions of it to be read in the class, where he criticises it. These essays are on the leading subjects discussed in the written lectures. On the other two days the Professor delivers carefully prepared written lectures. He begins the course with a few lectures on the Method of Investigation, which is that of Induction, and on Mind and Body, and then proceeds to divide his course into two parts, PSYCHOLOGY and METAPHYSICS PROPER.

Under PSYCHOLOGY he treats (1) of the Powers or Faculties of the Mind, and (2) of the Laws of the Succession of Thought. He classifies the faculties as follows:—I. The Simple Cognitive Faculties: (*a*) Perception; (*b*) Consciousness. II. The Reproductive Faculties: (*a*) Memory; (*b*) Imagination; (*c*) Symbolic Power. III. The Faculties which Discover Relations: (*a*) of Identity and Difference; (*b*) of Whole and Parts (to which we owe abstractions); (*c*) of Space; (*d*) of Time; (*e*) of Quantity; (*f*) of Resemblance (to which we owe the Discovery of Classes); (*g*) of Active Property; and (*h*) of Cause and Effect. IV. The Conscience. V. The Emotions; and VI. The Will. In this course of lectures, which occupies two-thirds of the session, the method of operation and peculiarities of these mental attributes are carefully pointed out.

Under METAPHYSICS PROPER the Professor treats of the Native or Constitutional Principles which are in the Mind prior to experience. He points out their true Psychological Nature, and shows that they are the fundamental laws or rules of the Faculties. He also specifies the tests, such as Self-evidence, Necessity, and Universality, by which they may be distinguished. He proves that they are in the constitution of the mind, and that they operate spontaneously, but that we can make a reflective or philosophic use of them only after we have detected their nature by a careful induction. He classifies them as the True and the Morally Good. Under the first he treats (1) of Primitive Cognitions

Appendix,
No. 7.
—
Digest
of Subjects
and
Courses.

and Beliefs, such as Body, Spirit, Substance, Power, Space, Time, the Infinite; and (2) Primitive Judgment, such as Substance and Quality, Mathematical Axioms, Cause and Effect. Under the Good, without entering into the subject of Ethics, he shows that there is a fundamental distinction between Moral Good and Evil. He closes this course by showing how all these principles should conduct us to the belief in a Being who is at one and the same time the True and the Good.

HONOR LOGIC.

The Professor has also an Honor Class, in which are discussed the higher questions of Logic (Formal and Inductive) and Philosophy. It meets three times a-week, and is attended by about a dozen advanced Students. At two of the hours the Professor lectures on Logic and the History of Philosophy, and at the third hour there are examinations on text-books and discussions.

GEOLOGY AND MINERALOGY—*Professor, Wyville Thomson, LL.D.*

The Courses consist of lectures, demonstrations, and examinations. The Geological Course embraces the general principles of the science, and a detailed investigation of the palæontological, lithological, and economic characters of all the formations. The Students are exercised in the practical use of the necessary instruments, and in the construction of Geological maps and working sections. The characteristic fossils of the different formations are rendered familiar by the exhibition of specimens and models, and an excellent series of drawings. Drawings are also used for the illustration of the underground workings of mines of copper, coal, &c.

In the Mineralogical Course the Students are instructed in the most modern crystallography by models, and exercised with the reflecting goniometer. The electro-chemical classification of minerals is then explained, and an extensive suite of minerals in the museum is arranged on that system, for the instruction of the Students.

Once a week examinations are held, and additional explanations given of the subjects of the preceding lectures.

CIVIL ENGINEERING—*Professor, James Thomson, A.M., C.E.*

The Courses of lectures and of practical instruction given by the Professor of Civil Engineering were rearranged at the commencement of last Session, 1860-61, to accord with the new Ordinance of the Queen's University, bearing date the 28th of November, 1859, which prescribes to candidates for the Diploma in Civil Engineering a Curriculum extending usually over three Sessions; but admitting of abbreviation to two Sessions in the case of students whose previous acquaintance with a sufficient group of the subjects prescribed for study in the first and second sessions of the ordinary Course shall be deemed by the College Council satisfactory.

For the First Year Students the Professor gives a Course of instruction in the Principles of Geometrical Drawing, and in Office Work consisting chiefly of practice in engineering and architectural drawing. The business of this course is conducted in a great degree by giving out practical work to the Students, which they perform in the presence of the Professor, the requisite information and explanations being given by him, partly before, and partly during the execution of the work. By lectures, accompanied with oral examinations, are taught the elements of the science of descriptive geometry, the principles of perspective, and other branches of geometrical drawing; and the students are exercised in working examples in practice. The Class meets for two hours at a time on two days per week during the three Terms of the College Session.

For the Second Year Students two Courses are conducted by the Professor of Engineering, of which one is mainly a Lecture Course, and the other a Practice Course. The Lecture Course comprises mainly the following subjects, or most of them:—Principles and practice of surveying, levelling, and plotting, with the theory and use of the instruments required in surveying and levelling

operations; descriptive geometry; perspective; isometrical projection; properties and qualities of materials used in construction; blasting and quarrying; preparation of specifications and estimates; water works for supplying towns; foundations, cofferdams, bridges, roads, and railways; tunnelling; and an introduction to architecture as a fine art.

*Appendix,
No. 7.
—
Digest
of Subjects
and
Courses.*

In the Practice Course of the Second Year the students are engaged in the performance of office work and field work under the instruction and direction of the Professor; and the business includes surveying, levelling, drawing, mapping, and the computation of areas of lands, and other engineering calculations. Excursions are also made occasionally during the Session to visit engineering works.

For the Third Year Students there will be, like as there are for those of the Second Year, two Courses conducted by the Professor, one a Lecture Course, and the other a Practice Course. The business will comprise the further prosecution of several of the subjects entered on in the Second Year. In the Lecture Course it will include a more advanced treatment of the strength of materials and structures; also the science of the flow of water in orifices, pipes, and canals; drainage of fens by gravitation and by steam power, and other mechanical means; the iron manufacture; processes and mechanisms used in foundries and engineering workshops; ventilation of buildings and mines; farther lectures on railway engineering; and the detailed discussion of various selected undertakings and structures in civil and mechanical engineering.

The Practice Course of the Third Year will include office work, field work, and engineering excursions.

AGRICULTURE—*Professor, John Frederick Hodges, M.D., F.C.S.*

Theory of Agriculture.

The objects of this Course are to teach the principles of Agricultural Science. It includes an account of the origin and composition of soils, the structure and food of plants, and the composition and preparation of manures.

Practice of Agriculture.

The objects of this Course are to teach the young agriculturist how practice may be conducted in accordance with the principles of science, and the results of experience, and to describe the methods by which the largest amount of food may be profitably obtained from the soils of this country. It includes an account of the processes employed in the preparation of the soil for crops, draining, irrigation, &c., the history of the plants of the farm, and the economy of farm produce.

History and Diseases of Farm Animals.

In this Course the history, structure, and treatment of the animals of the farm, in health and disease, are described, and the relative value and economical preparation of the various substances used in feeding explained.

All the Lectures in these Courses require an extensive series of illustrations, and efforts have been made to obtain suitable collections of apparatus, models, &c.; a valuable collection of drawings has been provided for the demonstration of the structure and forms of animals, and numerous specimens of seeds, &c., have been presented to the College. As the history of the treatment and technical management of the flax plant, which affords the raw material of the staple manufacture of Ireland, is regarded as an important department of the duties of an Agricultural Professor in Ulster, the chief seat of flax industry, a complete series of flax implements and specimens has been placed in the museum.

The Students are examined frequently during the Session, and required to write abstracts of the lectures. By these means their attention is secured, and their progress ascertained. Excursions are also made to implement and manure manufactories, and they attend the monthly meetings of the Chemico-Agricultural Society of Ulster, which are held in Belfast.

The influence which the young men thus trained must, in future years, exercise on the agriculture of Ireland may be expected to produce the most beneficial results.

Appendix,
No. 7.ANATOMY AND PHYSIOLOGY—*Professor, Peter Redfern, M.D., Lond.,*
F.R.C.S.I.Digest
of Subjects
and
Courses.

The Department of Anatomy and Physiology comprises two distinct Courses of Lectures—one on Anatomy and Physiology, the other on Descriptive and Surgical Anatomy, and also the teaching of Anatomy by Dissections throughout the day.

The Course of Anatomy and Physiology includes about 115 meetings, each of an hour's duration, held on the first five days of each week from November to April inclusive. These meetings are for lecture and occasional examinations on the subjects previously considered in the lectures. The lectures include a complete course of the Anatomy and Physiology of the general textures of the body, including the blood, chyle, &c., and a systematic account of the whole of the viscera, treated of as they are associated in groups for the several purposes of digestion, circulation, respiration, urination, innervation, and generation; also the organs of sense. In treating of every part or organ its healthy state is shown by recent dissections and by preparations from the Museum illustrating it in man and animals, its diseased states and actions being referred to at the same time and contrasted with the healthy ones. The textures not visible to the naked eye are shown under a series of achromatic microscopes, so that during the Course every student in the class has an opportunity of judging for himself of the true characters of each part, and, by becoming familiarized with these, of recognising each when changed by disease.

The Course of Practical Anatomy and Anatomical Demonstrations includes :—

1st. Dissections carried on throughout the day under the immediate superintendence of the Professor of Anatomy and Physiology, and the Demonstrator. Each Student is required to be steadily engaged in dissections during the whole Session. For this purpose the supply of subjects is regular and abundant, and thus affords the surest foundation for efficient medical teaching.

2nd. This Course includes the Anatomical Demonstrations, which consist of a complete Course of Descriptive and Surgical Anatomy, commencing with the anatomy of the skeleton and bones, and including the anatomy of the limbs and other parts, excluding that of the viscera and the physiology treated of in the Course of Anatomy and Physiology. The demonstrations are given on each of the first five days of the week, and are about 115 in number in each Session.

By the erection of part of the Anatomical buildings in the College grounds the Students have been relieved from the inconvenience of walking to and fro, for the distance of a mile, between the Practical Rooms and the College, as formerly.

It is earnestly to be hoped that the remainder of these buildings will now be undertaken, that the Anatomical and Physiological collection in the College Museum may be made available for teaching in the new buildings, and that the injury resulting from carrying the preparations for Lecture down the stairs and across the seats of the present Class-room may be obviated.

PRACTICE OF MEDICINE—*Professor, John Creery Ferguson, M.A., M.B., Hon. Fellow of King and Queen's College of Physicians, &c.*

The class meets four times each week, from the first week of November to the last of the following April.

An examination is held usually once a fortnight. The Course embraces the principles of Inflammation, Fevers, the diseases, organic and functional, of the viscera of the three great cavities of the human body. In treating of individual diseases, their pathology, semeiology, ætiology, and treatment, are the subjects chiefly dwelt on. Wherever it is possible, pathology is illustrated by the preparations afforded by our Museum, by drawings and plates, or by recent specimens. It may be added that the Professor's present connexion with the Belfast General Hospital adds greatly to the means of making his Course more useful and interesting to students.

THEORY AND PRACTICE OF SURGERY—*Professor, Alexander Gordon, M.D.* *Appendix, No. 7.*

Four Lectures are delivered weekly during the Medical Session. An examination is held each day on the subject of the preceding day's Lecture. Each Course comprises the following subjects:—

Inflammation,	Diseases of the Bursae,
Suppuration,	„ Bone, benign and malignant,
Mortification,	„ the Jaws and Mouth,
Erysipelas,	„ the Fingers and Toes,
Burns,	„ Female Breast,
Ulcers,	„ Anus and Rectum,
Wounds,	„ Testis,
Hæmorrhage,	„ Hernia,
Diseases of the Arteries,	„ Prostate,
„ Veins,	„ Bladder,
Fractures of Trunk and Extremities,	„ Eyes,
„ Cranium, Injuries of the	„ Larynx,
Brain and Scalp,	Syphilis,
Dislocations,	Gonorrhœa,
Diseases of the Joints,	Stricture.

All the capital and minor operations are performed on the dead subject. The Professor delivers a separate Course of twenty-five Lectures on Operative Surgery.

MATERIA MEDICA—*Professor, James Scaton Reid, M.D.*

This Course includes—

1st. General Pharmacology, or the modes in which medicines act upon the living organism in a state of health.

2nd. Therapeutics, or the modes in which medicines act as curative agents.

3rd. Pharmacy.

4th. Dietetics, a review of the different kinds of food used in health and in disease.

5th. Special Pharmacology, or the history, composition, uses, and modes of administering medicinal agents for the cure of disease.

The Class meets four times each week. An examination is held once every week.

MIDWIFERY—*Professor, William Burden, M.D.*

Lectures four times a week during the six winter months consist of following subjects:—

Anatomy of the pelvis, so much as is required for midwifery. Its measurement and pelvimeters.

Contents of the pelvis. The functions of the uterus in its virgin state.

Conception—length of gestation—changes of the uterus and its appendages during gestation.

Growth of child from its earliest seen form until its full parasitic size.

Graafian vesicle and corpus luteum. Fœtus, its circulation, signs of maturity, weight, and length.

Plural births.

Proportion of births and deaths of males to females.

Superfœtation.

Signs of pregnancy.

Signs of approaching labour.

Natural labour, its progress; also the positions and progress of child till its separation from its mother.

Management of natural labour, including the arrangement of the bed and bed-room, and the proper dress and posture of the patient.

Tedious labour, its causes and treatment.

Labour requiring the use of instruments; their application taught on models in the class.

Cæsarean section and Sequitean operation—how to prevent the fetus from getting large in uterus.

Appendix,
No. 7.Digest
of Subjects
and
Courses.

- Premature labour—how to bring it on, and when it is necessary to do so.
 Cross-births and their treatment.
 Abortion—how to prevent it.
 Extra uterine fetations—how they occur, and their treatment.
 Management of women after delivery, and treatment of such accidents and diseases as occur at this period.
 Management of children after birth, washing, dressing, food, &c., and the choice of a wet-nurse, and treatment of such accidents as take place at this period, or soon after.
 Practical midwifery taught by pupils attending patients in their own houses and in the Lying-in hospital, where Clinical Lectures are given.

MEDICAL JURISPRUDENCE—*Professor, Dr. Hodges.*

The Lectures in this Course are delivered twice weekly during six months. They include an account of the history and chemical investigation of poisons, and of the various subjects respecting which the evidence and assistance of Medical Practitioners may be required in Courts of Law. Experimental illustrations of the methods to be pursued in medico-legal inquiries are given, and frequent examinations held to test the progress of Students. No salary has been allocated to the Teacher of this department, and the duties, at the request of the Council, have, since the opening of the College, been performed by Dr. Hodges.

ENGLISH LAW—*Professor, Echlin Molyneux, Q.C.*

The Professor of English Law, in conducting his department, has constantly kept in view the object of the Select Committee of the House of Commons in recommending the foundation of Chairs in Law in connexion with the Queen's Colleges, which, as they stated in their Report on Legal Education, was not merely to prepare Candidates for the Bar, and for the profession of Attorney and Solicitor, but to raise the standard of legal attainments amongst local practitioners, and especially to provide opportunities of legal education to qualify persons intended to fill administrative situations not strictly legal—a policy which has been since followed up by the Legislature conferring privileges, by way of inducement, on Candidates for the profession of Attorney and Solicitor, who shall avail themselves of these Schools of Law.

The Course of the *First* year in this department comprehends the elements of real and personal property, with the principles of conveyancing; that of the *Second* consists of an introduction to the principles and practice of Courts of Equity and the law of Bankruptcy; the *Third* Course includes the common law as incident to contracts, the nature and form of remedies by civil action, and an outline of criminal law, theoretical and administrative, which last completes the Curriculum of instruction required for the attainment of the Diploma of Elementary Law in the Queen's University. The subjects prescribed for Students of the *Fourth* year to qualify them for the Degree of LL.B. embrace a more extended and detailed course of the subjects already enumerated, including the law of wills, powers, evidence, and procedure.

The Lectures are made auxiliary to the cotemporaneous studies directed, and are accompanied by interrogation, independent of the General Examination and that for Honors. Such books, cases, and decisions, and portions of treatises are pointed out for reading as are considered by the Professor most useful in elucidating a branch of learning which is scarcely furnished with books exclusively intended for instruction; and no efforts have been spared to point out the peculiarities of the law in Ireland, whether proceeding from statutes or inherent diversity of practice, or to direct attention to the recent changes which have been introduced into the course of procedure.

From the first opening of the College to the present time the successive classes have spontaneously applied themselves with assiduity and perseverance to the various subjects of legal instruction, and several Non-Matriculated Students

have from time to time availed themselves of the privilege afforded by the College Ordinances of attending detached Courses of the Lectures on selected subjects. Appendix,
No. 7.

Under these circumstances, the Professor is gratified at being able to give the assurance that the Faculty of Law has fully realized the objects of its founders, and that a further extension of its public benefits would ensue upon the adoption by Government of the suggestion made by the same Committee of the House of Commons that a preference should be given to candidates for situations in the Civil Service, not of a purely legal nature, who could produce testimonials of legal attainments from those institutions—a rule which would fully accord with the principle laid down in a recent report of another Committee in relation to the Civil Service. Digest
of Subjects
and
Courses.

JURISPRUDENCE AND POLITICAL ECONOMY—*Professor, T. E. Cliffe Leslie, LL.B.*

The subjects embraced in the Course of Lectures on *Jurisprudence* are, according to the regulations of this College, (1) the Elements of Jurisprudence, (2) Civil Law, (3) Constitutional Law, (4) Colonial and International Law.

In the treatment of these subjects both the *Historical* and *Philosophical* Methods are followed in the Lectures of the Professor. The Historical Method, for example, is applied in tracing the principal changes through which the laws of England have passed, the assignable causes of such changes, and the degree and manner in which, in comparison with the laws of Continental Europe, the laws of this kingdom have been affected by contact with the principles of Roman legislation. The method of Philosophical Analysis, on the other hand, is applied in investigating the doctrines of the foundation and classification of rights, the several parts and legitimate form of a complete code, the relation of Scientific Jurisprudence to other departments of Social Philosophy, and the means of improving the state of Positive Law as deducible from such considerations.

The subjects which a Course of Lectures on *Political Economy* must embrace are fewer and more definite than those classed under the less advanced and more complicated Science of Jurisprudence. It is the Professor's endeavour to illustrate the principles of Economic Science by the help of those practical applications which will be most interesting and useful in a large commercial town.

amination.

FIRST YEAR STUDENTS.

GREEK—*Examiner, Professor MacDouall.*

I.—Translate accurately and perspicuously this extract from the *Cyropaedia*:—

“Καὶ μὲν δὴ, ὦ πάτερ!” ἔφη ὁ Κῦρος, “ὥς ἂν ἴλεω¹ οἱ θεοὶ ὄντες ἡμῖν συμβουλεύειν θέλωσιν, ὅσον δύναμαι κατὰ τὸν σὸν λόγον διατελῶ ἐπιμελούμενος. μέμνημαι γάρ,” ἔφη, “ἀκούσας ποτὲ σου ὅτι εἰκότως ἂν καὶ παρὰ θεῶν πρακτικώτερος εἴη, ὥσπερ καὶ παρὰ ἀνθρώπων, ὅστις μὴ ὁπότε ἐν ἀπόροις εἴη, τότε κολακεύοι, ἀλλ’ ὅτε τὰ ἄριστα πράττοι τότε μάλιστα τῶν θεῶν² μεμνῶτο¹ καὶ τῶν φίλων² δ’ ἔφησθα¹ χρῆναι¹ ὡσαύτως οὕτως ἐπιμελεῖσθαι. οὐκοῦν νῦν,” ἔφη, “ὦ παῖ! διὰ γε ἐκείνας τὰς ἐπιμελείας ἥδιον¹ μὲν ἔρχει πρὸς τοὺς θεοὺς δεησόμενος, ἐλπίζεις δὲ μᾶλλον τεύξεσθαι¹ ἂν² ἂν δέη, ὅτι συνειδέναι¹ στυγῶ δοκεῖς οὐπώποτ’ ἀμελήσας αὐτῶν²;” “πάνν μὲν οὖν,” ἔφη, “ὦ πάτερ! ὥς πρὸς φίλους μοι ὄντας τοὺς θεοὺς οὕτω διάκειμαι.” “τί γάρ;”—ἔφη ὁ πατήρ,—“μέμνησαι ἐκεῖνα ἃ ποτε ἐδόκει ἡμῖν, ὥς, ἅπερ δεῶκασιν οἱ θεοὶ μαθόντας¹ ἀνθρώπους βέλτιον πράττειν ἢ ἀνεπιστήμονας

Appendix,
No. 8.

General
Class Ex-
amination.

αὐτῶν² ὄντας καὶ ἐργαζομένους μᾶλλον ἀνύτειν¹ ἢ ἀργοῦντας¹ καὶ ἐπιμελου-
μένους ἀσφαλέστερον διάγειν ἢ ἀφυλακτοῦντας¹ τούτων², ταρέχοντας οὖν
τοιούτους ἑαυτοὺς οἷους δεῖ, οὕτως ἡμῖν ἔδόκει δεῖν καὶ αἰτεῖσθαι τὰγαθὰ¹
παρὰ τῶν θεῶν ; ” “ καὶ μὰ Δία,” ἔφη ὁ Κῦρος, “ μέμνημαι μέντοι τοιαῦτα
ἰκούσας σου· καὶ γὰρ ἀνάγκη ἦν πείθεσθαι τῷ λόγῳ· καὶ γὰρ οἶδά σε λέγοντα
αἰεὶ ὡς οὐδὲ θέμις εἶη αἰτεῖσθαι παρὰ τῶν θεῶν οὔτε ἱππεύειν μὴ μαθόντας
ἵππομαχοῦντας νικᾶν, οὔτε μὴ ἐπισταμένους τοξεύειν τοξεύοντας κρατεῖν τῶν
ἐπισταμένων,² οὔτε μὴ ἐπισταμένους κυβερνᾶν σώζειν εὐχέσθαι ναῦς κυβερ-
νῶντας, οὐδὲ μὴ σπεύροντάς γε σῖτον εὐχέσθαι καλὸν αὐτοῖς φύεσθαι,¹ οὐδὲ
μὴ φυλαττομένους γε ἐν πολέμῳ σωτηρίαν αἰτεῖσθαι· παρὰ γὰρ τοὺς τῶν
θεῶν θεσμούς πάντα τὰ τοιαῦτα εἶναι· τοὺς δὲ ἀθέμιστα εὐχομένους ὁμοίως
ἔφησθα εἰκόσ¹ εἶναι παρὰ θεῶν ἀτυχεῖν¹ ὥσπερ καὶ παρὰ ἀνθρώπων ἀπρακτεῖν
τοὺς παράνομα δομένους.

1. Parse the words thus numbered, giving such tense forms of the verbs as are actually in use, and, in regard to derivatives and compounds, noticing the laws obeyed in their formation.

2. Explain the government of every genitive case thus numbered.

3. Point out the construction and the idiomatic usage of every participle in the extract, and in each case express the sense in some other way, as by a finite verb after a relative or conjunction, or by a complementary infinitive: you may discuss specially those in the 7th, 8th, and 9th lines, and also those in lines 12th, 13th, 14th, noticing the combination with μή —not οὐ nor οὔτε.

4. Show what verb, actually expressed or to be supplied, is introduced by every relative (whether adjective or particle) throughout the passage.

5. Explain clearly the construction of every verb in the subjunctive mode, whether in passing or in past time, and whether associated with ἄν or otherwise.

I.—Translate accurately and perspicuously the opening lines of the *Alkestis* :—

ᾧ δώματ¹ Ἀδμήτει¹, ἐν οἷς ἔτλην³ ἐγὼ
θῆσαν τράπεζαν αἰνέσαι, θεός περ ὦν!
Ζεὺς γὰρ κατακτάς³ παῖδα τὸν ἐμὸν αἴτιος
Ἀσκληπίον, στέρνοισιν ἐμβαλὼν φλόγα·
οὗ δὲ χολωθείς³ τέκτονας¹ δίου¹ πυρὸς
κτείνω³ Κύκλωπας· καί με² θητεύειν πατὴρ
θνητῷ παρ' ἀνδρὶ τῶνδ' ἄποιν¹ ἠνάγκασεν.
ἐλθὼν δὲ γαῖαν τήνδ' ἐβουφόρβουν³ ξένῳ,
καὶ τόνδ' ἔσωζον οἶκον ἐς τόδ'² ἡμέρας.
ὅσιον γὰρ ἀνδρὸς ὅσιος¹ ὦν ἐτύγχανον,
παιδὸς Φέρητος, ὃν θανεῖν³ ἐρρυσάμην³
Μοίρας δολώσας· ἦνεσαν³ δέ μοι θεαὶ
Ἀδμητον Ἀιδην¹ τὸν παραντίκ' ἐκφυγεῖν,
ἄλλον διαλλάξαντα τοῖς κάτω νεκρόν.
πάντας δ' ἐλέγξας³ καὶ διεξελθὼν φίλους,
πατέρα γεραίαν θ' ἡ² σφ'² ἔτικτε³ μητέρα,
οὐχ εὖρε πλὴν γυναικὸς ἥτις ἤθελε³
θανεῖν πρὸ κείνου² μῆδ' ἔτ' εἰσορᾶν φάος¹

ἡ νῦν κατ' οἴκους ἐν χερσὶν βαστάζεται
 ψυχορραγοῦσα³ τῇδε γάρ σφ' ἐν ἡμέρᾳ
 θανεῖν πέπρωται³ καὶ μεταστῆναι³ βίου.
 ἐγὼ δέ, μὴ μίσασμά¹ μ' ἐν δόμοις κίχῃ,³
 λείπω³ μελάθρων τῶνδε φιλάτην¹ στέγην.¹
 ἤδη δὲ τόνδε Θάνατον εἰσορῶ πέλας,
 ἱερῇ¹ θανόντων, ὅς νιν² εἰς Ἀΐδου δόμους
 μέλλει κατὰζειν· συμμέτρως δ' ἀφίκετο³
 φρουρῶν τόδ' ἡμαρ,¹ ᾧ² θανεῖν αὐτὴν χρεῶν.¹

Appendix,
 No. 8.
 General
 Class Ex-
 amination.

1. Parse the nouns thus numbered, giving the *etyma* of derivatives, noting peculiarities of formation, and substituting prosaic synonyms for such as are exclusively poetic.

2. Parse the pronouns thus numbered, distinguishing enclitic from accented forms, and substituting prosaic synonyms for those peculiar to the poetic style.

3. Parse fully the verbs thus numbered, noting peculiarities of flexion, formation, or composition,—distinguishing poetic from prosaic forms,—and accounting for the use of the aorist state in *ἐτλην*, *ἤνεσαν*, of the past imperfect in *ἤθελε*, *ἔτικτε*, and of the present imperfect in *κτείνω*, *πέπρωται*, *κίχῃ*, *λείπω*.

4. Point out any constructions that are elliptical or otherwise noticeable, and for some phrases suggest variations equally correct and idiomatic.

LATIN—*Examiner, Rev. Dr. Reichel.*

A.—I. De Tadiana re, necum Tadius locutus est te ita scripsisse, nihil esse iam quod laboraretue, quoniam hæreditas usa capta esset. Id mirabamur te ignorare, de tutela legitima, in qua dicitur esse puella, nihil usu capi posse.—CICERO—AD ATTICUM.

Translate and explain.

II.—Tuus autem ille amicus—scin quem dicam?—de quo tu ad me scripsisti, postea quam non auderet reprehendere, laudare coepisse, nos, ut ostendit, admოდum diligit, amplectitur, amat, aperte laudat: occulte, sed ita ut perspicuum sit, invidet. Nihil come, nihil simplex, nihil ἐν τοῖς πολιτικοῖς honestum, nihil forte, nihil illustre, nihil liberum. Sed hæc ad te scribam alias subtilius, nam neque adhuc mihi satis nota sunt et huic terrae filio nescio cui committere epistolam tantis de rebus non audeo. Provinciam prætores nondum sortiti sunt. Res eodem est loci, quo reliquisti. Τοποθεσίαν, quam postulas, Miseni et Puteolorum includam orationi meae. A. d. III. Non. Dec.: mendose fuisse animadverteram.—CICERO—AD ATTICUM.

Translate and explain.

α. Explain the phrase *reliquum dodrantem emere*. What is the derivation of *dodrans*?

β. Give the Latin names for the parts of the *as*.

γ. How are derivative verbs formed? Give examples.

B.—I. HA. Me nunc commoror, has foris, quum non ferio,
 Ut sciam sitne nunc Ballio domi,
 Heus ubi estis vos?
 Heus ubi estis? BA. Hic quidem ad me recta habet rectam viam.
 Bene ego ab hoc praedatus ibo: novi, bona scaevast mihi.

Appendix,
No. 8.

General
Class Ex-
amination.

HA. Equis hoc aperit? BA. Heus, *chlamudate*, quid istie dehibetur tibi?

HA. Aedium dominum lenonem Ballionem quaerito.

BA. Quisquis es, adulescens, *operam face compendi* quaerere.

HA. Quid iam? BA. Quia *ted* ipse coram praesens praesentem videt.

HA. Tunc is es? SI. Chlamudate cave sis tibi a *curvo infortunio*.

Atque in hunc intende digitum : hic lenost. BA. At hic est vir probus.

Set tu, bone vir, flagitare saepe clamore in foro,

Quum *libella* nusquamst, nisi quid leno hic subvenit tibi.

HA. Quin tu mecum fabulare? BA. Fabulor, quid vis tibi?

HA. Argentum accipias. BA. Jam dudum, si des, porrexi manum.

PLAUTUS.

Translate, and explain the words and phrases printed in italics.

II.—A. Satis tu quidem in consolatione es lamentatus, quam quum lego, nihil malo quam has res relinquere, his vero modo auditis multo magis. M. Veniet tempus et quidem celeriter, sive retractabis sive properabis, volat enim aetas. Tantum autem abest ab eo, ut malum mors sit, quod tibi dudum videbatur, ut verear ne homini nihil sit non malum aliud, certe sit nihil bonum aliud potius, si quidem vel di ipsi vel cum dis futuri sumus. A. Quid refert? M. Adsunt enim qui haec non probent. Ego autem nunquam ita te in hoc sermone dimittam, ulla uti ratione mors tibi videri malum possit. A. Qui potest, quum ista cognoverim? M. Qui possit rogas? Catervae veniunt contra dicentium nec solum Epicureorum, quos equidem non despicio, sed nescio quomodo doctissimus quisque, accerume autem deliciae meae Dicaearchus contra hanc immortalitatem disseruit.—CICERO—TUSCULAN QUESTIONS.

Translate.

C.—Translate the following into Latin prose :—

Mercury, desirous to know in what estimation he was held by mankind, went in a human form into the workshop of a statuary, as if intending to purchase something. Seeing the statue of Jupiter, he asked at what price it might be bought. The man answering for a drachm, he smiled, and asked, At what might this one of Juno be purchased? The statuary answered, For more money. Seeing his own statue, and thinking, as he was the messenger of the Gods, and his name invoked by all mortals desirous of gain, it would be highly valued, he inquired the price. If you will, said the statuary, buy the other two, I will give you this one to boot.

This fable shows that the opinion which we entertain of our own importance often differs from the estimate which others form of it.

A.—Translate into English the following extracts :—

I. Praetoria inde comitia habita. P. Manlius Vulso et L. Manlius Acidinus et C. Laetorius et L. Cincius Alimentus creati sunt. forte ita incidit, ut comitiis perfectis nuntiaretur, T. Otacilium, quem T. Manlio, nisi interpellatus ordo comitiorum esset, collegam absentem daturus fuisse videbatur populus, mortuum in Sicilia esse. Iudi Apollinares et priore anno fuerant, et eo anno ut fierent referente Calpurnio praetore, senatus decrevit ut in perpetuum voverentur. eodem anno prodigia aliquot visa nuntiataque sunt. in aede concordiae victoria, quae in culmine erat, fulmine icta decussaque ad victorias, quae in antefixis erant, haesit neque inde procidit. et Anagnia et Fregellis nuntiatius est murum portasque de coelo tactas, et in foro Subertano sanguinis rivos per totum diem

fluxisse, et Reate mulam peperisse. ea prodigia hostiis maioribus sunt procurata, et obsecratio in unum diem indicta et novemdiale sacrum. Sacerdotes publici aliquot eo anno demortui sunt, novique suffecti : in locum M. Aemilii Numidae decemviri sacrorum M. Aemilius Lepidus, in locum M. Pomponii Mathonis pontificis C. Livius, in locum Sp. Carvili Maximi auguris M. Servilius. T. Otacilius Crassus pontifex quia exacto anno mortuus est, ideo nominatio in ejus locum non est fructa. C. Claudius flamen Dialis, quod exta perperam dederat, flaminio abit.

amination.

II. SI. Quid ais? quum intellexeras

Id consilium capere, quor non dixi extemplo Pamphilo?

DA. Quis igitur eum ab illa abstraxit nisi ego? nam omnes nos quidem.

Scimus hanc quam misere amarit. nunc sibi uxorem expetit.

Postremo id mihi da negoti : tu tamem idem has nuptias

Perge facere ita ut facis : et id spero adiuturos deos.

SI. Immo abi intro : ibi me opperire et quod parato opus est para.

Non impulit me, haec nunc omnino ut crederem.

Atqui haud scio an quae dixit sint vera omnia,

Sed parvi pendo : illud mihi multo maximumst,

Quod mihi pollicitust ipse gnatus. Nunc Chremem

Conveniam : orabo gnato uxorem : id si impetro,

Quid alias malim quam hodie has fieri nuptias?

Nam gnatus quod pollicitust, haud dubiumst mihi,

Si nolit, quin eum merito possim cogere.

Atque adeo in ipso tempore eecum ipsum obviam.

B.—1. Distinguish between *pōpulus* and *pōpulus*. What deponent verb is formed from the latter, and what is its meaning?

2. Distinguish between *populus* and *plebs*. What is supposed to be the derivation of the latter?

3. When did the Apollinarian games take place?

4. Give the times of celebration of the Magalesia, Floralia, and ludi maximi, together with any other particulars you may recollect about the date of their introduction, the mode of their celebration, or the deities in whose honour they were held.

5. Give the (empiric) rule for the cases in which to put the place at which anything is. Explain the anomalies of this rule.

6. Distinguish between *sacerdos*, *flamen*, and *pontifex*: give their derivations : and state how many flamines and pontifices there were at Rome at the beginning of the commonwealth and afterwards.

7. Explain the meaning of the proposition *sub* in the composition of the word *suffectus*.

8. Explain the phrase *extra perperam dare*, and give the Greek word cognate to *perperam*.

9. Derive the words *prodigium*, *monstrum*, *portentum*, *culmen*, *nuntius*.

10. Mention the chief battles of the Second Punic War, and the date of its commencement and termination.

C.—1. What kind of a line is the first in the second extract ; and what rule usually obtaining of such lines is violated in this instance?

2. In what metres is this passage written? State what lines are written in each, and give the laws of these metres.

3. What other metres are of most frequent occurrence in Terence?

4. Show how the iambic may be derived from the trochaic ; and what phenomenon is explained by this derivation?

5. Describe the feet called cretic, bacchi, and choriamb, and explain their origin.

Appendix,
No. 8.
General
Class Ex-
amination.

6. What is the difference between a foot and a metre? and state what kinds of verse are usually scanned by metres and not feet.
7. What is the ithyphallic metre? Give an example of it.
8. Write out the following at full length in Latin, and translate it into English :
 GRAECA . MENANDRU . ACTA . LUDIS . MEGALENSIBUS . MARCO . FULVIO . M.' GLABRIONE . AED . CUR . EGERE . L. AMBIVIVS . TURPIO . L. ATILIUS . PRAEN . MODOS . FECIT . FLACCUS . CLAUDI . TIBIIS . PARIB . TOTA . FACTA . PRIMA . M. MARCELLO . C. SULPICIO . COSS.
9. Give the names of Terence's plays, and state which was the last written.
10. Give the dates (in years of the city) of Terence and Plautus.
11. When was the first regular play presented at Rome, and who was its author?

ENGLISH LANGUAGE.—*Examiner, Professor Craik.*

1. Explain the view of the progress and revolutions of the English language which regards it as having assumed only three essentially distinct successive forms.
2. Explain the view of the history of the language which regards its successive stages as marked by the changes in the vowel-endings of the noun and verb.
3. Explain the common view of the history of the language which divides it into a certain number of periods of what are called *Saxon* and *English*, of various kinds or denominations.
4. Explain the view of the history of the English language which looks at it in its changing relation to, or connexion with, the rival foreign tongue brought in by the Norman Conquest.
5. Compare the successive stages in the history of the language with those in the growth of the human being.
6. Explain the terms *Francic* (or *Frankish*), *French*, *Langue d'Oc*, *Langue d'Oyl*, *Provençal*, *Neo-Latin*, *Romance*.
7. Explain what we mean by the Latin of the First and the Latin of the Second Period in our existing English, and describe the general character of the latter.
8. Explain whence and how we have obtained the bulk of the Latin that is found in the vocabulary of our modern English.
9. Explain the rule or principle according to which their established names are given to the several vowels in our present English.
10. State and illustrate the rule for the correct use of the comma in connexion with the relative and its antecedent.

MODERN LANGUAGES.—*Examiner, Dr. Früdersdorff.*

Translate into English :—

La grotte de la déesse était sur le penchant d'une colline. De là on découvrait la mer, quelquefois claire et unie comme une glace, quelquefois follement irritée contre les rochers, où elle se brisait en gémissant et élevant ses vagues comme des montagnes. D'un autre côté, on voyait une rivière où se formaient des îles bordées de tilleuls fleuris et de hauts peupliers qui portaient leurs têtes superbes jusque dans les nues. Les divers canaux qui formaient ces îles semblaient se jouer dans la campagne ; les uns roulaient leurs eaux claires avec rapidité ; d'autres avaient une eau paisible et dormante ; d'autres, par de longs détours, revenaient sur leurs pas, comme pour remonter vers leur source, et semblaient ne pou-

voir quitter ces bords enchantés. On apercevait de loin des collines et des montagnes qui se perdaient dans les nues, et dont la figure bizarre formait un horizon à souhait pour le plaisir des yeux. Les montagnes voisines étaient couvertes de pampre vert qui pendait en festons : le raisin, plus éclatant que la pourpre, ne pouvait se cacher sous les feuilles, et la vigne était accablée sous son fruit. Le figuier, l'olivier, le grenadier, et tous les autres arbres, couvraient la campagne et en faisaient un grand jardin.

amination.

MAGNANIMITY OF LOUIS XIV.

While the English were erecting the Eddystone Lighthouse, which stands on a rock in the Channel, a French privateer took the workmen and carried them to France, where they were put into prison. Some time after, Louis XIV. heard of the transaction, and immediately ordered the Englishmen to be set at liberty and the captors to be put in their places, saying, "If I am at war with England I am not at war with mankind ; the lighthouse which the English are erecting will be a benefit to all nations whose ships navigate the Channel, and I would rather protect the workmen than annoy them." He ordered presents to be given them, and recommended them to continue their operations without fear. The lighthouse was completed, and has saved hundreds of vessels from wreck.

GRAMMATICAL QUESTIONS.

1. State the gender of the following nouns :—*ville, village, pouvoir, puissance, part, parti, salle, salon.*
2. Enumerate the different kinds of articles, with examples of each class.
3. What are the comparative and superlative degrees of *bon, petit, mauvais, grand* ?
4. Give the different forms of the demonstrative adjective *ce* and demonstrative pronoun *celui*.
5. Distinguish between irregular and defective verbs. Give examples.
6. In how many moods is the conjugation of French verbs divided ? Give examples of each mood, taken out of the four conjugations.
7. Conjugate the unipersonal verb *falloir*.
8. Mention the exceptions to the general rule on the position of the personal pronoun. Illustrate by examples.

MATHEMATICS.—*Examiner, Professor Slessor.*

ALGEBRA.

1. Show that $a \times a^6 = a^7$. What is the meaning of a^m when m is (1) a fraction $\frac{s}{q}$, (2) a negative quantity $-n$? and state the principle which makes it necessary to attach to them these meanings.

2. Show that if $b > c$ and $a > (b - c)$ then $a - (b - c) = a - b + c$.

$$\text{Simplify } a - 2 \left[b + 3 \left\{ b - 2 \left(a - c - \frac{a - b}{2} \right) \right\} \right]$$

3. By what expression must $ab + bc + c^2$ be multiplied so as to produce $a^2b - ab^2 + 2abc + ac^2 - b^2c + c^3$?

Show that $(x + y + z)^3 - (y + z - x)^3 - (x + z - y)^3 - (x + y - z)^3 = 24xyz$, and $3(x + y + z)^2 - (y + z - x)^2 - (x + z - y)^2 - (x + y - z)^2 = 8(xy + xz + yz)$.

Appendix,
No. 8.
General
Class Ex-
amination.

4. Reduce the following fractions :

$$\frac{x^2+4a+3ax^2}{x^2+7ax+12a^2}, \frac{y-z}{(y-a)(z-a)} + \frac{z-x}{(z-a)(x-a)} + \frac{x-y}{(x-a)(y-a)}.$$

5. Solve the following equations :

$$2x+5=5x+\frac{1}{4}(x+1); \quad \frac{6+x}{6-x} - \frac{4+x}{4-x} + \frac{2+x}{2-x} = 1; \quad \frac{x}{2} + \frac{3}{x} = \frac{x}{3} + \frac{4}{x} + \frac{5}{6}.$$

$$\left\{ \begin{array}{l} x^2-5xy=24 \\ y^2+3x^2+2xy=8 \end{array} \right\} \quad (2+x)^{\frac{1}{3}} + (2-x)^{\frac{1}{3}} = 3(4-x^2)^{\frac{2}{3}}.$$

6. Extract the square root of 114144 in the scale whose radix is 6. If the digits of a number in the scale whose radix is r be a, o, c , reckoning from the left, and in the scale whose radix is r' , be c, o, a , show that the number is

$$c \frac{r^2 r'^2 - 1}{r^2 - 1}.$$

7. Find the number of permutations taken altogether of n letters, of which p are a 's, q are b 's, and the rest all different. Find also the number of permutations of the same letters when taken $n-1$ together.

8. Show that if $f(m)f(n)=f(m+n)$ then will $f(m)=c^m$ where c is some constant independent of m . Expand by the binomial theorem

$\left(\frac{a}{2}-2x\right)^8$, $\left(1-4x\right)^{-\frac{1}{2}}$, and find the coefficient of x^r in the expansion of

$$\frac{(x^2-\sqrt{2x+1})^{\frac{1}{2}}}{(x^2+\sqrt{2x+1})^{\frac{3}{2}}}$$

9. If $\frac{p_n}{q_n}$ be the n th convergent to the continued fraction

$$a_1 + \frac{1}{a_2 + \frac{1}{a_3 + \frac{1}{a_4 + \dots}}}, \text{ then } p_n = a_n p_{n-1} + p_{n-2}.$$

Prove the corresponding relation when the fraction is of the form

$$a_1 - \frac{1}{a_2 - \frac{1}{a_3 - \frac{1}{a_4 - \dots}}}$$

Express $\sqrt{20}$ as a continued fraction.

10. Find numbers which when divided by 4, 5, 6 shall leave remainders 2, 1, 4.

11. Find the value of an annuity of £4, to begin at the end of p years and continue q years. Interest being such that £ R is the amount of £1 for a year. A man is to pay a debt of £ p by instalments in the following way: he is to pay in the second year twice what he pays in the first, in the third year 3 times as much, in the fourth 4 times, and so on. If it require n years to liquidate the debt, what must each payment be? Interest as before.

12. From a bag containing 6 white and 4 black balls, two balls are drawn and put into an empty bag. A says that both balls are white. What is now the chance that if a ball be drawn from the bag containing the two it shall be white, supposing that A speaks truth 4 times out of 5.

GEOMETRY AND TRIGONOMETRY.

1. Show that parallelograms upon the same base and between the same parallels are equal to one another. If $ABCD$ be a parallelogram, and E , the middle point of CD , be joined to A , and any point F be taken in AE , then will the triangle ABF be double of the triangle ADF .

2. Show that equal chords in a circle are equally distant from the centre. Appendix,
No. 8.
Place a chord in a circle such that the length of the chord may be equal to its distance from the centre.

3. Inscribe a circle in a given triangle.

4. The sides about the equal angles of equiangular triangles are proportionals. ABC is any triangle, from A a line AF is drawn meeting BC produced in F , and making the angle CAF equal to the angle B . Show that

$$AB^2 : AC^2 :: BF : CF.$$

5. If two chords in an ellipse intersect, the rectangles of their segments are proportional to the squares on the diameters parallel to them. Dd , Ee are two conjugate diameters of an ellipse, P a point on it, PM , PN parallel to Ee , Dd and meeting Dd , Ee respectively in M , N . Perpendiculars Mm , Nn are drawn on the tangent at P , show that

$$DM \cdot Md : PN^2 :: Mm : Nn.$$

6. What are the two units used for the measurement of angles? Compare the abstract numbers which represent the same angle in the respective measurements. Find the circular measure of angles 12° , $28^\circ 30'$, 690° .

7. Define the sine, tangent, and cosine of an angle, and show that

$$\sin A = \frac{\tan A}{\sqrt{1 + \tan^2 A}} \text{ and } \cos^2 A (1 + \tan^2 A) = 1.$$

8. Find a formula including all the angles, which have the same sine as a given angle a .

Given $\sin 5\theta = \cos 6\theta$ find the values of θ ; if $\tan \theta$ were to be determined from the above equation, how many different values would it generally have?

9. Prove the formula for $\cos(A+B)$, also

$$2 \cot 2a = \cot a + \tan a$$

$$\operatorname{cosec} 2a = \cot 2a + \tan a$$

$$2 \operatorname{cosec} 2a + 8 \cos 2a \cos 4a \operatorname{cosec} 8a$$

$$\text{If } \tan^{-1} \frac{x}{a} = 2 \sin^{-1} \frac{y}{a} \text{ then will } a^4 x^2 = 4y^3 (a^2 - y^2) (a^2 + x^2).$$

10. In a plane triangle, the sum of the two sides is to their difference as the tangent of half the sum of the angles at the base is to the tangent of half their difference. In any triangle $a \cot A + b \cot B - c \cot C = 4 (r_2 - R)$ where r_2 is radius of described circle touching c externally and R the radius of the circumscribed circle.

11. Prove Demoivre's theorem. Apply it to find the values of $(1 + \sqrt{-3})^{\frac{1}{3}}$.

What must be the relation between a and b that $(a + b\sqrt{-1})^n$ may be wholly real?

12. The angular points of a regular polygon inscribed in a circle are joined to a point in the plane of the circle at a distance d from the centre, find the sum of the squares of the joining lines.

SECOND YEAR STUDENTS.

GREEK.—*Examiner, Professor Mac Douall.*

I.—1. Translate perspicuously, and in good English style, the annexed extract from the second Book of HERODOTUS:—

Εἰ δὲ δει μὲν ψάμενον γνώμας τὰς προκειμένας αὐτὸν περὶ τῶν ἀφανέων γνώμην ἀποδέξασθαι, φράσω, &c., down to ἔλπομαι ποιεῖν ἂν τὸν Ἴστρον τάπερ νῦν ἐργάζεται τὸν Νεῖλον.

Appendix,
No. 8.
General
Class Ex-
amination.

2. Elucidate the whole of preceding discussion in connexion with the meteorological and cosmical conceptions of the Author.

3. Express the sense of the whole passage in Attic Greek and the style of Xenophon, retaining the phraseology (adapted in dialect) when appropriate, but transposing and abridging freely. Accentuate your version throughout.

II.—Translate accurately and perspicuously these lines from the *Philoctetes* of SOPHOCLES :—

ΦΙΛΟΚΤΗΤΗΣ.

πρὸς νῦν σε πατὴρ πρὸς τε μητρός, ὦ τέκνον !
 πρὸς τ' εἴ τί σοι κατ' οἶκόν ἐστι προσφιλές,
 ἱκέτης ἰκνοῦμαι, μὴ λίπης μ' οὕτω μόνον,
 ἔρημον ἐν κακοῖσι τοῖσδ', οἷοις ὄρεας
 ὅσοισι τ' ἐξήκουσας ἐνναϊοντά με·
 ἀλλ' ἐν παρέργῳ θεῶ με. δυσχέρεια μέν,
 ἐξοῖδα, πολλή τοῦδε τοῦ φορήματος·
 ὅμως δὲ τλήθι. τοῖσι γενναίοισι τοι
 τό τ' αἰσχρὸν ἐχθρὸν καὶ τὸ χρηστὸν εὐκλείας.
 σοὶ δ' ἐκλιπόντι ταῦτ' ὄνειδος οὐ καλόν,
 δράσαντι δ', ὦ παῖ ! πλεῖστον εὐκλείας γέρας,
 ἔαν μὲν γὰρ ζῶν πρὸς Οἰτῆϊαν χθόνα.
 ἴθι· ἡμέρας τοι μόχθος οὐχ ὅλης μιᾶς.
 τόλμησον, ἐμβαλοῦ μ' ὅποι θέλεις ἄγων,
 εἰς ἀντλίαν, εἰς πρῶραν, εἰς πρύμνην, ὅπῃ
 ἦκιστα μέλλω τοὺς ξυνόντας ἀλγυνεῖν.
 νεῦσον, πρὸς αὐτοῦ Ζηνὸς ἱκεσίου, τέκνον !
 πείσθητι· προσπίτνω σε γόνασι, καί περ ὦν
 ἀκράτωρ ὁ τλήμων, χωλός. ἀλλὰ μὴ μ' ἀφῆς
 ἔρημον οὕτω χωρὶς ἀνθρώπων στίβου.
 ἀλλ' ἢ πρὸς οἶκον τὸν ἐμὸν ἔκσωσόν μ' ἄγων
 ἢ πρὸς τὰ Χαλκιδόντι Εὐβοίας σταθμά,—
 ἐντεῦθεν οὐ μοι μακρὸς εἰς Οἶτην στόλος
 Τραχινίαν τε δερᾶδα καὶ τὸν ἔνροον
 Σπερχεῖον ἔσται,—πατρί μ' ὡς δεῖξῃς φίλῳ,
 ὃν δὴ παλαιὸν ἐξ ὅτου δέδοικ' ἐγὼ
 μή μοι βεβήκη. πολλὰ γάρ νιν ἐν λιταῖς
 ἔστειλ' ἱκεσίαις, ὥς ἐμ' ἐκσωσαι θέλοι.
 ἀλλ' ἢ τέθνηκεν αὐτός, ἢ διακόνων
 ἕκαστος, οἶμαι, τοῦμὸν ἐν σμικρῷ μέρει
 ποιούμενος, τὸν οἶκαδ' ἠπειγεν στόλον.

1. Explain the geographical and biographical references in this passage.
 2. Point out and very briefly elucidate such peculiarities of idiom, construction, and metre as you may find most noticeable.

3. You may also discuss the varieties of reading—especially those introduced here into the last eleven lines.

LATIN.—*Examiner, Rev. Dr. Reichel.*

TACITUS, GERMANIA.

*Appendix,
No. 8.*

General
Class Ex-
amination.

1. Tegumen omnibus sagum fibula aut, si desit, spina consertum : caetera intacti totos dies iuxta focum atque ignem agunt. Locupletissimi veste distinguuntur, non fluitante, sicut Sarmatae ac Parthae, sed stricta et singulos artus exprimente. Gerunt et ferarum pelles, proximi ripae negligenter, ultiores exquisitius, ut quibus nullus per commercia cultus. Eligunt feras, et detracta velamina spargunt maculis pellibusque beluarum quas exterior Oceanus atque ignotum mare gignit. Nec alius feminis quam viris habitus, nisi quod feminae saepius lineis amictibus velantur, eosque purpura variant, partemque vestitus superioris in manicas non extendunt, nude brachia ac lacertos : sed et proxima pars pectoris patet, quanquam severa illic matrimonia, nec ullam morum partem magis laudaveris, nam prope soli barbarorum singulis uxoribus contenti sunt, exceptis admodum paucis, qui non libidine sed ob nobilitatem plurimis nuptiis ambiuntur.

TACITUS, HISTORIAE.

2. Parvo interim initio, unde nihil timebatur orta seditio prope urbi excidio fuit. Septumam decumam cohortem e colonia Ostiensi in urbem acciri Otho iusserat : armandae eius cura Vario Crispino tribuno e praetorianis data. is quo magis vacuus quietis castris iussa exsequeretur, vehicula cohortis incipiente nocte onerari, aperto armamentario, iubet. Tempus in suspicionem, causa in crimen, affectatio quietis in tumultum evaluit ; et visa inter temulentos arma cupidinem sui movere. Fremit miles, et tribunos centurionesque prodicionis arguit, tanquam familiae centurionum ad perniciem Othonis armarentur, pars ignari et vino graves, pessimus quisque in occasionem praedarum, vulgus, ut mos est cuiuscunque novi motus cupidum. Et obsequia meliorum nox abstulerat. Resistentem seditioni tribunum et severissimos centurionum obtruncant. Rapta arma, nudati gladii. Insidentes equis urbem ac Palatium petunt. Erat Othoni celebre convivium primoribus feminis virisque : qui trepidi, fortuitusne militum furor an dolus imperatoris, manere ac deprehendi an fugere et dispergi periculosus foret, modo constantiam simulare, modo formidine detegi, simul Othonis vultum intueri. Utque eventus inclinatis ad suspicionem mentibus, quum timeret Otho timebatur.

CICERO, DE NATURA DEORUM.

3. Empedocles autem multa alia peccans in deorum opinione turpissime labitur. Quattuor enim naturas, ex quibus omnia constare censet, divinas esse vult, quas et nasci et extinguere perspicuum est, et sensu omni carere. Nec vero Protagoras, qui sese negat omnino de dis habere quod liqueat, sint non sint qualesve sint, quidquam videtur de natura deorum suspicari. Quid ? Democritus, qui tum imagines eorumque circuitus in deorum numero refert, tum illam naturam, quae imagines fundat ac mittat, tum scientiam intelligentiamque nostram, nonne in maximo errore versatur ? Quum idem omnino, quod nihil semper statu suo maneat, neget esse quidquam sempiternum, nonne deum omnino ita tollit, ut nullam opinionem eius reliquam faciat ? Quid ? aër, quo Diogenes Apolloniates utitur deo, quem sensum habere potest aut quam formam dei ?

4. Sed sint ista pulchriora duntaxat aspectu, quod mihi tamen ipsum non videtur : quid enim pulchrius ea figura quae sola omnes alias figuras complexa continet quaeque nihil asperitatis, habere, nihil offensionis potest, nihil incisum angulis, nihil anfractibus, nihil eminens, nihil lacunosum ? Quumque duae formae praestantissimae sint, ex solidis globis—sic enim *σφαῖραν* interpretari placet—ex planis autem circis aut orbis, qui *κυκλος* Graece dicitur, his duabus formis contingit solis ut omnes

Appendix,
No. 8.

General
Class Ex-
amination.

earum partes sint inter se simillimae a medioque tantum absit extremum [quantum idem a summo], quo nihil fieri potest aptius. Sed si haec non videtis, quia nunquam eruditum illum pulverem attigistis, ne hoc quidem physici intelligere potuistis, hanc aequabilitatem motus constantiamque ordinum in alia figura non potuisse servari?

Quaestiones, quibus Latine est respondendum :

1. Quomodo, secundum Epicurum, notitia deorum ad mentis pervenit humanas?

2. Quaenam est Epicuri πρόληψις?

3. Quomodo Epicurus conatur probare deos mundum nec creasse nec regere?

4. A quibusnam philosophis mutuatus est praecipue Epicurus suam disciplinam?

5. Quamnam philosophiae partem in maximo honore habuit Epicurus, spreta omnino alia?

6. Facile refelluntur Epicuri tum (α) physica, tum (β) moralia?

A.—Translate the following into Latin prose :

I had rather believe all the fables in the Talmud and the Alcoran, than that this universal frame is without a mind. And therefore God never wrought miracle to convince atheism, because his ordinary works convince it. It is true, that a little philosophy inclineth man's mind to atheism; but depth in philosophy bringeth men's minds about to religion : for while the mind of man looketh upon second causes scattered, it may sometimes rest in them, and go no further; but when it beholdeth the chain of them confederate and linked together, it must needs fly to Providence and Deity. Nay, even that school which is most accused of atheism, doth most demonstrate religion : that is, the school of Leucippus, and Democritus, and Epicurus. For it is a thousand times more credible, that four mutable elements, and one immutable fifth essence* duly and eternally placed, need no God; than that an army of infinite small portions, or seeds unplaced, should have produced this order and beauty without a divine marshall.† The Scriptures saith, "The fool hath said in his heart, There is no God:" it is not said, "The fool hath thought in his heart." So as he rather saith it by rote to himself, as that which he would have, than that he can thoroughly believe it, or be persuaded of it. For none deny there is a God, but those for whom it maketh that there were no God. It appeareth in nothing more that atheism is rather in the lip than in the heart of man, than by this : that atheists will ever be talking of that their opinion, as if they fainted in it within themselves, and would be glad to be strengthened by the consent of others; nay, more, you shall have atheists strive to get disciples, as it fareth with other sects; whereas, if they did truly think that there were no such thing as God, why should they trouble themselves?—BACON.

MODERN LANGUAGES.—*Examiner, Dr. Frädersdorff.*

Translate into English :

Massillon, évêque de Clermont, né en Provence en 1663, mort à Clermont en 1742, partage avec Bourdaloue le premier rang parmi les prédicateurs français. Chez d'autres écrivains la langue française est plus ner-

* Aliquid.

† Designator.

reuse et plus originale ; chez aucun autre, excepté chez Racine, elle n'est aussi élégante et aussi suave. L'art d'intéresser à une idée par les détails, de la multiplier en quelque sorte par l'expression, d'être diffus même sans langueur, caractérise Massillon, qui, d'ailleurs, est moins plein et moins fort que Bourdaloue, moins sublime et moins rapide que Bossuet. Plus habile à persuader qu'à convaincre, il a connu le moyen d'agir sur le plus grand nombre d'âmes. Il approche de l'unction de Fénelon dont il n'a pas l'intimité. Le Petit—Carême de Massillon, suite de sermons composés pour l'éducation de Louis XV. est regardé comme une des plus parfaites productions de la langue française.

Appendix,
No. 8.
General
Class Ex-
amination.

TOUT CHANGE DANS L'UNIVERS, EXCEPTE DIEU.

Tout passe avec vous et comme vous ; une rapidité que rien n'arrête, entraîne tout dans les abîmes de l'éternité ; nos ancêtres nous en frayèrent hier le chemin, et nous allons le frayer demain à ceux qui viendront après nous. Les âges se renouvellent ; la figure du monde passe sans cesse ; les morts et les vivants se remplacent et se succèdent continuellement ; rien ne demeure ; tout change, tout s'use, tout s'éteint ; Dieu seul demeure toujours le même ; le torrent des siècles qui entraîne tous les hommes, coule devant ses yeux ; et il voit avec indignation, de faibles mortels emportés par ce cours rapide, l'insulter en passant, vouloir faire de ce seul instant tout leur bonheur et tomber au sortir de là, entre les mains de sa colère et de sa vengeance.—MASSILLON.

GRAMMATICAL QUESTIONS.

1. Mention the different cases when the article is not used. Give examples.
2. Give the feminine of the following adjectives :—*doux, exprès, favori, sec, malin, paysan, roux, tiers, vieux.*
3. Enumerate the different kinds of pronouns, with examples of each class.
4. Give the imperfect, perfect, and future of the following verbs :—*songer, réussir, offrir, concevoir, entendre, and prendre.*
5. With what auxiliary are reflective verbs conjugated, and when is the participle of these verbs variable ?
6. Conjugate the unipersonal verb *y avoir*.
7. Give as many adverbs of quantity as you can remember.
8. Explain the following constructions :—

Je lui ai payé cette somme avant de partir.
Je lui ai payé cette somme avant qu'il partît.
J'ai vu le roi allant à la chasse.
J'ai vu le roi en allant à la chasse.

Translate into English :

Die benachbarten britanischen und dänischen Küsten waren die ersten, die von ihren Schiffen besucht wurden. Die englische Welle, die diese zurückbrachten, beschäftigte tausend fleißige Hände in Brügge, Gent und Antwerpen, und schon in der Mitte des zwölften Jahrhunderts wurden flandrische Tücher in Frankreich und Deutschland getragen. Schon im elften Jahrhundert finden wir friesische Schiffe im West und sogar in der levantischen See. Dieses muthige Volk unterstand sich sogar, ohne Compaß unter dem Nordpol hindurch bis zu der nördlichen Spitze Rußlands, zu steuern. Von den wendischen Städten empfingen die Niederlande einen Theil des levantischen Handels, der damals noch aus dem schwarzen Meere durch das russische Reich nach der Ostsee

Appendix,
No. 8.

amination.

ging. Als dieser im dreizehnten Jahrhundert zu sinken anfing, als die Kreuzzüge den indischen Waaren einen neuen Weg durch die mittelländische See eröffneten, die italienischen Städte diesen fruchtbaren Handelszweig an sich rissen, und in Deutschland die grosse Hansa zusammentrat, wurden die Niederlande der wichtige Stapelort zwischen Norden und Süden. Noch war der Gebrauch des Compases nicht allgemein, und man segelte noch langsam und umständlich längs den Küsten.

Translate into German :

For this reason, these familiar histories may perhaps be made of greater use than the solemnities of professed morality, and convey the knowledge of vice and virtue with more efficacy than axioms and definitions. But if the power of example is so great as to take possession of the memory by a kind of violence, and produce effects almost without the intervention of the will, care ought to be taken that, when the choice is unrestrained, the best examples only should be exhibited, and that which is likely to operate so strongly, should not be mischievous or uncertain in its effects.

1. Write out the second and third person singular of the present tense of the verbs *fechten, fassen, lassen*.

2. Give the third person singular of the imperfect subjunctive of the verbs *spinnen, fließen, fliehen*.

3. In what tenses is the preposition in separable verbs placed last, and state the circumstances under which it assumes its original position? Give some examples.

4. Give some verbs that govern the dative in German.

5. Write out in German some phrases in which the verb occurs with the accusative of the person and genitive of the thing.

6. Translate :

a. Er soll hier bleiben

Er soll* todt sein.

b. Er will den König sehen

Er will* den König gesehen haben.

c. Du dürftest* dich wohl geirrt haben.

LOGIC.—*Examiner, Rev. Dr. M'Cosh.*

1. Specify the several notions or terms in the following, and say as to each what sort of notion or term it is—"Abelard was the most famous of the schoolmen. The versatility of his genius was immense. Young men waited eagerly on his teaching. Theology and logic were the topics discussed by him."

2. Examine the following statement of Berkeley :—"It is impossible for me to form the abstract idea of motion distinct from the body moving, and which is neither swift nor slow, curvilinear nor rectilinear; and the like may be said of all abstract general ideas whatsoever:" and also the following statement of Leibnitz—"Concreta vere res sint, abstracta non sunt res sed rerum modi; modi autem nihil aliud sunt quam relationes rei ad intellectum."

3. What sort of notions can be logically defined? What does definition bring out in these notions? What difficulty is there in defining general concrete notions? How is this got over? Examine the following definitions, and say whether they are in accordance with the rules of de-

* The verbs marked thus involve an idiomatical locution.

inition, and when you condemn, say by what rule—"Words are the signs of thoughts." "A deer is an animal with horns." "Life is the sum of the vital functions."

*Appendix,
No. 8.*

4. Given the proposition—"In our joyous moments quick moves the step of time," what are the terms? what the subject and predicate? Interpret the proposition both as to the extension and comprehension of the notions. Whether is the extension or comprehension the more prominent in thought in the above sentence? What other forms could you derive from the proposition, say by opposition, conversion, or any other logical process?

*General
Class Ex-
amination.*

5. State briefly, but precisely, how and how far logic can practically give aid in thinking, in respect of our notions and judgments.

6. (a) When the middle term is singular, what figure is employed? Why? What arguments fall naturally into that figure? What is the special rule as to the conclusion in that figure? and what the reason of it? Or,

(b) Lias is above Red Sandstone; Red Sandstone lies above Coal; therefore, Lias lies above Coal.

7. It can be shown that if the earth were hollow, or if it were liquid, the oscillations produced would derange the tides and prevent them from following their present regular flow; and hence it is concluded that the earth must be solid. Put the reasoning in this in the form of a disjunctive, and show how the disjunctive could be reduced to a hypothetical and categorical.

8. "Bad men and even devils have faith, but what is possessed by such can be of no value—and so faith can be of no value." Put the above in correct form. Say under what head of fallacies it falls? Define that fallacy.

9. Individuals have periods of infancy, youth, manhood, and decrepitude. Nations have also their periods of infancy, youth, and manhood, and we may suppose, also, of decay; so at least had ancient Egypt, Chaldea, Rome, and many other countries. We may conclude that Great Britain must also have its time of old age and decay.

10. In what relation do generalization and classification stand towards each other? What is the difference between a natural and artificial classification? Wherein is the former superior to the latter.

11. What is meant by a "perfect induction?" Give an example. What rule regulates the inference in such induction? Is it of any use in physical investigation? What is meant by "an induction by simple enumeration without a known exception?" Can this be had in nature? Estimate its value.

12. What is the difference between reason and cause? What science lays down rules as to the reason, and what follows from it? What is the difference between sign and cause? In what sciences do we seek after causes? Can logic aid us in such an investigation?

13. The common statement is, that mountains draw the clouds, especially when near the sea, and that tracts of country lying near mountains are exposed to much rain in consequence. The correct account is said to be, that when a current of air, loaded with moisture, passes over a mountain, the moisture is condensed by the cold of the ground, and falls in rain. According to what method or methods is this inference drawn. State precisely what must be given or granted in order to entitle us to draw the inference. State the reasoning in syllogistic form.

14. Define evidence. Does historical evidence depend on intuition or experience. In what circumstances may we reckon an event of ancient history as so completely established that the evidence will not diminish as ages advance? Whence the uncertainty of hearsay and traditional evidence?

Appendix,
No. 8.
General
Class Ex-
amination.

15. What are the ultimate tests which logic supplies for trying reasoning? for determining what is intuitive truth? and for ascertaining when we have reached a law of nature?

Those who cannot answer *twelve* of these questions must answer the whole of the following, along with at least *six* of the above:—

(a) What is the difference between an abstract and a general notion? Give examples of each.

(b) What are the rules of logical division?

(c) Examine the following—"Every rational agent is accountable; brutes are not rational agents; therefore they are not accountable."

(d) What constitutes the Second Figure? Why must the conclusion in that Figure be negative? Put the following in correct form and examine it—"This man must be a good man, for he is charitable."

(e) Define *petitio principii* and *ignoratio elenchi*.

(f) In what respects does experiential evidence differ from demonstrative evidence? Why is experiential evidence called "moral"?

NATURAL PHILOSOPHY.—*Examiner, Dr. Stevelly.*

1. State and prove the conditions which three forces which act at the same point of a body must fulfil in order that they may be in equilibrio, and explain the distinction between force actually, or virtually, acting at a given point.

2. When a horse draws a boat along a canal, explain what prevents the boat from running in on the bank on which the horse walks; and point out how much of the force, he exerts at every instant, is effective to move the boat along the course it actually goes; also, explain why the horse has to exert his force continually in order to keep up the motion of the boat, and show the consistency of the facts with the first law of motion.

3. When forces are in equilibrio the equilibrium may be any one of three kinds: state the distinction between these, and give an example of each.

4. When a heavy body is placed upon a supporting base, explain the condition which determines whether it will continue to stand or fall. If it stand, state what force measures its stability, and state the quantities on which the magnitude of that force depends. If it fall, state what determines the direction in which it will fall.

5. A man's weight is 168 lbs., he can press down the handle of the pump of a Bramah's press so as to lay that weight on the handle at four feet two inches from the centre on which it works; the handle bears on the plunger of the pump at three inches from the same centre; what pressure does he exert on the plunger when he lays his whole weight on the handle?

6. Explain what is meant by the justness of a balance, and what by its sensibility; and state the adjustments of a modern balance which are necessary and sufficient to secure these perfections.

7. Describe the method of weighing by counterpoise, and state with what description of instrument that method may be employed with advantage.

8. Describe Hunter's, or the differential, screw, and explain the practical difficulties of increasing the power of the simple screw, which are avoided by its use.

9. Enumerate the five magnitudes whose relations to each other are investigated by dynamical inquiries, and state how Atwood's machine enables us to examine experimentally the relations of these in the case of bodies moving under the influence of uniformly accelerating forces.

10. Explain how the magnitude of a velocity which is continually

changing, is estimated at any one instant, and how the intensity of a force which is continually changing that intensity is determined at any given instant.

Appendix,
No. 8.
General
Class Ex-
amination.

11. Describe the construction of the "Gridiron Pendulum," and explain the principle on which it is made to compensate for those changes of temperature to which it may be exposed.

12. Describe and explain any of the experimental proofs that the hydrostatic pressure of heavy fluids is entirely independent of the shape of the containing vessel, and state clearly the quantities on which, alone, that pressure depends.

13. Describe and explain any of the experimental proofs that the buoyant force exerted by a heavy fluid upon a body totally or partially surrounded by it, is equal to the weight of the volume of fluid whose place it occupies.

14. Enumerate as many of the methods of taking the specific gravity of liquids as you remember, and describe the actual process in whichever of them you consider the simplest and best.

15. Enunciate the law which governs the ordinary refraction of light, and explain the experimental proof of its truth.

16. Explain how Astronomers prove that the Sun in the course of a year appears to describe a great circle among the fixed stars; and show on what circumstance, connected with the position of that circle, the variety of seasons through the year depends astronomically, and explain why the cycle of the seasons is completed, before his apparent course among the fixed stars.

17. State the law which determines whether two poles of magnetic bars, when presented to each other, will mutually attract or repel.

18. Explain how an electrified body, when brought near another body, may be caused to electrify it permanently by induction; and state under what circumstances the electrification will not be permanent when the inducing electrified body is removed.

MATHEMATICS.—*Examiner, Professor Slesser.*

DIFFERENTIAL CALCULUS, &c.

1. Show that $\lim_{x \rightarrow \infty} \left(1 + \frac{1}{x}\right)^x \div \left(1 - \frac{1}{x}\right)^{-x} = 1$.

Given $\lim_{x \rightarrow \infty} \left(1 + \frac{1}{x}\right)^x = e$ find $\lim_{x \rightarrow 0} \left(1 - x^2\right)^{\frac{a}{x^2}}$

2. The differential coefficients of u, v , two functions of x , are α, β ; find the differential coefficients of $\frac{u}{v}, u^m v^n, \frac{\log u}{\log v}, e^{uv}, u^v, \tan^{-1}(u+v)$.

3. Differentiate $\frac{1}{x^2 + a^2}, x^n \log x, (x^2 + \sqrt{1 + x^4})^n, a^{\sqrt{1 - x^2}} \sin^{-1} \sqrt{1 - x^2}, f\left(\frac{\phi x}{x}\right)$.

4. Transform the equation $x^2 \frac{d^2 y}{dx^2} + ax \frac{dy}{dx} + by = 0$ into an equation between θ and ϕ where $x = e^\theta, y = e^\phi$. Also in the same, leaving the dependent variable unchanged, change the independent variable from x to θ .

5. State the rule for the determination of the maxima and minima values of a function of any number of independent variables. Find the maxima or minima values of $x y z (x - a) (y - b) (z - c)$.

Appendix,
No. 8.
General
Class Ex-
amination.

6. Explain how the position and nature of the cusps in a given curve may be found. Find the position and nature of the cusps in (1)

$a(x+y)^2=(x-y)^3$; (2) $y=x+\sqrt{\frac{x^3}{a}}$; (3) $P^n=\lambda Q^{n-1}$ where P, Q, λ , are linear expressions in x and y , and n is even.

7. Integrate the expressions $\int \frac{dx}{x^2+a^2}$, $\int \frac{xdx}{a+bx+cx^2}$, $\int x \sin x dx$;

$$\int_0^{\frac{\pi}{2}} \frac{\sin x - \cos x dx}{\{a^2(\cos^4 x + \sin^4 x) + c^2 \sin^2 x \cos^2 x\}^{\frac{1}{2}}}; \int_0^{\frac{\pi}{2}} \frac{\cos^3 x \sin^3 x dx}{(\cos^4 x + \sin^4 x)^2}.$$

8. A man commences to run a mile, his speed at first is 440 yards per minute, and it diminishes in such a way that after running x yards, his speed per minute is $440 - \frac{x}{8}$ yards. Required how long he will take to run the mile.

9. Show that $\frac{d}{da} \int_a^b \phi(x) dx = \phi(b) \frac{db}{da} - \phi(a)$.

Hence find the value of $\int_0^{\frac{\pi}{2}} \frac{dx}{(a^2+x^2)^2}$.

10. Show how to find the envelope of a system of curves, in whose equation there is one arbitrary parameter.

Find the envelope of the system $a^2P+b^2Q=c^2R$ where a, b are related by the condition $\left(\frac{p}{a}\right)^m + \left(\frac{q}{b}\right)^m = 1$. P, Q, R are expressions in x and y and c is constant.

11. If an operation K be equivalent to the three operations $H_1 H_2 H_3$ performed in order, H_1 being the first; what operations and in what order would be equivalent to the inverse of the operation K .

Find y from the equation

$$\left(\frac{d}{dx} + x\right) \left(\frac{d}{dx} - a\right) \left(\frac{d}{dx} + \frac{1}{x}\right) y = cx.$$

12. Solve the following differential equations:

$$y^3 \frac{dy}{dx} + (y^4 - 1) \sqrt{x^2 - 1} = y.$$

$$\frac{d^3 y}{dx^3} + 3 \frac{dy}{dx} + 4y = Ax^2 + B \cos 3x + C e^{2x}.$$

$$\frac{d^2 y}{dx^2} + \frac{c^2 y}{x^{2r+1}} = 0.$$

ANALYTICAL GEOMETRY.

1. Find the equation of the line passing through a given point and perpendicular to a given line.

Find the equation of $\perp$, to $\frac{x}{a} + \frac{y}{b} = 1$ which passes through the point a, b . Find the condition that the latter line may pass through the origin.

2. Find the formula for the length of $\perp r$ from a point x, y , on a line whose equation is given.

Find the condition that the line $(x-a)l + (y-b)m = c^2$, should be at a distance c from the point (a, b) .

3. Find the polar equation of the circle, any point being the pole. Show

that if a point be taken in the plane of a circle, a line can be found such that the square of the distance of any point on the circle from the point, shall vary as its distance from the line.

4. The equation of a parabola is $y^2=4ax$. Find the equation of, (1) Its directrix; (2) Latus rectum; (3) Tangent; (4) Normal at extremity of latus rectum. If the latus rectum SL be produced to L' so that $LL'=SL$ and through L' a parallel to the axis be drawn, then if through any point P in the normal at L a $\perp$ to the axes be drawn meeting the curve in Q , and the line through L' in N , then will $SQ=NP$.

5. Show that in an ellipse or hyperbola, the product of the perpendiculars from the foci on any tangent is equal to the square of the semi-minor axis. If a conic touch the three sides of a triangle, and one focus move along a straight line, the other will move along a conic.

6. An ellipse inscribed in the triangle ABC touches its sides in points EFG so that

$$BE : EC :: l : 1, CF : FA :: m : 1, AG : GB :: n : 1.$$

Show that $lmn=1$ and the equation of the ellipse may be put in the form $\sqrt{ax} + \sqrt{mb\beta} + \sqrt{m\gamma} = 0$.

7. The straight lines $\alpha=0, \beta=0, \gamma=0$ form two sides and a diagonal joining their extremities of a parallelogram; find the equations of the other sides and diagonal, the lengths of the sides of the triangle formed by the three given lines being a, b, c .

8. Show that in any transformation in rectangular co-ordinates of the equation $Ax^2+2Bxy+Cy^2+2Dx+2Ey+F=0$ into an equation of the form $ax^2+2bxy+cy^2+2dx+2ey+F=0$, then $a+c=A+C=ac-b^2+AC-B^2$.

Find the equation of the ellipse $2x^2+xy+3y^2+4x+by=8$, when referred to its principal diameters as axes.

9. If there be three circles, A, B, C , and if circles be described through the points of intersection of A and B and of A and C , then a circle can be described through the points of intersection of the two circles so drawn, and of the circles B, C .

10. Find the equation of a parabola referred to two tangents as axes. Find the equation of the diameter through the origin, and of a line parallel to its corresponding ordinates.

11. In a hyperbola S being focus, P any point on the curve, and PM drawn parallel to an asymptote to meet the corresponding directrix in M , show that $SP=PM$. Describe a way in which the hyperbola can be traced graphically, depending on this property.

THIRD YEAR STUDENTS.

GREEK.—*Examiner, Professor Mac Douall.*

[HONOR CLASS.]

I.—Translate in a perspicuous style this extract from the *Philebos* of PLATON :

ΣΩ. πότερον οὖν ἐκ τούτου τοῦ σώματος ἔλως τὸ παρ' ἡμῖν σῶμα ἢ ἐκ τοῦ παρ' ἡμῖν τοῦτο τρέφεται τε καὶ ὅσα νῦν δὴ περὶ αὐτῶν εἴπομεν εἰληφέ τε καὶ ἴσχει; ΠΡΩ. καὶ τουθ' ἕτερον, ὃ Σώκρατες! οὐκ ἄξιον ἐρωτήσεως. ΣΩ. τί δέ; τόδ' ἄρ' ἄξιον; ἢ πῶς ἐρεῖς; ΠΡΩ. λέγε τὸ ποῖον. ΣΩ. τὸ παρ' ἡμῖν σῶμα ἄρ' οὐ ψυχὴν φήσομεν ἔχειν; ΠΡΩ. δῆλον ὅτι φήσομεν. ΕΩ. πόθεν, ὦ φίλε Πρώταρχε! λαβόν, εἰπερ μὴ τό γε τοῦ παντὸς σώμα ἔμψυχον ὃν ἐτύχανε, ταῦτά γ' ἔχον τούτω καὶ ἔτι πάντη καλλίονα; ΠΡΩ. δῆλον ὡς

οὐδαμότεν ἄλλοθεν, ὦ Σώκρατες! ΣΩ. οὐ γάρ που δοκεῖ ἡμῖν γε, ὦ Πρώταρχε! τὰ τέτταρα ἐκείνα, πέρας καὶ ἄπειρον καὶ κοινὸν καὶ τὸ τῆς αἰτίας γένος ἐν ἅπασι τέταρτον, θεμένοις, τοῦτο μὲν ἐν τοῖς παρ' ἡμῖν ψυχὴν ἐμποιοῦν καὶ σωμαστίαν παρέχον καὶ παίσαντος σώματος ἱατρικῇ ἀκούμενον καὶ ἐν ἄλλοις ἄλλα πᾶσι παντοῖα συντιθέν, “σοφίαν” ἐπικαλεῖσθαι, τῶν δ' αὐτῶν τούτων ὄντων ἐν ὅλῳ τε οὐρανῷ καὶ κατὰ μεγάλα μέρη καὶ προσέτι καλῶν καὶ εἰλικρινῶν, ἐν τούτοις οὐκ ἄρα μεμηχανῆσθαι τὴν τῶν καλλίστων καὶ τιμωτάτων φύσιν. ΠΡΩ. ἀλλ' οὐδαμῶς τοῦτό γ' ἂν λόγον ἔχοι. ΣΩ. οὐκοῦν, εἰ μὴ τοῦτο, μετ' ἐκείνου τοῦ λόγου ἂν ἐπόμενοι βέλτιον λέγοιμεν, ὥς ἔστιν, ἃ πολλὰκις εἰρήκαμεν, ἄπειρόν τ' ἐν τῷ παντὶ πολὺ καὶ πέρας καὶ κοινόν, καὶ τις ἐπ' αὐτοῖς αἰτία οὐ φαύλη, κοσμοῦσά τε καὶ συντάττουσα ἐναντιοῦς τε καὶ ωρας καὶ μῆνας, “σοφία” καὶ “νοῦς” λεγομένη δικάϊότατ' ἂν. ΠΡΩ. δικαιοτάτα δῆτα. ΣΩ. σοφία μὴν καὶ νοῦς ἀνευ ψυχῆς οὐκ ἂν ποτε γενοίσθην. ΠΡΩ. οὐ γὰρ οὖν. ΣΩ. οὐκοῦν ἐν μὲν τῇ τοῦ Λιὸς ἑρεῖς φύσει βασιλικὴν μὲν ψυχὴν, βασιλικὸν δὲ νοῦν ἐγγίγνεσθαι διὰ τὴν τῆς αἰτίας δύναμιν, ἐν δὲ ἄλλοις ἄλλα καλὰ, καθ' ὃ φίλον ἐκάστοις λέγεσθαι. ΠΡΩ. μάλα γε. ΣΩ. τοῦτον δὴ τὸν λόγον ἡμᾶς μὴ τι μάτην δόξης, ὦ Πρώταρχε! εἰρηκέναι, ἀλλ' ἔστι τοῖς μὲν πάλαι ἀποφρηναμένοις ὥς αἰεὶ τοῦ πάντος νοῦς ἄρχει ξύμμαχος ἐκείνοις,—ΠΡΩ. ἔστι γὰρ οὖν—ΣΩ. τῇ δὲ γ' ἐμῇ ζητήσει πεπορικῶς ἀπόκρισιν, ὅτι νοῦς ξυγγενὴς ἔστι τοῦ πάντων αἰτίου λεχθέντος. τῶν τεττάρων δ' ἦν ἡμῖν ἐν τοῦτο. ἔχεις γὰρ δῆπου νῦν ἡμῶν ἡδὴ τὴν ἀπόκρισιν. ΠΡΩ. ἔχω καὶ μάλ' ἰκανῶς· καὶ τοί με ἀποκρινάμενος ἔλαθες. ΣΩ. ἀνάπαντα γάρ, ὦ Πρώταρχε! τῆς σπουδῆς γίγνεται ἐνίοτε ἡ παιδιά. ΠΡΩ. καλῶς εἶπες. ΣΩ. νῦν δὴ νοῦς, ὦ εταῖρε! οὗ μὲν γένους ἐστὶ καὶ τίνα ποτὲ δύναμιν κέκτηται, σχεδὸν ἐπεικῶς ἡμῖν τὰ νῦν δεδήλωται. ΠΡΩ. πάνν μὲν οὖν.

II.—1. Elucidate the import both of this passage and of the discussion of which it is a segment, noticing the technical terms and peculiar phrases which occur in it.

2. Sketch the tenor of the Dialogue, tracing the relation of at least one of the subordinate or episodic disquisitions to the main argument. Show also the bearing of the whole or of some portions of the controversies between the Italic, Eleatic, and Hedonic Schools of Philosophy.

3. To what group of Platon's Dialogues would you refer the *Philebos*? And in what period of his life does it appear to have been composed?

LATIN.—*Examiner, Rev. Dr. Reichel.*

[HONOR CLASS.]

Translate the following into Latin Prose :—

The stateliness of houses, the goodness of trees, when we behold them delighteth the eye ; but that foundation which beareth up the one, that root which ministereth unto the other nourishment and life, is in the bosom of the earth concealed ; and if there be occasion at any time to search into it, such labour is then more necessary than pleasant, both to them which undertake it and to the looker on. In like manner, the use and benefit of good laws, all that live under them may enjoy with delight and comfort, albeit the grounds and first original causes from whence they have sprung be unknown, as to the greatest part of men they are. But when they who withdraw their obedience pretend that the laws which they should obey are corrupt and vicious, for better examination of their quality it

behoveth the very foundation and root, the highest well-spring and fountain, of them to be discovered ; which, because we are not oftentimes accustomed to do, when we do do it, the pains we take are more needful a great deal than acceptable, and the matters which we handle seem, by reason of newness (till the mind grow better acquainted with them), dark, intricate, and unfamiliar. For as much help thereof, as may be in this case, I have endeavoured, throughout the body of this whole discourse, that every former part might give strength unto all that follow, and every latter bring some light unto all before.—HOOKER.

Class Ex-
amination.

Turn the following into Latin Elegiacs :—

Crush the seeds of disease while they are new,
And let your horse be stopped when he is only beginning to go ;
For delay gives strength ; delay ripens¹ the grapes,
And makes what was mere herbage crops of corn.
The tree which now affords a wide shade
When² first planted³ was a twig :
Then it might have been plucked up by the hand ;
Now immensely⁴ increased it stands by its own force.
Oppose⁵ beginnings : it is too⁶ late to prepare medicine
When evils have grown⁷ strong by delay.

HISTORY AND ENGLISH LITERATURE.—*Examiner, Professor Craik.*

HISTORY.

1. Give an account of the connexion of France and the Empire throughout the ninth century.
2. Sketch the succession to the Empire from the end of the ninth century to the beginning of the nineteenth.
3. Enumerate in the order of time, and with the date of each, the successive changes of dominion undergone by Italy from the fall of the Western Roman Empire to the end of the eighth century.
4. Mention the several families who eventually acquired the supreme power in Tuscany, Milan, Mantua, and Modena.
5. Explain the origin and results of the conflicting claims of the Hohenstauffen Emperors, the Kings of Aragon and Spain, and the Counts and Dukes of Anjou to the crown of the Two Sicilies.
6. Explain what are meant by the Exarchate, the Pentapolis, the Romagna, the Marches, and what were, before 1830, called the Four Legations.
7. State the results of the war of the Spanish succession to Spain, Naples, Sicily, Lombardy, and the Belgic Provinces.
8. State the arrangements made at the peace of 1814 with regard to Lombardy, Venice, Genoa, and Belgium.
9. State the results in Italy of the war of the French and Sardinians in 1859 against Austria.
10. Explain the scheme of universal history given in the Lectures ; and sketch the leading events of any one of the nine Periods.
11. Explain the computation of Degrees of kindred according to both laws ; with the meaning of Consanguinity and Affinity, and of *Agnate* and *Cognate* ; and the distinction between Representation and Proximity in questions of inheritance.
12. Explain the Julian and Gregorian Reformations of the Calendar.

¹ To ripen, *percoquere*. ² When, *quo tempore*. ³ To be planted, *imponi*. ⁴ *Aucta in immensum*. ⁵ Oppose, *obstare*. ⁶ Too late, *Sero*. ⁷ To grow strong, *convalesco*.

amination.

ENGLISH LITERATURE.

1. Give an account of the Vision of Piers Ploughman, noticing the subject of the work, the date, the spirit, the form of composition, the poetical merit, and the modern editions.
2. Give an account of the Canterbury Tales of Chaucer, including the same particulars.
3. Sketch the life of Spenser, mentioning his principal works.
4. Do the same with Milton.
5. Give an account of the principal English historical works of the eighteenth century.
6. Characterize and illustrate the poetical genius of Cowper.
7. Characterize and illustrate the poetry of Wordsworth.
8. Write a short criticism on Shakespeare's Julius Cæsar.
9. Explain what you understand to be the essential distinction between the Poetic and the Prosaic.
10. Write out any one of Milton's Sonnets that you may remember.
11. Give an account of the structure of the Sonnet, and explain its peculiar character as a form of poetical composition.
12. Compare the styles of Johnson and of Burke.

MODERN LANGUAGES.—*Examiner, Dr. Frädersdorf.*

[HONOR CLASS.]

Translate into English:—

Der erste, welcher die Malerei und Poesie mit einander verglich, war ein Mann von feinem Gefühle, der von beiden Künsten eine ähnliche Wirkung auf sich verspürte. Beide empfand er, stellen uns abwesende Dinge als gegenwärtig, den Schein als Wirklichkeit vor; beide tauschen, und beider Täuschung gefällt.

Ein zweiter suchte in das Innere dieses Gefallens einzubringen, und entdeckte, daß es bei beiden aus einerlei Quelle fließe. Die Schönheit, deren Begriff wir zuerst von körperlichen Gegenständen abziehen hat allgemeine Regeln, die sich auf mehrere Dinge anwenden lassen; auf Handlungen, auf Gedanken sowohl als auf Formen. Ein dritter, welcher über den Werth und über die Vertheilung dieser allgemeinen Regeln nachdachte, bemerkte, daß einige mehr in der Malerei, andere mehr in der Poesie herrschten; daß also bei diesen die Poesie der Malerei bei jenen die Malerei der Poesie mit Erläuterungen und Beispielen ausbilden könne. Das erste war der Liebhaber; das zweite der Philosoph; das dritte der Kunsttrichter.

Translate into English:—

Sire! Jüngst kam ich an von Flandern und Brabant.—

So viele reiche, blühende Provinzen!

Ein kräftiges, ein großes Volk—und auch

Ein gutes Volk—und Vater dieses Volkes,

Das, dacht ich, das muß göttlich seyn!—Da stieß

Ich auf verbrauchte menschliche Gebeine—

Sie haben Recht. Sie müssen. Daß Sie können

Was Sie zu müssen eingesehn, hat mich

Mit schauernder Bewunderung durchdrungen.

O Schade, daß, in seinem Blut gewälzt,

Das Opfer wenig dazu taugt, dem Geist

Des Opfers ein Loblied anzustimmen!

Daß Menschen nur—nicht Wesen höherer Art—

Die Weltgeschichte schreiben!—Lautere
Jahrhunderte verdrängen Philipp's Zeiten;
Die bringen milde Weisheit; Bürgerglück
Wird dann versöhnt mit Fürstengröße wandeln,
Der farge Staat mit seinen Kindern geizen
Und die Nothwendigkeit wird menschlich seyn.

Class Ex-
amination

Translate into German:—

It is, therefore, not a sufficient vindication of a character that it is drawn as it appears; for many characters ought never to be drawn: nor of a narrative, that the train of events is agreeable to observation and experience; for that observation which is called knowledge of the world will be found much more frequently to make men cunning than good. The purpose of these writings is surely not only to show mankind, but to provide that they may be seen hereafter with less hazard; to teach the means of avoiding the snares which are laid by treachery for innocence, without infusing any wish for that superiority with which the betrayer flatters his vanity; to give the power of counteracting fraud, without the temptation to practise it; to initiate youth, by mock encounters, in the art of necessary defence, and to increase prudence without impairing virtue.

1. Name some of Lessing's principal works.
2. What is the subject of his *Laokoon*, and what influence did this work exercise in a literary point of view?
3. Name some of the German writers that formed, in connexion with Lessing, the so-called "*Sieben Gestirn*."
4. State what you may have read or know of the above writers and their respective works.
5. Compose in German a brief biographical sketch of Schiller or Göthe.

DISCOURS DU MARECHAL DE BIRON A HENRI IV.

Quoi! sire, on vous conseille de monter sur mer, comme s'il n'y avait pas d'autre moyen de conserver votre royaume que de le quitter! Si vous n'étiez pas en France, il faudrait percer au travers de tous les hasards et de tous les obstacles pour y venir; et, maintenant que vous y êtes, on voudrait que vous en sortissiez; et vos amis seraient d'avis que vous fissiez de bon gré ce que les plus grands efforts de vos ennemis ne sauraient vous contraindre de faire!

En l'état où vous êtes, sortir seulement de la France pour vingt-quatre heures, c'est s'en bannir pour jamais.

Le péril, au reste, n'est pas si grand qu'on vous le dépeint: ceux qui nous pensent envelopper sont, ou ceux-mêmes que nous avons tenus enfer-

amination.

més si lâchement à Paris, ou gens qui ne valent pas mieux, et qui auront plus d'affaires entre eux-mêmes que contre nous. Enfin, sire, nous sommes en France ; il faut nous y enterrer : il s'agit d'un royaume, il faut l'emporter, ou y perdre la vie ; et, quand même il n'y aurait point d'autre sûreté pour votre personne sacrée que la fuite, je sais bien que vous aimeriez mieux mille fois mourir de pied ferme, que de vous sauver par ce moyen. Votre majesté ne souffrirait jamais qu'on dise qu'un cadet de la maison de Lorraine lui aurait fait perdre terre, encore moins qu'on la vît mendier à la porte d'un prince étranger.

Non, sire, il n'y a ni couronne ni honneur pour vous au-delà de la mer. Si vous allez au-devant du secours de l'Angleterre, il reculera, si vous vous présentez au port de la Rochelle en homme qui se sauve, vous n'y trouverez que des reproches et du mépris.

Je ne puis croire que vous deviez plutôt fier votre personne à la merci des flots et de l'étranger, qu'à tant de braves gentilshommes et tant de vieux soldats qui sont prêts à lui servir de remparts et de bouclier ; et je suis trop serviteur de votre majesté, pour lui dissimuler que, si elle cherchait sa sûreté ailleurs que dans leur vertu, ils seraient obligés de chercher la leur dans un autre parti que le sien.—*Histoire de France.*

M. VILLEMAIN possessed abundant sources of knowledge for his critiques, and what he drew from them, skilfully combined, formed the great material of his literary eloquence, so admirably ductile and pliable, and on all subjects so appropriate. The first of those sources consisted in a profound knowledge of antiquity and of the classic authors ; Germany was overlooked. In fact, M. Villemain had imparted so great an impulse by his investigations on England, as to be justly deemed a mighty step for France—a country that had before been so exclusive, and a knowledge of German is only now beginning to be generally appreciated among writers. The fourth and last, but most prolific, source of M. Villemain's criticisms, lay in his immense historical studies ; he has plunged into all the darkness of the middle ages, and approved himself as erudite an historian, as able and sagacious a critic.

GRAMMATICAL QUESTIONS.

1. What prepositions do the following adjectives require before a noun, or before a verb in the Infinitive ?—

content,
enclin,
jaloux,

empressé
reconnaissant,
capable,

utile,
facile,
habile.

2. What are the respective significations of the following homonymes ?

cour,
cours,

foi,
fois,

laid,
lait,

seau,
sceau.

3. Give the first person singular and plural of the present Subjunctive of the following verbs :—

vouloir,
cueillir,

mouvoir,
peindre,

prendre,
résoudre

s'asseoir,

4. Give the general rules for forming the tenses of verbs.

5. Would you use the Subjunctive Mood after *si* ?

6. Make a list of some conjunctions and conjunctive locutions requiring the subjunctive.

7. Translate the following idiomatic phrases :—

a. Je me fais fort de réussir.

b. Cela ne laisse pas de m'inquiéter.

c. Vous porterez la peine de votre paresse.

d. Malheur à lui, s'ils en viennent aux voies de fait.

8. Give the exact meaning of the following words :—

Désormais—Je ne le croirai plus désormais.

Or—Vous savez le reste ; or, que décidez-vous ?

Donc—Il a menti une fois, donc on ne le croit plus.

Appendix,
No. 8.

Class Ex-
amination.

METAPHYSICS.—*Examiner, Rev. Dr. M'Cosh.*

1. Did Bacon suppose that his method applied to mental as well as material science ? But under what modifications is his method applicable to psychological investigation ? What must be the instrument employed in such investigation ? From what sources, direct and indirect, may it gather information ?

2. Who showed that we do not intuitively know distance by the sense of sight ? How do we come primarily to know distance ? How do we come to know distance by the sense of sight ?

3. Bring out the distinctions in regard to the objects intuitively perceived by the senses. In particular bring out and examine the distinctions between the primary and secondary qualities of matter.

4. State precisely the nature and the amount of the knowledge obtained by self-consciousness. In doing so, you are invited to offer a historical statement of opinions maintained by eminent men on this subject.

5. Unfold and analyse all that is contained in the recognitive power of the mind. Does the memory deceive ?

6. What are the discursive or logical operations of the mind ? Give a psychological analysis of the mental faculties which may be involved in the simple apprehension of logicians.

7. What place has the mental apprehension or phantasm in emotion ? What sort of ideas raise emotions ? What is meant by the motive principles or native appetences of the mind ? Name some of them. How do they stand in reference to emotions ?

8. What associations of colours are recognised as beautiful ? Mention works of art and of nature in which these associations are found.

9. What is the characteristic of the exercises of the will ? Show how the will may influence the emotions and the decisions of the conscience.

10. Can every thing be proven ? What are we at liberty to assume without proof ? But under what conditions ?

11. What account do you give of the mind's apprehension as to substance ? You are invited to give historical notices of opinions. In what sense is "substance" an abstract and in what sense a general phrase ? What is involved in our idea of substance ?

12. Wherein, precisely, do primitive beliefs differ from primitive cognitions ? What sort of conception and belief have we in regard to the infinite ? In answering this question you may give historical notices of opinions.

13. How does the mind reach the idea of quantity ? Specify some primitive judgments in regard to quantity. Are mathematical axioms the generalizations of an outward experience ? In what sense are they generalizations ?

14. In what relations do moral good and happiness stand to each other according to our intuitive convictions ?

1. Name the principal philosophical works of Bacon, and specify the date of their publication. What is his precise doctrine as to final cause ?

Appendix,
No. 8.

General
Class Ex-
amination.

Examine it, and in doing so say what purpose is served by final cause in certain departments of natural science, and in natural theology.

2. Where was Descartes born and where did he die? What was the method followed by him? Is it the same as that recommended by Bacon? or that followed by Reid? Illustrate his method by the way in which he establishes the existence of body.

3. Where and when was Spinoza born? In what faith was he brought up? Of what religious system did he become the expounder? By what dilemma did he seek to establish his conclusions? Examine it.

4. What is the subject treated of by Locke in Book II. of his Essay? What is his account of the origin and genesis of the idea of time? What was the view of our idea of time given in the class?

5. Where does Locke treat of knowledge and intuition? What is his account of knowledge and intuition? Wherein did it differ from that given in the class?

6. What is Leibnitz' doctrine of optimism? What his theory of the origin of evil? Have you any remarks to offer.

7. Name the principal philosophic works of Reid. He says reason has two degrees: what is the distinction between these two? What is the function of reason in the first degree? How does he divide the judgments pronounced by it?

8. What is the province of the speculative reason according to Kant? What are the three ideas of reason? Have they any objective value? What is the province of the practical reason? What is the categorical imperative? What are the three postulates of, or corollaries from, the practical reason?

9. In what relation did Fichte stand to Kant? How would you meet the idealism of Fichte?

10. What is the relation of cause and effect according to Hume? to Brown? and to Mill? Is there more in the relation than these authors suppose? If so, what is there?

11. Name the writers who have endeavoured to show that man is swayed by no other motive than that of a desire to secure pleasure or to avoid pain. Name the eminent authors who have opposed them. On what grounds have they done so? You are invited to offer comments.

12. What form did utilitarianism take in the system of Hume? in that of Paley? and in that of Bentham? Does utilitarianism contain any principle fitted to show that we ought to promote the greatest happiness of the greatest number?

13. What function does Cousin allot to reason? What are the elements or ideas of reason? Offer comments.

14. What eminent men have constructed an *a priori* argument in behalf of the Divine existence? What intuitive elements are involved in the theistic argument? Do they need an experiential element?

JURISPRUDENCE AND POLITICAL ECONOMY.—*Examiner, Professor Leslie.*

POLITICAL ECONOMY.

1. What causes will regulate the increase or decrease in the next twenty-five years of the rate of wages in Ireland?

2. What causes will regulate the increase or decrease in the next twenty-five years of the amount of rent in North America?

3. What causes will regulate the increase or decrease in the next five years of the rate of interest in Mexico?

4. State the causes on which the price of each of the following commodities at the end of the present century will depend—

- (a.) Cotton, and cotton manufactures respectively ;
- (b.) Rags, paper, and newspapers respectively ;
- (c.) Gold and silver plate respectively ;
- (d.) Potatoes, bread, and butchers' meat respectively ;
- (e.) Tea and spirits respectively.

Appendix,
No. 8.

General
Class Ex-
amination.

5. Prove that a sensible decline in the value of the precious metals tends to raise the nominal or pecuniary rate of interest; and, moreover, that a rise in the rate of interest attributable to this cause is merely a nominal one.

6. Point out the material differences between bills of exchange and bank notes, considered as portions of the circulation of this country.

7. What causes will determine the amount of metallic currency necessary for the domestic trade of Russia in 1872?

8. What is the limit to the premium on foreign bills of exchange?

9. Prove that a rapid increase in the foreign trade of a country tends—

- (a.) To raise the price of its labour and raw materials ;
- (b.) To lower the price of its manufactures.

10. Explain the effect of the nature of the consumption of a country upon the nature and distribution of its wealth.

11. State the peculiar advantages and disadvantages of direct and indirect taxation respectively.

12. Who are the ultimate sufferers of the losses of English mercantile ships confiscated for breaking the American blockade?

THIRD YEAR ARTS AND FIRST YEAR MEDICINE AND ENGINEERING STUDENTS.

CHEMISTRY.—*Examiner, Dr. Andrews.*

1. What are the different states of matter? Describe them and the conditions under which bodies pass from one state to another.

2. In graduating a mercurial thermometer, what are the chief points requiring attention in order to secure an accurate instrument?

3. Describe the method of correcting a dry gas for temperature and pressure.

4. What are the circumstances which influence the boiling point of a liquid?

5. If water be cooled to 18° F., without freezing, and then be agitated, how much of the water will be suddenly converted into ice?

6. Give some account of "regelation," and of the conditions under which it takes place.

7. Mention the principal gases which have been liquefied, and describe the methods by which their liquefaction has been effected.

8. Describe the method of determining the latent heat of steam, and state how it is affected by the temperature at which the vapour is formed.

9. How is nitrogen gas prepared, and under what conditions will it combine with the following elements, viz.:—hydrogen, oxygen, and carbon?

10. What is the supposed composition of ammonium? State also the reasons for assuming the possible existence of such a compound.

11. Give the composition, by weight and by volume, of the following compounds:—water, ammonia, deutoxide of nitrogen, hydrochloric acid, carbonic oxide, marsh gas, olefiant gas (H=1; O=8; N=14; Cl. 35.5; C=6).

Appendix,
No. 8.
General
Class Ex-
amination.

12. Mention some of the natural groups under which certain elements may be classed, and the leading properties of each group.

13. What are the sources and properties of iodine, and how is it prepared?

14. Give an account of the chemical changes which take place in the respiration of animals and of plants.

15. Describe the solar spectrum, and contrast it with the spectra of the following metals:—sodium, lithium, strontium.

16. State the characteristic lines of the spectra of the new metals, cesium and rubidium, and describe the chemical methods by which these metals have been separated from potassium.

17. What are the distinguishing tests of baryta, lime, and magnesia, respectively?

18. What is the composition of cast iron, and how is it converted into malleable iron?

19. Describe the principal varieties of sugar and their distinguishing properties.

20. Mention the more important acids of the form C_{2n} , H_{2n} , O_4 , and state how they can be derived from their respective alcohols.

21. Give an account of the electrical condenser, and of the mode of employing it to exhibit the tension of the poles of a voltaic pile.

22. If the gold leaves of an electroscope are diverging from a permanent charge, how can it be determined whether the electricity is positive or negative?

23. Show, by Ohm's theorem, that when the terminal plates of a voltaic battery are connected by a thick and short copper wire, the force of the current is independent of the number of elements.

24. Give an account of voltaic induction, and of the properties of induced currents.

The following may be substituted for questions 21, 22, 23, and 24:—

1. Describe the compounds of mercury and chlorine, their preparations and properties.

2. What are the distinguishing properties of cane sugar, and of glucose?

3. Describe the action of polarized light on solutions of sugar.

4. Give a general account of the derived ammonias, and of the methods of preparing them.

NATURAL HISTORY.—*Examiner Dr. Wyville Thomson.*

ZOOLOGY.

1. Give the general characters of the sub-kingdom Protozoa.

2. What are the properties of Sarcodæ?

3. Give the characters of the Foraminifera, and state some of the principal structural modifications in the group.

4. Describe the genus *Grantia* among Sponges.

5. Give the general characters of the sub-kingdom Cœlenterata, and the character of its principal subdivisions.

6. How would you distinguish a *Coryne* from a *Sertularia*?

7. What is the structure, and what are the functions of thread-cells?

8. Describe the mode of reproduction in Tubularia, or in Campanularia.

9. What are the structural differences between the umbrellas of the Steganophthalmata, and the nectocalyces of the naked-eyed Medusæ?

10. What is the general structure of Actinia?

11. Describe the general features of a Coral reef.

12. Describe the ambulacral vascular system in an Echinus.

13. Describe the structure of a Tape-worm, and refer it to its genus, *Appendix*,
order, and class. No. 8.
14. Describe the arrangement of the nervous system in the Annulosa. General
15. Give the distinguishing characters of a Gasteropod, a Cephalopod, Class Ex-
and a Pteropod, among Mollusca. amination.
16. What special characters distinguish the skeleton of a bony fish from
that of a Reptile or Mammal?
17. What bones, according to Owen's view, constitute the hæmal arch
and appendages of the parietal vertebra in Fishes?
18. Describe the heart, and give an outline of the circulation in Fishes.
19. In what Fishes do we find electric organs developed? and what is
the structure of these organs?
20. Name the principal fins (paired and unpaired) in Fishes, and state
their positions.
21. Describe the gills in the Lancelet, the Lamprey, the Perch, and the
Shark.
22. To what order among Fishes do the Salmonidae belong?
23. Describe the peculiar modification of the skeleton in Tortoises.
24. Describe the modifications of the anterior extremity met with in
the class Reptilia, recent and fossil.
25. Distinguish the Batrachii among Reptiles from Saurii.
26. Describe the foot in the Raptores, and contrast it with that of the
Scansores.
27. What bones of the wing of a bird support the primary flag-feathers?
28. Describe the dentition of the Rodentia.
29. Describe any peculiarities in the skeleton of the Marsupialia and
of the Monotremata.

BOTANY.

1. Describe and distinguish the spiral, scalariform, dotted and disciferous
tissues, and indicate the plants and the parts of plants in which these
tissues are severally found.
2. Describe the phenomena of the motion of fluids within vegetable
cells.
3. What are raphides; and what is their usual composition?
4. Enumerate the principal substances which form the secreted contents
of vegetable cells.
5. Describe some well-marked form of cell multiplication.
6. What is laticiferous tissue? What are its functions; and in what
parts of plants does it principally occur?
7. Describe the structure and mode of growth of a palm stem, and state
in what it differs from the stem of an ordinary grass.
8. Describe, 1, an orthotropical; 2, an anatropal; and 3, a campylotropical
ovule.
9. What is the position, the structure, and the function of the conduct-
ing tissue of the style?
10. Give the *distinguishing* characters and the therapeutic properties
of the following Natural Orders:—Umbelliferæ, Cruciferæ, Leguminosæ,
and Boraginaceæ.
11. Name any economic plants belonging to the Natural Order Euphor-
biaceæ. State their properties and uses, their mode of cultivation and
the regions in which they are cultivated.
12. Describe the structure of the fig, the strawberry, and the pine-
apple.
13. What are the properties and the economic uses of the two species
(or varieties) Cannabis Indica and Cannabis Sativa?

Appendix,
No. 8.
General
Class Ex-
amination.

14. How would you distinguish the Orchidaceæ from the Iridaceæ?
15. Describe the following parts of a moss:—the seta, the theca, the calyptra, the peristome.
16. Name the three plants provided, refer them to their several natural orders, and give your reasons.
17. To what natural orders do the following genera belong:—*Caltha*, *Anemone*, *Lathyrus*, *Scilla*, *Fumaria*, *Stellaria*, *Pelargonium*, *Musa*, *Chamærops*?

PHYSICAL GEOGRAPHY.—*Examiner, Dr. Wyville Thomson.*

1. Give a general sketch of the distribution of active volcanic vents.
2. What is the structure of a sub-aërial volcanic cone?
3. What relation in distribution and in apparent cause does volcanic bear to earthquake action?
4. Describe the principal phenomena connected with the formation and the melting of icebergs.
5. What are the chief causes of the divergence of the isothermal lines from the parallels of latitude?
6. Sketch generally the distribution of the isabnormal lines.
7. Give some instances of the sudden elevation of large tracts of land, and indicate the conditions under which these elevations have taken place.
8. Give a sketch of the distribution of Coral reefs.

NATURAL PHILOSOPHY.—*Examiner, Dr. Stevelly.*

[FOR HONOR CLASS.]

1. A perfectly hard body is moving obliquely in a given line towards a perfectly hard, smooth, and immovable plane, given in position; investigate the rate of velocity after the collision, both as to direction and magnitude, with the velocity before: and if v be the velocity before the collision, give the expression for the lost velocity.
2. Given the directions of two forces which act at the same point of a body and the direction of their equivalent (or of its equal and opposite, the force that would equilibrate with them); prove that if you draw any line whatever across these three, the three forces will bear to each other respectively the ratio of the rectangles under the intercepted parts of these respective directions between this line and the point of application of the forces, and the portions of this line intercepted between the directions of the other two forces.
3. Show how to find the centre of gravity of three heavy lines which form the perimeter of a given triangle, their breadth and thickness being supposed indefinitely small; and prove, that that centre coincides with the centre of the circle inscribed in the triangle formed by joining the middle points of the sides of the given triangle.
4. Two forces which have to each other the ratio of m to n are applied to a lever at two given points, and in given directions; find the position that the fulcrum must have in order that these forces may equilibrate.
5. Find the algebraic expression for the space a body falling freely by the force of gravity g would describe from rest in the same time that another body would run from rest down the length of a smooth inclined plane whose length is l , and height is h ; and from this give the simple geometric construction by which the simultaneous places of two bodies

would be marked, which were discharged at the same instant, from the top, one to run along the plane, the other to fall freely and vertically. *Appendix,
No. 8.*

6. Show by a general expression, derived from Galileo's Theorem, that the spaces described by a body falling freely, under the action of a uniformly accelerating force, in any equal successive portions of time, are in the proportion of the successive terms of the series of odd numbers. *General
Class Ex-
amination.*

7. Explain how a given point of a suspended heavy body may be made to oscillate in the arc of a cycloid whose axis is in a vertical position : and if the centre of gravity be that point, show how the free force which accelerates its motion along that path varies. Investigate the variation of the free force, when the path is a circular arc.

8. Show that the diminution of the force of gravity caused by the diurnal rotation of the earth (supposed to be an exact sphere) is proportional to the square of the cosine of the latitude of the place of observation.

9. Kepler found, when examining the observations made by Tycho Brahe, that the area of the sun's apparent circular disc was continually, through the year, proportional to the apparent angular motion of the sun among the fixed stars per hour (his apparent "horary motion"). Explain how this fact led him to the discovery of the first law of planetary motion. What conclusion did Newton deduce from this first law ?

10. Suppose two of the planets to move in exact concentric circles round the sun, supposed at rest in the common centre ; and that the squares of their periodic times are to each other as the cubes of the radii of the circles they describe (that is, their distances from the sun), deduce from these data that the accelerating forces of gravity towards the sun, exercised on each, are reciprocally as the squares of the distances. Find also the proportion of their moving forces, or weights, towards the sun.

11. Find the distance through which either of the foregoing bodies would require to fall from rest, under the influence of a uniform force equal to that exercised on it at every instant by the sun, in its orbit, in order that it should acquire the velocity with which it is moving in its orbit.

SPECIAL PRIZE EXAMINATION.

MIXED MATHEMATICS.—*Examiner, Dr. Stevelly.*

1. Show that any number of couples, acting on a rigid body in the same or parallel planes, can be reduced to a single equivalent couple, or are in equilibrio. *a*, Determine the equivalent ; or, *b*, State the condition of equilibrium.

2. Two couples act on the same rigid body in planes neither coincident nor parallel, find their equivalent.

3. Explain what is meant by "The Central Axis" of a system of forces which act on several points of a rigid body ; and find its equations.

4. Prove that if a right cylinder be described round the central axis of such a system, that the principal moment retains the same value for any origin taken on the surface of that cylinder.

5. Prove that the volume of any portion of a cylinder contained between any two plane sections of it, is equal to the area of the orthogonal section multiplied by the line joining the centres of gravity of the two plane sections which bound that volume.

6. Apply Guldinus' properties of the centre of gravity to find the area of the surface and the solid contents of the anchor-ring.

7. A heavy elastic string is fastened at one end, and has a weight

Appendix,
No. 8.

General
Class Ex-
amination.

attached to the other, and hangs vertically; determine the total extension of it, taking the weight of its own parts into account.

8. Find the attraction of a number of equal particles ranged continuously in the form of a circular arc, on a particle placed at the centre of that arc, the particles attracting with a force proportional to the produce of their masses divided by the squares of their distances.

9. Show that if a shell of uniform density be bounded by two concentric, similar, and similarly situated ellipsoidal surfaces, the total attraction of that shell on a particle placed anywhere within it vanishes.

10. Show that a heavy particle may be made to oscillate in a cycloid properly placed; and show, that when so oscillating, the accelerating force of gravity along the curve is always directed towards the vertex, and varies as the distance of the particle from that point of its path.

11. Supposing a to denote the acceleration of the motion of a particle along its path s , prove that $a = \frac{d^2s}{dt^2}$.

12. Prove that at any point of the motion of a particle, in an orbit about a fixed centre of force, the velocity at any point in the orbit is that which the particle would acquire in descending from rest through the fourth part of the circle of curvature which passes through the centre of force, under the influence of the central force at that point of the orbit, continued uniform.

EXPERIMENTAL PHYSICS.

1. State and explain the experiments by which it is proved that, at a particular temperature, water assumes a maximum density. State what that temperature is.

2. State, and give the leading facts connected with the most remarkable known deviations from the law that bodies, *generally*, expand by an increase, and contract by a diminution of temperature.

3. Explain why one end of a permanent magnet, which will attract one end of another permanent magnet, but generally repel the other end, will always attract either end of a bar of soft iron.

4. Explain why the similar ends of two permanent magnetic bars, of different intensities, which are mutually repulsive at certain distances, will, when brought near, attract each other.

5. Describe the Leyden Jar, and the proper mode of charging it, and explain why, when its outer coating is insulated from the earth, it receives but a slight charge, and why, when properly charged, it accumulates so large a quantity of electricity.

6. Describe the Tangent Galvanometer, the manner of using it, and give the mathematical demonstration of its principle.

FIRST YEAR ENGINEERING STUDENTS.

GEOMETRICAL DRAWING AND OFFICE WORK.—*Examiner, Professor*
James Thomson.

The examination comprised questions in descriptive geometry, orthographic and isometrical projection, and perspective, together with a scrutiny of drawings executed during the Session.

SECOND YEAR ENGINEERING STUDENTS.

Appendix,
No. 8.

OFFICE WORK AND FIELD WORK.—*Examiner, Professor James Thomson.*

General
Class Ex-
amination.

The examination comprised questions on the business of the course, together with a scrutiny of work performed during the Session, in drawings, maps, and written exercises.

CIVIL ENGINEERING.—*Examiner, Professor James Thomson.*

1. Explain the subdivisions of a prismoid into parts, used in the formulas on which Bidder's Table of Earthwork is founded.
2. What are the chief uses of specifications for engineering works, and what are the chief matters which usually fall to be comprised in them?
3. Explain the relation between the coefficient of friction and the angle of repose, pointing out how, by a simple experiment on the angle of repose, the coefficient of friction between two given bodies may be determined.
4. Give an outline of the process explained in the lectures for estimating the stability of the cofferdam constructed by David Stevenson for excavating rock in the river Ribble.
5. Explain how, with the aid of a theodolite, to range a straight line from one given point to another, each being invisible from the other, and no point being known in the line passing through them from which they can both be seen.
6. Calculate the weight of a piece of round cast-iron pipe 24 inches bore, $1\frac{1}{4}$ inch thick, and 8 feet long, taking the weight of cast-iron at 263 lbs. to the cubic inch.
7. Describe briefly the manufacture of Portland cement.
8. What is meant by the saltpetreing of limes, cements, and mortars? and what are the chief opinions that have been offered as to its origin?
9. In what manner would men in a diving bell under water be injured if the flexible pipe conveying air down to them should burst?

MINERALOGY AND GEOLOGY.—*Examiner, Dr. Wyville Thomson.*

1. Describe the phenomena of metamorphism, and contrast them with the effects of volcanic action on sedimentary rocks.
2. How far do you regard metamorphism a test of the age of a group of rocks?
3. Of what value would you consider physical structure and mineral composition in determining the geological age of a group of rocks?
4. Name the formations in ascending order from the variegated marls of the Trias to the white chalk, and name three fossils characteristic of each formation.
5. Characterize the principal genera of Cephalopodous mollusca, and sketch their distribution in time.
6. Name the fossils provided, and numbered 1, 2, and 3, refer them to their zoological position, and state the formations of which they are severally characteristic.
7. Describe and refer to their zoological position and to their geological horizon, the following fossil genera—*Graptolites*, *Zaphrentis*, *Actinocrinus*, *Trinucleus*, *Pentamerus*, *Eurypterus*, and *Lingula*.
8. Contrast, in physical characters and in chemical composition, the minerals of the Felspathic, the Hornblendic, and the Zeolitic series.

[The Engineering Students were examined in the other classes with the Arts Students.]

Appendix,
No. 8.

General
Class Ex-
amination.

AGRICULTURE.—*Examiner, Dr. Hodges.*

THEORY OF AGRICULTURE.

1. What is the usual composition of a properly prepared specimen of superphosphate of lime made from bone ash?
 2. Give an example of the usual composition, as shown by analysis, of a specimen of superphosphate prepared from coprolites.
 3. What constituents of plants do the following rocks yield by their decomposition :—Granite, Sandstone, Clay Slate?
 4. State the alterations which farm-yard manure undergoes when long exposed to the air.
-

PRACTICE OF AGRICULTURE, AND HISTORY AND DISEASES OF FARM ANIMALS.

1. Describe the operations required to prepare a field for the cultivation of flax, and the methods employed in the treatment of the crop after its removal from the field.
 2. State the quantities of seed per acre required to sow the following crops :—Wheat, Oats, Turnips.
 3. Mention the parts which compose the foreleg of the horse.
 4. What is the average composition of cow's milk?
- [The other classes were examined with the Arts Students.]
-

FACULTY OF MEDICINE.

PRACTICE OF MEDICINE.—*Examiner, Professor Ferguson.*

1. Give all the morbid products of inflammation of the pleura, its terminations, the changes in the chest, and its parietes produced by them, and their signs.
 2. State the premonitory symptoms, the peculiar features of the eruption, the complications and the sequelæ considered characteristic of Rubeola, Scarlatina, and Variola.
 3. Enumerate the chief causes of Peritonitis, the symptoms and signs of its presence, its pathology and terminations.
 4. Give the pathology of Apoplexy in all its stages.
 5. What are the indications of treatment in Croup, the means usually employed, and the principal sources of danger to the patient?
-

PRACTICAL CHEMISTRY.—*Examiner, Dr. Andrews.*

1. What is the composition of the ammoniaco-magnesian phosphate, and of the phosphate of magnesia into which it is converted by heat?
2. How would you determine the amount of phosphoric acid in bone earth?
3. Describe the process for separating from one another the following bases, if present in a solution :— Fe_2O_3 , BaO , CaO , MgO .
4. Explain, by symbols, the reaction which takes place when the protosulphate of iron is heated with an excess of nitric acid.
5. What are the blowpipe tests of the following bases :—potash, soda, alumina, oxide of manganese, and oxide of cobalt?
6. Describe the mode of analyzing an alloy of silver and copper.
7. Give an account of Liebig's method of preparing cyanide of potassium, and explain fully the reaction.

8. State the general principles on which Liebig's method of determining the amount of urea in urine depends. *Appendix, No. 8.*
9. What are the distinctive properties of the hippuric and uric acids? General Class Examination.
10. What are the tests of morphia, and how would you separate that alkaloid from a complex organic liquid?
11. Describe Fehling's method of determining the amount of sugar in a given quantity of diabetic urine.
12. What are the tests of bile?

FACULTY OF LAW.—FIRST YEAR STUDENTS.

JURISPRUDENCE.—*Examiner, Professor Leslie.*

1. What is meant by the terms "Universal Justice," and "the Fountains of Law," in Lord Bacon's aphorisms?
2. Lord Bacon attributes obscurity in a body of laws to several causes. Show, from Mr. Maine's researches, that these causes of obscurity become thicker in the progress of society, until the last agency of law reform removes them.
3. It follows from Austin's definition, that popular usage cannot either originate or extinguish positive law?
4. (a) There is, according to Austin, an essential difference between rules of positive law, and rules of religion and morality.
(b) Does that difference exist in every condition of human society?
5. How does Austin define the Sciences of Jurisprudence, Legislation, and Ethics, respectively?
6. What is the meaning of the phrase used by Mr. Mill and other writers—"the Metaphysics of positive law?"
7. What is the real nature and significance of the difference between law and equity?
8. Austin speaks of "certain notions which meet us at every step as we travel through the science of law." Do these notions meet us at every *historical* step?
9. State the substance of Austin's criticism of the distinction drawn between real and personal rights by civilians and by English lawyers respectively.
10. Explain Mr. Maine's formula of the progress of society as being "a movement from Status to Contract."
11. What is the explanation of the old rule of English law which excluded the half-blood from succession to real property?
12. Hallam ("Middle Ages," Chap. viii., Part 1.) quotes from Hickee a record of a suit in the County Court, in Canute's reign. What are, according to modern ideas, the chief defects of such a mode of trial?
13. "If any one accuse a king's thane of homicide, if he dare to purge himself, let him do it along with twelve king's thanes" (Laws of Alfred). What mode of trial is here appointed? Is there anything analogous to it in modern English jurisprudence?
14. Explain the nature and origin of the wehrgeld.
15. Point out any remarkable differences in the Laws of England as existing at the three following periods—A.D. 1062, A.D. 1162, and A.D. 1862.

SECOND YEAR STUDENTS.

JURISPRUDENCE AND CIVIL LAW.—*Examiner, Professor Leslie.*

1. Explain and comment on Austin's conception of law as "the subject of an abstract science."—Preface, p. xxv.

Appendix,
No. 8.

General
Class Ex-
amination.

2. Explain and illustrate what Austin means by the arrangement of a body of law *in a natural order*.

3. Austin says of the distinction between *jura in rem* and *jura in personam*:—"The difference whereon it rests runs through every department of every system of Jurisprudence." Is this true of *every* system of Jurisprudence?

4. Explain the division of law into that of Persons and of Things, and give your reasons for thinking it essential or otherwise.

5. What is the difference between a *quasi contract* and an *implied contract*?

6. Point out the principal resemblances and contrasts between English and Roman equity.

7. Explain the origin of the distinction between *res Mancipi* and *res nec Mancipi*, and contrast it with that between *movables* and *immovables*.

8. Prove historically the fallacy of the doctrine of *Natural Rights*.

9. Is there any historical connexion between Roman and feudal tenures?

10. "The more archaic the code, the fuller and minuter is its penal legislation."—"Maine's Ancient Law," p. 368). How do you account for this phenomenon?

11. Trace the historical connexion between a Testament, a Conveyance, and a Contract.

12. What are the main problems to be solved by Historical Jurisprudence?

Matricula-
tion Ex-
amination.

MATRICULATION EXAMINATION.—OCTOBER, 1862.

LATIN.—*Examiner, Rev. Dr. Reichel.*

I.—Translate into English any two of the following extracts:—

1. O Dea, si prima repetens ab origine pergam
Et vacet annales nostrorum audire laborum,
Ante diem clauso componat Vesper Olympo.
Nos Troja antiqua, si vestras forte per aures
Trojae nomen iit, diversa per aequora vectos
Forte sua Libycis tempestas adpulit oris.
Sum pius Aeneas, raptos qui ex hoste Penates
Classe veho mecum, fama super aethera notus.
Italiam quaero patriam et genus ab Iove summo.
Bis denis Phrygium conscendi navibus aequor,
Matre dea monstrante viam, data fata secutus.
Vix septem convulsae undis Euroque supersunt.
Ipse ignotus, egens, Libyae deserta peragro,
Europa atque Asia pulsus.

VIRGIL—*Aeneid*, Book I.

2. O Venus, regina Gnidi Paphique,
Sperne dilectam Cypron et vocantis
Thure te multo Glycerae decoram
Transfer in aedem.

Fervidus tecum puer et solutis
Gratiae zonis properentque Nymphae
Et parum comis sine te Juventas
Mercurisque.

HORACE—*Odes*, Book I.

3. Sed Allobroges diu in incerto habuere, quidnam consilii caperent. In altera parte erat aes alienum, studium belli, magna merces in spe victoriæ : at in altera majores opes, tuta consilia, pro incerta spe certa praeconia. Haec illis volentibus, tandem vicit fortuna reipublicae. Itaque Q. Fabio Sangae, cujus patriocinio civitas plurimum utebatur, rem omnem uti cognoverant aperiunt. Cicero, per Sangam consilio cognito, legatis praecepit, ut studium conjurationis vehemeter simulent, ceteros adeant, bene polliceantur ; dentque operam, uti eos quam maxime manifestos habeant.—SALLUST.

Appendix,
No. 8.
Matriculation Examination.

4. Ad haec quae visum est Caesar respondit : sed exitus fuit orationis, "Sibi nullam cum his amicitiam esse posse, si in Gallia remanerent : neque verum esse, qui suos fines tueri non potuerint, alienos occupare ; neque ullos in Gallia vacare agros, qui dari tantae praesertim multitudini sine injuria possint ; sed licere, si velint, in Ubiorum finibus consistere, quorum sint legati apud se et de Suevorum injuriis querantur et a se auxilium petant : hoc se Ubiis imperaturum."—CAESAR.—*De Bello Gallico*, Book IV.

II.—Translate the following into Latin Prose :—

Having received arms and hostages, Crassus set out into the territories of the Vocates and Tarusates. Then, indeed, the barbarians, in consternation, because they found that a town fortified both by the nature of the place and by the hand of man, had been stormed within a few days after its being reached, began to send ambassadors in all directions, to conspire together, to exchange hostages, to levy troops. Ambassadors are sent even to those states which are on the confines of Aquitania ; from thence auxiliary forces and generals are summoned.

MATHEMATICS.—*Examiner, Professor Slessor.*

ARITHMETIC.

1. Give the rules for the multiplication and division of fractions, and find the value of

$$\frac{\frac{1}{2} - \frac{2}{5}}{\frac{37}{6} - 1\frac{3}{7} \times 4\frac{1}{5}} \text{ of } £1 \text{ 5s. and of } \frac{1}{2} - \frac{1}{7} + \frac{1}{21} - \frac{1}{6} + \frac{1}{5}$$

2. Exhibit any decimal as a fraction and as the sum of a number of fractions.

State and prove the rule for the multiplication of decimals. Multiply 27·856 by ·0093 ; also divide 132·79 by 24·5, and 14570 by ·0031.

3. Show how a vulgar fraction may be reduced to a decimal. Reduce $\frac{7}{224}$ to a decimal. Will $\frac{3}{6144}$ recur when reduced to a decimal ?

4. Archimedes discovered that the crown made for King Hiero consisted of gold and silver in the ratio of 2 : 1. How much per cent. was gold, and how much per cent. silver ?

5. A person buys eight hundred 3 per cent. consols at 85, and five hundred more when they are at 97. How much per cent. will he get for his money, after deducting an income tax of 7*d.* in the pound ?

EUCLID.

1. If one side of a triangle be produced, the exterior angle is greater than either of the interior opposite angles.

2. Parallelograms upon the same base and between the same parallels are equal to one another.

Appendix,
No. 8.Matriculation
Examination.

ALGEBRA.

1. Explain the meaning and use of brackets and indices, and simplify $a - [b - \{c - (d - e)\}]$; and express algebraically the square and square root of $x + y + z$.
2. Explain the meaning and use of indices, and prove that $a^5 + a^7 = a^{12}$.
3. Multiply $1 + x - x^2$ by $1 - x + x^2$, and divide $x^8 + 2x^6 + 3x^4 + 2x^2 + 1$ by $x^4 - 2x^3 + 3x^2 - 2x + 1$; also reduce to a single fraction $\frac{4}{a-b} - \frac{b}{a} + \frac{4}{a+b}$.
4. Find the greatest common measure and least common multiple of $x^2 - 3x - 70$, $x^3 - 39x + 70$.
5. Solve the following equations:

$$(1) 5x - \{8x - 3(16 - 6x - 4 - 5x)\} = 6.$$

$$(2) \frac{1}{9} \left\{ 3x - 6 - 5 \left(\frac{7}{2}x - 5 \right) \right\} + 13(x - 5) + \frac{1}{4} = 0.$$

$$(3) (x - a)(x - b) + (x - c)(x - d) = x^2 + (x + a + b)(x + c + d).$$

$$(4) \frac{x-3}{5} + \frac{x-7}{12} - \frac{x-8}{4} = \frac{13}{12}.$$

SCHOLARSHIP EXAMINATIONS.—OCTOBER, 1862.

LITERARY SCHOLARSHIPS.—FIRST YEAR STUDENTS.

GREEK.—*Examiner, Professor MacDouall.*

I.—1. Translate accurately and perspicuously the following extract from the *Menippus* of LUCIANUS:—

διελθόντες δὲ καὶ τούτους ἐς τὸ πεδῖον* ἐςβάλλομεν τὸ Ἀχερούσιον,* εὐρίσκομέν τε αὐτόθι τοὺς ἡμιθέους τε καὶ τὰς ἡρώϊνας καὶ τὸν ἄλλον ὄμιλον τῶν νεκρῶν κατὰ ἔθνη καὶ φύλα διαιτωμένους,* τοὺς μὲν παλαιούς τινες καὶ εὐρωτιῶντας* καὶ (ὡς φησιν Ὀμηροῦ†) ἀμενηνοῦς,* τοὺς δ' ἔτι νεαλεῖς* καὶ συνεστηκότας,* καὶ μάλιστα τοὺς Αἰγυπτίους† διὰ τὸ πολυαρκεῖς* τῆς ταριχείας.* τὸ μέντοι διαγινώσκειν ἕκαστον οὐ πάνυ τι ἦν ῥᾶδιον* ἅπαντες γὰρ ἀτεχνῶς* ἀλλήλοις γίνονται ὅμοιοι, τῶν ὁστέων γεγυμνωμένων* πλὴν μόγις τε καὶ διὰ πολλοῦ ἀναθεωροῦντες αὐτοὺς ἐγινώσκομεν. ἔκειντο δ' ἐπ' ἀλλήλοις ἀμαυροί* καὶ ἄσημοι* καὶ οὐδὲν ἔτι τῶν παρ' ἡμῖν καλῶν φυλάττοντες. * * τοιγάρτοι ἐκεῖνα ὁρῶντι ἐδόκει μοι ὁ τῶν ἀνθρώπων βίος πομπῇ τινι μακρᾷ προσεοικῆναι, χορηγεῖν* δὲ καὶ διατάττειν ἕκαστα ἢ Τύχῃ διάφορα καὶ ποικίλα τοῖς πομπέουσι σχήματα προσάπτουσα· τὸν μὲν γὰρ λαβοῦσα, εἰ τύχοι, βασιλικῶς διεσκεύασε, τίاران τε ἐπιθέισα καὶ δορυφόρους παραδοῦσα καὶ τὴν κεφαλὴν στέψασα τῷ διαδήματι, τῷ δὲ οἰκέτῳ σχῆμα περίεθηκε, τὸν δὲ τινα καλὸν εἶναι ἐκόσμησε, τὸν δὲ ἄμορφον καὶ γελοῖον παρεσκεύασε· παντοδαπὴν* γάρ, οἶμαι, ἔδει γενέσθαι τὴν θέαν.* πολλὰκις δὲ καὶ διὰ μέσης τῆς πομπῆς μετέβαλε τὰ ἐνίων* σχήματα, οὐκ ἔῴσα ἐς τέλος διαπομπεῦσαι* ὡς ἐτάχθησαν, ἀλλὰ μεταμφιέσασα* τὸν μὲν Κροῖσσον† ἠνάγκασε τὴν οἰκέτου καὶ αἰχμαλώτου* σκεπὴν ἀναλαβεῖν, τὸν δὲ Μαιάνδριον,† τέως ἐν τοῖς οἰκέταις πομπέοντα, τὴν Πολυκράτους† τυραννίδα μετενέδυσσε.* καὶ μέχρι μὲν τίνος εἴασε χρῆσθαι τῷ σχήματι· ἐπειδὴν δ' οὐ τῆς πομπῆς καιρὸς παρέλθῃ,

τηνικαῦτα* ἕκαστος, ἀποδοὺς τὴν σκευὴν καὶ ἀποδυσάμενος τὸ σχῆμα μετὰ τοῦ σώματος, οἷόςπερ ἦν πρὸ τοῦ γίνεσθαι, μηδὲν τοῦ πλησίον διαφέρων. ἔνιοι δ' ὑπ' ἀγνωμοσύνης,* ἐπειδὴν ἀπαιτῇ τὸν κόσμον ἐπιστάσα ἡ Τύχη, ἄχθονται τε καὶ ἀγανακτοῦσιν, ὥσπερ οἰκείων τινῶν στερισκόμενοι* καὶ οὐχ ἅ πρὸς ὀλίγον ἐχρήσαντο* ἀποδιδόντες.

Appendix,
No. 8.
Scholarship
Examina-
tions.

2. In brief notes upon the words marked with an *asterisk* point out whatever may seem most noticeable, in regard to etymology or formation,—to usage,—or to accentuation, if this discriminate any word found here from another.

3. Advert very briefly to allusions conveyed in the names marked with an *obelus*.

II.—Translate likewise this passage from the *Hellenica* of ΞΕΝΟΦΩΝ :—

ὁ δὲ Καλλικρατίδας, ξυγκαλέσας τοὺς Λακεδαιμονίων ἐκεῖ παρόντας, ἔλεγεν αὐτοῖς τοιάδε. “ἐμοὶ μὲν ἀρκεῖ οἴκοι μένειν, καί, εἴτε Λύσανδρος εἴτε ἄλλος τις ἐμπειρότερος περὶ τὰ ναυτικά βούλεται εἶναι, οὐ κωλύω τὰ κατ’ ἐμέ· ἐγὼ δ’ ὑπὸ τῆς πόλεως ἐπὶ τὰς ναῦς πεμφθεὶς οὐκ ἔχω τί ἄλλο ποιῶ ἢ τὰ κελευόμενα ὥς ἂν δύνωμαι κράτιστα. ὑμεῖς δὲ πρὸς ἃ ἐγὼ τε φιλοτιμούμαι καὶ ἡ πόλις ἡμῶν αἰτιάζεται,—ἴστε γὰρ αὐτὰ ὥσπερ καὶ ἐγώ,—ξυμβουλεύετε τὰ ἄριστα ὑμῖν δοκοῦντα εἶναι περὶ τοῦ ἐμέ ἐνθάδε μένειν ἢ οἵκαδε ἀποπλεῖν ἐροῦντα τὰ καθεστῶτα ἐνθάδε.” οὐδενὸς δὲ τολμήσαντος ἄλλο τι εἰπεῖν ἢ τοῖς οἴκοι πεῖθεσθαι ποιεῖν τε ἐφ’ ἃ ἦκοι, ἐλθὼν παρὰ Κύρον ἦτει μισθὸν τοῖς ναύταις. ὁ δὲ αὐτῷ εἶπε δύο ἡμέρας ἐπισχεῖν. Καλλικρατίδας δέ, ἀχθεσθεὶς τῇ ἀναβολῇ καὶ ταῖς ἐπὶ τὰς θύρας φοιτήσεσιν, εἰπὼν ἀθλιωτάτους εἶναι τοὺς Ἕλληνας, ὅτι βαρβάρους κολακεύουσιν ἔνεκα ἀργυρίου, φάσκων τε, ἣν σωθῇ οἵκαδε, κατὰ γε τὸ αὐτῷ δυνατὸν διαλλάξαι Ἀθηναίους καὶ Λακεδαιμονίους, ἀπέπλευσεν εἰς Μίλητον.

Translate with accuracy and spirit the following lines of the *Iliad* :—

“Ἄλλοι μὲν ῥ’ ἔζοντο,¹ ἐρήτυθεν² δὲ καθ’ ἑδρας·

* * * * *

ἀλλὰ μάλ’ οὐκ Ἀχιλῆϊ χόλος φρεσίν, ἀλλὰ μεθήμεν.⁴⁷

[ἦ γὰρ ἄν, Ἀτρεΐδῃ! νῦν ὕστατα⁴⁸ λωβήσαιο.”³²]

1. ¹⁻³². Parse fully and accurately the words thus numbered, giving the Attic forms wherever these differ from the Homeric, and for such words as are not used in Attic substituting Attic equivalents.

2. ³³⁻⁴⁸. Give the etymology and some lexical affinities of the words thus numbered, briefly discussing doubtful cases.

3. Exemplify, from the lines given above, various characteristics of Homeric versification :—

4. Show (*a*) how the most objectionable examples of *hiatus* may be remedied, and (*b*) how room may be found for restoring letters (such as *F*, *λ*, &c.), which commenced certain words in Homeric Greek, though they fell off afterwards.

LATIN.—*Examiner*, Rev. Dr. Reichel.

I.—Translate *accurately* and *fully* the following extracts :—

1. Singulari militum nostrorum virtuti consilia cuiusque modi Gallorum occurrebant, ut est summae genus solertiae atque ad omnia imitanda et efficienda, quae ab quoque traduntur, aptissimum. Nam et laqueis falces

Appendix,
No. 8.
Scholarship
Examina-
tions.

avertebant, quas cum destinaverant, tormentis introrsus reducebant, et aggerem cuniculis subtrahebant, eo scientius, quod apud eos magnae sunt ferrariae atque omne genus cuniculorum notum atque usitatum est. Totum autem murum ex omni parte turribus contabulaverant atque has coriis intexerant. Tum crebris diurnis nocturnisque eruptionibus aut aggeri ignem inferebant aut milites occupatos in opere adoriebantur et nostrarum turrium altitudinem, quantum has cotidianus agger expresserat, commissis suarum turrium malis adaequabant et apertos cuniculos praeusta et praeacuta materia et pice fervefacta et maximi ponderis saxis morabantur moenibusque appropinquare prohibebant.—CAESAR.

2. Hunc ego hominem tam acrem, tam paratum, tam audacem, tam callidum, tam in scelere vigilantem, tam in perditis rebus diligentem, nisi ex domesticis insidiis in castrense latrocinium compulsem—dicam id quod sentio Quirites—non facile hanc tantam molem mali a cervicibus vestris depulissem. Non ille nobis saturnalia constituisset, neque tanto ante exiti ac fati diem reipublicae denuntiasset nec commisisset ut signum ut literae suae testes denique manifesti sceleris deprehenderentur. Quae nunc, illo absente, sic gesta sunt, ut nullum in privata domo furtum unquam sit tam palam inventum quam haec in tota republica conjuratio manifeste inventa atque deprehensa est. Quod si Catilina in urbe ad hanc diem remanisset, quamquam quoad fuit omnibus ejus consiliis occurri atque obstiti, tamen, ut levissime dicam, dimicandum nobis cum illo fuisset, neque nos unquam dum ille in urbe hostis fuisset, tantis periculis rempublicam tanta pace, tanto otio tanto silentio liberassemus.—CICERO.

II.—1. Give the meanings of the following words:—Longurius, musculus, amentum, alces, urus, vitrum, pilus, pilum, pila, pila.

2. Give the modern names of the following places and rivers, and mark the quantities of their vowels:—Avaricum, Genabum, Noviodunum, Bibracte, Lutetia, Samarobriva, Liger, Elaver, Sequana, Arar, Matrona.

3. Draw an outline map of Gaul, marking on it the *Provincia* and the territories of the following tribes:—Aedui, Bituriges, Sequani, Aquitani, Belgae, Veneti; and the course of the rivers Arar, Elaver, Liger, Sequana, Matrona, Rhenus, Rhodanus.

III. Translate the following into Latin prose:—

At length, shut out by the blockade from everything they required, their beasts of burden being already four days without fodder, and being destitute of water, of firewood, and of corn, they requested a conference, and this, if possible, in a place withdrawn from the soldiery. When this was refused by Cæsar, and a colloquy granted provided they chose to hold it publicly, the son of Afranius is given to Cæsar as a hostage. They came to the place which Cæsar chose. In the hearing of both armies Afranius speaks: he says that there is no reason for entertaining displeasure against either themselves or their soldiers, because they had resolved to preserve their fidelity towards their commander-in-chief, Cn. Pompey. But they had now satisfied the demands of duty, and had borne punishment enough. They had endured the want of all things: and now being enclosed almost like wild beasts, they were kept from water, kept from going out, and could neither bear the suffering in their persons nor the disgrace in their spirits. Accordingly, they confessed that they were conquered: they begged and besought, if any place for mercy were left, that they might not be necessitated to come forth to the last punishment.—CIC., I. 84.

I. Translate into English the following passages, adding notes, when necessary, to explain the difficulties, or to specify the various ways in which the passages have been understood, or any emendations which may have been suggested :—

Appendix,
No. 8.
Scholarship
Examina-
tions.

1. En unquam patrios longo post tempore fines
Pauperis et tuguri congestum caespite culmen
Post aliquot mea regna videns mirabor aristas?
2. Ut vidi, ut perii, ut me malus abstulit error!
3. Talia saecula suis dixerunt currite fusis
Concordes stabili fatorum numine Parcae.
4. Non nostrum inte vos tantas componere lites
Et vitula tu dignus et hic et quisquis amores
Aut metuet dulces aut experietur amaros.
5. Incipe parve puer risu cognoscere matrem :
Matri longa decem tulerunt fastidia menses :
Incipe, parve puer, cui non risere parentes
Nec deus hunc mensa dea nec dignata cubili est.

VIRGIL—*Eclogues*.

6. Ut nuper, actus cum freto Neptunius
Dux fugit ustis navibus,
Minatus urbi vincla quae detraxerat
Servis amicus perfidis.
Romanus, eheu posteri negabitis,
Emancipatus feminae
Fert vallum et arma miles et spadonibus
Servire rugosis potest,
Interque signa turpe militaria
Sol adspicit conopium.
At hoc frementes, verterunt bis mille equos
Galli canentes Caesarem,
Hostiliumque navium portu latent
Puppae sinistrorsum citae.

Terra marique victus hostis punico
Lugubre mutavit sagum.

HORACE—*Epodes*.

II.—1. *a*. In what order do the *Eclogues* of Virgil seem to have been written?

β. Mention the chief historical events alluded to in them, giving dates.

γ. Specify *briefly* the chief defects of Virgil's *Pastorals*, giving examples.

2. *a*. In what particulars, with regard to *metre* and *subject*, do the *Epodes* differ from the other lyrics of Horace?

β. Who is the *dux Neptunius* in the extract from Horace? and what events are alluded to in it? Give dates.

γ. Give the right explanation of *sinistrorsum citae*.

III.—*a*. Scan the following lines :—

1. Clamassent ut litus Hyla Hyla omne sonaret.
2. Credimus an qui amant ipsi sibi somnia fingunt.
3. Uno eodemque igni sic nostro Daphnis amore.—VIRGIL.
4. Inachia furere silvis honorem decutit.—HORACE—*Epodes*.

β. What principle of scansion is exhibited in the first and second of the above lines?

2. What kind of verse is that of the fourth line?

Appendix,
No. 8.

Scholarship
Examina-
tions.

γ. Explain what is meant by *caesura*, and specify the chief caesuras used in the hexameter. What is the bucolic caesura?

IV. Give the meaning of the following words, and mark their quantities :—*Sinum*, *intuba*, *myrica*, *cantharus*, *corylus*, *fraxinus*, *alnus*, *morus*, *sandyx*, *corymbus*, *calathus*, *serpyllum*, *allium*, *ligustrum*, *vaccinium*, *pedum*, *paliurus*, *muletra*, *arvina*, *dolo*, *galerus*, *pero*, *caetra*, *cateia*.

HISTORY AND THE ENGLISH LANGUAGE.—*Examiner, Professor Craik.*

1. *Every competitor* will write a short Essay on "What we owe to our Ancestors."

2. Explain how the kingdom of England arose out of what is commonly called the Saxon Heptarchy.

3. Deduce the descent of Queen Victoria from William the Conqueror.

4. Give a rapid outline of the commencement, course, and termination of any of the Three Punic Wars.

5. Sketch the history of the reign of Nero.

One of the questions on English History, and one of those on Roman History, must be answered by every competitor.

SECOND YEAR STUDENTS.

GREEK.—*Examiner, Professor MacDonall.*

I.—Translate accurately and with spirit these lines from the XVIth Book of the *Iliad* :—

τόν⁴⁵ δ' ἄτη φρένας⁴⁵ εἶλε, λύθεν¹ δ' ὑπὸ φαίδιμα γυνῆ,
στῇ δὲ ταφών² ὀπιθεν δὲ μεταφρένον³ ὀξέϊ δουρὶ

 Examina-
 tions.

II.—a. ¹⁻⁴⁴ Parse fully the words thus numbered—noticing whatever invites remark in respect to formation, derivation, and usage, and collating Attic synonymes or representatives.

b. ⁴⁵⁻⁵⁸ Elucidate the construction of the words or phrases thus numbered.

THE ENGLISH LANGUAGE.—*Examiner, Professor Craik.*

1. *Every competitor* will write a short Essay on either—
 The Greek language as compared with the English ; or,
 The Latin language as compared with the English.
2. Explain the two great revolutions which have converted the language spoken or written in England before the Norman Conquest into that now in use.
3. State the leading characteristics, but without going into minute details, which distinguish the English of Chaucer from that of the present day.
4. Give what appears to you to be the correct account of the proportions in which its two great constituent elements exist in our present English, and of the extent to which they are usually employed in writing and speaking.

MODERN LANGUAGES.—*Examiner, Dr. Früdersdorff.*

Translate into English :—

J'avais donné la plupart de ces derniers jours à ce qu'un aussi court séjour qu'un séjour de près de six mois avait pu me faire regarder comme des amis particuliers, surtout à Grimaldo. Quelque sensible joie et quelque empressement que je sentisse d'aller retrouver Madame de Saint-Simon et mes amis, je ne pus quitter l'Espagne sans avoir le cœur serré, sans regretter des personnes dont j'avais reçu tant de marques personnelles de s'accommoder de moi, et dont tout ce que j'avais vu dans le gros de la nation m'avait fait concevoir de l'estime jusqu'au respect, et une si juste reconnaissance pour tant de seigneurs et de dames en particulier. J'ai conservé toute ma vie quelque souvenir de cette époque. Grimaldo tant qu'il a vécu, et après sa disgrâce et sa chute, qui n'arriva

Appendix,

Scholarship
Examina-
tions.

que long temps après, avec plus de soin et d'attention qu'auparavant. L'attachement plein de respect et de reconnaissance pour le roi et la reine d'Espagne m'engagea à me donner l'honneur de leur écrire en toutes occasions, surtout à répandre mon extrême douleur à leurs pieds au renvoi de l'infante. Je consultai là-dessus l'évêque de Fréjus, déjà plus maître que M. le Duc, qui me manda que je pouvais écrire, résolu, s'il m'eût refusé, de le dire à Lauliez et de le prier de le mander à leurs Majestés catholiques. Elles me firent souvent l'honneur de me répondre avec toutes sortes de bontés, et de charger toujours leurs nouveaux ministres en France, et les personnes considérables qui y venaient se promener avec leur permission, de me renouveler, expressément les mêmes bontés de leur part.—*Mémoires de Saint-Simon.*

Translate into French :—

There is, indeed, in the genius of the French something of a sociableness, of a sympathy—something which spreads itself with more facility and energy than in the genius of any other people. It may be in the language, or the particular turn of mind of the French nation ; it may be in their manners, or that their ideas, being more popular, present themselves more clearly to the masses, penetrate among them with greater ease ; but, in a word, clearness, sociability, sympathy, are the particular characteristics of France, of its civilization ; and these qualities render it eminently qualified to march at the head of European civilization.

In studying, then, the history of this great fact, it is neither an arbitrary choice nor convention that leads us to make France the central point from which we shall study it ; but it is because we feel that in so doing we in a manner place ourselves in the very heart of civilization itself—in the heart of the very fact which we desire to investigate.—M. GUIZOT: *Hist. de la Civilisation en Europe* (Oxford Translation).

1. State what general rule or rules you would lay down for the use of the subjunctive mood, and give instances.

2. State any forms of expressions or rules of grammar, which are derived from Latin.

3. What mood would you employ after *qui que ce soit, quoi que ce soit, quelque, quel que* ?

4. What is the number of the following words in French: *cresses, dregs, font, measles, oats, spinach, politics* ?

5. On what circumstance depends the different use of *en* and *dans* in French, relative to time? Translate: *In three days I shall have finished my work. He has performed his task in less than three weeks.*

6. Show the exact force of *puisque* and of *parceque*, as denoting a logical ground ; also of *au moins*, and *du moins*. Translate: *If he is not rich, AT LEAST (= at any rate) he has to live. He has two hundred a year AT LEAST.*

7. How do you render *out of* and *from*, in French, in the following combinations?—*He used to drink OUT of a large goblet. To draw (water) FROM the source. To drink OUT of a bottle.*

8. Distinguish between the notion conveyed by *venir de* and *venir à* followed by an infinitive, and translate: *Alas! if my father WERE to die! What a misfortune if he WERE to die! He IS JUST dead. He HAD JUST died when I arrived.* Render by the proper French grammatical idiom: *I have heard my father say, that, &c. I have heard my father say it.*

9. Say what you know about the Provincial Letters of Pascal.

10. Characterize briefly the lyrical poets of France.

Translate into English :—

„Nicht leichtsinniger Weise,“ fing er an, „stürze ich mich und euch in diesen neuen gefährvollen Krieg. Mein Zeuge ist der allmächtige Gott, daß ich nicht aus Vergnügen fechte. Der Kaiser hat mich in der Person meiner Gesandten auf's Grausamste beleidigt, er hat meine Feinde unterstützt, er verfolgt meine Freunde und Brüder, tritt meine Religion in den Staub und streckt die Hand aus nach meiner Krone. Dringend sehen uns die unterdrückten Stände Deutschlands um Hülfe, und, wenn es Gott gefällt, so wollen wir sie ihnen geben.

„Ich kenne die Gefahren, denen mein Leben ausgesetzt seyn wird. Nie habe ich sie gemieden, und schwerlich werde ich ihnen ganz entgehen. Bis jetzt zwar hat mich die Allmacht wunderbar behütet; aber ich werde doch endlich sterben in der Vertheidigung meines Vaterlandes. Ich übergebe euch dem Schutze des Himmels. Seyd gerecht, seyd gewissenhaft, wandelt unschuldig, so werden wir uns in der Ewigkeit wieder begegnen.

„An euch, meine Reichsräthe, wende ich mich zuerst. Gott erleuchte euch und erfülle euch mit Weisheit, meinem Königreiche stets das Beste zu rathen. Euch, tapferer Adel, empfehle ich dem göttlichen Schutze. Führet fort, euch als würdige Nachkommen jener heldenmüthigen Gothen zu erweisen, deren Tapferkeit das alte Rom in den Staub stürzte. Euch, Diener der Kirche, ermahne ich zur Verträglichkeit und Eintracht; seyd selbst Muster der Tugenden, die ihr predigt, und mißbraucht nie eure Herrschaft über die Herzen meines Volks. Euch, Deputirte des Bürgerund Bauernstandes, wünsche ich den Segen des Himmels, eurem Fleiße eine erfreuende Ernte, Fülle euren Scheunen, Ueberfluß an allen Gütern des Lebens. Für euch Alle, Abwesende und Gegenwärtige, schicke ich aufrichtige Wünsche zum Himmel. Ich sage euch Allen mein zärtliches Lebewohl. Ich sage es vielleicht auf ewig.“—*Gustav Adolphs Abschiedsrede an seine Stände.*

Translate into German :—

Cosroes, king of Persia, had a minister of state whose character was so amiable, that it was difficult to determine by whom he was most beloved, the king or his people. At length this able minister demanded his dismissal: but Cosroes, unwilling to lose such a faithful and wise statesman, desired an explanation. "Why would you desert me?" said the afflicted monarch. "Have you any cause of complaint? Has not the dew of my benevolence fallen upon you? Have not all my slaves been ordered to make no distinction between your commands and mine? Are not you next to my heart? Have you anything to ask that I can grant? Speak, and you shall be satisfied: only do not think of leaving me." Mitrane, the minister, made this reply: "O king! I have served you with zeal and fidelity, and thou hast most amply rewarded me: but nature now requires from me one of the most sacred of its duties. I have a son, who can learn from me how to serve thee or thy successors hereafter, as I have done: let me pursue this private duty, after all my care for the public good." Cosroes granted his request; but upon this condition—that he should take the young prince with him into his retreat, and educate both the youths together. Mitrane set out, and after five or six years' absence, returned with his pupils to court. Cosroes was overjoyed to see his son again; but, upon examination, he was greatly sorry to find that he had not made the same progress in his studies as the son of Mitrane. In short he was greatly inferior to him in the point of real merit. The king complained to the minister of this striking difference; and his reply should be a lesson to all young men of good dispositions: "O king! my son has made a better use than yours of the instructions I gave to both: my attention has been equally divided between them; but *my* son knows that his dependence must be on mankind, while I never could conceal from *yours* that men would be dependent upon him."

tions.

QUESTIONS.

1. Decline the following substantives: der Sturm, der Degen, das Haus, der Hirt, die Hand, die Arbeit.
2. When may the *e* be dropped in the last syllable of the genitive and dative singular of the strong declension?
3. Decline großer Garten, der hohe Baum, dieses schöne Schloss, viele neue Bücher.
4. German adjectives have two forms of declension; when are they respectively used? State the case-endings of each form.
5. When do adjectives remain unaltered?
6. Express in German words: seven, nineteen, fifty-three, one hundred and eighty-eight, first, thirty-third, seventy-seventh.
7. Decline ich, du, er, sie, es.
8. Give the second person singular of all the tenses, in the indicative and subjunctive moods, of *sitzen*, both active and passive.
9. Give the first person singular of the imperfect, and the past participle, of *finden*, *spinnen*, *bitten*, *essen*, *reiten*, and *bleiben*.
10. Conjugate *sein*, *haben*, and *werden*.
11. What cases are governed by the following prepositions: *von*, *mit*, *ohne*, *wegen*, *nach*?
12. Of what gender are substantives ending in *heit* and *schaft*? Mention any other terminations of the same gender, with exceptions.

THIRD YEAR STUDENTS.

GREEK.—*Examiner, Professor MacDouall.*

I.—Translate, in a perspicuous and animated style, the following lines from the IVth *Pythian Ode* of PINDARUS:

Στρ. α'.

Σάμερον μὲν χρή σε παρ' ἀνδρὶ φίλῳ
στᾶμεν, ἐνὶ πύον βασιλῆϊ Κυράνας, ὅφρα κωμάζοντι σὺν Ἀρκεσίλῳ,
Μοῖσα! Λατοῖδαισιν ὀφειλόμενον Πυθῶνι τ' αὐξὺς οὔρον ὕμνων,
ἐνθα ποτὲ χρυσέων Διὸς αἰητῶν πάρεδρος,
οὐκ ἀποδάμου Ἀπόλλωνος τυχόντος, ἱέρα
χρῆσεν οἰκιστῆρα Βάττον καρποφόρου Λιβύας, ἱερὰν
νᾶσον ὡς ἤδη λιπὼν κτίσσειεν εὐάρματον
πόλιν ἐν ἀργαέντι μαστῶ,

Ἀντ. α'.

καὶ τὸ Μηδείας ἔπος ἀγκομίσαιθ'
ἐβδόμα καὶ σὺν δεκάτῃ γενεᾷ Θήραιον, Αἰήτα τό ποτε Ζαμενῆς
παῖς ἀπέπνευσ' ὑπανάτου στόματος δέσποινα Κόλχων. εἶπε δ' οὕτως
ἡμιθέοισιν Ἰάσονος αἰχματᾶο ναύταις·
“κέκλυτε, παῖδες ὑπερθύμων τε φωτῶν καὶ θεῶν!
φαμί γὰρ τὰςδ' ἐξ ἀλιπλάκτου ποτὲ γᾶς Ἐπάφοιο κόραν
ἀστέων ῥίζαν φυτεύσεσθαι μελησίμβροτον
Διὸς ἐν Ἀμμωνος θεμέλοις.

Ἐπ. α'.

ἀντὶ δελφίνων δ' ἐλαχυπτερύγων ἵππους ἀμείψαντες θοῆς
ἀντα τ' αὐτ' ἐρεγμῶν διφρονι τε ἰωμῆσιν αἰελλοποδας,
κεῖνος ὄρνις ἐκτελευτάσει μεγαλᾶν πολίων

ματρόπολιν Θήραν γενέσθαι, τόν ποτε Τριτωνίδος ἐν προχοαῖς
λίμνας θεῶ ἄνερει εἰδομένῳ γαῖαν διδόντι
ξείνια πρῶραθεν Εὐφάμος καταβὰς
δέξατ',—αἴσιον δ' ἐπὶ οἱ Κρονίων Ζεὺς πατήρ ἔκλαγξε βροντάν,—

Appendix,
No. 8.

Scholarship
Examina-
tions.

Στρ. β'.

ἀνίκ' ἄγκυραν ποτὶ χαλκόγενυν
ναὶ κρημνάντων ἐπέτοσσε θαῶς Ἀργοῦς χαλινόν. δώδεκα δὲ πρότερον
ἀμέρας ἔξ Ὀκεανοῦ φέρομεν νώτων ὑπὲρ γαίας ἐρήμων
εἰνάλιον δόρυ μήδεσιν ἀνσπᾶσαντες ἁμοῖς.
τουτάκι δ' οἰοπόλος δαίμων ἐπῆλθεν παιδίμαν
ἄνδρὸς αἰδοίου πρόσονιν θηκάμενος· φιλίων δ' ἐπέων
ἄρχετο, ξείνοις ἅτ' ἐλθόντεσσιν εὐεργέται

II.—I. In very brief notes you may elucidate the genealogical, mythical, historical, and geographical allusions in this passage.

2. Trace very concisely the sequence of ideas throughout, and arrange the incidents referred to in the order of logical prose, taking note of time, place, and causal connexion.

LATIN.—*Examiner, Rev. Dr. Reichel.*

I.—Translate the following passages accurately and fully :—

1. Legati ab Ardea Romam venerunt, de injuria querentes, ut, si demeretur ea, in foedere atque amicitia mansuros, *restituto agro*, appareret. Ab Senatu responsum est "judicium populi ab senatu rescindi non posse, praeter quam quod nullo nec exemplo nec jure fieret, concordiae etiam ordinum causa. Si Ardeates sua tempora expectare velint, arbitriumque senatui levandae *suae injuriae* permittant, fore ut post modo gaudeant, se irae moderatos: sciantque Patribus aequae curae fuisse, ne qua injuria in eos oriretur, ac ne orta diuturna esset." Ita legati, quum se rem integram relaturos dixissent, comiter dimissi. *Patricii*, quum sine curuli magistratu respublica esset, *coiere, et interregem creavere*. Contentio, consulesne an *tribuni militum* crearentur, in interregno rem dies complures tenuit. Interrex ac senatus consulum comitia, tribuni plebis ac plebs tribunorum militum ut habeantur tendunt, vicerunt Patres, quia et plebs, patriciis seu hunc seu illum delatura honorem frustra certare supersedit: et principes plebis ea comitia, malebant quibus non haberetur ratio sui, quam quibus ut indigni praeterirentur. Tribuni quoque plebis *certamen sine effectu in beneficio apud primores Patrum reliquere*. T. Quinctius Barbatus interrex consules creat L. Papirium Mugillanum, L. Sempronium Atratinum. His consulibus cum Ardeatibus foedus renovatum est. Idque monumentum est, consules eos illo anno fuisse, qui neque in annalibus priscis, neque in libris magistratuum inveniuntur, credo quod tribuni militum initio anni fuerunt, eo, perinde ac si totum annum in imperio fuerint, suffectis his consulibus, praetermissa nomina consulum horum. Licinius Macer auctor est et in foedere Ardeatino et in linteis libris *ad Monetae* inventa.—LIVY.

Explain fully the italicised words and phrases.

tions.

2. Quid faciam ? Saltat Milonius ut semel icto
Accessit fervor capiti numerusque lucernis.
Castor gaudet equis, ovo prognatus eodem
Pugnis : quot capitum vivunt, totidem studiorum
Milia : me pedibus delectat claudere verba
Lucili ritu nostrum melioris utroque.
Ille velut fidis arcana sodalibus olim.
Credebat libris, neque si male cesserat, unquam
Decurrens alio, neque si bene : quo fit ut omnis
Votiva pateat veluti descripta tabella
Vita senis. Sequor hunc, Lucanus an Appulus anceps,
Nam Venusinus arat finem sub utrumque colonus
Missus ad hoc pulsus, vetus est ut fama, Sabellis,
Quo ne per vacuum Romano incurreret hostis,
Sive quod Appula gens seu quod Lucania bellum
Incuteret violenta. Sed hic stilus haud petet ultro
Quemquam animantem et me veluti custodiet ensis
Vagina tectus ; quem cur destringere coner,
Tutus ab infestis latronibus ? O pater et rex
Juppiter, ut pereat positum robigine telum,
Nec quisquam noceat cupido mihi pacis ! At ille,
Qui me commorit—melius non tangere, clamo,—
Flebit et insignis tota cantabitur urbe.
Cervius iratus leges minitatur et urnam,
Canidia Albuti, quibus est inimica, venenum,
Grande malum Turius, si quid se iudice certes.
Ut, quo quisque valet, suspectos terreat, atque
Imperet hoc natura potens, sic collige mecum :
Dente lupus cornu taurus petit : unde nisi intus
Monstratum ? Scaevae vivacem crede nepoti
Matrem : nil faciet sceleris pia dextera : mirum,
Ut neque calce lupus quemquam neque dente petit bos ;
Sed mala tollet anum vitiatum melle cicuta.
Ne longum faciam ; seu me tranquilla senectus
Expectat seu Mors atris circumvolat alis,
Dives, inops, Romae, seu fors ita jusserit, exsul,
Quisquis erit vitae, scribam, color.—HORACE.

II.—Translate the following into Latin Prose :—

If there be, in some men, a proneness to detract from the character even of persons unknown and indifferent ; in others an avidity to hear and propagate scandal ; to what principle in human nature must we ascribe these qualities ? The failings of others surely add nothing to our worth, nor are they in themselves a pleasant subject of thought or of discourse. But they flatter pride, by giving an opinion of our superiority over those from whom we detract. Is it not possible that the same desire of superiority may have some secret influence upon those who have to display their eloquence in declaiming upon the corruption of human nature, and the wretchedness, fraud, and insincerity of mankind in general ? It ought always to be taken for granted that the declaimer is an exception to the general rule, otherwise he would rather choose, even for his own sake, to draw a veil over the nakedness of his species. But hoping that his audience will be so civil as not to include him in the black description, he rises superior by the depression of the species, and stands alone, like Noah in the antediluvian world. This looks like envy against the human race.—REID.

MODERN LANGUAGES.—*Dr. Frädersdorff.*

Appendix,
No. 8.

Translate into English :—

Grimoald, fils et héritier de Pepin, étant allé en pèlerinage au tombeau de saint Lambert, il y fut tué, sans doute par les amis d'Alpaïde. Carl lui-même se signala comme ennemi de l'Eglise. Son surnom païen de Marteau me ferait volontiers douter s'il était chrétien. On sait que le marteau est l'attribut de Thor, le signe de l'association païenne, celui de la propriété, de la conquête barbare. Cette circonstance, expliquerait comment un empire, épuisé sous les règnes précédents, fournit tout-à-coup tant de soldats et contre les Saxons et contre les Sarrasins. Ces mêmes hommes, attirés dans les armées de Carl par l'appât des biens de l'Eglise qu'il leur prodigua, purent adopter peu à peu la croyance de leur nouvelle patrie, et préparèrent une génération de soldats pour Pepin le Bref et Charlemagne. Dans cette famille tout ecclésiastique des Carlovingiens, le bâtard, le proscrit Carl, ou Charles Martel, offre une physionomie à part et très-peu chrétienne.

tions.

D'abord les Neustriens, battus par lui à Vinçy, près de Cambrai, appelèrent à leur aide les Aquitains qui, depuis la dissolution de l'empire des Francs, formaient une puissance redoutable. Eudes, leur duc, s'avança, jusqu'à Soissons, s'unit aux Neustriens, qui n'en furent pas moins vaincus. Peut-être eût-il continué la guerre avec avantage, mais il avait alors un ennemi derrière lui. Les Sarrasins, maîtres de l'Espagne, s'étaient emparés du Languedoc. De la ville romaine et gothique de Narbonne, occupée par eux, leur innombrable cavalerie se lançait audacieusement vers le Nord, jusqu'en Poitou, jusqu'en Bourgogne, confiante dans sa légèreté, et dans la vigueur infatigable de ses chevaux africains. La célérité prodigieuse de ces brigands, qui voltigeaient partout, semblait les multiplier ; ils commençaient à passer en plus grand nombre ; on craignait que, selon leur usage, après avoir fait un désert d'une partie des contrées du Midi, ils ne finissent par s'y établir. Eudes, défait une fois par eux, s'adressa aux Francs eux-mêmes ; une rencontre eut lieu près de Poitiers entre les rapides cavaliers de l'Afrique et les lourds bataillons des Francs (732). Les premiers, après avoir éprouvé qu'ils ne pouvaient rien contre un ennemi redoutable par sa force et sa masse, se retirèrent pendant la nuit. Quelle perte les Arabes purent-ils éprouver, c'est ce qu'on ne saurait dire. Cette rencontre solennelle des hommes du Nord et du Midi a frappé l'imagination des chroniqueurs de l'époque ; ils ont supposé que ce choc de deux races n'avait pu avoir lieu qu'avec un immense massacre.—J. MICHELET : *Histoire de France.*

Pour moi, je chanterai le maître que j'adore,
Dans le bruit des cités, dans la paix des déserts,
Couché sur le rivage, ou flottant sur les mers,
Au déclin du soleil, au réveil de l'aurore.

La terre m'a crié : Qui donc est le Seigneur ?
Celui dont l'âme immense est partout répandue,
Celui dont un seul pas mesure l'étendue,
Celui dont le soleil emprunte sa splendeur ;

Celui qui du néant a tiré la matière,
Celui qui sur le vide a fondé l'univers,
Celui qui sans rivage a renfermé les mers,
Celui qui d'un regard a lancé la lumière ;

Celui qui ne connaît ni jour, ni lendemain,
Celui qui de tout temps de soi-même s'enfante,
Qui vit dans l'avenir comme à l'heure présente,
Et rappelle les temps échappés de sa main.—LAMARTINE.

tions.

Translate into French :—

The generous readiness with which hospitality is afforded to the stranger who asks for it, the facility with which he is allowed to contract the peculiar connexion of guest with his host, and the permanence with which that connexion, when created by partaking of the same food and exchanging presents, is maintained even through a long period of separation, and even transmitted from father to son—these are among the most captivating features of the heroic society. The Homeric chief welcomes the stranger who comes to ask shelter in his house, first gives him refreshment, and then inquires his name and the purpose of his voyage. Though not inclined to invite strangers to his house, he cannot repel them when they spontaneously enter it, craving a lodging. The suppliant is also commonly a stranger, but a stranger under peculiar circumstances.—GROTE: *History of Greece*.

GRAMMATICAL AND LITERARY QUESTIONS.

1. What is the difference with respect to meaning conveyed by verbs expressing *fear* when followed by *ne* and by *ne pas* in the *subordinate* clause? Exemplify the rule.

2. If instead of repeating *si*, it were replaced by *que*, should this *que* be followed by the subjunctive in a *co-ordinate* clause? Give examples.

3. What preposition or particle must be employed after *rien*, when followed by an adjective or a past participle in the *comparative* degree?

Translate: *Nothing* more sublime than ——. *Nothing* more detestable and detested than ——. Give besides some sentences of that description you may remember from authors.

4. Explain the elliptic construction: *plus de larmes, plus de soupirs, plus d'amitié sincère*.

5. How would you render *have* and *get* when followed by an *objective* case, and subsequently by a *past participle*?

Translate: Have you *had* your creditors arrested? Have you *got* your sheep shorn? Will you *get* the bill discounted for me? Has he *had* this house built for himself, or for his son-in-law?

6. Translate *idiomatically* in as many ways as it may be done:—This room is twenty feet long, fifteen feet wide, and eighteen feet high.

7. Give the *idiomatical French equivalent* for the preposition *by*, relative to dimension, *e.g.*, six feet *by* five, ten inches *by* nine.

8. Write out the present and imperfect subjunctive of the verbs *aller, mourir, s'asseoir, valoir, vouloir, pouvoir, savoir, faire*.

9. Define accurately by examples the distinct notions conveyed respectively by *commencer par, commencer à, commencer de*.

Would you say: *l'enfant commence déjà à marcher*, or *de marcher*? Assign a reason.

10. State, by examples, the difference between *finir par* and *finir de*.

11. We find "*de*" employed after "*pas*" relative to a *substantive-notion* in the plural, *e.g.*, "*Il n'y avait pas de meilleurs hommes de cheval que les Egyptiens*" (Bossuet). Why is the *article* after *pas* used in the following and the like examples:—*Il n'a pas des idées bien orthodoxes, des sentiments bien relevés*?

12. What tense is employed in French when a permanent state of a thing or condition is involved? Translate: *St. Augustine described the nature of God as a circle, the centre of which was everywhere, and the circumference nowhere*.

Give a brief biographical sketch of some of the principal French writers during the latter part of the sixteenth and the beginning of the seventeenth century.

Scholarship
Examina-
tions.

Wallensteins Plan war Nichts weniger als Ruhe, da er in die Stille des Privatstandes zurücktrat. Der Pomp eines Königs umgab ihn in dieser Einsamkeit, und schien dem Urtheilspruch seiner Erniedrigung Hohn zu sprechen. Sechs Porten führten zu dem Pallaste, den er in Prag bewohnte, und hundert Häuser mußten niedergeissen werden, um dem Schloßhofs Raum zu machen. Aehnliche Palläste wurden auf seinen übrigen zahlreichen Gütern erbaut. Kavaliers aus den edelsten Häusern wetteiferten um die Ehre, ihn zu bedienen, und man sah kaiserliche Kammerherren den goldenen Schlüssel zurückgeben, um bei Wallenstein eben dieses Amt zu bekleiden. Er hielt sechzig Pagen, die von den trefflichsten Meistern unterrichtet wurden; sein Vorzimmer wurde stets durch fünfzig Trabanten bewacht. Seine gewöhnliche Tafel war nie unter hundert Gängen, sein Haushofmeister eine vornehme Standesperson. Reiste er über Land, so wurde ihm Geräthe und Gefolge auf hundert sechs- und vierspännigen Wagen nachgeschafren; in sechzig Karrossen mit fünfzig Handpferden folgte ihm sein Hof. Die Pracht der Livereien, der Glanz der Equipage und der Schmuck der Zimmer war dem übrigen Aufwande gemäß. Sechs Barone und eben so viele Ritter mußten beständig seine Person umgeben, um jeden Wink zu vollziehen;—zwölf Patrouillen die Runde um seinen Pallast machen, um jeden Lärm abzuhalten. Sein immer arbeitender Kopf brauchte Stille; sein Gefäß der Wagen durfte seiner Wohnung nahe kommen, und die Straßen wurden nicht selten durch Ketten gesperrt. Stumm, wie die Zugänge zu ihm, war auch sein Umgang. Finster, verschlossen, unergründlich, sparte er seine Worte mehr als seine Geschenke, und das Wenige, was er sprach, wurde mit einem widrigen Tone ausgestoßen. Er lachte niemals, und den Versuchungen der Sinne widerstand die Kälte seines Bluts. Immer geschäftig und von großen Entwürfen bewegt, entsagte er allen leeren Zerstreuungen, wodurch Andere das kostbare Leben vergenden. Einen durch ganz Europa ausgebreiteten Briefwechsel besorgte er selbst; die meisten Aufsätze schrieb er mit eigener Hand nieder, um der Verschwiegenheit Anderer so wenig als möglich anzuvertrauen. Er war von großer Statur und hager, von gelblicher Gesichtsfarbe, röthlichen kurzen Haaren, kleinen aber funkelnden Augen. Ein furchtbarer, zurückschreckender Ernst saß auf seiner Stirn, und nur das Uebermaß seiner Belohnungen konnte die zitternde Schaar seiner Diener festhalten.

Translate into German :—

THE NORTHMEN IN ICELAND.

The men who colonized Iceland towards the end of the ninth century of the Christian era were of no savage or servile race. They fled from the overbearing power of the king, from that new and strange doctrine of government put forth by Harold Fairhair, 860-933, which made them the king's men at all times, instead of his only at certain times for special service, which laid imposts and taxes on their lands, which interfered with vested rights and world-old laws, and allowed the monarch to meddle and make with the freemen's allodial holdings. As we look at it now, and from another point of view, we see that what to them was unbearable tyranny, was really a step in the great march of civilization and progress, and that the centralization and consolidation of the royal authority, according to Charlemagne's system, was in time to be a blessing to the kingdoms of the north. But to the freeman it was a curse. He fought against it as long as he could; worsted over and over again, he renewed the struggle; and at last, when the isolated efforts, which were the keystone of his edifice of liberty, were fruitless, he sullenly withdrew from the field, and left the land of his fathers, where, as he thought, no freeborn man could now care to live. Now it is that we hear of him in

tions.

Iceland, where Ingolf was the first settler in the year 874, and was soon followed by many of his countrymen. Now, too, we hear of him in all lands. Now France, now Italy, now Spain, feel the fury of his wrath, and the weight of his arm. After a time, but not until nearly a century has passed, he spreads his wings for a wider flight, and takes service under the great emperor at Byzantium, or Micklegarth—the great city, the town of towns—and fights his foes from whatever quarter they come. The Moslem in Sicily and Asia, the Bulgarians and Slavonians on the shores of the Black Sea and in Greece, well know the temper of the northern steel, which has forced many of their chosen champions to bite the dust. Wherever he goes the Northman leaves his mark, and to this day the lions of the Piræus are scored with runes which tell of his triumph.

QUESTIONS.

1. What is the general rule for the sequence of tenses? Is the present subjunctive ever found after the Imperfect Indicative? How has Becker stated the rule?
2. After what verbs is the verb in the consequent clause, introduced by *daß*, usually in the *indicative* mood?
3. What is the gender of substantives ending in *feit*, *schaft*, *ßen*, *niß*, *lein*, *ling*?
4. Give the gender, the genitive singular, and nominative and dative plural of *Gemüth*, *Zufluchtsort*, *Stadt*, *Leben*, *Schurke*, *Baum*, *Schnee*, *Funke*, *Beispiel*.
5. Give the feminine forms of *Herzog*, *König*, *Graf*, *Freund*.
6. Translate accurately, Das Buch $\left\{ \begin{array}{l} \text{ist} \\ \text{wird} \end{array} \right\}$ gebunden; Die Thore der Stadt $\left\{ \begin{array}{l} \text{sind} \\ \text{werden} \end{array} \right\}$ des Nachts geschlossen.
7. Mention what particles are inseparable in compound verbs.
8. When must separable particles be placed at the end of their clause?
9. Give a list of prepositions which govern (1) the dative only, (2) the accusative only, (3) the accusative and dative.
10. Give a list of conjunctions introducing subordinate sentences under the following heads: (1) place, (2) time, (3) cause, (4) condition, (5) manner, (6) proportion, (7) concession. Illustrate by examples.
11. Mention some reflexive verbs that take a genitive after them, and frame sentences exemplifying each.

GERMAN LITERATURE.

1. What are the chief periods of German literature? Name the most celebrated writers in each, and their principal works.
2. Give a list of the principal works of Goethe and Schiller. State their respective characteristics as authors, and give a brief life of each.
3. Enumerate the chief historians and philologists of Germany. State when each flourished and what he wrote.
4. Explain the following terms: *Minnesänger*, *Meistersänger*, *romantische Schule*, *Volksbücher*.
5. State the respective periods relating to the *Minnesänger* and *Meistersänger*.
6. Name the authors of the following compositions: *Des Sängers Fluch*, *Barival*, *Kritik der reinen Vernunft*, *Der Messias*, *Schwertlied*, *Nathan der Weise*; and give some account of each.

SCIENCE SCHOLARSHIPS.—FIRST YEAR STUDENTS.

No. 8.

MATHEMATICS.—*Examiner, H. J. Sharpe, M.A.*

Scholarship
Examina-
tions.

GEOMETRY AND TRIGONOMETRY.

1. The diagonals of a rhombus intersect at right angles. When and when only can a rhombus be inscribed in a circle?

2. When a circle can be inscribed in a rhomboid, the sum of two opposite sides is the same.

3. Draw a straight line touching two given circles.

4. $ABCD$ is a parallelogram, E the point of intersection of its diagonals and K any point in AD : if KB, KC be joined, show that the figure $BKEC$ is one-fourth of the parallelogram.

5. Describe the different measures of an angle, and if A be the number of degrees, G the number of grades, θ the circular measure of the same angle, show that

$$\frac{A}{90} = \frac{G}{100} = \frac{\theta}{\pi}.$$

Find the number of degrees in the unit of circular measure.

6. Define the sine, cosine, and cosecant of an angle, and construct the angle whose cosine is $\sqrt{\frac{2}{3}}$.

Solve the equation $\sin^2\theta - 2\cos\theta + \frac{1}{4} = 0$.

7. Trace the changes in sign and magnitude of the tangent of an angle which increases from 0° to 360° .

8. Prove from a figure that $\sin(A+B) = \sin A \cos B + \cos A \sin B$, and assuming this to be true, whatever be the magnitudes of A and B , deduce the other similar formulæ.

9. Find the value of $\sin 15^\circ$ and $\sin 75^\circ$. Also prove that $\sin 3A = 4 \sin A \sin(60^\circ - A) \sin(60^\circ + A)$.

10. Show that in any plane triangle $\cos A = \frac{b^2 + c^2 - a^2}{2bc}$.

Hence deduce $\sin A$, and hence that the sines of the angles of a triangle are proportional to the opposite sides.

11. Find in terms of the sides the radius of the inscribed circle.

If r is the radius of the inscribed circle of a triangle whose sides are a, b, c ; r_1, r_2, r_3 the distances of its centre from the angular points of the triangle, prove that

$$\frac{r_1 r_2 r_3}{abc} = \frac{r}{s}.$$

ALGEBRA.

1. Distinguish carefully between the algebraical and arithmetical term—Greatest Common Measure. Give the proof of the rule for finding the former, showing why in certain cases the work may be shortened.

Ex. Find the greatest common measure of $6x^3 - 6yx^2 + 2y^2x - 2y^3$ and $12x^2 - 15yx + 3y^2$.

2. Extract the fourth root of $\left(x^2 + \frac{1}{x^2}\right)^2 - 4\left(x + \frac{1}{x}\right)^2 + 12$.

3. Find the condition that the following equations may have a root in common:

$$\begin{aligned} x^3 + ax^2 + bx + c &= 0; \\ x^3 + ax^2 + \beta x + \gamma &= 0. \end{aligned}$$

Appendix,
No. 8.
Scholarship
Examina-
tions.

4. Show that every quadratic has two, and only two, roots, and that if α and β are the roots of the quadratic $x^2 - px + q = 0$, then $\alpha + \beta = p$, $\alpha\beta = q$.

5. Assuming that the law $a^m \times a^n = a^{m+n}$ holds universally, whatever be m and n , investigate the meaning of such an expression as $\frac{p}{q}$. Reconcile it also with the generalization of $(a^m)^n = a^{mn}$.

6. Solve the equations

$$(1) 10x - \frac{14x-9}{8x-3} = \frac{18-40x^2}{3-4x} - 9.$$

$$(2) y(x^2 + y^2) = a(x + y)^2$$

$$xy = a(x + y).$$

$$(3) \frac{(x+a)(x+b)}{yz} = \frac{(y+a)(y+b)}{zx} = \frac{(z+a)(z+b)}{xy} = m.$$

7. Prove algebraically the geometrical operations, *alternando*, *componendo*, *dividendo*, and explain the terms *duplicate* and *triplicate ratio* and *continued proportion*.

If $a : b :: c : d$ prove that

$$a^2 + b^2 : \frac{a^3}{a+b} :: c^2 + d^2 : \frac{c^3}{c+d}$$

8. If S_n represent the sum of n terms of a given geometric series, find the sum of $S_1 + S_2 + S_3 + \dots + S_n$.

9. Define a logarithm. Enumerate the several advantages of a system calculated to base 10. Prove the fundamental properties of logarithms.

Given $\log 2 = .3010300$, $\log 3 = .4771213$, and $\log 131371 = 5.1173942$,

find the value of $\left(\frac{3}{2}\right)^{-\frac{3}{2}}$.

10. Find the exact times between one and two when the hour and minute hand of a clock are two minutes apart.

SECOND YEAR STUDENTS.

MATHEMATICS.—*Examiner, H. J. Sharpe, M.A.*

CONIC SECTIONS.

To be proved Geometrically.

1. Show that if the tangent at any point P of a conic be produced to meet the directrix in Z , PZ subtends a right angle at the focus. Hence show that in the ellipse the tangent makes equal angles with the focal distances.

2. Show that in the parabola the subtangent is bisected at the vertex, and that the subnormal is constant.

3. Prove the truth of the following method of finding any number of points on a conic. Through the focus draw to the directrix a straight line inclined at an angle $\cot^{-1}e$ to it. Through Q any point on this draw QN perpendicular to the axis, and with centre N and radius NQ describe a cutting the directrix in R . Parallels through R and S to the axis and NR intersect in a point P on the conic.

4. In an ellipse HP is joined, cutting the conjugate CD in E . Show that PE = the semi-major axis.

CO-ORDINATE GEOMETRY.

Appendix,
No. 8.
Scholarship
Examina-
tions.

1. Define clearly the equation to a curve. How is the intersection of two curves indicated algebraically? Trace the loci of the equations $xy=0$, $x^2-2xy=0$, $x^2+y^2=0$, $x^3+y^3=0$.
2. Find the equation to a straight line in the form $y=mx+c$, and explain the geometrical meanings of m and c . Find the length of the perpendicular from (x, y) on it.
3. Find the equation to the straight line drawn through the point (x_1, y_1) parallel to $y=mx+c$.
4. What is the geometrical meaning of the condition for 3 points lying in a straight line?
5. Define *analytically* and find the equation to the tangent to a circle at a point $(x' y')$, the axes being at the centre.

DIFFERENTIAL CALCULUS.

1. Explain clearly what is meant by the differential coefficient of a function of one independent variable, and deduce at once the differential co-efficients of

$$ax^5, (1+x^2)^{\frac{3}{2}}, \cos x.$$

2. Differentiate $\log(x+\sqrt{1+x^2})$, x^z , $\sin^{-1}(\epsilon+z\epsilon^{-z})$.
3. Explain the geometrical meaning of $\frac{dy}{dx}$, where x and y are the co-ordinates of a point on a curve.

ALGEBRA AND TRIGONOMETRY.

1. Give and prove the rule for finding the greatest common measure of two algebraical quantities, and find it for x^4-3x^2+2 and x^4+x^2-6 .
2. Prove that

$$\frac{(a^2-b^2)^3+(b^2-c^2)^3+(c^2-a^2)^3}{(a-b)^3+(b-c)^3+(c-a)^3}=(a+b)(b+c)(c+a).$$

Solve the equations

$$(1) \quad \frac{mx-(a+b)}{nx-(c+d)} = \frac{mx-(a+c)}{nx-(b+d)}.$$

$$(2) \quad \left\{ \begin{array}{l} x^2+xy+y^2=a^2 \\ x^4+x^2y^2+y^4=b^4 \end{array} \right\}$$

$$(3) \quad \frac{\sqrt{12x+1}+\sqrt{12x}}{\sqrt{12x+1}-\sqrt{12x}}=18.$$

3. Show how to rationalize a binomial surd. Simplify $\frac{\sqrt{18}}{\sqrt{3}+\sqrt{2}} + \frac{\sqrt{12}}{\sqrt{3}-\sqrt{2}}$ and extract the square root of $12-\sqrt{140}$.

4. Give the geometrical and algebraical definitions of proportion, and show that if four quantities be proportionals according to the geometrical they will also be so according to the algebraical definition. Which is the more comprehensive of the two?

5. Prove by induction or otherwise that $1^2+2^2+3^2+\dots+n^2=\frac{(n+n1)(2n+1)}{1.2.3}$, and sum to n terms the series whose n th term is $2+(-1)^n$.

6. Show how to form convergents to a continued fraction, and converge to $\frac{1559}{6672}$.

Appendix,
No. 8.

Scholarship
Examina-
tions.

7. Find the $(r+1)$ th term of the expansion of $\frac{1}{(1-x)^{\frac{m}{2}}}$ by the binomial theorem; and if $x=\frac{2}{3}$, find what two consecutive terms of the series are equal to one another.

8. Show that all angles which have the same tangent as a given angle are included in the formula $n\pi + \alpha$.

Find the *general* value of θ when $\sin^2\theta = \sin^2\alpha$.

9. Prove the formula $\sin(\delta-\beta) \sin(\alpha-\gamma) + \sin(\beta-\gamma) \sin(\alpha-\delta) + \sin(\gamma-\delta) \sin(\alpha-\beta) = 0$; also if $\alpha + \beta + \gamma = 180^\circ$, that $\sin\alpha + \sin\beta + \sin\gamma = 4\cos\frac{\alpha}{2} \cos\frac{\beta}{2} \cos\frac{\gamma}{2}$, and that the expression $\cot\alpha + \frac{\sin\alpha}{\sin\beta \sin\gamma}$ will retain the same value if any two of the quantities α, β, γ be interchanged.

10. Prove Demoivre's theorem for a positive integral index, and extend it to fractional and negative indices.

Rationalize

$$\frac{(A+B\sqrt{-1})^n}{(C+D\sqrt{-1})^m} + \frac{(A-B\sqrt{-1})^n}{(C-D\sqrt{-1})^m}$$

11. Show that if θ be the circular measure of an angle less than a right angle, $\theta > \sin\theta > \theta - \frac{\theta^3}{4}$. Hence calculate roughly the value of $\sin 10''$.

12. Find the exponential values of sine and cosine of θ . Hence prove that $\theta = \tan\theta - \frac{1}{3} \tan^3\theta + \frac{1}{5} \tan^5\theta - \&c.$

THIRD YEAR STUDENTS.

MATHEMATICS.—*Examiner, H. J. Sharpe, M.A.*

THEORY OF EQUATIONS, &c.

1. Show how to find the quotient and remainder when a rational algebraic function of x is divided by a binomial $x-a$.

Ex. Divide $x^5 + x^3 - 11x^2 + 4x + 4$ by $x-2$.

2. State and prove the relations existing between the roots of the equations $f(x)=0$ $f'(x)=0$.

If the roots of $f(x)=0$ are all real, those of $f(x)-kf'(x)=0$ are all real, where k is any constant.

3. If a, b, c , be the roots of the equation $x^3 - 2x^2 + 2 = 0$, form the equation whose roots are $\frac{b^3+c^3}{a^3}$, $\frac{c^3+a^3}{b^3}$, $\frac{a^3+b^3}{c^3}$.

4. Show how to find by Newton's method of divisors the commensurable roots of an equation. Solve completely the equation $x^4 - 11x^2 + 14x - 24 = 9$.

5. Enunciate and prove Descartes' rule of signs. Show that if $2t$ consecutive terms be wanting in an equation, there must be at least $2t$ imaginary roots.

6. Tangents are drawn to a parabola from a given point; find the equation to the chord of contact. If this latter always passes through a fixed point, the point of intersection of the two tangents travels on a fixed line.

7. Find the value of c in order that the line $y=mx+c$ may be a tangent to the curve $y^2 - x^2 = a^2$.

Determine the locus of points from which pairs of tangents may be drawn to this curve, so as to make a constant angle with each other.

8. Show that the *general* equation to a circle in trilinear co-ordinates must be of the form $a\beta\gamma + b\gamma\alpha + c\alpha\beta + (a\alpha + b\beta + c\gamma)(la + m\beta + n\gamma) = 0$. Hence find the equation to the circle which passes through the centres of the described circles.

Appendix,
No. 8.
Scholarship
Examina-
tions.

9. Prove the principal properties of the polar triangle. Hence show that the three angles of any spherical triangle are together greater than two and less than six right angles.

10. Prove from a figure the formulæ $\frac{\sin A}{\sin a} = \frac{\sin B}{\sin b} = \frac{\sin C}{\sin c}$.

In an equilateral triangle, prove that $2\cos\frac{a}{2} \sin\frac{A}{2} = 1$.

DIFFERENTIAL CALCULUS, &c.

1. Show that $\lim_{x \rightarrow \infty} \left(1 + \frac{1}{x}\right)^x$ lies between 2 and 3. Also show this by taking logarithms, &c.

Find the value of $(\operatorname{cosec} x)^{2 \tan^{-1} x}$ as x approaches $\frac{\pi}{2}$.

2. Give a method of finding the differential coefficient of x^n where n is unrestricted.

3. If y is a function of z , and z is a function of x , show clearly that $\frac{dy}{dx} = \frac{dy}{dz} \frac{dz}{dx}$.

4. Prove Maclaurin's theorem without assuming Taylor's. Explain how to apply it to expand y in ascending powers of x from the equation $\phi(x, y) = 0$.

5. Show how the maxima or minima values of a function of one independent variable may be determined. Find the greatest rectangle, having its sides parallel to the axes, that can be inscribed in the curve

$$(ax)^{\frac{2n}{2n+1}} + (by)^{\frac{2n}{2n+1}} = c^{\frac{4n}{2n+1}}.$$

6. If ϕ be the angle between the radius vector and the tangent to a curve, prove that $\tan \phi = \frac{r d\theta}{dr}$. Hence find the polar equation to the tangent at any point in a curve. Find the locus of the foot of the perpendicular from the origin on the tangent of the curve $r = a(1 + \cos \theta)$.

7. Show how to find the envelope of the system of curves defined by $f(x, y, \theta) = 0$, θ being a variable parameter.

Find the points of intersection of two infinitely close ellipses of the series defined by $\frac{x^2}{a^2} + \frac{y^2}{\beta^2} = 1$, where a and β are variable, but $a^2 + \beta^2 = c^2$ a constant.

8. Explain clearly the meaning and use of integration.

Exhibit $\int_a^b \phi(x)$ as the limit of the sum of a series.

Integrate $\frac{x^2-1}{x^2-4}$, $\frac{x^2-1}{x^4+x^2+1}$, and find the limit where n is infinite, of $\frac{1}{n} + \frac{1}{\sqrt{n^2-1}} = \frac{1}{\sqrt{n^2-2^2}} + \dots + \frac{1}{\sqrt{n^2-(n-1)^2}}$.

9. Explain the method of finding the lengths and areas of curves.

Ex. Find the area of a loop of the curve $16a^4y^2 = b^2x^2(a^2 - 2ax)$, as also the whole area of the ellipse $ax^2 + 2bxy + cy^2 = 1$.

Appendix,
No. 8.
Scholarship
Examina-
tions.

10. Prove that the only necessary and sufficient condition that $Mdx + Ndy = 0$ should be a complete differential is $\frac{dM}{dy} = \frac{dN}{dx}$.

11. Explain the method of separation of symbols as applied to the solution of differential equations, and solve the following :

$$\left(\frac{d}{dx} + a\right)^2 \left(\frac{d}{dx} - a\right) y = \cos(mx + a)$$

$$\left. \begin{aligned} a \frac{dx}{dt} + b \frac{dy}{dt} &= mx \\ b \frac{dx}{dt} + a \frac{dy}{dt} &= ny \end{aligned} \right\}$$

$$\frac{d^4 y}{dx^4} + n^2 \frac{d^2 y}{dx^2} = \cos nx.$$

NATURAL PHILOSOPHY.—*Examiner, Dr. Stevelly.*

1. Enunciate distinctly the propositions which constitute the successive steps of Duchayla's proof of the composition of forces, without going through the proof of any step except the last, and give it in full.

2. Three forces, P , Q , R , equilibrate, acting at the same point of a body, their directions making respectively the angles $(\hat{PQ})$, $(\hat{PR})$, and $(\hat{QR})$ with each other, prove that

$$P : Q : R :: \sin(\hat{QR}) : \sin(\hat{PR}) : \sin(\hat{PQ}).$$

3. In the last question, given the directions and magnitudes of P and Q respectively, find (1) the magnitude, (2) the direction of R .

4. Three forces, P , Q , and R , acting at the same point of a body equilibrate, show that $\sin(\hat{PQ}) =$

$$\sqrt{\frac{(P+Q+R)(P+Q-R)(P+R-Q)(R+Q-P)}{2P \cdot Q}}$$

5. Two couples act in the same or parallel planes in opposite directions, or one positive, the other negative : the constituent forces of the one are each equal P , and its arm is p ; the constituent forces of the other are each equal Q , and its arm is q ; show that if $P \cdot p = Q \cdot q$ these couples are in equilibrio.

6. If a heavy particle be made to oscillate in a cycloid whose axis is vertical, show that the time of an oscillation is denoted by $\pi \sqrt{\frac{l}{g}}$; π

being the ratio of the circumference to the diameter of a circle, l the length of the pendulum (or semicycloid), and g the force of gravity at that place.

7. If a body move round in a circle whose radius is r , with a uniform velocity, completing its circuit in the time P ; prove that the force with which at each instant it endeavours to recede from the centre is expressed by $\frac{4\pi^2 \cdot r}{P^2}$.

8. Show that the part of the centrifugal force, arising from the diurnal rotation, on the surface of the earth, supposed to be a sphere, which directly opposes gravity, is proportional to the square of the cosine of the latitude of the place of observation.

9. Explain the nature of the effect produced by that part of the centrifugal force which is perpendicular to the radius of the earth (or the direction of gravity on the supposition of sphericity), and investigate the law of its variation with the latitude of the place.

10. State and prove the law of the variation of the parallax of the moon, a planet, or any other celestial object near enough to have parallax, during the observed part of its diurnal course.

11. Describe and explain the direct stationary and retrograde apparent motions of the planets, (1) inferior, (2) superior.

12. Describe the monthly phases of the moon; explain their causes, and state (1) the exact, (2) the approximate, angular measure of the greatest breadth of the illuminated and visible portion of her surface.

13. State the conditions required in order that a heavy body may float in equilibrio on a heavy fluid, and state and explain what determines whether the equilibrium will be stable, unstable, or neutral.

14. Suppose the specific gravity of pure copper to be 8.879 to distilled water at the standard temperature = 1, calculate the weight in grains of one cubic inch of such copper.

15. Prove that no curvature (or capillary disturbance) of the surface of a liquid would occur, if a raised coherent plate were placed vertically in it, which attracted the particles of the liquid with exactly one-half the force that an equal volume of the liquid would exert on one of its own particles.

16. Explain the cause of the great accumulation of quantity of electricity in the Leyden Jar, beyond that which the same electrical machine could accumulate on a mere insulated conductor having the same surface as the coating of the jar.

17. Describe and explain the experiments by which Snow Harris proved that the quantities of electricity accumulated on a given surface were proportional to the square roots of the forces they exerted on another given surface placed at a given distance from the charged surface.

18. Describe and explain the experimental means by which Fizeau determined the velocity of artificial light at the earth's surface.

LOGIC.—*Examiner, Rev. Dr. McCosh.*

1. In what relation does Logic stand to Psychology and to Grammar? Wherein does it differ from them? How far is Logic conversant about language?

2. What are the principal incidental disadvantages of language, considered as an instrument of thought? How does ambiguity of language affect reasoning? What are the remedies for these evils?

3. "It is hopeless to master all knowledge." What is the subject and predicate, what the quantity and quality of this proposition? Interpret it both as to the extension and comprehension of the terms. Convert it, and put it in the various forms of opposition.

4. What is the precise nature of the general concrete notion? Give an example, and show how it admits of higher and lower generalization, and how every such notion must have both extension and comprehension. Has an abstract notion extension and comprehension?

5. When Columbus was in search of the new world he fell in with a flock of birds, and concluded that he could not be far from land. Was there reasoning in this process? If so, put it in syllogistic form, indicating the mood and figure.

6. "No branch of science has reached perfection; all branches of science deserve to be cultivated." What conclusion can be drawn from these

Appendix,
No. 8.
Scholarship
Examina-
tions.

premises? Indicate the mood and figure. What is the special rule for the conclusion in that figure, and what the reason of the rule? Reduce the syllogism.

7. Define a conditional proposition. What is conditional reasoning? Does it differ essentially from categorical? Examine the following, designating the parts: "This world would be a happy one if men were all good: but men are not good, and so our world is not a happy one." Can you put this in categorical form?

8. What is the fallacy of "indirect assumption?" Say under what division and subdivision of fallacies it falls, and explain the nature of the division and subdivision. How is such an assumption apt to prove more fallacious than a direct assertion?

9. Why is an induction of facts necessary in order to the prosecution of physical science, while it is not so in such sciences as mathematics?

10. Is there anything more than a collection of facts in the inductive process? If so, specify what else there is. Is there inference? If so, where does it come in? How can the inference be stated in syllogistic form?

11. What is meant by "phenomenon?" What by the "explanation" of a phenomenon? What by "laws of nature?" What explanation is sought for in natural history? What in natural philosophy? What in chemistry?

12. Leverrier and Adams argued the existence of a new planet (Neptune) from the perturbations of Uranus. What "canon of induction" would justify the inference? Enunciate the "canon," and show that it applies.

13. Define analogy. What is meant by the argument from analogy? Into what errors are we liable to fall in analogical reasoning? In what effective way may an answer to objections be furnished by analogy?

14. What is the teleological argument in physiology? What in natural theology? How can they be reduced to syllogistic form?

ENGINEERING SCHOLARSHIPS.—SECOND YEAR STUDENTS.

GEOMETRICAL DRAWING.—*Examiner, Professor James Thomson.*

The Examination comprised questions in Descriptive Geometry, Isometrical Drawing, Perspective and Mechanical Drawing.

EXPERIMENTAL PHYSICS.—*Examiner, Dr. Stevelly.*

1. Three forces, P , Q , R , equilibrate, acting at the same point of a body, their directions making respectively the angles ($\hat{PQ}$), ($\hat{PR}$), and ($\hat{QR}$) with each other, prove that

$$P : Q : R :: \sin(\hat{QR}) : \sin(\hat{PR}) : \sin(\hat{PQ})$$

2. In the last question, given the directions and magnitudes of P and Q respectively, find (1) the magnitude, (2) the direction of R .

3. State accurately the law which governs the relation of two forces which equilibrate on a lever; and give either the geometrical or experimental proof of its truth. State also how the pressure on the fulcrum, in that or any other case of forces equilibrating on a lever, is determined.

4. The sluice of a mill-pond resists being opened with a force of 15 cwt. It is worked by a rack-and-pinion, the winch handle has a radius of 20 inches, and the pinion a radius of $2\frac{1}{2}$ inches; find the number of pounds of force just required to be exerted on the winch handle to equilibrate that resistance of the sluice.

5. Does a machine enable a man, or other agent, to perform more work in a given time than his unaided strength could accomplish? Explain the aid a machine does truly give him (1) statically, (2) dynamically.

Appendix,
No. 8.

6. Explain what is meant when it is asserted that the dynamic force of gravity at London is 32.1908: and explain what fact is required to be experimentally determined in order to find the dynamic force of gravity at any given place.

Scholarship
Examinations.

7. Prove that the velocity acquired by a heavy body in descending any curved or inclined course, without friction or other resistance, is the same as that a heavy body would acquire in falling freely through the same vertical height as that of the course.

8. State the conditions required in order that a heavy body may float in equilibrio on a heavy fluid, and state and explain what determines whether the equilibrium will be stable, unstable, or neutral.

9. Suppose the specific gravity of pure copper to be 8.879 to distilled water at the standard temperature = 1, calculate the weight in grains of one cubic inch of such copper.

10. Prove that no curvature (or capillary disturbance) of the surface of a liquid would occur, if a raised coherent plate were placed vertically in it, which attracted the particles of the liquid with exactly one-half the force that an equal volume of the liquid would exert on one of its own particles.

11. Explain how the specific gravity of a gas is determined, (1) with respect to standard water as unity, (2) with respect to standard atmospheric air as unity.

12. State accurately the law discovered by Dalton and Gay-Lussac, which connects the changes of temperature and volume of gases: state the corrections and coefficients as determined by the researches of Rudberg and Regnault, and point out the features which distinguish the law of Dalton from the law of Boyle or Marriotte.

13. Describe and explain the experiment by which Gay-Lussac determined the specific gravity of atmospheric steam.

14. Explain the cause of the great accumulation of quantity of electricity in the Leyden jar, beyond that which the same electrical machine could accumulate on a mere insulated conductor having the same surface as the coating of the jar.

15. Describe and explain the experiments by which Snow Harris proved that the quantities of electricity accumulated on a given surface were proportional to the square roots of the forces they exerted on another given surface placed at a given distance from the charged surface.

16. Describe the experiments by which Coulomb determined the law of magnetic attraction at different distances by comparing the number of vibrations a magnetic needle made in a given time when under the influence of the earth's magnetism alone, with those which it made when that influence was modified by that of another magnet placed at various distances; and show how the law was deduced.

17. When the vertical plane, in which a dipping needle is permitted to move freely, is placed at right angles to the magnetic meridian of the place of observation, the needle is found to stand vertically: explain the reason of this.

CHEMISTRY.—*Examiner, Dr. Andrews.*

1. Explain the meaning of the terms convection and conduction of heat; and state the experimental proofs of water being a bad conductor.

2. How is the *absolute* expansion of mercury determined; and when the

Appendix,
No. 8.
Scholarship
Examina-
tions.

coefficient expressing that expansion is known, by what simple experiment can you determine the absolute expansion of glass between 0° and 100° C?

3. The latent heat of water is most accurately ascertained by observing the diminution of temperature which occurs when a weighed mass of ice is melted in a given quantity of water; describe fully the experiment, and the method of deducing from it the latent heat of water.

4. The atomic weights of copper, lead, and mercury being 32, 104, and 100 respectively, and the specific heat of copper 0.095, calculate, according to the law of Dulong and Petit, the specific heats of lead and mercury.

5. Contrast the appearances presented by the solar spectrum with the spectra produced by the metals sodium and lithium, or their salts.

6. State the composition and describe the methods of analyzing atmospheric air.

7. What is the action of a series of electrical sparks on ammoniacal gas? and show how the density of this gas may be calculated from this experiment, the densities of hydrogen and nitrogen being known (0.0692 and 0.9722).

8. Give an account of the preparation and chief properties of phosphoric acid.

9. Name C_2NH and describe its properties and tests.

10. What are the sources of light carburetted hydrogen; how is it prepared artificially? State also how many volumes of oxygen are required for its complete combustion, and how many volumes of carbonic acid and of aqueous vapour are formed.

11. Describe the preparation and properties of carbonic oxide.

12. What are the characteristic tests of potash and soda?

13. How is aluminium prepared, and what are its properties?

14. State the composition of common alum. Give also the formulas for the other alums of analogous composition.

15. Describe the method of separating silica from a siliceous mineral which is not attacked by acids.

16. Describe fully the methods of converting the protosalts of iron into sesquisalts.

17. Give an account of the method of taking the density of a vapour, and show how the density will serve to control the results of analysis.

18. How is the amount of nitrogen in an organic body determined?

19. What is the composition of tartaric acid; its relations to racemic acid; and how is it prepared artificially?

20. Give some account of uric acid, and of the more important products of its oxidation.

21. Mention the principal acids of the form $C_{2n}H_{2n}C_4$ and state their relations to the alcohols.

22. What relation has been observed in certain organic bodies between their boiling points and atomic constitution?

[*Examination in Mathematics with Arts Students.*]

MEDICAL SCHOLARSHIPS.

ANATOMY AND PHYSIOLOGY.—*Examiner, Dr. Redfern.*

SECOND YEAR.

1. Describe the characters of the surfaces, articulations, processes, and markings, of the lower two inches of the length of the radius, and state what structures are attached to this portion of the bone, and what lie upon it, indicating the part with which each structure is in relation.

2. State the anatomical characters of the following ligaments, including their connexions and uses :—the calcaneo-scapoid, the orbicular and the external lateral of the elbow joint, the capsular of the hip joint, the transverse of the atlas, and the costo-vertebral.

3. Define the terms elasticity, contractility, sensibility, and sensation, and state generally the microscopical and the chief chemical characteristics of the animal tissues which possess these properties.

*Appendix,
No. 8.
—
Scholarship
Examina-
tions.*

THIRD YEAR.

1. Name and characterize the several articulations of the following bones and parts of bones, describing the shape, extent, position, and other characters of each articular portion :—the great wing of the sphenoid, the petrous portion of the temporal, the lamella plana of the ethmoid, the semilunar, the unciform, the second metacarpal, the middle cuneiform, and the fourth metatarsal.

2. State what movements occur at the hip and at the first carpo-metacarpal joints, and what muscles produce them respectively. What part of these movements can each muscle produce when acting singly?

3. Describe the structure of a hair and its follicle ; also the processes of development, nutrition, death, and reproduction of a hair.

SENIOR SCHOLARSHIPS.

IN MODERN HISTORY.—*Examiner, Professor Craik.*

1. Connect into a rapid but clear narrative, giving as many dates as you can, the assembling of the Long Parliament, the breaking out of the Civil War, the death of the King, the death of Cromwell, the Restoration, the death of Charles the Second, the Revolution, the death of Queen Mary, of King William, of Queen Anne, of George I., and of George II.

2. What does Hallam describe the state of the two parties to have been in the war between Charles I. and the Parliament, at the beginning of September, 1643?

3. Give a short account, with dates, of the battles of Edgehill, Naseby, Marston Moor, Preston, Dunbar, and Worcester.

4. Explain the position which Cromwell held in the Government, according to each of the two successive Constitutions by which he was recognised as chief of the State.

5. Give an account of Algernon Sidney, embracing his trial and execution.

6. State the principal questions that have been agitated since the Restoration on Parliamentary impeachments, with the determination that each has received.

7. Give an account of the origin and first application of the party designations of *Whig* and *Tory*.

8. Relate the succession of the Parliaments of Charles II. and James II.

1. State shortly who the following personages were :—Queen Henrietta Maria ; Catherine, Queen of Charles II. ; Mary, Queen of James II. ; Mary, wife of William II. of Orange ; Henrietta Maria, Duchess of Orleans ; Anne, Duchess of York ; Prince George of Denmark, Prince Rupert, the Duke of Monmouth, Lord Strafford, Lord Stafford, Lord Russell, and Father Petre.

2. Give a short account, with dates, of the following events :—The attempt of the King to seize the five members ; the expulsion of the Presbyterian members ; Colonel Pride's purification ; the dismissal of the Rump by Cromwell.

Appendix,
No. 8.
Scholarship
Examina-
tions.

3. Compare the government of Charles II. in respect of its constitutional or unconstitutional character with that of his father.
4. State what it is in which Hallam holds the real significance and value of the Revolution to consist.
5. Give the names of the seven who signed the invitation to the Prince of Orange.
6. Explain what is meant by the Appropriation of the Supplies, and give the history of that matter.
7. Sketch the history of Standing Armies in England to the end of the reign of William III.
8. Give an account of the Triennial Act of the Long Parliament, of that of the reign of Charles II., and of that of the reign of William III., and also of the Septennial Act.
9. Give the dates of the Treaties of Westphalia, of the Pyrenees, of Aix-la-Chapelle (16—), of Nimeguen, of Ryswick, and of Utrecht; of the Triple Alliance (16—), and of the two Partition Treaties; and of the commencement and termination of the several Dutch wars in the times of Cromwell and of Charles II.

IN MODERN LANGUAGES.—*Examiner, Dr. Früdersdorff.*

I.—Translate into English:—

Que signifie ce nom de *Slave*,—*Slove* dans l'ancien idiome russe, *Slave* dans les écrivains grecs et romains?—(Le premier annaliste des Russes, Nestor, appelle *Slovènes* les peuples que les Grecs et les Romains appelèrent *Sclavènes* et *Sclavines*). La vanité nationale le tire du mot *slava*, qui veut dire *gloire*; mais ce mot lui-même dérive de *stova*, parole, comme en latin *fama* (la renommée) dérive de *fari* (parler). La gloire, c'est la parole du genre humain sur un héros ou sur un peuple. L'interprétation la plus sensée du nom de *Slave* or *Slove*, est donc *celui qui a la parole*, qui parle l'idiome national de la race, et, par une corrélation de termes qui justifie cette interprétation, l'étranger est *celui qui ne parle pas*, NIEMME, littéralement *le muet*. La langue est le moyen de reconnaissance du Slave; c'est par elle que le sentiment de la fraternité se maintient entre toutes les fractions de la race, quelles que soient les diversités de vie sociale ou de condition politique. Telle cette race se montre à nous aujourd'hui depuis la Dalmatie jusqu'aux régions polaires, telle aussi nous l'entrevoions dès l'aurore de sa résurrection à la liberté. Elle se divisait alors en trois grandes branches, partagées à leur tour en confédérations et tribus. A l'est et sur les fleuves qui descendent dans la Mer-Noire était le rameau des Antes dont j'ai parlé tout à l'heure, et qui avait pour voisins les peuples finnois et asiatiques. A l'ouest se trouvait la branche des Vénètes ou Vendes, qui, appuyés sur la Baltique, confinaient au nord avec les Finnois d'Europe, au midi avec les Germains: ce rameau Slave avait été connu de bonne heure par les navigateurs grecs et les voyageurs romains.

Durant les tristes années qui fermèrent le cinquième siècle et ouvrirent le sixième, les provinces voisines du Danube purent étudier à leurs dépens toutes les variétés de la férocité humaine, car les races barbares qui les dévastaient avaient chacune sa façon particulière de torturer et de détruire. On connaissait les procédés du Hun d'Europe, issu des bandes d'Attila, et, comme je l'ai dit, celui-là était presque civilisé à côté de ses compagnons; mais le Slave et le Bulgare joignaient à des cruautés inconnues le supplice de l'épouvante. Le Slave, ennemi invisible et toujours présent, tapi derrière toutes les broussailles, caché jusque dans les rivières, attendait la nuit pour faire ses surprises; il fondait alors sur une ville, sur un village, sur une troupe en marche, et là où il avait passé, il ne restait plus âme vivante.—AMEDEE THIERRY.

ODE A LORD BYRON.

Toi dont le monde encore ignore le vrai nom,
Esprit mystérieux, mortel, ange ou démon,
Qui que tu sois, Byron, bon ou fatal génie,
J'aime de tes concerts la sauvage harmonie,
Comme j'aime le bruit de la foudre et des vents
Se mêlant dans l'orage à la voix des torrents !
La nuit est ton séjour, l'horreur est ton domaine :
L'aigle, roi des déserts, dédaigne ainsi la plaine,
Il ne veut, comme toi, que des rocs escarpés
Que l'hiver a blanchis, que la foudre a frappés ;
Des rivages couverts des débris du naufrage,
Ou des champs tout noirs des restes du carnage ;
Et, tandis que l'oiseau qui chante ses douleurs,
Bâtit au bord des eaux son nid parmi les fleurs.
Lui des sommets d'Athos franchit l'horrible cime,
Suspend aux flancs des monts son aire sur l'abîme,
Et là, seul, entouré de membres palpitants,
Trouvant sa volupté dans les cris de sa proie,
Bercé par la tempête, il s'endort dans la joie.

LAMARTINE.

Translate into French :—

The island of Cyprus, so choicely situated as an emporium and station for the commerce of the Mediterranean, was a spot on which both the Genoese and Venetians had cast for some time a greedy and longing eye ; and the equipoise established by the reciprocal jealousy which was entertained of such an acquisition by the rival powers, had alone, perhaps, arrested the downfall of the feeble dynasty of the Lusignani. The trading entrepôts formed by the emulous commonwealths at Nicosia and Famagosta, the two capitals of this tiny monarchy, enjoyed approximately similar privileges ; but it was rarely that the reigning king was sufficiently strong or sufficiently judicious to refrain from patronizing one settlement in preference to the other. The predilections of the late prince, Peter I., had been Genoese ; and throughout his reign, more especially towards its close, the Genoese factory obtained a marked ascendancy on the island. At his decease, however, the crown devolved upon a minor, who fell under the tutelage of his uncles ; and the latter at once betrayed an equally decided bias to the Venetians.—HAZLITT : *History of the Venetian Republic*.

II.—Translate into French or German :—

History often appears to be a record of the acts of individuals, and this not necessarily from an inadequate conception of the historian. There are eras, in highly advanced as well as in primitive stages of civilization, when individual force, genius, and ambition, are the main moving powers of events. To understand the will of some great man, is to understand the secret of the times. The era of the Peloponnesian war appears in marked contrast with such epochs. Probably at no other time has national life been so powerful. In Athens the collective force of the State, during the greater part of the war, was paramount in its ascendancy over individual influence. Their strong feeling of equal citizenship rendered the Athenians especially jealous of the rise of great men among them. There was, indeed, one partial exception to this jealous hindrance of individual superiority during the first years of the war, when Pericles guided the policy of the State. But after his death, though there were many eminent men, there was none of force sufficient to exercise entire sway over events.

III.—Translate into French :—

Fu Lodovico Sforza condotto a Lione, dove allora era il Re, ed introdotto in quella Città in sul mezzo di, concorrendo infinita moltitudine a vedere un Principe poco innanzi di tanta grandezza e maestà, e per la sua felicità invidiato da molti, ora caduto in tanta miseria. Donde, non ottenuta grazia d'essere, come sommamente desiderava, intronesso al cospetto del Re, dopo due di fu menato nella Torre di Locces, nella quale stette circa dieci anni, ed insino alla fine della vita prigioniero; rinchiodendosi in una angusta carcere i pensieri e l'ambizione di colui, che prima appena capivano i termini di tutta Italia. Principe certamente eccellentissimo per eloquenza, per ingegno e per molti ornamenti dell'animo, e della natura, e degno d'ottenere nome di mansueto e di elemente, se non avessi mbrattata questa laude l'infamia per la morte del nipote; ma da altra parte d'ingegno vano, e pieno di pensieri inquieti e ambiziosi, e disprezzatore delle sue promesse e della sua fede, e tanto presumendo del sapere di sè medesimo, che ricevendo somma molestia, che e' fosse celebrata la prudenza e il consiglio degli altri, si persuadesse di potere con l'industria e arti sue volgere dovunque gli paresse i concetti di ciascuno.—*Guicciardini*.

PHILOLOGICAL AND LITERARY QUESTIONS.

1. An old French form for *acheteur* is *achapteur*;—show on principles of comparative philology, involving the Northern and Teutonic dialects, that the constituent factor "*Chap*," containing the root of this word, is identical with German *Kauf*, Dutch *Koop*, Danish *Køb*, English *Cheap*.

2. Describe:—*a*. The oldest document in the literature of France.—State the date of that document; its special tenor and its linguistic character. *b*. The oldest document in German literature; state (as above) particulars respecting time, tendency (whether political or religious?), and its characteristic, *linguistically speaking*; *c*. Trace the *outer* history of the latter document. To which University has it been ultimately transferred, and under what historical circumstances?

3. Distinguish between *Trouvères* and *Troubadours*, also between *Meistersänger* and *Minnesänger*. Trace the relation (if any) between the just-mentioned *French* and *German* writers respectively; refer to time, tenor, and tendency, as regards *both* classes.

4. Dwell at some length (by way of an *original French composition*) on the historian Froissart, and compare him approximately, 1, with a modern *English* writer, *stylistically*, or relative to *descriptive* qualities; 2, with an *old English* writer in a purely *linguistic* point of view (i.e., relative to the periodical stage of the language *as such*).

[Other questions on comparative philology, and relating to subsequent later epochs in the literature of France formed a subject of *viva voce* examination.]

Translate into English :—

Das Edelste, was wir besitzen, haben wir nicht von uns selbst; unser Verstand mit seinen Kräften, die Form, in welcher wir denken, handeln, und sind, ist auf uns gleichsam herabgeerbet. Wir denken in einer Sprache, die unsere Vorfahren erfanden, in einer Gedankenweise, an der so viele Geister hildeten und fornteten, zu der auch in andern Sprachen die schönsten Genien des Menschengeschlechts beitrugen und uns damit den edelsten Theil ihres Daseins, ihr innerstes Gemüth, ihre erworbenen Gedankenschätze huldreich vermachten. Täglich genießen und gebrauchen wir tausend Erfindungen, die aus alten Zeiten, ja zum Theil von den fernsten Gegenden der Erde zu uns gekommen sind, und ohne die wir ein freudenloses, dürftiges Leben führen müßten. Maximen und

Sitten sind auf uns geerbt, die nicht nur das Gesetz der Natur, das dunkel in uns liegt, erhellen, sondern uns auch erwärmen und Kraft geben, uns über Bedrückniß und Gewohnheit hinaufzuschwingen, Verurtheile abzuschütteln, und indem wir andere Gemüther von demselben Lichte des Wahren, Guten und Schönen durchdrungen fühlen, uns mit ihnen in Freundschaft und Thätigkeit weit inniger zu vereinigen, als geist und sinnlose Körper sich je vereinigen konnten. Diese Kette von Wirkungen ist zu uns gelangt, sie hat uns umfaßt und umschlungen; wider Willen müssen wir an ihr haften und im Guten oder Bösen thätig oder hindernd, auf Welt und Nachwelt fortwirken. Dies ist das unsichtbare, verborgene Medium, das Geister durch Gedanken, Herzen durch Reizungen und Triebe, die Sinne durch Eindrücke und Formen, bürgerliche Gesellschaften durch Gesetze und Anstalten, Geschlechter durch Beispiele, Lebensweise und Erziehung, Liebende durch Liebe, Freunde durch harmonische Freundschaft knüpft.—Herder: "*Von der menschlichen Unsterblichkeit.*"

Mignon.

Kennst du das Land? wo die Citronen blühen,
Im dunkeln Laub die Gold-Drangen glühen,
Ein sanfter Wind vom blauen Himmel weht,
Die Myrte still und hoch der Lorbeer steht,
Kennst du es wohl?

Dahin! dahin!

Möcht' ich mit dir, o mein Geliebter, ziehn.

Kennst du das Haus? Auf Säulen ruht sein Dach
Es glänzt der Saal, es schimmert das Gemach,
Und Marmorbilder stehn und sehn mich an,
Was hat man dir du armes Kind, gethan?
Kennst du es wohl?

Dahin! dahin!

Möcht' ich mit dir, o mein Beschützer, ziehn.

Kennst du den Berg, und seinen Wolfensteg?
Das Maulthier sucht im Nebel seinen Weg:
In Höhlen wohnt der Drachen alte Brut:
Es stürzt der Fels, und über ihn die Fluth.
Kennst du ihn wohl?

Dahin! dahin!

Geht unser Weg! o Vater, laß uns ziehn!

Translate into German—

As early as the eighth century, in the troubled reign of the Iconoclasts, Greece, and even Peloponnesus were overrun by some Slavonian bands, who outstripped the royal standard of Bulgaria. The strangers of old, Cadmus, and Danaus, and Pelops, had planted in that fruitful soil the seeds of policy and learning; but the savages of the North eradicated what yet remained of their sickly and withered roots. In this irruption the country and the inhabitants were transformed; the Grecian blood was contaminated; and the proudest nobles of Peloponnesus were branded with the names of foreigners and slaves. By the diligence of succeeding princes, the land was in some measure purified from the barbarians; and the humble remnant was bound by an oath of obedience, tribute, and military service, which they often renewed and often violated. The siege of Patras was formed by a singular concurrence of the Slavonians of Peloponnesus and the Saracens of Africa. In their last distress, a pious fiction of the approach of the praetor of Corinth revived the courage of the citizens.

Appendix,
No. 8.

Examina-
tions.

Their sally was bold and successful; the strangers embarked, the rebels submitted, and the glory of the day was ascribed to a phantom or a stranger, who fought in the foremost ranks under the character of St. Andrew the Apostle. The shrine which contained his relics was decorated with the trophies of victory, and the captive race was for ever devoted to the service and vassalage of the Metropolitan Church of Patras.—*Gibbon's Decline and Fall of the Roman Empire.*

QUESTIONS ON THE HISTORY OF GERMAN LITERATURE.

1. Describe the influence which Charlemagne exercised on the literature of Germany, and state the best sources from which we may derive our information on the subject.
2. Give the names of some of the contemporaries of Luther, and describe the works by which they gained a place in the history of German literature.
3. State what you know of Sebastian Brant, Johann Fischart, and Opitz.
4. Give an account of the controversy between Gottsched and Bodmer.
5. Give a short outline of the history of German literature from Gottsched to Goethe.
6. Describe the influence which Leibnitz exercised on the literature of Germany.

IN MATHEMATICS.—*Examiner, H. J. Sharpe, M.A.*

1. Show that the equation of the asymptotes of the conic $la^2 + m\beta^2 + u\gamma^2 = 0$ is $(la^2 + m\beta^2 + u\gamma^2) \left(\frac{a^2}{l} + \frac{b^2}{m} + \frac{c^2}{n} \right) = (aa + b\beta + c\gamma)^2$.
2. A tangent to an ellipse at a point P intersects a fixed tangent in T ; if a line be drawn through the focus S perpendicular to ST to meet PT in Q , the locus of Q is a straight line touching the ellipse.
3. Prove that a root of the equation $x - \epsilon^{\alpha x} = 0$ is

$$1 + \frac{2a}{2} + \frac{3^2 a^2}{3} + \frac{4^3 a^3}{4} + \dots$$

4. If two roofs whose ridges are at right angles to each other make angles α and β with the horizon, the angle θ which their intersection makes with it is given by

$$\cot^2 \theta = \cot^2 \alpha + \cot^2 \beta.$$

5. If $y = z + x\phi(y)$ where z and x are independent, find the expansion of $f(y)$ in ascending powers of x .

Ex. If $y = z + x \sin y$ expand $\cos y$ in powers of x .

6. If $u = f(x, y, z)$, $r = y^2 + x^2$, $s = z^2 + x^2$, $t = x^2 + y^2$, change the variables to r, s, t in the equation

$$x^2 \frac{d^2 u}{dx^2} + y^2 \frac{d^2 u}{dy^2} + z^2 \frac{d^2 u}{dz^2} = 0.$$

7. Show how to change the variables in a double integral.

If $x^2 + y^2 = r^2$ and $\frac{y}{x} = t$, change the variables to r and t in the expression

$$\int_0^a \int_0^b f(x, y) dy dx.$$

8. Show how to determine the locus of the feet of perpendiculars from the origin upon the tangent lines to a given curve in space.

The equations to the curve being $x = a \cos \theta$ $y = a \sin \theta$ $z = c\theta$, show that the locus is a curve lying on a hyperboloid of one sheet.

9. State the conditions of a contact of the second order between two surfaces; and show that a surface of the second degree can generally be found with its axes parallel to the co-ordinate axes, having a contact of the second order with any given surface at a given point.

Appendix,
No. 8.
Scholarship
Examina-
tions.

10. Integrate completely the following equations :

$$\frac{d^2y}{dx^2} + 2 \tan x \frac{dy}{dx} - y = 0.$$

11. Find the equation to a surface of revolution such that the distance of the CG from the vertex for any segment cut off by a plane $\perp$ to the axis shall vary as the square of the length of the segment.

IN POLITICAL ECONOMY.—*Examiner, Professor Leslie.*

1. What are, according to Adam Smith, the causes of the prosperity of new colonies, and why?

2. Why are grants of land unsuitable endowments of a church or public institution in a new colony?

3. In what sense, and with what limitations, is it true that the rate of profit is the same in all trades?

4. According to a Parliamentary Return, the wages of agricultural labourers in 1861 averaged 10s. 2d. in Roscommon, and only 6s. a week in Queen's County. Can you explain this inequality consistently with the economic theory of the equality of wages in the same employment?

5. On what causes will the price of linen for the next two years depend?

6. State briefly the chief advantages and disadvantages of direct taxation.

7. State briefly the chief advantages and disadvantages of indirect taxation.

8. Explain the principle of Mr. Pitt's Sinking Fund, and point out its fallacy.

9. How does an adverse foreign exchange affect exportation and importation respectively, and why?

10. On what causes does the value of gold in a country of gold mines depend?

11. On what causes does the value of gold in a country without gold mines depend?

12. Explain the principles of the Bank Charter Act.

IN ANATOMY AND PHYSIOLOGY.—*Examiner, Dr. Redfern.*

ANATOMY.

1. Describe the tympanic cavity, its shape, walls, openings, and membranes. Enumerate its contents without describing them.

2. Describe the branches of arteries which are distributed upon the alimentary canal, and their anastomoses with each other from the mouth to the anus.

3. State the position, size, relations, and coats of the duodenum, and describe the minute structure of the mucous membrane and its accessory parts.

PHYSIOLOGY.

1. What are the phenomena attendant on the coagulation of the blood? What circumstances hasten, and what retard, coagulation? State what evidence there is that coagulation results from the separation of ammonia

Appendix,
No. 8.
Scholarship
Examina-
tions.

from the fluid blood. State the proofs of a super-alkaline condition of the blood during life and after death, and the circumstances under which super-alkalinity occurs in man's blood, and those which will produce it in that of animals.

2. Describe the reparative process which takes place after the division of a tendon, a nerve, and a muscle respectively; also after a wound of cartilage, the fracture of a bone, and the destruction of a portion of skin.

3. Describe and contrast the structure of the respiratory apparatus of a fish, a reptile, a bird, and a mammal.

SURGICAL ANATOMY.—*Examiner, Dr. Gordon.*

1. Describe the relations of the Anterior Tibial Artery, and the practice that has been pursued in cases of wounds in this vessel in Compound Fractures of the Leg.

2. Describe briefly the relative position of the bones of the tarsus to each other; their articular surfaces, and the guides which assist in determining their precise situation in performing the amputations of this part of the foot, as described in the text-books of Surgery.

3. Describe the course and coverings of the various forms of Inguinal Hernia.

4. What arteries supply the Mammary Gland? and mention the precautions to be taken to avoid loss of blood in its excision.

MEDICAL JURISPRUDENCE.—*Examiner, Dr. Hodges.*

1. Describe the methods required for the detection of alcohol in the contents of the stomach.

2. State the operations employed to detect hydrochloric acid in the presence of organic matters.

3. How is hydrochloric acid quantitatively determined?

4. Describe the methods required for the identification of sulphuric acid, and the determination of the amount of commercial acid which may have been swallowed.

5. How is arsenic quantitatively determined?

6. What are the objections to the evidence afforded by Reinsch's process, when employed for the detection of arsenic?

THE REPORT
OF THE
PRESIDENT OF QUEEN'S COLLEGE, CORK,
FOR
THE ACADEMIC YEAR 1861-62.

TO THE QUEEN'S MOST EXCELLENT MAJESTY.

MAY IT PLEASE YOUR MAJESTY,

In accordance with the requirements of the Statutes of the Queen's College, Cork, and of the Act of Parliament founding the Queen's Colleges, I have the honour to submit the following Report of the Proceedings of that College, and of the condition of its several departments, during the past Academic Year, 1861-62.

1. EXAMINATIONS FOR ENTRANCE—NUMBERS AND CLASSIFICATION
OF STUDENTS.

The Matriculation Examinations were held as usual at the commencement of the Session, and subsequently as arranged by the College Council. The regulations prescribed for those and other College Examinations are given in the Prospectus for the Session hereto annexed, forming Appendix A.

At the close of those Examinations, 89 new Students were admitted as Matriculated Students of the First Year's Class, in addition to 21 Students who had previously matriculated, but from non-promotion or other causes, had arranged to resume the studies of the First Year. The total number of Matriculated Students in the First Year's Class for the Session 1861-62 was, therefore, 110.

In addition to those 110, there entered to proceed with the studies of the senior years, 101 Students who had passed the Sessional Examinations of the preceding year, and had been promoted in their several Faculties or Departments, in which such is required. The total number of Matriculated Students attending Queen's College, Cork, for the Academic Year 1861-62 was, consequently, 211.

In addition to those 211 Matriculated Students, 18 Non-Matriculated Students entered to attend the Lectures of special Profes-

sors. The total number of Students attending the College during the year 1861-62 was, therefore, 229.

The following table exhibits the collegiate standing of the above Students, and will serve to compare those numbers with the returns of the preceding Sessions:—

Courses of Study in order of Collegiate standing.		Session 1860-61.	Session 1861-62.
Matriculated Students	Course of First Year, .	88	110
	Course of Second Year, .	37	55
	Course of Third Year, .	21	20
	Course of Fourth Year, .	12	22
	Special Courses not for University Degrees, .	15	4
Total number of Matriculated Students, .		173	211
Non-Matriculated Students, . . .		30	18
Total number of Students, . . .		203	229

Indicating a satisfactory increase.

With reference to the several Faculties and Courses of study for Degrees or Diplomas, the Students attending Queen's College, Cork, in the Academic Session 1861-62, were classified as follows:—

	Matriculated.	Non-Matriculated.	Total.
Faculty of Arts, . . .	77	—	77
Faculty of Law, . . .	9	1	10
Faculty of Medicine, . .	103	17	120
Course of Engineering, . .	36	—	36
Course of Agriculture, . .	1	—	1
Total, . . .	226	18	244
From which deduct, as attending more than one Faculty, .	15	—	15
Number of individuals as above, .	211	—	229

Of the number 15 who were attending more than one Faculty, there were in attendance on:—

Arts and Medicine, . . .	10
Arts and Law, . . .	5
Total, . . .	15

The respective ages of Matriculated Students are given in the following tables, arranged, 1st, as regards College standing, and 2nd, as to the Faculties or Courses attended:—

TABLE OF AGES BY STANDING.

CLASSES.	14 Years.	15 Years.	16 Years.	17 Years.	18 Years.	19 Years.	20 Years.	21 Years.	Un-known.	Total.
1st Year, . . .	1	9	17	28	17	10	12	14	2	110
2nd Year, . . .	—	—	12	8	12	9	10	4	—	55
3rd Year, . . .	—	—	—	1	6	3	3	9	—	20
4th Year, . . .	—	—	—	—	3	2	3	14	—	22
Special, . . .	—	—	—	—	—	1	—	3	—	4
Totals, . . .	1	9	29	37	33	28	28	44	2	211

TABLE OF AGES BY FACULTIES.

FACULTIES.	14 Years.	15 Years.	16 Years.	17 Years.	18 Years.	19 Years.	20 Years.	21 Years.	Un- known.	Total.
Arts, . . .	—	4	11	21	13	9	8	11	—	77
Law, . . .	—	—	—	2	2	2	1	2	—	9
Medicine, . .	—	1	9	12	15	16	22	27	1	103
Engineering, .	1	3	9	6	4	5	4	3	1	36
Agriculture, .	—	—	—	1	—	—	—	—	—	1
Totals, . . .	1	8	29	42	34	32	35	43	2	226

Including the 15 duplicates as above.

The ages of the 89 Students who entered Queen's College, Cork, for the first time, in the Session 1861-62, were as follows:—

14 Years, . . .	1	18 Years, . . .	14	Unknown, . . .	2
15 Years, . . .	8	19 Years, . . .	8		—
16 Years, . . .	15	20 Years, . . .	9	Total, . . .	89
17 Years, . . .	18	21 Years, . . .	14		

Of the 211 Matriculated Students, 10 interrupted their studies before the termination of the Session.

2. COLLEGE EXAMINATIONS FOR SCHOLARSHIPS AND SESSIONAL PROMOTION OF MATRICULATED STUDENTS.

The several Examinations for Scholarships and for Sessional promotion, were held as prescribed by the College Council, with the following results:—

Of the 7 Senior Scholarships in the Faculty of Arts, 6 were awarded.

Of the 30 Junior Scholarships in the Faculty of Arts, 19 were awarded.

Of the 2 Senior and 6 Junior Scholarships in the Faculty of Medicine, 7 were awarded.

Of the Senior and 3 Junior Scholarships in the Faculty of Law, all were awarded.

Of the 6 Scholarships in the Courses of Engineering and Agriculture, 2 were awarded.

Those Examinations were conducted, as usual, principally by printed papers, but also partly, in some cases, *viva voce*. The subjects of the Examinations are prescribed in the Prospectus, Appendix A, and a selection of the principal Examination Papers is given, forming Appendix B.

At the Examinations for Class Promotions and Prizes held at the termination of the Session, the following were the results:—

In the Faculty of Arts, of 44 Students of the first year, 27 were promoted to second year's rank.

Of 16 Students of the second year, 14 were promoted to third year's rank.

Of 6 Students of the third, 5 were promoted to fourth year's rank, and were recommended for Examination for the Degree of A.B.

The 7 Students of the fourth year, were all recommended to be examined for the Degree of A.M.

In the Faculty of Law, of the 9 Students, 6 were promoted to their Senior Classes respectively, and 1 recommended for Examination for the Degree.

In the Department of Engineering, of 36 Students, 23 were promoted to their Senior Classes respectively, and 9 were recommended to be examined for the Degree.

No collegiate promotion takes place in the Faculty of Medicine, such students only being examined who compete for Scholarships or Prizes; neither are those Students examined who attend only special classes. The following table exhibits the general results:—

	Promoted.	Not Promoted.	Total.
Faculty of Arts,	46	31	77
Faculty of Law,	6	3	9
Course of Engineering and } Agriculture, }	24	13	37
Faculty of Medicine, where no promotion takes place, . .			103
Total,			226

The proportion of Students promoted does not differ materially from that of the preceding year, and may be considered satisfactory as compared with the high standard of proficiency established by the Professors and the College Council. Prizes were awarded to those Students who most distinguished themselves in the several subjects. A selection of the Examination Papers is given herewith, forming Appendix C, and a list of the Students on whom Sessional Prizes were conferred, is given in Appendix D.

3. COURSES OF INSTRUCTION.

The special subjects of the courses of instruction given by the several Professors, the number of Students attending each class, and the number of Lectures delivered by each Professor, will be found in the following table:—

Subjects of Course.	Number of Lectures weekly.	Number of Lectures in Course.	Number of Students attending.
Greek Language,	9	Roll burned.*	54
Latin Language,	9	Roll burned.	60
English Language,	3	40	42
English Literature,	3	54	5
History,	3	50	3
French Language,	6	230	101
Celtic Languages,	3	60	3
Mathematics,	6	Roll burned.	70
Natural Philosophy,	12	242	72
Chemistry,	3	68	72
Practical Chemistry,	3	45	29
Natural History,	3	68	43
Geology and Mineralogy,	3	73	49
Logics,	3	37	16
Metaphysics,	3	51	16
Civil Engineering,	12	Roll burned.	35
Agriculture,	3	—	1
Anatomy and Physiology,	5	112	80
Practical Anatomy,	5	110	63
Practice of Surgery,	3	60	27

* This alludes to the fact of the burning of the west wing of Queen's College, Cork, on the 13th May, 1862, to which subsequent reference is made.

Subjects of Course.	Number of Lectures weekly.	Number of Lectures in Course.	Number of Students attending.
Practice of Medicine,	3	53	22
Midwifery,	3	58	23
Materia Medica,	3	61	37
Medical Jurisprudence,	3	36	14
English Law,	3	48	8
Jurisprudence,	3	48	8
Political Economy,	3	24	4

Those courses of instruction were all delivered by the several Professors, with the same zeal and ability which I have noticed in former Reports. The diligence and progress of the Students were also found to be very satisfactory. Further details as to those courses, and as to the several Professorial departments, will be found in the special Report of the Professors annexed, forming Appendix E.

QUEEN'S UNIVERSITY EXAMINATIONS, HONORS AND DEGREES CONFERRED.

Such Students as had suitably completed their Collegiate courses were recommended to the Senate of the Queen's University to be examined for their respective Diplomas and Degrees. The names of those Students of Queen's College, Cork, who obtained Degrees or Diplomas at the University Examinations held in June and October, 1862, and also the names of such as obtained University Honors at those Examinations, are given in Appendix F.

COMPETITIVE EXAMINATIONS, AND CIVIL SERVICE APPOINTMENTS.

At the College Examination for the Special Prizes founded to encourage proficiency in those branches of study concerned in the principal Civil Service Examinations, the first prize was awarded to Mr. Robert Orr, A.B.; the second and third prizes were not awarded.

The Resolution and Regulations of the College Council regarding the Special Prizes, and the Papers of Questions used at the Examination, are given in Appendix G.

At the Examination for admission to the Public Works Service of India, which was held in London in May and June, 1862, 3 former Students of Queen's College, Cork, were successful. Mr. F. O'Callaghan having obtained third place; Mr. Edward Mansfield, fifth place; and Mr. George Jones, tenth place. There having been but 10 appointments to be made.

PEEL EXHIBITIONS.

Through the beneficent energy and influence of the Right Hon. Sir Robert Peel, Bart., M.P., Chief Secretary for Ireland, considerable funds were collected during the past year, by means of a public subscription, for increasing the number and amount of the endowments available to Students in the Queen's Colleges. In this well-timed and well-merited assistance, the Students of the Queen's

College, Cork, in common with those of the other Queen's Colleges, have already begun to participate: an Exhibition in Arts, of value £60, having been conferred on Mr. Thomas Ryan, and an Exhibition in Engineering, of value £30, on Mr. William Quarry, at Examinations held in October, 1862.

The liberality and public spirit with which this new foundation was proposed and established, has been doubly gratifying to the friends of united education and liberal progress. On the one hand, it supplements in an important degree the very limited assistance afforded by the State to the Students of the Queen's Colleges, and as it also serves to connect, permanently, with those Institutions, the name of the illustrious statesman to whom their establishment was mainly due; a name identified in history with the principles upon which the true greatness of this Empire rests, enlightened industry, religious equality, freedom of commerce, and liberal education.

LIBRARIES, MUSEUMS, AND BOTANIC GARDENS:

The alterations and additions made in those Departments during the past year do not require any special remark, except as regards the results of the fire at the College, referred to in a subsequent part of this Report. Details as to the numbers and kinds of books and specimens obtained, and the progress made in classification and arrangement, will be found in the Reports of the Curator of the Museum and of the Librarian, which are annexed, forming Appendix H, Nos. 1 and 2.

FINANCIAL POSITION OF THE COLLEGE:

I have the honour to append copies of the several accounts furnished by the Bursar, showing the appropriation of the College Endowment, and also the mode of distribution of the Parliamentary Grant of £1,600 among the several departments of the College, forming Appendix I.

CONDUCT AND DISCIPLINE OF STUDENTS.

The conduct of the Students of Queen's College, Cork, during the Session 1861-62, has been highly satisfactory to the authorities. But one case of breach of College discipline came before the Council, during the year. It was but of a trivial character, and was suitably punished by a small pecuniary fine. The Report of the Vice-President on Discipline, and the Return of Punishments from the Registrar, will be found in Appendix K, Nos. 1 and 2.

In reference to the religious and moral conduct of the Students, I have the honour to annex the Reports of the several Deans of Residences, viz.:—Rev. Mr. Webster for the Students of the Established Church, the Rev. Mr. Tracy for Students of the Wesleyan Communion, Rev. Dr. Magill for Students of the Presbyterian Church, and the Rev. Mr. Whitelegge for Students of the Non-Subscribing Presbyterian body. With regard to Students of

the Roman Catholic Church, I beg to refer to the statements contained in my Report for the Session 1860-61, and to Rev. Mr. O'Connor's Reports therein quoted: the conduct of the Roman Catholic Students during the past Session, having fully sustained the high character already so frequently awarded to them. The above Reports form Nos. 3, 4, 5, and 6 of Appendix K.

In regard to the numerical proportion of the several religious bodies among the Students, I beg to report, that of the 229 Students who were enrolled in Queen's College, Cork, for the Session 1861-62, there were—

Religions.	Matriculated.	Non-Matriculated.	Total.	Per cent.
Roman Catholic, .	91	7	98	42·9
Church of England, .	102	9	111	48·4
Presbyterian, .	7	—	7	3·0
Wesleyans, .	7	—	7	3·0
Independents, .	—	2	2	0·9
Society of Friends, .	2	—	2	0·9
Unitarians, .	2	—	2	0·9
Totals, .	211	18	229	100·0

It may be of interest, for comparison, to state here, the similar numbers of the Students who have entered the Queen's College, Cork, for the Session now current, 1862-63, up to present date, January 13, 1863, they are—

Religions.	Matriculated.	Non-Matriculated.	Total.	Per cent.
Roman Catholic, .	83	9	92	39·6
Church of England, .	113	6	119	51·1
Presbyterian, .	6	—	6	2·6
Wesleyans, .	10	—	10	4·3
Independents, .	—	2	2	0·8
Society of Friends, .	2	—	2	0·8
Unitarians, .	1	1	2	0·8
Totals, .	215	18	233	100·0

And for the three Sessions of 1860-61, 1861-62, and 1862-63, the number of Students, and the proportions of religions, have been—

Religions.	1860-61.	1861-62.	1862-63.
Roman Catholic, .	97	98	92
Church of England, .	92	111	119
Presbyterian, .	2	7	6
Wesleyans, .	8	8	10
Independents, .	1	1	2
Society of Friends, .	2	2	2
Unitarians, .	1	2	2
Totals, .	203	229	233

BURNING OF THE WEST WING OF QUEEN'S COLLEGE, CORK.

I regret to have to report, that on the morning of Thursday, 13th May, 1862, at about six o'clock, the west wing of Queen's College, Cork, was discovered to be on fire, and notwithstanding all the efforts made, the conflagration could not be extinguished

until the roof, wood-work, and much of the contents of that part of the building, had been destroyed. Fortunately the flames were arrested by the massive masonry of the gate-tower, and the fire was thereby entirely limited to the west wing. The Library and Natural History Museum were thus perfectly safe, with the exception of some books, maps, and specimens which happened to be, at the time, in use in the Lecture-rooms, which were burned. The principal losses, besides the injury to the building, were the *Materia Medica*, Pathological, Surgical, and Midwifery Museums entirely destroyed, as also the collections of instruments, models, and drawings belonging to the Engineering School. The valuable collection of Electro-type copies of Classical Gems and Coins, and a number of specimens of Classical and Mediæval Art, the purchase of which had been referred to in preceding Reports, were similarly lost. The valuable contents of the Chemical Laboratory and Museum, and of the collection of Physical and Mechanical apparatus were, however, fortunately removed from the burning building with but very trifling injury.

Some private property belonging to Professors and Students, which happened to be in that part of the College at the time, was also lost.

The estimate of the Collegiate and private property lost, independent of the injury of the building and fittings in charge of the Board of Works, which was submitted to the Governmental authorities soon after the fire, is given in Appendix L, No. 1, and my official Report of the occurrence, is also given in that Appendix, No. 2.

From the evidence obtained by the College Council immediately after the occurrence, there appears to be little doubt but that the building was intentionally set on fire. No means has, however, been as yet found of discovering the guilty individual.

I am glad, however, to be able to add, that owing to the untiring zeal of the Professors, and to the active co-operation of the Board of Works, such arrangements were carried out during the recess for the restoration of certain parts of the building, and the temporary fitting up of others, as enabled the business of the College to be resumed at the proper time for the current Session, and the various classes to be opened by the Professors, with the greatest number of Students that has ever been in attendance on the Queen's College, Cork.

Signed,

ROBERT KANE,

President of Queen's College, Cork.

13th January, 1863.

APPENDIX.

The College Session, 1861-62.

The *First Term* will commence on the 15th of October, 1861, and end on the 21st of December.

The *Second Term* will commence on the 7th of January, 1862, and end on the 12th of April.*

The *Third Term* will commence on the 28th of April, 1862, and end with the Session, on the 14th of June.

* The Easter recess for the Medical Faculty will commence on the Tuesday before Easter, and end on Easter Monday.

Appendix A.

General
Regulations
of College,
&c.

SUBJECTS OF THE MATRICULATION EXAMINATIONS.

For the Faculties of Arts, Medicine, and Law.

Greek :

Grammar.

Any one of the following Authors, which the Candidate may select:—

Homer—*Iliad*, Books I. and II.

Xenophon—*Anabasis*, Books I. and II.

Lucian—Walker's Selections.

Latin :

Any one of the following Authors, which the Candidate may select:—

Virgil—*Aeneid*, Books I. and II.

Sallust—*Conspiracy of Catiline*.

Re-translation into Latin of short sentences from Cæsar's *Gallie War*, Book I.

English :

Grammar—

(1.) The principles of Etymology and Orthography.

(2.) The leading Rules of Syntax.

Composition, and writing from dictation.

Outlines of Grecian History to the death of Alexander the Great.

Outlines of Roman History to the accession of Augustus.

Outlines of Ancient and Modern Geography.

Mathematics :

Arithmetic—Principles of Notation. Vulgar and Decimal Fractions. Definition of the terms, Ratio and Proportion. The Rule of Proportion, with its commercial applications, including Simple Interest.

Algebra—Explanation of the signs and meaning of an Index. Calculation of the values of Algebraical Expressions, when particular values are given to the letters which they involve.

Euclid—Book I., with the definitions and axioms.

For the Department of Civil Engineering.

The outlines of Modern Geography ; Grammar.

Mathematics—Arithmetic, Principles of Notation, Vulgar and Decimal Fractions, with the reasons of the different rules. Rule of Proportion, with its commercial applications ; Extraction of the Square Root, both of whole numbers and decimals.

Algebra—Explanation of the signs and meaning of an Index, calculation of the value of Algebraic expressions, when particular values are given to the letters which they involve.

Euclid—Books I., II., III., IV., and VI., with the definitions of Book V.

For the Department of Agriculture.

The English Language :

Grammar and Composition.

Mathematics :

First Four Rules of Arithmetic. Proportion. Vulgar and Decimal Fractions. Extraction of the Square Root.

Modern Geography.

MATRICULATED STUDENTS.

Persons intending to become *Matriculated* Students of the College, in any of the Faculties or Departments of Faculty, are required to pass the Matriculation Examination, whereby they are declared competent to pursue the course of study

prescribed to Students in that Faculty or Department of Faculty, and, on completing this course, are entitled to become Candidates for the Degrees or Diplomas granted by the Queen's University in Ireland.

The Examinations for the MATRICULATION of Students in the several Faculties and Departments of Faculty, will commence at Ten o'clock, on Tuesday, the 15th of October, 1861.

Appendix A.
General Regulations of College, &c.

Candidates for Matriculation are required to forward their names to the Registrar of the College, and to state the Faculty or Department of Faculty for which they propose to Matriculate, at least *three days* before the commencement of the Matriculation Examinations.

Each Candidate, before being admitted to the Matriculation Examination, is required to pay to the Bursar of the College the *Matriculation and College Fees* for the year, amounting together to 10s. for each Faculty or Department of Faculty. These fees will be returned to such Candidates as may fail in passing the Matriculation Examination.

After passing the Matriculation Examination, and before receiving a Certificate thereof, or joining the several Classes, each Student of the Literary and Science Divisions of the Faculty of Arts is required to pay the Bursar of the College the sum of £4 15s., being a *moiety* of the *Class Fees* for the Session. The remaining moiety will be required on or before the 10th of December, 1861.

Students of the Faculties of Medicine and Law, and of the Departments of Engineering and Agriculture in the Faculty of Arts, are required to pay on Matriculation, and before receiving a Certificate thereof, the *whole* of the Fees of the Classes for which they enter. See Table of Class Fees.

Junior Scholars are exempt from the payment of more than *one moiety* of the *Class Fees* for the Session.

In order to encourage the study of French by Candidates for Matriculation, a prize of £5 will be offered for competition in that language, to such Students as shall have passed the Matriculation Examination for the Session 1861-62.

Matriculated Students are required to wear an academic dress.

In May and June are held General Examinations in the subjects lectured upon during the Session; and a sum of One Hundred Pounds is awarded in Prizes to the most distinguished Students.

Students who have pursued part of their studies in any one of the Queen's Colleges, or in any University capable of granting Degrees in the several Faculties of Arts, Law, and Medicine, are permitted, on passing the prescribed Examinations, to take corresponding rank in this College, and also to compete for Scholarships of the corresponding year; provided they shall not hold at the same time a Scholarship or other office of emolument in any University or College of a University.

NON-MATRICULATED STUDENTS.

Gentlemen who do not propose, or are not prepared, to Matriculate, but who wish to avail themselves, in other respects, of the advantages offered by the College, are permitted to attend the Professors' Lectures, without passing any of the Examinations, on paying to the Bursar the regulated College and Class Fees, amounting generally to £2 5s. for each course; but they cannot become Candidates for Scholarships or Prizes, or enjoy the other privileges of Matriculated Students. They are, however, entitled to the use of the Library, on subscribing the Library Regulations, and paying a fee of 15s. for each Session; and the Professors are authorized to recommend to the Council to grant Certificates of Honour to the most distinguished of them in their respective Classes.

EAST INDIA CIVIL SERVICE.

The attention of parents and guardians is directed to the new arrangements for the East India Civil Service; according to which Writerships are open to competition at Examinations prescribed by the Board of Control. The course of Lectures in the Queen's College, Cork, are well adapted to prepare Candidates

Appendix A. for this Examination, which includes the following branches of knowledge, their relative importance being indicated by the annexed scale of marks.

General
Regulations
of College,
&c.

English Language and Literature:

Composition,	500
English Literature and History, including that of the Laws and Constitution,	1,000
	1,500
Language, Literature, and History of Greece,	750
" " " Rome,	750
" " " France,	375
" " " Germany,	375
" " " Italy,	375
Mathematics, pure and mixed,	1,250
Natural Science—that is, Chemistry, Electricity, and Magnetism, Natural History, Geology, and Mineralogy,	500
* * No candidate will be allowed to be examined in more than three of the branches of knowledge included under this head, and the total (500 marks) may be obtained by adequate proficiency in any three.	
Moral Sciences—that is, Logic, Mental, and Moral Philosophy,	500
Sanscrit Language and Literature,	500
Arabic Language and Literature.	500
	7,375

LIBRARY AND MUSEUM.

The Library and Museum are open, under certain regulations, to all the Students.

FACULTY OF ARTS.

LECTURES.

The Lectures of the several Professors in this Faculty will commence on Monday, the 28th of October, 1861, except those on the "English Language" and on "Logic," which will not be delivered until the commencement of the Second Term.

SCHOLARSHIPS.

The Examinations for Scholarships will commence on Thursday, the 17th of October.* The College Council are empowered to confer, at these Examinations, Ten Senior Scholarships of the value of £40 each, and Forty-five Junior Scholarships, viz.:—Fifteen in Literature, and Fifteen in Science, of the value of £24 each; Six in Medicine, Three in Law, and Two in Civil Engineering, of the value of £20 each; and Four in Agriculture, of the value of £15 each—and if competent Candidates present themselves, these Scholarships will be awarded to the most deserving. The Scholarships are tenable for one year only; but the Scholars of each year are, at its expiration, eligible to become Candidates for the Scholarships of the succeeding year. A Scholarship, however, of the same year in the same Faculty, cannot be held twice by the same Student.

The Scholarships of the first year are open to all Students of the respective Faculties who have passed the Matriculation Examination. Those of the second, third, and fourth years are open to all Students who have passed the Examina-

* See Programme of Scholarship Examinations.

tions, and attended the Lectures prescribed in the preceding part of their Course of Study. *Appendix A.*

If any Student be placed, at the Examination for Junior Literary and Science Scholarships, first on both the lists of Candidates, he will be entitled to a Scholarship of each Division; but in no other case will the same Student be permitted to hold two Scholarships. *General Regulations of College, &c.*

No Student is entitled to become a Candidate for a Scholarship until he shall have paid the COLLEGE AND CLASS Fees for the current Session. To be paid on or before the day previous to the Examination.

The Scholarship endowment is paid by Quarterly Instalments, and its tenure is dependent on the Scholar's performance (so far as required by the Council) of the duties prescribed by the Statutes. These duties are to take charge of the Class-Rolls, to Register the attendance of the Students, to assist the Professors, &c.

If the Scholar be not obedient to the orders of the Council, be removed from the College, or, by non-attendance on Lectures, fail to keep the terms required for promotion, he forfeits his Scholarship.

The Scholar in the Faculty of Medicine must attend during the year of his appointment the classes recommended for his year of study in the order of the following Curriculum:—

FIRST YEAR.

Anatomy and Physiology.
Chemistry.
French and German.
Natural Philosophy.
Zoology and Botany.

SECOND YEAR.

Anatomy and Physiology.
Materia Medica.
Practical Anatomy.
Practical Chemistry.

THIRD YEAR.

Surgery.
Midwifery.
Practical Anatomy.
Clinical Surgery.

FOURTH YEAR.

Practice of Medicine.
Medical Jurisprudence.
Clinical Medicine.

JUNIOR SCHOLARSHIPS.

Subjects of Examination for Literary Scholarships of the First Year.

The Greek Language:

Homer—The Iliad, Books I., II., III., IV., V., VI.
Euripides—The Medea.
Herodotus—The Second Book.
Xenophon—The Anabasis, Books I., II., III.
Lucian—Walker's Selections.
Greek Prose—Re-translation of short sentences from English into Greek.

The Latin Language:

Virgil—First Six Books of the Æneid, the Georgics.
Horace—First Two Books of the Odes, the Satires, and the Epistles, Books I., II.
Cicero—De Senectute, De Amicitia.
Sallust—Conspiracy of Catiline, and Jugurthine War.
Cæsar—The Gallic War, Books V., VI.
Latin Prose—Re-translation from English into Latin, of portions of Cicero.

N.B.—The Examination in Greek and Latin will be conducted partly *vivâ voce*, and partly by printed questions.

The English Language:

Original Essays on subjects proposed by the Examiner. The Principles of English Grammar. The Laws of Etymology and Orthography, Craik's Outlines of the History of the English Language.

History and Geography:

Grecian History to the Death of Alexander the Great.
Roman History to the Accession of Augustus.
Outlines of Ancient and Modern Geography.

Appendix A. Subjects of Examination for Literary Scholarships of the Second Year.

General
Regulations
of College,
&c.

The Greek Language:*

Homer—Iliad, Books XX. to XXIV. inclusive.

Herodotus—Book I.

Euripides—Orestes.

Plato—Crito.

Composition in prose and verse. Grecian History and Ancient Geography.

The Latin Language:

Virgil—Eclogues and Æneid.

Horace—Odes, Satires and Epistles.

Terence—Phormio.

Cicero—Tusculan Disputations.

De Oratore.

Juvenal—Satires, I., III., VIII.,
XIII., XIV.

Sallust—Jugurthine War.

Livy—Book IV.

Tacitus—Histories, Book I.

Composition in prose and verse.

The English Language:

History of English Literature. Period, 1558-1649. Text Book, Chambers

Cyclopædia of English Literature. Vol. I., pp. 36-311.

Shakspeare's Julius Cæsar.

The French Language:

Bossuet—Oraisons Funèbres.

Lafontaine—Fables.

Barthe—Histoire de la Littérature Française.

Translation from English into French.

Subjects of Examination for Literary Scholarships of the Third Year.

The Greek Language:*

Homer—Odyssey, Books XII. to XVIII. inclusive.

Æschylus—Prometheus, Vincetus.

Plato—Apology.

Thucydides—Book I.

Composition in prose and verse. Grecian History and Ancient Geography.

The Latin Language:

Virgil—Eclogues, Georgics, and Æneid.

Horace—Odes, Satires, and Epistles.

Cicero—Tusculan Disputations.

Actiones Verrinæ.

De Oratore.

Terence—Adelphi and Phormio.

Juvenal—Satires, I., III., VIII., X., XIII., XIV.

Livy—Book IV.

Tacitus—Annals, Book I.

Histories, Book I.

Composition in prose and verse.

The English Language:

History of English Literature. Period, 1558-1689. Text Book, Chambers'

Cyclopædia of English Literature. Vol. I., pp. 36-534.

Hallam's Middle Ages. Chapter I. and II.

Shakspeare's Macbeth and Hamlet.

The French Language:

Translation from English into French.

Questions on French Literature.

Subjects of Examination for Science Scholarships of the First Year.

Arithmetic:

Mensuration of rectilineal figures and of the circle.

Algebra:

The Solution of Simple and Quadratic Equations with one or more unknown quantities. Easy questions in the application of Algebra to Geometry. Arithmetical and Geometrical Progressions. The nature of Logarithms.

* One passage will be set, not included in the specified portions of the authors.

Euclid :

Books I., II., III., and IV., with deductions.

Trigonometry :

Definitions of the Sine, Tangent, &c., of an angle. The easier analytical formulæ. The Solution of Plane Triangles, with demonstrations. Nature and Use of the Tables.

Appendix A.

General Regulations of College, &c.

Subjects of Examination for Science Scholarships of the Second Year.

The Higher Arithmetic :

Mensuration, with formulæ :

Algebra :

The Solution of Equations with one or more unknown quantities. Elimination. Theory and use of Logarithms. Theory of Equations. Binomial and Exponential Theorems. Compound Interest and Annuities.

Geometry :

Euclid, Books I., II., III., IV., VI., with deductions. Application of Algebra to Geometry.

Trigonometry :

The Solution of Plane Triangles, with demonstrations of the formulæ. Theorems relating to single arcs. Theorems relating to the sums and differences of arcs. Application to heights and distances. Elements of Spherical Trigonometry.

Subjects of Examination for Science Scholarships of the Third Year.

Logic :

Scholastic Logic. The Theory of Hypothetical Syllogisms and Inductions, and the New Analytic of Logical Forms, as contained in the works of Mill, Whately, Thompson, and Baynes.

Mathematics :

Algebra—Theory of Equations and Methods of Approximation. Elimination. Summation of series. Binomial and Exponential Theorems. Scales of Notation, &c.

Trigonometry—Plane and Spherical, with Astronomical applications.

Analytical Geometry.

Differential Calculus, involving demonstrations of the rules for differentiating Algebraic, Circular, and Exponential Functions, founded upon a clear statement of the nature of Limits and Definition of a Differential co-efficient. Taylor's and Maclaurin's Theorems. Maxima and Minima. Criteria of the same, with proofs. Equation of Tangent, Normal, Evolute, &c.

Integral Calculus, including more particularly Rational Fractions, Binomial Differentials, Areas of Curves, Rectification of Curves, Cubature of Solids of Revolution.

Mechanics :

Statics. Equilibrium of forces in the same place. Dynamics. Rectilinear Motion. Motion in a circle. Simple pendulum. Impact.

Optics :

Ganôt—Traite de Physique, Livre VII.

Astronomy :

Brinkley's Astronomy, omitting the Appendix.

Subjects of Examination for Engineering Scholarships of the First Year.

Arithmetic :

Mensuration :

Algebra :

Euclid :

Trigonometry :

} As for Science Scholarships of the First Year.

Subjects of Examination for Engineering Scholarships of the Second Year.

Mathematics :

The same as for Science Scholarships of the Second Year.

French :

Barthe—Histoire de la littérature Française.

Translation from English into French.

Appendix A.
General
Regulations
of College,
&c.

Chemistry :

Laws of Combination and Affinity—Preparation and Properties of the Chief Organic Substances—Metallurgic Operations—Mortars and Cements.

Geometrical Drawing :

Descriptive Geometry—Orthographic Projection—Isometric Projection—Perspective.

N.B.—A prize of £20 will be offered for competition, at the commencement of next Session, to Engineering Students who shall be proceeding with the Second Year's course under the Old Ordinance, and the successful Candidate for which shall be required to proceed with the studies of the Second Year, under that Ordinance. The examination for such prize to be in the subjects hitherto prescribed for the Scholarship of the Second Year, and subject to the same regulations.

Subjects of Examination for Agricultural Scholarships of the First Year.

The English Language :

Grammar and Composition.

Mathematics :

Vulgar and Decimal Fractions, Involution and Evolution, Proportion and Interest, Mensuration.

Geography :

Outlines of Modern Geography.

Book-keeping :

Subjects of Examination for Agricultural Scholarships of the Second Year.

Chemistry :

Laws of Combination and Affinity—Chemical History of the Constituents of Soils, Plants and Manures, Chemical Problems of the Nutrition of Plants and Animals.

Natural Philosophy :

Principles of Statics and Dynamics—Hydraulics and Pneumatics—Applications to the Theory of Farm Operations, Buildings and Instruments.

Zoology and Botany :

The Lectures of the Professor for the preceding year.

Theory of Agriculture :

Principles of Nutrition, and Growth of Cultivated Plants—Agricultural Botany—Classification and Properties of Soils and Manures—Meteorology in relation to Agriculture.

SENIOR SCHOLARSHIPS.

The Seven Senior Scholarships appropriated to the Faculty of Arts will be conferred, by examination, on the most distinguished Students who shall have proceeded to the Degree of A.B. in the Queen's University, for proficiency in Special Departments of Study, viz. :—One Scholarship in the Greek and Latin Languages, and Ancient History ; One in Modern Languages, and Modern History ; One in Mathematics ; One in Natural Philosophy ; One in Metaphysics and Economical Science ; One in Chemistry ; and One in Natural History.

Subjects of Examination for the Senior Scholarships in the Greek and Latin Languages, and Ancient History.

The Greek Language :

Plato—The Protagoras.

Pindar—The Pythian Odes.

Together with the Subjects for the Honor Examination at the University.
Composition in Attic Prose and Iambic Verse.

The Latin Language :

Virgil. Horace.

Lucretius—Books V., VI.

Ovid—Fasti. Book I.

Persius.

Plautus—Captevei and Trinummus.

Terence—Phormio and Andria.

Cicero—De Oratore.

Tusculan Disputations.

Ad Atticum, Books III. to VI.

Actiones Verrinae.

Livy—Books XXI. and XXIII.

Tacitus—The Histories.

Composition in Prose and Verse.

For Senior Scholarships in Modern Languages and History.

Appendix A.

The French Language :

Corneille—Le Cid ; Cinna.

Mignet—Histoire de la Revolution Française.

Histoire de la Littérature Française, par Barthe ou Nisard.

The German Language :

National Literature, Von A. F. Vilmar.

Schiller's Maria Stuart.

Goethe's Ephigenie.

History—Hallam's Middle Ages.

Chap. II., Part 1, The Feudal System.

Chap. VIII., Part 1, Anglo-Saxon Constitution.

Chap. VIII., Part 2, The Anglo-Norman Constitution.

Chap. VIII., Part 3, The English Constitution.

The Italian Language :

Tasso—Gerusalemme Liberata—First Five Cantos.

Dante's Inferno—Italian Literature, published by Messrs. Chambers.

Translation from English into French, German, or Italian.

For the Senior Scholarships in Mathematics.

The subjects of previous Examinations (for which see page 17), with the following additions, viz. :

Analytical Geometry of Three Dimensions.

Differential Equations.

For the Senior Scholarship in Natural Philosophy.

Duhamel—Mécanique, Volume I.

Brinkley—Elements of Astronomy, including the Appendix.

Lloyd—Treatise on Light and Vision.

For the Senior Scholarship in Metaphysics and Economical Science.

The subjects discussed in the Lectures of the Professors, with the following additions :

Metaphysics :

Sir William Hamilton's Philosophical Essays and Notes on Reid.

Mill—System of Logic, Book III. to the end of Volume I.

Jurisprudence and Political Economy :

Principles of Political Economy, by John Stuart Mill.

For Senior Scholarship in Chemistry.

Stœchiometry, and the general doctrines of Theoretical Chemistry :

The Laws of Combination—Atomic Theory—Relation between the Atomic Weight and the Volume of Bodies.

Relation between the external form and Chemical constitution of Bodies—Isomorphism, Dimorphism, Amorphism, Allotropy, Isomerism, Polymerism, Metamerism.

Atomic constitution of Compounds—Theories of Acids and Salts.

Determination of the equivalent of Bodies—Stœchiometrical calculations.

Inorganic Chemistry :

Preparation and Properties of the Chief Metallic and Non-Metallic Substances and their Compounds.

Metallurgy of Iron, Zinc, Lead, Copper, Tin, Mercury, Gold, Silver.

Organic Chemistry :

Principles of Organic Analysis—Determination of the formulæ of Organic Compounds—Theories of Compound Radicals and Types—Doctrine of Substitution, Homologous Series, Conjugated Compounds.

Preparation and Properties of the Compounds of the Radicals, Cyanogen, Ferrocyanogen, Methyle, Formyle, Acetyle, Amyle.

For Senior Scholarship in Natural History.

The Lectures of the Professor.

Carpenter—Principles of Comparative Physiology.

Appendix A.

General
Regulations
of College,
&c.

COURSE FOR THE DEGREE OF BACHELOR OF ARTS.

Candidates for the Degree of Bachelor of Arts are hereby required—

1. To have been admitted Matriculated Students of one of the Colleges of the Queen's University in the Faculty of Arts.
2. To have subsequently studied in one of the Colleges of the Queen's University the Course herein prescribed.
3. To have passed the University Examinations herein prescribed.

The Course for the Degree of Bachelor of Arts shall extend over three Sessions, and shall comprise attendance on the following curriculum:—

FIRST SESSION.

English (One Term).
Greek.
Latin.
Modern Continental Languages.
Mathematics.

SECOND SESSION.

Logic (One Term).
Natural Philosophy.

Along with any two of the following:—

Greek (Second Course).
Latin (Second Course).
Modern Continental Languages (Second Course).
Mathematics (Second Course).

THIRD SESSION.

English Language and Literature.
Metaphysics, or History, or Political Economy. (Two Terms).
Chemistry.
Zoology, or Botany.

Attendance on these Courses shall, in all cases, be understood to include passing such examinations as may be appointed by the College Council, and the catechetical parts of the Courses of Lectures.

Candidates for the Degree of Bachelor of Arts shall reside at their respective Colleges during at least the first two terms of each Session, but may be exempted from residence during the third term by a special grace of the College Council.

Third year's Students may substitute attendance on one or on two Courses of Honor Lectures, for a like number of the Courses above set down for study in the third Session.

Candidates for the Degree of Bachelor of Arts shall pass two University Examinations—a Preliminary and a Degree Examination.

The Course for the Preliminary Examination shall include Greek, Latin, a Modern Continental Language, and Mathematical Science. Students who have completed their second Session must pass this Examination before rising to the third year, unless prevented by illness or other inevitable accident, in which case the Senate may admit them to a Supplementary Examination.

Candidates who have completed the Undergraduate Course, may offer themselves at the Degree Examination for graduation either with Honors or without Honors.

If they seek to graduate with Honors, they may select for their Examination any one of the following groups:—

Greek and Latin.
Modern Continental Languages.
Mathematical Science.
Experimental Science.
Natural Science.

Or any two of the following:—

English Language and Literature.
Logic and Metaphysics.
Logic and History.
Logic and Political Economy.

Candidates who seek the Degree without Honors, may select for their Ex-

amination any group of the subjects from the following lists, provided the sum of the numbers attached in this list to be selected subjects be at least four :—

English Language and Literature,	2	Latin,	1	General Regulations of College, &c.
Mathematical Science,	2	Each Modern Continental Language,	1	
Experimental Physics,	2	Logic,	1	
Chemistry,	2	Metaphysics,	1	
Zoology,	1	History,	1	
Botany,	1	Political Economy,	1	
Greek,	1			

English Composition will form a part of all University Examinations.

This Ordinance is binding on all Candidates for the Degree of Bachelor in Arts who have not completed the first year's Course. Students now in their second* or third Session shall proceed under the Ordinances hitherto in force.

2. Course for the Degree of Master in Arts.

Bachelors in Arts of one year's standing, may offer themselves for Examination for the Degree of Master in Arts, and may select for their Examination any one of the following groups :—

Greek and Latin.
Modern Continental Languages.
Mathematical Science.
Experimental Science.
Natural Science.

Or any two of the following :—

English Language and Literature.
Logic and Metaphysics.
Logic and History.
Logic and Political Economy.

This Ordinance supersedes former Ordinances prescribing the curriculum for the Degree of Master in Arts.

3. Course for the Diploma of Licentiate in Arts.

A Diploma conferring the title of Licentiate in Arts of the Queen's University in Ireland, shall be granted to Candidates who comply with the following regulations :—

Candidates for this Diploma are hereby required—

1. To have Matriculated in one of the Colleges of the Queen's University.
2. To have pursued in one of the Colleges of the Queen's University the Course herein prescribed.
3. To have passed the University Examination herein prescribed.

The Course for the Diploma of Licentiate in Arts shall extend over two Sessions, and shall comprise attendance on the following curriculum :—

FIRST SESSION.

Two Languages, of which one may be English.
Mathematics.
Another Course on any subject in the annexed list.

SECOND SESSION.

Greek, Latin, or a Modern Continental Language.
Logic (One Term).
Natural Philosophy.
And two other Courses on subjects in the annexed list.

If any of the Courses, except that on Logic, extend over one Term only, some other Course from the annexed list must be attended as a supplement to it, but not necessarily in the same Session.

Credit will not be given for attending the same Course of Lectures a second time.

* Second year's Students may offer themselves for the University Examinations in conformity with the present Ordinance.

Appendix A. Attendance on the Courses shall, in all cases, be understood to include passing such Examinations as the College Council shall appoint, and the catechetical parts of the Courses of Lectures.

General Regulations of College, &c. Candidates for the Diploma of Licentiate in Arts shall reside at their respective Colleges during at least the first two terms of each Session.

After having completed the above curriculum, Candidates for the Diploma shall pass a University Examination in Greek, Latin, or a Modern Continental Language; in Mathematical Science; and in two other subjects selected from the annexed list, viz.:—

The Mathematical Sciences.
 The Experimental Sciences.
 The Natural Sciences.
 Geometrical Drawing.
 Mensuration, Levelling, and Mapping.
 Anatomy and Physiology.
 English Language and Literature.
 The Modern Continental Languages.
 Greek.
 Latin.
 Logic.
 Metaphysics.
 History.
 Political Economy.

English Composition will form a part of all University Examinations.

Licentiates in Arts who may desire to proceed to the Degree of Bachelor in Arts, may enter directly on the second Session in the Course for this Degree, provided they attend in it, instead of the usual curriculum, all the Courses prescribed for the first two years which they shall not have already attended in the curriculum for the Diploma of Licentiate.*

DIPLOMA IN ENGINEERING.

Each Candidate for the Diploma in Civil Engineering is hereby required—

1. To have been admitted a Matriculated Student of one of the Colleges of the Queen's University in the Department of Civil Engineering.
2. To have studied in the Colleges of the Queen's University the Course herein prescribed.
3. To have passed the University Examinations herein prescribed.

The Course for the Diploma in Civil Engineering shall usually extend over Three Sessions, and shall comprise attendance on the following curriculum:—

FIRST SESSION.

Mathematics (First Course).
 Chemistry.
 Modern Languages.
 Geometrical Drawing.
 Office Work.

SECOND SESSION.

Mathematics (Second Course).
 Experimental Physics.
 Mineralogy, Geology, and Physical Geography.
 Civil Engineering.
 Office Work.
 Field Work.

THIRD SESSION.

Natural Philosophy, applied.
 Mathematical Physics.
 Civil and Mechanical Engineering.
 Office Work.
 Field Work.
 Engineering Excursions.

* NOTE.—Degrees in Arts, conferred by the Queen's University in Ireland, are recognised by the University of Durham, by St. Bee's College, Whitehaven, and by St. Aidan's College, Birkenhead, in the case of Theological Students preparing for Holy Orders in the Established Church.

Attendance on these Courses shall in all cases be understood to include passing such Examinations as may be appointed by the College Council, as well as the Catechetical parts of the Courses of the Lecture.

Appendix A.
General
Regulations
of College,
&c.

Engineering Students shall reside at their respective Colleges during at least the first two Terms of each Session, and can be exempted from residence during the third Term also, only by a special grace of the College Council.

The study of the Engineering Curriculum may be extended over more than three Sessions, on the recommendation of the College Council, and under such regulations as the Council shall impose. Some relaxation of the order in which the subjects shall be studied will also be admitted, on the recommendation of the Council.

Candidates will, on the special recommendation of the College Council, be admitted to the Diploma after two years' residence instead of three, if their previous acquaintance with a sufficient group of the subjects above set down for study in the First and Second Session is deemed by the Council satisfactory. In such cases the Certificate of the Council will be accepted in lieu of attendances upon these Courses, but will not exempt Candidates from the University Examinations in them.

In order to obtain this Certificate, Students must have attended previously at least one Session in Arts, or one year in an Engineer's office. On making application to the Council, such Students will be allowed to present themselves, at the time of Matriculation, for examination in the subjects of any four of the eight Courses of Lectures of the first two years. On passing this Examination, they will be allowed to take rank at once as Students of the second year, and will then be required to attend those other four Courses of Lectures only, in the subjects of which they have not passed; but they will not be eligible for the Scholarship of that year.

The application to be admitted to this Examination must be lodged with the Registrar before the first day of the Session, and must state what are the four subjects in which the Students propose to offer themselves for Examination, and must be accompanied by a Certificate of the required attendance of one or more years in Arts or an Engineer's Office.

On passing the Sessional Examinations in the subjects of these four Courses of Lectures which they shall have attended as Students of the second year, they will be promoted to the rank of Students of the third year; and, on completing the regular Course of that year, will be furnished with the Certificate required by the Senate of the University.

The University Examinations shall extend to all the subjects of the above Curriculum. French will, in all cases, be required.

Candidates may present themselves before the close of their Collegiate Course for Examination in any four or more of the following subjects, which they shall have previously studied, viz.:—Mathematics (*First Course*); Experimental Physics; Chemistry; Modern Languages; Geometrical Drawing (including Orthographic projection, Isometric projection, Descriptive Geometry, and Linear Perspective); Mathematics (*Second Course*); Mathematical Physics; Mineralogy, Geology, and Physical Geography; Mensuration, Levelling, and Mapping.

The final Examination shall extend to all the subjects of the Engineering Course, in which the Candidate shall not have previously passed. English Composition will form a part of each University Examination.

This Ordinance shall take effect from the first day of January, 1860; Students who shall have entered the Engineering Schools of the Colleges of Queen's University previously, may proceed either under the present Ordinance, or under that hitherto in force.

DIPLOMA IN AGRICULTURE.

Candidates for this Diploma are required to pass a Matriculation Examination (for which see page 12), and afterwards pursue the following

Course of Study for the Diploma of Agriculture.

FIRST YEAR.

Natural Philosophy,	.	.	.	Three Terms.
Chemistry,	.	.	.	Do.
Principles of Zoology and Botany,	.	.	.	Do.
Theory of Agriculture,	.	.	.	Do.

Appendix A.

General
Regulations
of College,
&c.

SECOND YEAR.

Mineralogy, Geology, and Physical Geography,	Three Terms.
Surveying, Mapping,	Do.
History and Diseases of Farm Animals,	Do.
Practice of Agriculture, including Farm Finance and Accounts,	Do.

Students who shall have passed through the above Course, and also attended, during twelve months, the Practical Working of a Farm, under the direction of an Agriculturist approved by the College Council, will be admitted to Examination for the Diploma in Agriculture.

Students intending to qualify themselves for the Management of Estates, or Extensive Farms, are recommended to attend also Sessional Courses of Instruction in—

- 1st. The Law of Landlord and Tenant, and the Elements of Conveyancing.
- 2nd. Elements of Political Economy and Statistics, as applied to Agriculture and Farm Finance.

FACULTY OF MEDICINE.

Dean—DENIS B. BULLEN, M.D.

LECTURES, &c.

The Medical Session will be opened on Monday, 28th October, 1861, and the Courses of Lectures will commence as under:—

ANATOMY AND PHYSIOLOGY—Monday, 4th November, at One o'clock, to be continued daily, except on Saturdays, at the same hour.

PRACTICE OF MEDICINE—Tuesday, 5th November, at Three o'clock, to be continued on Tuesdays, Thursdays, and Saturdays, at the same hour.

PRACTICE OF SURGERY—Monday, 4th November, at Three o'clock, to be continued on Mondays, Wednesdays, and Fridays, at the same hour.

MATERIA MEDICA—Tuesday, 5th November, at Two o'clock, to be continued on Tuesdays, Thursdays, and Fridays, at the same hour.

MIDWIFERY—Monday, 4th November, at Four o'clock, to be continued on Mondays, Wednesdays, and Fridays, at the same hour.

The Course of PRACTICAL ANATOMY will be conducted by the Professor of Anatomy and Physiology, assisted by Dr. SHINKWIN, Demonstrator.

The Department will be opened for DISSECTIONS on the 15th October.

The ANATOMICAL DEMONSTRATIONS will commence on 4th November, and be continued daily at Twelve o'clock, except Saturdays.

CHEMISTRY—Monday, Wednesday, and Friday.

PRACTICAL CHEMISTRY—Monday, Tuesday, Wednesday, Thursday.

ZOOLOGY AND BOTANY—Monday, Wednesday, Friday.

NATURAL PHILOSOPHY—Tuesdays and Thursdays.

MEDICAL JURISPRUDENCE—Tuesday, Thursday, and Friday.

MODERN LANGUAGES—Monday, Wednesday, and Friday.

A SPECIAL PRACTICAL COURSE OF SURGICAL OPERATIONS under the direction of the Professor of Anatomy and Physiology.*

Subjects of Examination for Medical Scholarships of the First Year.

The Scholarships of the First year in the Faculty of Medicine will be awarded thus:—One to the Candidate who shall have most distinguished himself at the Examination in the course prescribed for Science Scholarships of the First year in Arts, and one to the Candidate who shall have most distinguished himself at the Examination in the course prescribed for Literary Scholarships of the First year in Arts. Candidates for these Scholarships shall have previously declared themselves, and have Matriculated as Medical Students. It is left to their option for which of them they will compete.

* NOTE.—The 25th of November in each year, is the last day for entering for the Six Months' Courses of Lectures in the above Curriculum. All the Lectures are recognised by the Queen's University in Ireland, by the Universities of London, Glasgow, Aberdeen, and St. Andrew's; the Colleges of Surgeons of Dublin, Edinburgh, and London; by the Apothecaries' Companies, by the Army, Navy, and East India Medical Boards, &c., &c.

Subjects of Examination for Medical Scholarships of the Second Year. *Appendix A.*

Anatomy and Physiology.	General Physics.
Chemistry.	Zoology and Botany.
The French Language.	

General
Regulations
of College,
&c.

Subjects of Examination for Medical Scholarships of the Third Year.

Anatomy and Physiology.	Materia Medica.
Practical Anatomy.	Practical Chemistry.

The Two Senior Scholarships appropriated to the Faculty of Medicine will be awarded, by examination, to the most distinguished Students who shall have completed in some one of the Queen's Colleges the Course of Study of the first, second, and third years prescribed to Candidates for the Degree of M.D. in the Queen's University, for proficiency in Special Departments of Study, viz. :— One Scholarship in Anatomy and Physiology; and One in Therapeutics and Pathology.

For the Senior Scholarship in Anatomy and Physiology.

All branches of Anatomy and Physiology.

N.B.—Students will be expected to make Dissections, and give explanations of the parts dissected.

For the Senior Scholarship in Therapeutics and Pathology.

The general Actions of Drugs in health and disease, with their special applications and mode of administration.

Pathology, general and special.

Morbid Anatomy.

DEGREES IN MEDICINE.

Ordinance of the Senate of the Queen's University in Ireland, regarding the Qualifications and Examinations for the Degree of M.D.

1st.—Every Candidate for the Degree of M.D. shall produce a Certificate from the Council of one of the Queen's Colleges, that he has passed a full Examination in the subjects of study prescribed in the Course of Matriculation for Arts, and has been admitted a Matriculated Student of the College in the Faculty of Medicine.

2nd.—The Curriculum shall extend over a period of at least four years, and shall be divided into two periods of at least two years each.

3rd.—The first period shall comprise attendance on the following Courses of Medical Lectures :—

Chemistry—Six Months, at least Three Lectures each Week.

Botany and Zoology—Six Months, Three Lectures each Week, with Herborizations for practical study.

Anatomy and Physiology—Six Months, Five Lectures each Week.

Practical Anatomy—Six Months.

Materia Medica and Pharmacy—Six Months, Three Lectures each Week.

4th.—The second period shall comprise attendance on the following Courses of Medical Lectures :—

Anatomy and Physiology—Six Months, Five Lectures each Week.

Practical Anatomy—Six Months.

Theory and Practice of Surgery—Six Months, Three Lectures each Week.

Midwifery and Diseases of Women and Children—Six Months, Three Lectures each Week.

Theory and Practice of Medicine—Six Months, Three Lectures each Week.

Medical Jurisprudence—Three Months, Three Lectures each Week.

5th.—In addition to the above Courses of Lectures, Candidates shall have attended during the first period of the above Curriculum—

Practical Chemistry, in a recognised Laboratory—Three Months.

Medico-Chirurgical Hospital, recognised by the Senate, containing at least sixty beds, together with the Clinical Lectures therein delivered, at least Two each Week—Six Months.

6th.—And during the second period—

Practical Midwifery, at a recognised Midwifery Hospital, with the Clinical Lectures therein delivered, for a period of Three Months, in an Hospital containing not less than fifteen beds.

Appendix A.

General
Regulations
of College,
&c.

Practical Pharmacy—Three Months.

Medico-Chirurgical Hospital, recognised by the Senate, containing at least sixty beds, together with the Clinical Lectures therein delivered—Eighteen Months.

7th.—Candidates, before being admitted to the Degree of M.D., shall pass two Examinations, the first Examination comprising the subjects of the first period of the Curriculum; the second comprehending subjects of the second period of study. It shall be competent for Students to present themselves for their first Examination at the termination of the first period of the Curriculum, or at any after period to be fixed by the Senate, previous to their undergoing the second Examination.

8th.—By the Charter of the Queen's University, *Candidates are required to have attended at least ONE-THIRD of the Courses of Medical Lectures in some one of the Queen's Colleges.* For the remainder of the Courses of Medical Lectures, authenticated Certificates will be received from the Professors or Lecturers in the Universities, Colleges, or Schools recognised by the Senate of the Queen's University in Ireland.

9th.—Candidates will also be required to have attended, *in some one of the Queen's Colleges,* Lectures on One Modern Language for Six Months, and Lectures on Natural Philosophy for Six Months.

10th.—The Examinations will be conducted principally by printed papers, to which written answers shall be given; but the Examiners shall also be at liberty to add such *vivâ voce* Examination on the subjects of the written paper, and to call for such demonstrations and experiments as they may deem necessary.

11th.—The above regulations will be binding on all Students commencing their Medical Studies on or after the 1st October, 1852; but Students already engaged in their Medical Studies are at liberty either to complete their Courses according to the Ordinance of 30th June, 1850, or according to the present Ordinance.

FACULTY OF LAW.

LECTURES.

The complete Course for each Class consists of Twenty-four Lectures, by the Professor of English Law, in each Collegiate Session, which Lectures are delivered in the interval between the close of the Michaelmas Law Term and the Christmas recess, in the Second Collegiate Term, commencing in the Month of February, and in the interval between Easter and Trinity Law Terms. And of Twenty-four Lectures in each course of the first two years, and Twelve in that of the fourth year, by the Professor of Jurisprudence, which are delivered in the Months of December, February, and March.

LAW SCHOLARSHIPS.

Examination by the Professor of Jurisprudence.

First Year:

Reddie's *Inquiries in the Science of Law.*
Lord Bacon's *Tract on Universal Justice*, by D. C. Heron.
Adam Smith's *Wealth of Nations*—Book III.

Second Year:

Sources of the Roman Civil Law, by William Grapel, with the Lectures of the Professor, and subjects prescribed for examination in the first year.

Third Year:

The *Institutes of Justinian*, by Thomas Collett Sandars, and the Lectures of the Professor, and subjects prescribed for examination in the first and second year.

Examination by the Professor of English Law.

First Year:

Williams—*Principles of the Law of Real Property.*

Second Year :

The Lectures of the Professor for the preceding years.
Smith—Manual of Equity Jurisprudence.
Williams—Principles of the Law of Personal Property.
Smith—On Contracts.

Third Year :

The Lectures of the Professor for the preceding years.
Smith—Leading cases on branches of the Law.
Storey—Equity Jurisprudence.

The Lectures to the Law Students are delivered in the months of December, February, and March, twenty-four lectures in each course of the first two years, and twelve in that of the fourth year, by the Professor of Jurisprudence.

The Senior Law Scholarship will be awarded to the most distinguished Student who shall have proceeded in the Course of Arts to the Degree of A.B., and who shall have completed the Course of Legal Study prescribed to Candidates for the Degree of LL.B.

For the Senior Scholarship in Law.

The Lectures of the Professors for the preceding years.
Sugden—The Law of Vendors and Purchasers.
Furlong—Law of Landlord and Tenant.
Taylor—Treatise on the Law of Evidence.
Stephen—Treatise on the Principles of Pleading.
Hallam's Constitutional History.

DEGREES IN LAW.

Candidates for the Diploma of Elementary Law must have passed a Matriculation Examination* (see page 12), and pursued the following

Course of Study for the Diploma of Elementary Law.

First Session—Law of Property and Principles of Conveyancing, Jurisprudence. The Course for the Class of the First Year, "The Law of Real Property," comprises Elementary Instruction in this branch of Law, and in Practical Conveyancing. The Text-book read is "Williams on Real Property." The first volume of Stephens' Editions of Blackstone's Commentaries, and the second volume of Kerr's Edition, are recommended for perusal.

Second Session—Equity and Bankruptcy, Civil Law.

The Courses for the Class of the Second Year, "The Law of Personal Property," Equity, and "Bankruptcy," comprise instructions in those branches of law, and in the Practical Application of Precedents, &c. The Text-books read are "Williams on Personal Property," "Smith's Manual of Equity," "The late Statute of Bankruptcy and Insolvency," by Adams. The second volume of Stephens' and Kerr's Editions of Blackstone's Commentaries, and Smith's "Mercantile Law," are recommended for perusal.

Third Session—Common and Criminal Law.

The Course for the Class of the Third Year, "Common and Criminal Law," comprises the History, Constitution, and Jurisdiction of the several Courts of Justice; Procedure in Crown and Civil Causes at Law and in Equity, as also in the Local Courts. The Text-books are the Third and Fourth Volumes of Blackstone's Commentaries, Stephens' and Kerr's Editions, "Broom's Common Law," "Broom's Maxims," "Smith's Leading Cases," and "Copinger's County Courts," are recommended for perusal.

* NOTE.—It will be sufficient for such Candidates to have passed this Examination at any time previous to applying for the Diploma. By the Act of Parliament, 14 and 15 Vic. cap. 88, it is provided, that every person who, as a Matriculated or Non-Matriculated Student, shall have attended the prescribed Lectures, and passed the prescribed Examinations of the Professors of the Faculty of Law for two Collegiate years, and who shall have duly served as an apprentice or clerk by contract in writing, duly stamped at or before the signing thereof, or within six months after, for the term of four years, shall, at any time after the expiration of five years from the commencement of such attendance on Lectures, or of such a period of service, which ever shall first happen, be qualified to be admitted as an Attorney or Solicitor as fully and effectually as any person having been bound, and having served five years is now qualified to be admitted. See also the same Act for the privileges extended to Graduates of the Queen's University, respecting admission to the profession of Attorney or Solicitor.

Appendix A. Candidates for the Degree of LL.B. will be admitted to Examination for that Degree from the Queen's University in Ireland, provided they shall have proceeded to the Degree of A.B., and shall have attended the Lectures and passed the Examinations prescribed for the Elementary Course, and shall also have pursued the following

General
Regulations
of College,
&c.

Additional Course of Study for the Degree of LL.B.

Fourth Session—A more extended Course of Study in the subjects appointed for the Diploma—The Law of Evidence and Pleading in the Courts of Common Law and Equity—Medical Jurisprudence—Constitutional, Colonial, and International Law.

Students who have obtained the Degree of LL.B. will, at the expiration of three years after they have obtained the Degree, be admitted to the Examination for the Degree of LL.D.

FEES PAYABLE BY NON-MATRICULATED STUDENTS.

Appendix A.

For each of the Sessional courses, except *Logic, Metaphysics, Political Economy and Jurisprudence, Anatomy and Physiology, Practical Anatomy and Practical Chemistry*, Non-Matriculated Students pay a College Fee of Five Shillings, and a Class Fee of Two Pounds; for each of the excepted courses, and, in the Faculty of Medicine, for each second and subsequent course they pay, along with the College Fee of Five Shillings, the same *Class Fees* as Matriculated Students.*

ANALYTICAL CHEMISTRY.

The Chemical Laboratory is open daily, except on Sundays, from 10 to 4 o'clock, under the superintendence of the Professor, for Students desirous of prosecuting an extended course of Qualitative and Quantitative Analysis, and for the purpose of original investigation in connexion with the Arts, or in the higher departments of Scientific Chemistry. The fees, exclusive of the expenses of materials and apparatus, is—

For a period of two months and a-half, five	£	s.	d.
days a-week,	5	0	0
For the same period, four days a-week,	4	4	0
For the same period, three days a-week,	3	10	0
For one month, daily,	3	3	0

PROGRAMME OF THE TIMES AND SUBJECTS OF THE SCHOLARSHIP EXAMINATIONS FOR THE SESSION 1861-62.

Examination Days.	From 9 to 12 o'clock, Noon.	From 2 to 5 o'clock, P.M.
21st October, 1861.	Natural Philosophy, Mineralogy and Geology.	Zoology and Botany, Physical Geography.
22nd October, ,,	Mathematics.	Mathematics.
23rd October, ,,	Latin.	Greek, Practical Chemistry.
24th October, ,,	Greek, Surveying, &c., Political Economy, Jurisprudence, Civil Law.	Latin, Surveying, &c., English Law.
25th October, ,,	Modern Languages, Logic, Theory of Agriculture.	English Language, English Literature, History, Chemistry.
26th October, ,,	Metaphysics,	Political Economy,
28th October, ,,	Anatomy and Physiology, Pathology.	Practical Anatomy.
29th October, ,,	Materia Medica, Therapeutics.	Practical Chemistry.

* *Hospital Attendance*.—Clinical Lectures on Medicine and Surgery are delivered at the North and South Infirmaries, by the Physicians and Surgeons of those Institutions.

Fee for twelve months,	£8	8	0
Fee for six months,	5	5	0

Practical Pharmacy at the same Infirmaries.

Fee for three months,	3	3	0
---------------------------------	---	---	---

Clinical Midwifery at the Lying-in Hospital, with Practical Attendance upon Thirty Midwifery cases.

Fee for six months,	£3	3	0
-------------------------------	----	---	---

Further information may be had from the Medical Officers at the Infirmaries.

Regulations
of College,
&c.

APPENDIX.

Outlines of the Courses of Lectures delivered by the Professors of the Faculty of Arts.

LITERARY DIVISION OF THE FACULTY OF ARTS.

Dean—BUNNELL LEWIS, A.M.

In Greek and Latin the classification of the Students is irrespective of their Collegiate standing; those of the First and Second years being distributed between two classes according to their proficiency. There is also in each of these Departments an Extra Class, the attendance on which is voluntary, and which consists generally of those Students who propose to become Candidates for Degree of A.M. or Classical Honors in the Queen's University, or for appointments in the Indian Civil Service.

Both the Extra and Ordinary Classes are open to Non-Matriculated Students, *i.e.* to gentlemen who have not yet commenced their Undergraduate course, or who do not intend to take *Degrees in Arts*.

THE GREEK LANGUAGE.

Professor, JOHN RYALL, LL.D.

Junior Class, Monday, Wednesday, Thursday, and Friday.

Senior Class, Monday, Wednesday, and Friday.

Extra Class, Tuesday, Thursday.

Junior Class, Xenophon, Anabasis, Book III.—Homer, Iliad, Book IV.

Senior Class, Plato, Crito.—Homer, Odyssey, Book XII.

Exercises in Prose and Verse, according to the proficiency of the Students.

Fee payable by Matriculated Students for the Undergraduate Course, £2 10s.

Fee payable by Non-Matriculated Students for each Sessional Course, £2.

THE LATIN LANGUAGE.

Professor, BUNNELL LEWIS, A.M.

Senior Class, Monday, Wednesday, and Friday.

The Verrine Oration, De Sigmis.

Juvenal, Satires, VIII. to XVI.

Junior Class, Monday, Tuesday, Wednesday, and Thursday.

Livy, Part of Book IV.

Virgil, Æneid, Book III.

Exercises in both Classes chiefly from Arnold's Introduction to Latin Composition.

Fee for the whole Undergraduate Course, £2 10s.

Fee payable by Non-Matriculated Students for each Sessional Course, £2.

Extra and Third Year's Class, Tuesday and Thursday.

Terence, Phormio.

Cicero, De Oratore, Book I.

In this Class special attention is paid to original Composition, and to translation from English Authors into Latin. Fee, £2.

MODERN HISTORY, ENGLISH LITERATURE, AND THE HISTORY OF THE ENGLISH LANGUAGE.

Professor, WILLIAM RUSHTON, A.M.

1st and 2nd { Modern History, Monday, Wednesday, and Friday.

Term. { English Literature, Tuesday, Thursday, and Saturday.

2nd Term.—The History of the English Language, Tuesday, Thursday, Saturday.

Modern History :

The Course will include General History from the 5th to the 15th Century, inclusive.

English Literature :

The Course will include the History of English Literature, along with a Critical Examination of its Standard Works from the earliest period up to the present day.

The History of the English Language :

The Lectures in this Course will treat of the History of the English Language, and its relationship to the Anglo-Saxon, along with its kindred tongues and dialects. In subservience to this arrangement the more remarkable stages through which the Anglo-Saxon passed into Semi-Saxon, the Semi-Saxon into Old English, and the Old English into Modern English, will be analyzed and explained Historically and Philologically.

Composition :

English Composition will, at stated periods, be required from the Students.

Fee payable by Matriculated Students for the Undergraduate Course, £2 10s.

Fee payable by Non-Matriculated Students for each Sessional Course, £2.

MODERN LANGUAGES.

Professor, R. DE VERICOUR, D. ES. L.

Senior French Class (Medical), Mondays, Wednesdays, and Fridays.

Junior French Class (Arts and Engineering), Mondays, Wednesdays, and Fridays.

Italian Class, Mondays, Wednesdays, and Fridays.

German Language, Tuesdays and Fridays.

Senior French—Lectures Sur les Sciences par Achille Compté. Extracts from Bichat, Andral, Lallemand. Weekly Lectures on the Grammar and Idioms.

Junior French—Bossuet's Oraisons Funèbres. Fables de Lafontaine, Racine's Athalie, and Esther. Histoire de la Revolution Française, par Mignet. Barthe's Histoire de la Littérature Française. Extracts from Villemain, Châteaubriand, and Lamartine. Weekly Lectures on the Grammar and Idioms.

Italian—Silvio Pellico. Tasso. Extracts from Macchiavelli, Guicciardini, Davila, Manzoni. Weekly Lectures.

German—Goethe's Ballads and Egmont. Schiller's Wilhelm Tell. National Literatur, Von A. F. Vilmar. Weekly Lectures.

SPECIAL COURSE NOT REQUIRED FOR A DEGREE. CELTIC LANGUAGES.

Professor, OWEN CONNELLAN, Esq.

Monday, Wednesday, and Friday.

Subject—I. The Celtic Family of Languages; and its existing derivations, the Erse or Gaelic, Manx, Welch, Armorican, and Hiberno-Celtic. The Ogham Alphabet. The Ancient Literature of Ireland, viz. :—The earlier Bardic Compositions, the Ossianic Poems and Fenian Legends; View of the Contemporaneous state of Ireland.*

„ II. The Irish Language as now extant, its Grammar, Vocabulary, and Dialects. In this part of the course, the Student will be taught to speak and write the language grammatically.

Fee for each Sessional Course, £2.

SCIENCE DIVISION OF THE FACULTY OF ARTS.

Dean—ROBERT HARKNESS, F.R.S.S.L. & E., F.G.S.

MATHEMATICS.

Professor, GEORGE BOOLE, D.C.L., F.R.S.

Junior Class, Monday, Wednesday, and Friday.

Subjects—Arithmetic, Algebra, Geometry, and Plane Trigonometry.

Second Year's Class, Monday, Wednesday, and Friday.

Subjects—Analytical Geometry, Trigonometry, Differential, and Integral Calculus.

* The Lectures will be illustrated by reference to Irish MSS., and such publications on Irish Historical and General Literature as are at present accessible.

Appendix A.

General
Regulations
of College,
&c.

Third Year's Class:

Subjects—Geometry of three dimensions, Differential Equations, &c.
Exercises are regularly set in each of the Classes.

Fee payable by Matriculated Students for the Undergraduate Course, £2 10s.
Fee payable by Non-Matriculated Students for each Sessional Course, £2.

LOGIC AND METAPHYSICS.

Professor, GEORGE SIDNEY READ, A.M.

2nd Term, . Logic, . Tuesday, Thursday, and Saturday.
1st & 2nd Terms, Metaphysics, Do. do. do.

Logic.—This Course consists of:—

- I.—Lectures, Examinations, and Exercises in Aldrich's Compendium of Logic, occupying the early part of the Term, &c.
- II.—A full discussion of Classification, the Theory of Hypothetical Syllogisms and of Induction, and the Analytic of Logical Forms, as contained in the works of Mill, Whately, Thompson, and Baynes.

Throughout the Course the Students will be expected to familiarize themselves with the reduction of arguments to their strict Logical Form by written exercises, which will be examined by the Professor.

N.B.—Students who are proceeding to the Degree of A.B. may attend at their option, in their Third Year, the Course of Lectures of the Professor of Metaphysics, or the Lectures of the Professor of Jurisprudence and Political Economy.

Metaphysics.—This Course will embrace:—

- I.—The Philosophy of the Inductive Sciences, illustrated by reference to Lord Bacon, Whewell, and Mill; and—
- II.—The History of Mental Philosophy, comprising—
 - 1st.—The origin, progress, and development of Modern Philosophy anterior to the rise of the Scottish School.
 - 2nd.—A critical examination of the works of the more celebrated writers of that School.
 - 3rd.—A brief review of the present state of Philosophy in the British Islands and on the Continent.

JURISPRUDENCE AND POLITICAL ECONOMY.

Professor, RICHARD HORNER MILLS, A.M.

Jurisprudence.—Nature of the subject and some of its Elementary Principles; with a sketch of the leading changes in the law from the Conquest to the present period.

Political Economy.—The nature and distribution of wealth, the principles which regulate Rents, Profits, and Wages; the Principles of Commerce, of Taxation, of the Funding System, and of Currency and Banking.

Text Books recommended:—

- Adam Smith—Wealth of Nations.
Senior—Political Economy.
Longfield—Political Economy.
Longfield—Lectures on Commerce.
Huskisson—"Question Stated."
Reddie—Inquiries on Science of Law.
Lord Bacon—Tract on Universal Justice, by D. C. Heron.
John Stuart Mill—Political Economy.
Richard H. Mills.—Lectures on Currency and Banking (Second Edition).

The Course consists of Twenty-four Lectures, delivered in the months of December, February, and March; the Students are required in the intervals to prepare the subjects which will be pointed out by the Professor.

CHEMISTRY.

Professor, JOHN BLYTH, M.D.

Monday, Wednesday, Friday.

The Course is divided into Inorganic and Organic Chemistry.

In the first part are discussed the Laws of Combination and Affinity, Molecular Chemistry and Crystallography, and the History of the Non-Metallic and Metallic substances.

In the Organic portion of the Course will be considered the subjects of Organic Analysis, Organic Series, Compound Radicals and Types, Metamorphoses of Organic Bodies, History of special Animal and Vegetable Bodies.

In treating of the Laws of Chemistry, and the History of Inorganic and Organic Bodies, those points will be chiefly dwelt upon which have a practical bearing in the Arts, Medicine, Engineering, and Agriculture. Thence, during the Course, attention will be directed to the application of Chemistry to Medicine and Physiology, to Metallurgic Operations, Chemical Manufactures, Building Materials, Soils, Manures.

Appendix A.
General
Regulations
of College,
&c.

Fee, for each Sessional Course, £2. Each subsequent Course in Medicine, £1.

Analytical Chemistry :

The Chemical Laboratory is open daily, except on Saturdays, from 10 to 4 o'clock, under the superintendence of the Professor, for students desirous of prosecuting an extended course of qualitative and quantitative analysis, and for the purpose of original investigation in connexion with the arts, or in the higher departments of Scientific Chemistry.

Fee, exclusive of the expense of materials and apparatus :

For a period of two months and a half, five days a-week,	£5	0	0
For the same period, four days a-week,	4	4	0
For the same period, three days a-week,	3	10	0
For one month daily,	3	3	0

NATURAL PHILOSOPHY.

Professor, JOHN ENGLAND, A.M.

Experimental Physics (Senior) :

Text Books—Galbraith and Haughton's Manuals of Mechanics, Hydrostatics, &c. ; Pouillet ; *Traite de Physique*.

Experimental Physics (Junior) :

Text Books—Dr. Golding Bird's Natural Philosophy. Ganot, *Traite de Physique*.

Mathematical Physics :

Text Books—Duhamel's *Mecanique*, Vol. I., omitting Attractions, and Vol. II., Central Forces. Lloyd's *Light and Vision*, Part I., omitting Chapters IV. and VII. Part II., Chapters I. and III. Brinkley's *Astronomy*.

Engineering Physics :

Text Books—Tate's *Exercises in Mechanics*, selections from the works of Mosely, De Pambour, Weisbach, &c.

NATURAL HISTORY.

Professor, JOSEPH REAY GREENE, A.B.

Monday, Wednesday, and Friday.

The Lectures delivered by the Professor of Natural History are as follows :—

A Course of Lectures on General Zoology.

A Course of Lectures on Botany.

Students may obtain Certificates of Attendance on all or any of these Courses.

Text Books recommended :

In Botany—"Elementary Course of Botany," by Henfrey.

In Zoology—"Zoologie" (in *Cours Élémentaire d'Histoire Naturelle*), par Milne Edwards ; or the English translation of the same work by Dr. Knox.

In addition to the above Text Books, those Students who purpose presenting themselves as Candidates for Commissions in the Army Medical Service, must procure—

(1).—"Natural History of the Animal Kingdom," by Dallas.

(2).—"School Botany," and "Medical and Economic Botany," by Lindley.

Such Students as desire during the Summer months to pursue the study of Botany in the field, are requested to provide themselves with Lindley's "Descriptive Botany," and Bentham's "Handbook of the British Flora."

Appendix A.

General
Regulations
of College,
&c.

GEOLOGY AND MINERALOGY.

Professor, ROBERT HARKNESS, F.R.S.S.L. & E., F.G.S.

Monday, Wednesday and Friday.

General Structure of the Earth; the causes at present in operation which modify its surface; Nature of Rocks which enter into composition with the crust of the Globe; description and classification of Sedimentary Deposits; Organic Remains; Physical Geography of the Earth during the several geological epochs; characters and nature of Igneous, Plutonic, and Metamorphic Rocks; Mineral Veins—their contents and mode of occurrence; application of Geology to Engineering, Mining, Agriculture and Land Improvement. Forms, Structure, Physical and Chemical characters of Minerals; descriptions of the most important simple materials—circumstances and conditions under which they are found.

CIVIL ENGINEERING.

Professor, ALEXANDER JACK, A.M.

FIRST YEAR.—Monday, Wednesday, and Friday.

Subject of Lectures—Orthographic Projection; Descriptive Geometry; Shadows; Isometric Projection; Perspective.

SECOND YEAR.—Tuesday, Thursday, and Saturday.

Subject of Lectures:—

First Term.—Instruments used by the Engineer in Surveying.

Second Term.—Surveying and Levelling.

Third Term.—Principles of Architecture; Materials used in construction.

THIRD YEAR.—Tuesday, Thursday, and Saturday.

There will be no Students of sufficient standing to form this Class during this Session, but instead of it there will be under the Old Ordinance—

SENIOR CLASS.—Tuesday, Thursday, and Saturday.

Principles of Architecture; Materials used in Construction; Construction of Bridges, Roads, Railways, Canals, &c.; Hydraulic Engineering; Strength of Materials.

DRAWING OFFICE.—Attended by all the Classes.—Tuesday, Thursday, and Saturday.

The First Year's Class are chiefly employed in drawing the problems given at lectures, and a few easy examples for their application. The Second and Third Year's Classes, in making working drawings of examples of the subjects of lectures, and in Mapping.

Practical Instruction in the Field in the use of Surveying Instruments will be given during the Session.

AGRICULTURE.

Professor, EDMUND MURPHY, A.B.

Subjects of Examination for the Agricultural Scholarships of the Second Year.

Theory of Agriculture.—The Organs, Nutrition, Growth, and Products of Agricultural Plants. Agricultural Botany. Constituents of Plants, of Soils, and of Manures. Formation and Classification of Soils. Agricultural Entomology and Diseases of Plants. Meteorology in relation to Agriculture.

Subjects of the Sessional Examination in Agriculture at the end of Second Session.

Practice of Agriculture.—Agricultural Implements and Machines. On Sheltering, Fencing, Draining and Deepening Land. Culture of Farm Crops. Construction of Farm Buildings. Reclamation and Irrigation of Land. Valuation of Land and Farm Finance.

Text Books in the Theory of Agriculture.—Henfry's Structural and Physiological Botany. Johnston's Lectures on Agricultural Chemistry and Geology.

In the Practice of Agriculture.—Stephens' Book of the Farm, and Morton's Encyclopædia.

Subjects of Examination in the History and Diseases of Farm Animals.

Animal Physiology in reference to Farm Animals. The Natural History of Farm Animals. The Breeding, Rearing, and General Management of Farm Animals, with their diseases and the ordinary remedies.

SPECIAL PROSPECTUS of COURSES of INSTRUCTION given in the COLLEGE which are applicable to the EXAMINATION for the INDIAN CIVIL SERVICE.

Appendix.
Special
Prospectus
of Courses
for Compe-
titive Ex-
aminations.

Subjects of Examination for the Indian Civil Service. Lectures on these Subjects in Queen's College, Cork.

1. ENGLISH LANGUAGE and LITERATURE :
 - a. Composition, Marks, 500
 - b. English Literature, including that of the Laws and Constitution, Marks, 1,000

1,500
2. LANGUAGE, LITERATURE, and HISTORY of GREECE :

Marks, 750
3. LANGUAGE, LITERATURE, and HISTORY of ROME :

Marks, 750
4. LANGUAGE, LITERATURE, and HISTORY of FRANCE :

Marks, 375
5. LANGUAGE, LITERATURE, and HISTORY of GERMANY :

Marks, 375
6. LANGUAGE, LITERATURE, and HISTORY of ITALY :

Marks, 375
7. MATHEMATICS, Pure and Mixed :

Marks, 1,250

HISTORY and ENGLISH LANGUAGE—
Professor, William Rushton, A.M.

First Term.—Modern History; Monday, Wednesday, and Friday.

Second Term.—English Literature; Tuesday, Thursday, and Saturday.

History of the English Language, Tuesday, Thursday, Saturday.

English Composition will, at the stated periods, be required from the students.

GREEK—Professor, John Ryall, LL.D.

Senior Class: Monday, Friday, Wednesday.

Junior Class: Monday, Friday, Wednesday, Thursday.

Extra Class: Tuesday, Thursday.

LATIN—Professor, Bunnell Lewis, A.M.

Senior Class: Monday, Wednesday, Friday.

Junior Class: Monday, Tuesday, Wednesday, Thursday.

Extra Class: Tuesday and Thursday.

The Extra Class, both in Latin and Greek, the attendance on which is voluntary, consists generally of those students who propose to become Candidates for the Degree of M.A., or Classical Honors, in the Queen's University, or for appointments in the Indian Civil Service.

FRENCH—Professor, R. De Vericour, D. ES. L.

Senior Class: Monday, Wednesday, Friday.

Junior Class: Monday, Wednesday, Friday.

GERMAN.

Tuesday, Thursday.

ITALIAN.

Monday, Wednesday, and Friday.

MATHEMATICS—Professor, George Boole, LL.D.

Junior Class: Monday, Wednesday, Friday.

Senior Class: Monday, Wednesday, Friday.

MATHEMATICAL PHYSICS—Professor, John England, A.M.

Tuesday, Thursday, and Saturday.

Appendix A.
Special
Prospectus
of Courses
for Compe-
titive Ex-
aminations.

8. NATURAL SCIENCES: that is, Chem-
istry, Electricity, and Magne-
tism, Natural History, Geology,
and Mineralogy:

Marks, 500

* * No Candidate will be allowed to
be examined in more than three of the
branches of knowledge included under
this head, and the total (500 marks) may
be obtained by adequate proficiency in
any three.

9. MORAL SCIENCES: that is, Logic,
Mental, and Moral, Philosophy:

Marks, 500

CHEMISTRY—*Professor, Jno. Blyth, M.D.*
Monday, Wednesday, and Friday.

EXPERIMENTAL PHYSICS (Electricity
and Magnetism)—*Professor, John*
England, A.M.

Monday, Wednesday, and Friday.

NATURAL HISTORY—*Professor, J. R.*
Greene.

Monday, Wednesday, and Friday.

GEOLOGY and MINERALOGY—*Profes-
sor, Robert Harkness, F.R.S.S.L. & E.,*
F.G.S.

Monday, Wednesday, and Friday.

LOGIC and METAPHYSICS—*Professor,*
G. S. Reade, M.A.

Logic: Tuesday, Thursday, and Sa-
turday.

Metaphysics: Tuesday, Thursday,
Saturday.

JURISPRUDENCE and POLITICAL ECO-
NOMY—*Professor, Richard Horner*
Mills, A.M.

COURSES of INSTRUCTION given in the COLLEGE which are applicable to the
COMPETITIVE EXAMINATION for ADMISSION to the ROYAL MILITARY
ACADEMY at WOOLWICH.

*Subjects of Examination for the
direct appointments to the Practi-
cal Class at Woolwich.*

*Lectures on these Subjects in Queen's
College, Cork.*

MATHEMATICS (Pure):

Marks, 2,500

Professor, George Boole, LL.D.

Junior Class: Monday, Wednesday,
Friday.

Senior Class: Monday, Wednesday,
Friday.

MATHEMATICS (Mixed):—

Statics, Dynamics, Hydrostatics:

Marks, 1,000

Professor, J. England, A.M.

Tuesday, Thursday, and Saturday.

LANGUAGE and LITERATURE of ANCIENT
ROME:

Marks, 1,000

Professor, Bunnell Lewis, A.M.

Junior Class: Monday, Tuesday,
Wednesday, Thursday.

GEOGRAPHY and HISTORY:

Marks, 500

1,500

LANGUAGE and LITERATURE of ANCIENT
GREECE:

Marks, 1,000

Professor, John Ryall, LL.D.

Junior Class: Monday and Friday,
Wednesday and Thursday.

GEOGRAPHY and HISTORY:

Marks, 500

1,500

LANGUAGE, LITERATURE, and HISTORY
of FRANCE:

Marks, 1,000

Professor, Raymond de Vericour, D. ES. L.
Monday, Wednesday, and Friday.

And GERMANY:

Marks, 1,000

ENGLISH LANGUAGE, LITERATURE,
COMPOSITION, HISTORY and GEO-
GRAPHY:

Marks, 2,000

Professor, William Rushton, A.M.
Tuesday, Thursday, and Saturday.

Appendix A.

Special
Prospectus
of Courses
for Compe-
titive Ex-
aminations.

EXPERIMENTAL SCIENCES:—
Chemistry:

Marks,
1,000

Professor, John Blyth, M.D.
Monday, Wednesday, and Friday.

HEAT, ELECTRICITY, includ-
ing MAGNETISM:

Professor, John England, A.M.
Monday, Wednesday, and Friday.

NATURAL SCIENCES:—

Mineralogy and Geology:

Marks, 1,000

Professor, Robt. Harkness, F.R.S.S.L. & E.,
F.G.S.

DRAWING, *i.e.*, Elementary Geometri-
cal Drawing, including the use of
Drawing Instruments:

Marks, 500

Professor, Alexander Jack, A.M.
Monday, Wednesday, and Friday.

Machinery, Architectural, Topographi-
cal, Landscape, or Figure Drawing:
Marks, 500

Monday, Wednesday, and Friday.

RESIDENCES.

Residences.

There is no accommodation for the residence of students within the College but it is provided by the Statutes that every Matriculated Student, being under the age of Twenty-one Years, shall reside, during the College Terms, with his parent or guardian, or with some relation or friend, to whose care he shall have been committed by his parent or guardian, or in one of the Boarding-houses licensed by the President of the College and arranged for the reception of students, who are then placed under the moral care and spiritual charge of the Deans of Residence of their respective creeds.

The Terms for Board and Lodging are generally at the rate of from £30 to £40 a-year.

DEANS OF RESIDENCE.

<i>Church of England,</i>	.	.	.	Rev. George Webster.
<i>Presbyterian Church,</i>	.	.	.	Rev. William Magill.
<i>Wesleyan Communion,</i>	.	.	.	Rev. R. T. Tracy.
<i>Non-Subscribing Presbyterian,</i>	.	.	.	Rev. W. Whitelegg.

LICENSED BOARDING HOUSES.

Mrs. Jane Heron's,	.	.	.	14, Hardwick-street.
Mrs. John Martin's,	.	.	.	12, North-Mall.
Mr. John O'Sullivan's,	.	.	.	52, South-Mall.
Mrs. O'Regan's,	.	.	.	Sunday's Well.

For terms, &c., application to be made to the different Proprietors.

N.B.—Letters from persons desiring further information, to be addressed to the Registrar.

Signed,

By Order of the President,

ROBERT JOHN KENNY, Registrar.

ἡμᾶς αὐτάς. εἰδῶναι γὰρ
κοῦκ ἑξαίφνης οὐδὲ λαθραίως
εἰς ἀπέραντον δίκτυον ἄτης
ἐμπλεχθήσεσθ' ὑπ' ἀνοίας.

1115

Translate into Iambic trimeter verse:

Where should this music be? i' the air, or the earth?
It sounds no more: and sure, it waits upon
Some god of the island. Sitting on a bank,
Weeping again the king my father's wreck,
This music crept by me upon the waters;
Allaying both their fury, and my passion,
With its sweet air: thence I have follow'd it,
Or it hath drawn me rather: But 'tis gone.

(A). HOMER—*Odyssey*, Book xviii., vv. 259 to 280.

ᾠ γύναι, οὐ γὰρ οἶω ἐνκνήμιδας Ἀχαιοὺς
ἐκ Τροίης εὖ πάντας ἀπήμονας ἀπονέεσθαι 260
καὶ γὰρ Τρωάς φασι μαχητὰς ἔμμεναι ἄνδρας,
ἡμὲν ἀκοντιστάς, ἡδὲ ῥυστήρας διστῶν,
ἵππων τ' ὠκυπόδων ἐπιβήτορας, οἳ κε τάχιστα
ἔκριναν μέγα νείκος ὁμοίου πολέμοιο.
τῷ οὐκ οἶδ', εἰ κέν μ' ἀνέσει θεός, ἢ κεν ἁλώω 265
αὐτοῦ ἐνὶ Τροίῃ· σοὶ δ' ἐνθάδε πάντα μελόντων.
μεμνησθαι πατρὸς καὶ μητέρος ἐν μεγάροισιν,
ὥς νῦν, ἢ ἔτι μᾶλλον, ἐμεῦ ἀπονόσφιν ἰόντος.
αὐτὰρ ἐπὴν δὴ παῖδα γενεΐησαντα ἴδῃαι,
γῆμασθ', ᾧ κ' ἐθέλῃσθα, τεὸν κατὰ δῶμα λιποῦσα. 270
κεῖνος τὼς ἀγόρευε· τὰ δὲ νῦν πάντα τελεῖται.
νῦξ δ' ἔσται, ὅτε δὴ στυγερὸς γάμος ἀντιβολήσῃ
οὐλομένης ἐμέθεν, τῆσθε Ζεὺς ὄλβον ἀπήνυρα.
ἀλλὰ τὸδ' αἰνὸν ἄχος κραδίην καὶ θυμὸν ἰκάνει· 275
μνηστήρων οὐχ ἡδὲ δίκη τὸ πάροιθε τέτυκτο·
οὔτ' ἀγαθὴν τε γυναῖκα καὶ ἀφνειοῖο θύγατρα
μνηστεύειν ἐθέλωσι, καὶ ἀλλήλοισι ἐρίσωσιν,
αὐτοὶ τοίγ' ἀπάγουσι βόας καὶ ἴφια μῆλα,
κοῦρης δαῖτα φίλοισι, καὶ ἀγλαὰ δῶρα διδοῦσιν·
ἄλλ' οὐκ ἀλλότριον βίοντι νήποιον ἔδουσιν. 280

1. Give the arguments of Books xii. to xviii, inclusive, of the *Odyssey*.
2. Accepting the theory of the Digamma, where is it necessary to the scansion in the above extract?
3. Is there any thing unusual in the form ἀνέσει? Give the Homeric forms of the principal parts of the verb from which it comes.
4. Parse ἁλώω, μελόντων, γενεΐησαντα, γῆμασθ', ἀπήνυρα, τοίγ'.

(B). ÆSCHYLUS—*Prometheus Vinculus*, vv. 786 to 807.

Appendix B.

Examination Papers for Scholarships.

ἐπεὶ προθυμῆσθ', οὐκ ἐναντιωσομαι
τὸ μὴ οὐ γεγωνεῖν πᾶν ὅσον προσχρήζετε.
σοὶ πρῶτον, Ἰοῖ, πολύδονον πλάνην φρασω,
ἣν ἐγγράφου σὺ μνήμοσιν δέλτοις φρενῶν.
ὅταν περάσῃς ῥεῖθρον ἡπείρων ὄρον, 790
πρὸς ἀντολὰς φλογῶπας ἡλιοστιβεῖς
πόντου περῶσα φλοῖσβον, ἐς τ' ἂν ἐξίκη
πρὸς Γοργόνεια πεδία Κισθήνης, ἵνα
αἱ Φορκίδες ναῖουσι δηναῖαι κόραι
τρεῖς κυκνόμορφοι, κοινὸν ὅμμι' ἐκτημέναι, 795
μονόδοντες, ἃς οὐθ' ἥλιος προσδέρκεται
ἄκτισιν οὐθ' ἡ νύκτερος μήνη ποτέ.
πέλας δ' ἀδελφαὶ τῶνδε τρεῖς κατάπτεροι,
δρακοντόμαλλοι Γοργόνες βροτοστυγεῖς,
ἃς θνητὸς οὐδεὶς εἰσιδὼν ἔξει πνοάς· 800
τοιοῦτο μὲν σοὶ τοῦτο φρούριον λέγω.
ἄλλην δ' ἄκουσον δυσχερῇ θεωρίαν·
ὄξυστόμους γάρ Ζηνὸς ἀκραγεῖς κύνας
γρυπας φύλαξαι, τὸν τε μουνῶπα στρατὸν
'Αριμασπὸν ἱποβιάμον', οἱ χρυσόρρυτον 805
οἰκοῦσιν ἀμφὶ νᾶμα Πλούτωνος πόρου·
τούτοις σὺ μὴ πέλαζε.

1. What is the derivation of 'Αριμασπός, according to Herodotus?
2. Derive πολύδονος, δέλτος, φλοῖσβος, δηναῖος.
3. Quote any other examples that occur to you of the metaphor in v. 789. Comment on the epithet ἀκραγεῖς, as there employed, and translate the following passage:—ἔστι δὲ τῷ τρόπῳ τούτῳ τῆς μεταφορᾶς χρῆσθαι καὶ ἄλλως, προσαγορεύσαντα τὸ ἀλλότριον ἀποφῆσαι τῶν οἰκείων τι· οἷον εἰ τὴν ἀσπίδα εἶποι φιάλην μὴ Ἀρεως ἀλλ' ἄοινον.

(C). PLATONIS—*Apologia*, c. xxx.

τὸ δὲ διὰ μετὰ τοῦτο ἐπιθυμῶ ὑμῖν χρησμοδῆσαι, ὃ καταψηφισάμενοί μου· καὶ γὰρ εἰμι ἤδη ἐνταυθα, ἐν ᾧ μάλιστα ἄνθρωποι χρησμοδοῦσιν, ὅταν μέλ-
λωσιν ἀποθανεῖσθαι. φημί γάρ, ὦ ἄνδρες, οἱ ἐμὲ ἀπεκτόνατε, τιμωρίαν ὑμῖν
ἤξειν εὐθὺς μετὰ τὸν ἐμὸν θάνατον πολὺ χαλεπωτέραν νῆ Δεῖ ἢ οἷαν ἐμὲ
ἀπεκτόνατε. νῦν γὰρ τοῦτο εἵργασθε οἰόμενοι ἀπαλλάξεσθαι τοῦ διδόναι
ἐλεγχον τοῦ βίου. τὸ δὲ ὑμῖν πολὺ ἐναντίον ἀποβήσεται, ὡς ἐγὼ φημι.
πλείους ἔσονται ὑμᾶς οἱ ἐλέγχοντες, οὓς νῦν ἐγὼ κατεῖχον, ὑμεῖς δὲ οὐκ
ῥησθάνεσθε· καὶ χαλεπωτέροι ἔσονται ὅσῳ νεώτεροι εἰσι, καὶ ὑμεῖς μᾶλλον
ἀγανακτήσετε. εἰ γὰρ οἴεσθε ἀποκτείνοντες ἀνθρώπους ἐπισχίσαι τοῦ ὀνειδί-
ζειν τινὰ ὑμῖν, ὅτι οὐκ ὀρθῶς ζῆτε, οὐκ ὀρθῶς διανοεῖσθε· οὐ γάρ ἐσθ' αὕτη
ἡ ἀπαλλαγὴ οὔτε πάνυ δυνατὴ οὔτε καλὴ, ἀλλ' ἐκείνη καὶ καλλίστη καὶ ῥά-
στη, μὴ τοὺς ἄλλους κολοῦναι, ἀλλ' ἑαυτὸν παρασκευάζειν, ὅπως ἔσται ὡς
βέλτιστος. ταῦτα μὲν οὖν ὑμῖν τοῖς καταψηφισαμένοις μαντευσάμενος
ἀπαλλάττομαι.

1. Explain the construction of ἡ οἷαν ἐμὲ ἀπεκτόνατε.
2. Parse εἵργασθε, and supply the ellipsis before χαλεπωτέροι.

Appendix B.
Examina-
tion Papers
for Scholar-
ships.

3. Why is *μή* used, and not *οὐ*, in the construction of *μή τοὺς ἄλλους κολοῦειν*?

4. Describe the forms of an Attic criminal trial.

(D). THUCYDIDES, Book I., c. 133.

τότε δὲ οἱ ἔφοροι, δεῖξαντος αὐτοῦ τὰ γράμματα, μᾶλλον μὲν ἐπίστευσαν, αὐτήκοοι δὲ βουλευθέντες ἔτι γενέσθαι αὐτοῦ Πανσανίου τι λέγοντος, ἀπὸ παρασκευῆς τοῦ ἀνθρώπου ἐπὶ Ταίναρον ἰκέτον οἰχομένου, καὶ σκηνησαμένου διπλὴν διαφράγματι καλύβην, ἐς ἣν τῶν [τε] ἐφόρων ἐντός τινες ἔκρυψε, καὶ Πανσανίου ὡς αὐτὸν ἐλθόντος καὶ ἐρωτῶντος τὴν πρόφασιν τῆς ἰκετείας, ἥσθοντο πάντα σαφῶς, αἰτιωμένου τοῦ ἀνθρώπου τὰ τε περὶ αὐτοῦ γραφέντα καὶ τᾶλλ' ἀποφαίνοντος καθ' ἕκαστον, ὡς οὐδὲν πώποτε αὐτὸν ἐν ταῖς πρὸς βασιλείᾳ διακονίαις παραβάλοιτο, προτιμηθεῖν δ' ἐν ἴσῳ τοῖς πολλοῖς τῶν διακόνων ἀποθανεῖν, κἀκείνου αὐτὰ ταῦτα ξυνομολογοῦντος καὶ περὶ τοῦ παρόντος οὐκ ἔωντος ὀργίζεσθαι, ἀλλὰ πίστιν ἐκ τοῦ ἱεροῦ διδόντος τῆς ἀναστάσεως, καὶ ἀξιούντος ὡς τάχιστα πορεύεσθαι καὶ μὴ τὰ πρᾶσσόμενα διακωλύειν.

1. In what way does Thucydides introduce the story of Pausanias?

2. Distinguish between the following compounds of *ἀκονω*—*αὐτήκοος*, *παρήκοος*, *κατήκοος*, *ὑπήκοος*, *ἐπήκοος*.

3. What is the Latin equivalent to *ἀπὸ παρασκευῆς*? Give examples of similar phrases.

4. Distinguish between *τέμενος*, *ἱερόν*, and *ῥαός*.

5. Explain the exact meaning of *τὰ πρᾶσσόμενα*.

(E).—Describe the Athenian constitution, and the extent of the Athenian dominions, at the commencement of the Peloponnesian war.

 μετ' ἀσφαλείας μὲν δοξάζομεν, μετὰ δέους δὲ ἐν τῷ ἔργῳ ἑλλείπομεν.

Translated into Attic Greek :—

As the day dies into night, so does the summer into winter : the sap is
 said to descend into the root, and there it lies buried in the ground ; the

Appendix B. earth is covered with snow, or crusted with frost, and becomes a general sepulchre. When the spring appeareth, all begin to rise : the plants and flowers peep out of their graves, revive and grow, and flourish : this is the annual resurrection. The corn by which we live, and for want of which we perish by famine, is notwithstanding cast upon the earth, and buried in the ground, with a design that it may corrupt, and being corrupted, may revive and multiply ; our bodies are fed with this constant experiment, and we continue this present life by a succession of resurrections. Thus all things are repaired by corrupting, are preserved by perishing, and revive by dying ; and can we think that man, the lord of all these things, which thus die and revive for him, should be detained in death, as never to live again ?

Examina-
tion Papers
for Scholar-
ships.

JOHN RYALL, *Professor.*

SENIOR SCHOLARSHIPS.—LATIN.

Subject for a Latin Essay :—

Græcia capta ferum victorem cepit, et artes
Intulit agresti Latio.

HORACE—*Epistles*, II., 1.

Translate into Latin lyrics :—

Say, Father Thames, for thou hast seen
Full many a sprightly race
Disporting on thy margent green
The paths of pleasure trace,
Who foremost now delight to cleave
With pliant arm thy glassy wave ?
The captive linnet which enthrall ?
What idle progeny succeed
To chase the rolling circle's speed,
Or urge the flying ball ?

THIRD YEAR'S SCHOLARSHIPS.

Translate into Latin verse.

Sometime let gorgeous Tragedy
In scepter'd pall come sweeping by,
Presenting Thebes or Pelops' line,
Or the tale of Troy divine,
Or what (though rare) of later age.
Ennobled hath the buskin'd stage.
But, O sad Virgin, that thy power
Might raise Musæus from his bower,
Or bid the soul of Orpheus sing
Such notes, as warbled to the string,
Drew iron tears down Pluto's cheek,
And made Hell grant what Love did seek.

Translate into Latin Prose :—

But the contending parties came not into the field on equal terms : the one was old in years and sated with excitement, the other was active and ardent, flushed with conquest and impatient for power ; the one had long clothed himself in the garb of peace, the other had not yet sheathed the

sword which had subdued the Gauls. Pompeius stood like the oak, conspicuous and alone in the centre of some fertile field, bearing the trophies of many triumphs, majestic in its decay, and venerated for its antique associations: Caesar fell upon him like the lightning of Jupiter, which spares nothing venerable, nothing holy, neither the monarch of the forest, nor the temples of its own divinity.

Translate into English, in as few words as possible:—

VIRGIL, *Georgics*, I. 150.

Mox et frumentis labor additus, ut mala culmos
Esset robigo, segnisque horreret in arvis
Carduus : intereunt segetes, subit aspera silva,
Lappaeque tribulique, interque nitentia culta
Infelix lolium et steriles dominantur avenae.
Quod nisi et assiduis herbam insectabere rastris,
Et sonitu terrebis aves, et ruris opaci
Falce premes umbram votisque vocaveris imbrem ;
Heu, magnum alterius frustra spectabis acervum,
Concussaque famem in silvis solabere quercu.

SECOND YEAR'S SCHOLARSHIPS.

Translate into Elegiac verse:—

No product here the barren hills afford,
But man and steel, the soldier and his sword ;
No vernal blooms their torpid rocks array,
But winter lingering chills the lap of May ;
No zephyr fondly sues the mountain's breast,
But meteors glare, and stormy glooms invest.

Re-translate into Latin:—

They may be timid and dastardly, who can look for refuge behind them, who can fly through safe and quiet roads, and be received into their own territories and their own lands. For your part, necessity obliges you to be brave ; and, since every mean between victory and death is sunk out of reach, you must resolve to conquer, or should fortune be unfavourable, to meet death in battle rather than in flight. If this determination be firmly fixed in every one of your breasts, I affirm again, you are conquerors. The immortal gods never gave to man a more invigorating incentive to conquest.

Translate into English, in as few words as possible:—

TACITUS, *Histories*, I. 20.

Proxima pecuniae cura : et cuncta scrutantibus iustissimum visum est inde repeti, ubi inopiae causa erat. bis et viciens milliens sestertium donationibus Nero effuderat. appellari singulos iussit, decuma parte liberalitatis apud quemque eorum relicta. at illis vix decumae super portiones erant, isdem erga aliena sumptibus quibus sua prodegerant, cum rapacissimo cuique ac perditissimo non agri aut fenus, sed sola instrumenta vitiorum manerent. exactioni triginta equites Romani praepositi, novum officii genus et ambitu ac numero onerosum. ubique hasta et sector, et inquieta urbs actionibus. ac tamen grande gaudium, quod tam pauperes forent quibus donasset Nero quam quibus abstulisset.

FIRST YEAR'S SCHOLARSHIPS.

1. What are the perfects and supines of *cado*, *frango*, *fodio*, *colo*, *gigno* ?
2. By whom, and at what dates, were the battles of *Regillus*, *Asculum*, and *Zama* fought ?

Appendix B.

Examina-
tion Papers
for Scholar-
ships.

3. What are the principal uses of the conjunction *Ut* ?

4. Give the rules for the quantity of E final in Latin.

5. Draw a map of Sicily, and mark in it Panormus, Messana, Syracuse, Eryx, Lilybæum, Agrigentum, and Camarina.

Re-translate into Latin :—

Here you see the Athenians, whence humanity, learning, religion, the fruits of the earth, the rights and laws of mankind, are thought to have been first propagated; for the possession of whose city, the gods themselves are said to have contended, on account of its beauty; which is of so great antiquity, that it is reported to have brought forth its own citizens, and the same spot to have been their parent, their nurse, and their country; and of so great authority, that the broken and shattered fame of Greece depends now singly on the credit of this city. Here also are the Lacedæmonians, whose tried and renowned virtue was confirmed, not only by nature, but by discipline; who alone, of all the nations upon earth, have subsisted for above seven hundred years without any change in their laws and manners.

BUNNELL LEWIS, *Professor.*

SCHOLARSHIP EXAMINATIONS.—MODERN LANGUAGES.

Translate into French, or German, or Italian :—

Guilt ever irrational.

Warren Hastings' conduct upon these occasions may be thought irrational. But, thank God, guilt was never a rational thing: it distorts all the faculties of the mind, it perverts them, it leaves a man no longer in the free use of his reason, it puts him into confusion. He has recourse to such miserable and absurd expedients for covering his guilt, as all those who are used to sit in the seat of judgment know have been the cause of detection of half the villainies in the world. To argue that these could not be his reasons, because they were not wise, sound, and substantial, would be to suppose what is not true, that bad men were always discreet and able. But I can very well, from the circumstances, discover motives which may affect a giddy, superficial, shattered, guilty, anxious, restless mind, full of the weak resources of fraud, craft, and intrigue, that might induce him to make these discoveries, and to make them in the manner he has done. Not rational, and well-fitted for their purposes, I am very ready to admit; for, God forbid that guilt should ever leave a man the free undisturbed use of his faculties. For, as guilt never rose from a true use of our rational faculties, so it is very frequently subversive of them. God forbid that prudence, the first of all the virtues, as well as the supreme director of them all, should ever be employed in the service of any of the vices. No, it takes the lead, and is never found where justice does not accompany it; and, if ever it is attempted to bring it into the service of the vices, it immediately subverts their cause. It tends to their discovery, and I hope and trust, finally to their utter ruin and destruction.—BURKE.

1. Give examples of the similarities between the French and the Latin Syntax.

2. Explain the English idiom, "*I would have you go*;" and translate it into French, German, and Italian.

3. Explain the English idiom, "*he is to come*;" and translate it into French, German, and Italian.

4. What are the forms for past time? Give them, with comparative examples, in English, French, Latin, German, and Italian.

5. Explain the meanings of *Fables* and *Fabliaux*.
6. Give the various epochs of the development of the French language.
7. State the influence of Pascal on the French language.
8. Compare the genius of Molière with that of other dramatists, ancient and modern.
9. Give an account of the life, works, and influence of Klopstock.
10. Give an account of the life and works of Tasso; and explain the various characters of Epic Poetry.

Appendix B.
—
Examina-
tion Papers
for Scholar-
ships.

RAYMOND DE VERICOUR.

LITERARY SCHOLARSHIPS OF THE FIRST YEAR.—ENGLISH LANGUAGE.—
HISTORY.

ENGLISH LANGUAGE.

1. Write a short essay on the importance of clearness in composition.
2. Prove that a sound knowledge of Etymology is the best guide in Orthography.
3. Give rules for the use of *shall* and *will* in the future tenses of verbs.
4. Show that the English language is made up of Anglo-Saxon and Norman-French, with an admixture of Latin and Greek derivatives.

HISTORY.—GREEK.

5. Describe the usurpation of Pisistratus.
6. Enumerate the events of the Persian Wars, from the battle of Marathon to the battle of Salamis.
7. Recount the administration of the Thirty Tyrants at Athens, and their expulsion by Thrasybulus.

HISTORY.—ROMAN.

8. Discuss the causes and results of the Punic Wars.
9. Give some account of the Catilinarian Conspiracy.
10. Review the events of Roman History, from the death of Julius Cæsar to the battle of Actium.

LITERARY SCHOLARSHIPS OF THE SECOND YEAR.—ENGLISH LITERATURE.

1. What are the characteristics of Spenser's poetry?
2. Write a short account of Shakespeare's life.
3. Mention some of the most remarkable of Ben Jonson's plays.
4. What was Hooker's most celebrated work? What is the nature of his style?
5. What is the style of Lord Bacon's Essays?
6. Sketch the plot of Shakespeare's Julius Cæsar.

LITERARY SCHOLARSHIPS OF THE THIRD YEAR.—ENGLISH LITERATURE.

1. Sketch the plot of Shakespeare's "Macbeth."
2. Enumerate the principal Dramatic Works of Beaumont and Fletcher.
3. What were the chief works of Lord Bacon?
4. What are the characteristics of Cowley's poetry?
5. Give a brief account of Milton's "L'Allegro," "Il Penseroso," and "Lycidas."
6. What was Dryden's "Absalom and Achitophel?"
7. What is the style of Milton's prose?
8. What are the characteristics of Thomas Fuller's writing?

HALLAM'S MIDDLE AGES.

9. Give a short account of the Feudal System.

Appendix B.

Examina-
tion Papers
for Scholar-
ships.

SENIOR SCHOLARSHIPS.—HISTORY.

1. Give an analysis of the Feudal System.
2. How was the succession to the Crown regulated in Anglo-Saxon times?
3. Enumerate the classes of society among the Anglo-Saxons.
4. To what extent did William the Conqueror alter the constitution of the Kingdom?
5. In what respects did Anglo-Norman Feudalism differ from that of the Continent?
6. Estimate the influence of Magna Charta as a bulwark of freedom.
7. What was the Confirmation of the Charters?
8. Trace the origin of Parliamentary Government, comparing the Parliaments of Henry the Third's reign with the Anglo-Saxon Witenagemots, and the Great Councils of the Anglo-Normans.

WILLIAM RUSHTON, *Professor.*

SECOND YEAR'S SCHOLARSHIP.

Morning.

1. Explain the theory of recurring decimals. Reduce to vulgar fractions $\cdot 75\bar{3}$ and $\cdot 75\bar{3}$.
2. A vessel in the form of a cube contains $\frac{3}{4}$ of a solid foot. Find the exact length of each side in inches. Find also the whole surface.
3. Solve the algebraic equations—

$$(1.) \sqrt{1+x+x^2} + \sqrt{1-x+x^2} = a.$$

$$(2.) \frac{a+x}{\sqrt{a-x}} + \frac{a-x}{\sqrt{a+x}} = 2\sqrt{a}$$

$$(3.) x^4 - 3\frac{1}{2}x^2 + 1 = 0.$$

4. Solve the simultaneous equations—

$$(1.) x+y=a \quad x^4-y^4=b^4.$$

$$(2.) xy=a^2, yz=b^2, zx=c^2.$$

5. Construct the quadratic equations whose roots are a and $\frac{1}{a}$, and verify the result by solving the constructed equation.

6. Construct the biquadratic equation of which the roots are $a, -\frac{1}{a}, b, \frac{1}{b}$.

Prove, *a priori*, that the equation will be a 'reciprocal one.'

7. Define a logarithm, and prove from the definition that

$$\log \frac{ab}{\sqrt{c}} = \log a + \log b - \frac{1}{2} \log c.$$

8. Show how to construct a pentagon in a given circle.

9. Find the value of $\tan 15^\circ$, $\sec 15^\circ$, and $\operatorname{cosec} 120^\circ$.

10. Prove the following theorems, viz. :—

$$\tan a = \cot a - 2 \cot 2a = \tan \left(45 + \frac{a}{2} \right) - \sec a.$$

11. Discuss the different methods of determining the third side c of a triangle of which the sides a, b , and the angle C , are given.

12. Determine the general equations of the circle and the straight line, and show, *a priori*, why, in the former, there are three, and, in the latter, two constants.

13. Under what conditions, expressed by relations among the constants, will the straight line $y=ax+b$ respectively intersect, touch, and lie without the circle $x^2+y^2=r^2$?

THIRD YEAR'S SCIENCE SCHOLARSHIP.

Afternoon.

Appendix B.

Examination Papers
for Scholarships.

1. Determine the tangent of the angle which the straight lines, whose equations are

$$\frac{x}{a} + \frac{y}{b} = 1, \quad \frac{x}{a^1} + \frac{y}{b^1} = 1,$$

make with each other.

2. Deduce the equation of a straight line which passes through a given point (α, β) , and is perpendicular to the straight line whose equation is $\frac{x}{a} + \frac{y}{b} = 1$.

3. Prove, analytically, that if two straight lines intersect in a circle, the rectangle under the segments of the one will be equal to the rectangle under the segments of the other.

4. Determine the nature of the curve represented by the equation—

$$x^2 + xy + y^2 + x + y = 1.$$

5. Trace the curves represented by the equations—

$$(1.) y = e^x + e^{-x}.$$

$$(2.) y = \sqrt{\frac{x+1}{x-1}}.$$

6. Prove that the focal distances of any point of the hyperbola make equal angles with the normal at that point.

7. Define the circle of curvature of a plane curve, and show how it may be determined for any given point of the curve.

8. Find expressions for the normal, subnormal, and tangent, to the catenary

$$y = \frac{c}{2} \left(e^{\frac{x}{c}} + e^{-\frac{x}{c}} \right)$$

9. Deduce also the radius of curvature of the above curve, and determine where it assumes a minimum value.

10. Investigate fully the conditions for determining the maxima and minima of functions of one variable. Apply them to circumscribe a given sphere with the smallest cone.

11. Integrate the differentials—

$$\frac{dx}{x^2\sqrt{1-x^2}}, \quad \frac{dx}{x^3-a^3}, \quad \frac{dx}{e^x+e^{-x}}.$$

12. Explain and exemplify the application of the integral calculus to the determination of the areas and the lengths of curves.

THIRD YEAR'S SCIENCE SCHOLARSHIP.

Morning.

1. Discuss, geometrically and analytically, the problem of making a circle pass through three given points on a plane. Under what conditions is the problem impossible?

2. Bisect a given triangle by a straight line drawn from a given point in one of its sides.

3. If a triangle be inscribed in a circle, and from the vertex straight lines be drawn parallel to the tangents at the extremities of the base; then, by these straight lines, together with the tangents, and the base produced if necessary, will two similar triangles be formed.

4. Find all the roots of the equation $x^5 - 1 = 0$.

5. Solve, by approximation, the equation $x^3 + 20x = 100$.

Appendix B.
Examina-
tion Papers
for Scholar-
ships.

6. The roots of every reciprocal equation of an even degree $2n$, can be found by the solution of an equation of the degree n .

7. Solve, by quadratics, the algebraic equations—

$$(1.) \frac{a+x}{\sqrt{a-x}} + \frac{a-x}{\sqrt{a+x}} = 2\sqrt{a}.$$

$$(2.) \sqrt{ax+b} + \sqrt{cx+d} = b\sqrt{ex+f}.$$

8. Solve the system of equations—

$$\begin{aligned} \sqrt{x+y} - \sqrt{x-y} &= \sqrt{a} \\ \sqrt[4]{x+y} + \sqrt[4]{x-y} &= \sqrt[4]{b}. \end{aligned}$$

9. Prove the trigonometrical formulæ—

$$\cos^2 \frac{A-B}{2} - \sin^2 \frac{A+B}{2} = \cos A \cos B.$$

$$\frac{\cos 3A + \sin 3A}{\cos A - \sin A} = 1 + \sin 2A.$$

$$\frac{1}{1 + \tan A \tan \frac{A}{2}} = \cos A.$$

10. Show how to determine the time of rising of the sun, when the latitude of the place, the declination of the sun, and the obliquity of the ecliptic, are given.

11. The angles of a plane triangle are as the numbers 5, 12, 13, and the radius of the inscribed circle is given. Find the sides of the triangle.

12. In a plane triangle $\tan B = \frac{b \sin A}{c - b \cos A}$. Prove this, and show hence

$$\text{that } B = \frac{b}{c} \sin A + \frac{b^2}{2c^2} \sin 2A + \frac{b^3}{3c^3} \sin 3A + \&c.$$

JUNIOR SCHOLARSHIP.

Morning.

1. Multiply .372106 by .0054, and express the result as a vulgar fraction in lowest terms. Explain the origin and nature of decimal fractions.

2. Supposing 32 metres equal to 35 yards, express 11835.49 metres in English miles.

3. Extract the square root of .00789 to four places of decimals. Demonstrate the rule for the extraction of the square root.

4. If one Prussian dollar, of thirty silver groschen, is equal to three shillings, and one Frankfort florin, of sixty kreuzers, is equal to 1s. 8d., express 25 thalers 18 silver groschen in florins and kreuzers.

5. Find the solid content of a cylinder of which the diameter and depth are each equal to $7\frac{3}{4}$ feet.

6. The hypotenuse of a right-angled triangle is 1000 yards, and one of the sides is to the other in the ratio of 24 to 7. Find those sides.

7. Explain what is meant by a Geometrical Progression. Find an expression for the n th term, and for the sum of n terms of the progression—

$$\frac{1}{5} - \frac{2}{15} + \frac{4}{45} - \frac{8}{135} + \&c.$$

When is the sum of a geometric progression *ad inf.*, infinite in value, and when finite.

8. Solve the following equations :—

$$(1.) 5(3x-4)-4(7x-9)=4\left(6+\frac{x-1}{3}\right)$$

$$(2.) \frac{4x}{5-x} - \frac{20-4x}{x} = \frac{15}{x}.$$

$$(3.) \sqrt{ax+b} = \sqrt[4]{cx+b^2}.$$

9. Solve the following quadratic equations :—

$$(1.) (x-\frac{1}{2})^2 - 7(x-\frac{1}{2}) + 12 = 0.$$

$$(2.) x+y=a \quad x^3+y^3=b^3.$$

10. Prove that if two lines intersect in a circle, the rectangle under the segments of the one is equal to the rectangle under the segments of the other.

11. Upon a given straight line, to describe a segment of a circle containing an angle equal to a given rectilineal angle.

12. Prove the following theorems of plane trigonometry :—

$$\tan(a+b) = \frac{\tan a \pm \tan b}{1 \mp \tan a \tan b}$$

$$\tan a + \sec a = \tan\left(\frac{\pi}{4} + \frac{a}{2}\right)$$

$$\frac{2 \sec a}{1 + \sec a} = \left(\sec \frac{a}{2}\right)^2.$$

13. Explain the object of trigonometry, and illustrate some of its more important applications to the mensuration of heights and distances.

14. Find in terms of the sides the length of the straight line bisecting the angle C of a triangle, and terminating in the opposite side.

SECOND YEAR'S SCHOLARSHIPS IN MEDICINE.—NATURAL PHILOSOPHY.

1. What is the cause of the intense degree of cold produced by mixing solid carbonic acid with ether?

2. Define the terms "Latent Heat" and "Specific Heat;" and illustrate your meaning by some examples.

3. Give some instances in which cold appears to be reflected.

4. A galvanic cell is formed of copper and zinc immersed in dilute acid, the action is found at first to be energetic, then feeble, and finally to cease altogether; how do you explain this?

5. How is it shown that the inner and outer coatings of a Leyden jar are in opposite electrical states?

6. Describe the construction of the eye-piece generally used in the compound microscope, and explain the function of each glass contained in it.

7. State the several hypotheses used to account for the fact, that the eye can adapt itself to viewing distinctly objects at different distances.

8. When is light polarized by reflection?

9. How can heat be produced by electricity; and in what way can electricity be produced by heat?

10. Under what circumstances do three forces, acting at the same point, produce equilibrium?

11. How do you find the centre of gravity of any rectilinear figure?

12. Define the terms "uniformly accelerated velocity," and "quantity of motion."

13. Through what distance would a heavy body fall in twenty seconds?

J. ENGLAND, *Examiner.*

tion Papers
for Scholar-
ships.

1. Show that any number of forces in the same plane, not in equilibrium, can be reduced either to a single force or to a *couple*, and in the case of a single resultant, determine it both in direction and magnitude from knowing the directions and magnitudes of the component forces.

2. A beam rests with one end on a smooth horizontal plane, the other pressing against a smooth vertical wall, knowing the length, the position, and weight of the beam, determine the strain on a horizontal tie attached to its lower extremity, which will keep it in equilibrium.

3. A solid cone, whose height is twice the diameter of its base, is suspended from a point in the circumference of its base; determine its position of equilibrium.

4. A bar, each foot of the length of which weighs 5 lbs., rests upon a fulcrum distant 3 feet from one extremity; what must be its length that a weight of 80 lbs., suspended from that extremity, may just be balanced by 20 lbs. suspended from the other?

5. Prove the following equations of rectilinear motion, viz.:—

$$v = V \pm ft$$

$$s = V \pm \frac{f t^2}{2}$$

$$v^2 - V^2 = 2fs$$

6. Prove that the path described by a projectile in vacuo is a parabola.

7. Determine the time of falling down a small arc of a circle terminated at its lowest point.

8. A heavy point moves in a vertical circle; determine the pressure at any point on the circumference.

9. How is the refractive index of a transparent medium determined, and prove that in a prism placed in the position of minimum deviation—

$$\mu = \frac{\sin A + \frac{d}{2}}{\sin \frac{A}{2}}$$

10. Prove the following formula for determining the focal length of a lens—

$$\frac{1}{f} = (\mu - 1) \left(\frac{1}{r} - \frac{1}{r^1} \right)$$

11. Explain the construction of the ordinary terrestrial eye-piece.

12. How is polarized distinguished from ordinary light?

13. Prove that atmospheric refraction varies nearly as the tangent of the zenith distance, and show how to determine the co-efficient.

14. Show how to determine the angle which two distant places on the earth's surface subtend at a planet, and hence how to determine the horizontal parallax.

15. From two heliocentric latitudes and longitudes, show how to determine the place of the node and inclination of a planet's orbit to the plane of the ecliptic.

16. Give an outline of the method of ascertaining the sun's parallax by means of the transit of Venus.

17. Show how to clear the observed distance of the moon and a fixed star of the effects of parallax and refraction.

ARTS.—SENIOR SCHOLARSHIP IN NATURAL HISTORY.—BOTANY.

Appendix B.

1. Describe, with the aid of outline diagrams, the chief modifications which the ovary and receptacle present in the following genera of *Rosaceæ*:—*Rosa*, *Fragaria*, *Dryas*, and *Spiræa*.

Examination Papers for Scholarships.

2. What general characters does the fruit exhibit in *Euphorbiaceæ*? How are these modified in the case of *Mercurialis*? Name the three genera which represent the family in Britain.

3. Define the order *Urticaceæ*.

4. Why are Diatoms now generally regarded as members of the vegetable kingdom? Give some account of their various modes of multiplication.

ZOOLOGY.

1. How does the skeleton of the *Dinosauria* differ from that of Reptiles in general? In what geological formations have remains of this order been detected?

2. Briefly sum up the results of the researches of Kölliker on the development of the *Cephalopoda*.

3. Describe, with the aid of diagrams, the entire structure of the freshwater Polype (*Hydra*), and compare it with that of a Polyzoön.

4. Give some account of the minute structure of the liver, and of the principal modifications which this organ presents in the different classes of *Vertebrata*.

MEDICINE.—SECOND YEAR'S SCHOLARSHIPS.—BOTANY.

1. Define the terms 'peltate,' 'mucronate,' 'crerate,' 'pinnate,' and 'equitant,' as applied to leaves.

2. In what families of the British Flora do examples of unisexual plants occur?

3. Compare the groups *Ranunculaceæ*, *Rosaceæ*, and *Alismaceæ*.

4. Give examples of vegetable groups which characterize the Flora of the New World.

ZOOLOGY.

1. In what groups of the Animal Kingdom has the existence of a renal apparatus been determined?

2. Describe the structure of the manducatory organs and digestive track in the Medicinal Leech.

3. The name of Coral is applied to two very different kinds of skeleton, or hard parts, occurring among the Actinoid Polypes. — Distinguish between them.

4. Give some account of the geographical distribution of poisonous Serpents.

J. REAY GREENE, *Professor of Natural History.*

SCHOLARSHIPS IN ARTS, ENGINEERING, AND AGRICULTURE.—CHEMISTRY.

1. What are the laws of combination?

2. How is ozone prepared, and what are the points of difference between its properties and those of ordinary oxygen?

3. How is phosphoric acid prepared?

4. What are the tests for hydriodic, nitric, carbonic, and sulphuric acids?

5. What are the two modifications of silicic acid; and how are they converted into each other?

6. What is a salt radical? Give examples of simple and compound salt radicals.

Appendix B.

Examina-
tion Papers
for Scholar-
ships.

7. What is the theory of the hardening of common and of hydraulic mortars?
8. Give the relations of the axes of the square prismatic system and the notation of the faces of the octahedron of this system.
9. What are the tests for alumina, zinc, lead, potash, and ammonia?
10. How many grains of nitrate of silver are required to decompose ten grains of chloride of sodium?

$$\begin{array}{r} \text{Ag} = 108 \\ \text{Na} = 23 \\ \text{Cl} = 35.5. \end{array}$$

SCHOLARSHIPS OF THE SECOND YEAR IN MEDICINE.—CHEMISTRY.

1. What is the law of equivalents?
2. Explain the law of combination by volume.
3. How is the amalgam prepared in which NH_4 is supposed to exist?
4. What are the tests for HI , HCy , NO_5 and PO_5 ?
5. Give the preparation and the properties of NO and NO_5 .
6. What are the reactions which take place in preparing NO_5 from equal weights of nitre and oil of vitriol? Why is NO_5 more easily obtained by those proportions than when a smaller quantity of oil of vitriol is employed?
7. How is potassa fusa prepared?
8. How is white precipitate prepared? What is its composition?
9. Salts of silver, peroxide of mercury, zinc, and lime, are in the same solution; separate them and give the characteristic reagent for each.
10. How many grains of nitrate of silver are required to precipitate four grains of HCy ?

$$\begin{array}{r} \text{Ag} = 108 \\ \text{C} = 6 \end{array}$$

SENIOR SCHOLARSHIPS IN ARTS OF THE FOURTH YEAR.—CHEMISTRY.

1. What is the nature of the white crystals of the leaden chambers? Under what conditions in the manufacture of sulphuric acid are they formed?
2. Explain the constitution of salts on the salt radical theory.
3. How is HI prepared; and why cannot a process be adopted similar to that followed in the formation of HCl ?
4. Carbonic acid, protoxide of nitrogen, nitrogen and oxygen, are mixed together; how would you test for the presence of each gas?
5. One ounce of HO , NO_5 is wanted, how much nitre and HO SO_3 are required, by theory, for the reaction, so as to leave bisulphate of potash in the retort?

$$\text{K} = 39.$$

6. How is platinum separated from its ores and converted into a malleable state?
7. Give the formula, mode of preparation, and properties of the alehyde of the ethylic series.
8. Calculate the formula of hydrated acetic acid from the following data:—

100 grains of acetate of silver give on combustion—

$$\begin{array}{r} \text{C} = 14.37 \\ \text{H} = 1.80 \\ \text{O} = 14.37 \\ \text{AgO} = 69.46 \end{array}$$

$$\begin{array}{r} 100.00 \\ \text{C} = 6 \\ \text{Ag} = 108. \end{array}$$

J. BLYTH, Professor.

SENIOR SCHOLARSHIPS IN PATHOLOGY.

Appendix B.

Examination Papers
for Scholarships.

1. Specify the foreign bodies, living and inanimate, found in the human body, and their situation.
2. Enumerate the various states of the system calculated to produce hæmorrhage.
3. Given a number of small abscesses in the liver, from what cause are they likely to be produced.
4. Specify the changes in the position of the heart from its normal situation, and their causes.
5. Describe the appearance and situation of the fluid in a case of hydrocephalus, and the condition of the brain.
6. Explain the connexion between the morbid phenomena, and the symptoms in peritonitis.
7. What is the cause of the immediate danger of death in a case of pericarditis.
8. What are the consequences, immediate and remote, of endocarditis?
9. Under what circumstances besides diabetes do you find glucosuria?
10. What are the effects of hysteria on the urine and urinary organs?
11. What are the chief morbid conditions of the urine?
12. Describe a case of gangrene of the lungs, and state its cause.
13. What are the various secondary affections produced by disease of the heart?
14. If one ureter be completely blocked up by disease, what will be the effect on both the kidneys?
15. Specify the various causes which might produce a loss of motive power in the lower extremities.

-
1. How do you divide the causes of disease? Explain and give an example of each kind.
 2. Enumerate the causes which might create disturbance of the intellectual faculties.
 3. In what forms might the functions of the heart be disturbed, and from what causes?
 4. Given dulness on percussion over a limited portion of a lung, enumerate the various causes which might produce it.
 5. Specify the abnormal states in which the urine might be found, and the cause in each case.
 6. What is the natural process of cure in gangrene and necrosis?
 7. If fluid be found in a serous cavity after death, from what causes might it have arisen, and how might the cause be determined from the pathological appearance?
 8. (a) In what tissue does spontaneous hæmorrhage most frequently arise? (b) In what locality is hæmorrhage found in childhood, as compared with adult life and old age? (c) How is hæmorrhage affected by the specific gravity of the atmosphere?
 9. Suppose œdema of one leg and thigh, what might be its cause? If œdema of both lower extremities succeed ascites, how do you explain the œdema in such cases?
 10. What effects are produced from very extensive swelling of both tonsils, as in scarlatina?
 11. What is the cause of secondary swellings of the lymphatic glands of the neck in this disease?
 12. Enumerate the diseases generally believed to be hereditary?

D. C. O'CONNOR, *Professor.*

Appendix B.

Examination Papers
for Scholarships.

AGRICULTURAL SCHOLARSHIPS OF THE FIRST YEAR.—GEOGRAPHY.

1. What is the position, and what is the course of the *Altai Mountains*?
2. What is the course of the river *La Plata*, and what country does it drain?
3. What is the position, and what is the nature of the country formerly known as *Banks' Land*?
4. In what portion of the globe does the largest area of *plateau land* occur?
5. What is the cause of *tides*, and what are the peculiar circumstances which give rise to *spring* and *neap tides*?

PRIZE EXAMINATION FOR STUDENTS OF SECOND YEAR (OLD ORDINANCE).—
SURVEYING, &c.

1. What is the line of collimation in a theodolite. How may it be out of adjustment? What error would be produced in an observation by its being out of adjustment?
2. Describe the division of the scale and vernier on a circle that will enable you to read to 20".
3. Suppose you require to range a line from station A to station B, B being not visible from A, but both being visible from an intermediate station C; how would you do it?
4. How would you plot a traverse without the aid of a protractor?
5. If the traverse were a closed one, how would you find its area?
6. How would you find the local time by an observation of the sun?
7. Set up and read the mountain barometer on the table.
8. Explain the following method of keeping a Level Field Book :—
B.S. | Int. | F.S. | Height of Inst. | Result. | Dist.

SECOND YEAR'S ENGINEERING SCHOLARSHIP.—GEOMETRICAL DRAWING AND
DESCRIPTIVE GEOMETRY.

1. When will the projection of a curve on a plane be a straight line?
2. A circular cylinder has its axis horizontal, and making a given angle with the vertical plane of projection; draw its vertical projection.
3. Two cylinders of unequal radii, one vertical, the other horizontal and parallel to the vertical plane of projection intersect, their axes being in the same plane; draw the projections of their intersection.
4. A cylinder intersects a cone as in sketch; draw the projection of their curve of intersection.
5. Given the projections of three points; find the traces of the plane passing through them.
6. Given the traces of three planes; find the projections of their point of intersection.
7. How would you construct the angle between two lines whose projections are given?
8. Draw the shadow cast by the cone, in the sketch, on the two planes.
9. Make an isometric drawing of the section of a cone by a plane.
10. If a line be given by its projection, as also the position of the picture plane and point of sight, how would you find the vanishing point of the line on the picture plane?

ALEX. JACK, Professor.

PRIZE EXAMINATION FOR ENGINEERING STUDENTS.—GEOLOGY.

1. What features serve to distinguish rocks of a sedimentary nature?
2. In what respect do Igneous differ from *Plutonic* Rocks?

3. What is the nature of the Tertiary deposits of the valley of the Thames, and how are they grouped? Appendix B.

4. What is the position of the *Avicular contesto* beds; and what fossils characterize these? Examination Papers for Scholarships.

5. Where do the remains of all Mammals first make their appearance; what is the nature of these remains, and to what forms of animals are they referable?

6. In what formation have the remains of the *Archegoscurus* been found, and what was the nature of this animal?

7. What is the age, position, and nature of the Paris building stone?

8. What strata in America yield the *mineral oil* which is used for illuminating purposes?

9. What is the origin, and what is the nature of *mineral veins*?

10. What are the *minerals* which enter into the composition of *granite*? To what systems of crystals do they belong; and what are their respective natures?

11. Under what circumstance do *Garnets* commonly occur? To what system do they belong; and what is their composition?

12. What is the nature, and what is the composition of *Black-band Iron-stone*?

ROBERT HARKNESS, *Professor.*

SENIOR SCHOLARSHIP EXAMINATION.—LOGIC.

1. Is Descartes' proof of the existence of an external world an instance of reasoning in a circle?

2. What is Hobbe's distinction between memory and imagination?

3. Enumerate and explain the *Idola* of Bacon?

4. What is Locke's account of the origin of the Idea of *Infinite Space*? Are Cousin's objections to it valid?

5. What does Hume mean by "Impressions and Ideas?" How do they differ from Sensation and Reflection as explained by Locke?

6. What place do the "Categories" hold in the system of Kant?

7. What was in reality Reid's theory of Perception?

8. What does Brown mean by "Simple and Relative Suggestion," respectively?

9. What, according to Sir W. Hamilton, is the immediate object of Perception? Is his theory mediate or immediate?

10. Explain and criticise Sir W. Hamilton's classification of the Cognitive Faculties?

JUNIOR SCHOLARSHIP EXAMINATION.—LOGIC.

1. Is logic rightly defined to be "the science of proof?" If not, give a more exact definition.

2. Is the operation of simple apprehension confined to "terms?"

3. Explain the distinction between "finite" and "infinite" nouns. Is it of any logical value?

4. What is meant by "Summum Genus," and "Infima Species?" Do they exist in nature, or are they purely arbitrary?

5. How are propositions divided as to their quantity?

6. What is meant by the *distribution* of a term, and how does it affect the laws of conversion?

7. Why must the middle term be distributed once at least in every syllogism?

8. Special rules for the 4th figure with proofs.

9. What is *Induction*?

Appendix B.
Examina-
tion Papers
for Scholar-
ships.

10. Give the canon and instances of the application of the "Method of Residues."
11. What is the difference between a fallacy of non-observation and one of mal-observation?
12. What is a hypothetical syllogism? Can all hypothetical syllogisms be reduced to a categorical form, and how?

G. S. READ, *Professor.*

SECOND YEAR'S SCHOLARSHIP.—ANATOMY AND PHYSIOLOGY.

1. Describe the microscopic features of adipose tissue.
2. Describe the appearance of cartilaginous tissue under the microscope.
3. State the composition of the liquor sanguinis.
4. What value may be assigned to the gelatinous compounds of the food, in reference to the nutritive functions?
5. Describe the structure of the teeth.
6. Detail the disposition of the serous pericardium, and then mention the arrangement of the fibrous layer.
7. Describe the structure, connexions, and relations of the diaphragm; mention its vessels and nerves.
8. Describe the mode in which the small intestine communicates with the large.
9. Describe the constituents of the urine and the nature of urea.
10. State the provisions peculiar to the organs of circulation during foetal life.

THIRD YEAR'S SCHOLARSHIP.—PRACTICAL ANATOMY.

1. Describe the ischio-rectal space and the levatores ani muscles.
2. Describe the relations and structure of the prostate gland.
3. Describe the articular surfaces and ligaments of the elbow joint and of the superior radio-ulnar articulation.
4. Mention the origin, course, and branches of the great gluteal artery.
5. State the connexions and relations of the iliac and pelvic fasciæ.
6. Describe the inter-osseal arteries of the fore-arm and the palmar arches of arteries.
7. State the origin, course, and branches of the middle meningeal artery.
8. Mention the muscles in relation with the hip joint.
9. Mention the origin, course, and branches of the anterior crural nerve.

THIRD YEAR'S SCHOLARSHIP.—ANATOMY AND PHYSIOLOGY.

1. State the value of the oleaginous compounds of the food, in regard to the nutritive and other functions of the body.
2. Mention the experiments of Hering in reference to the rapidity of the circulation.
3. Describe the sebaceous follicles of the skin, the sudoriparous glands and ducts.
4. State the circumstances influencing the supervention, degree, and duration of cadaveric rigor.
5. Detail the experiments of Dr. Brown-Séquard on the temporary restoration of muscular irritability after death.
6. State the various causes of, and physiological conditions during asphyxia.
7. The peculiarities (anatomical and functional) of the organs of circulation within the cranium and abdomen.
8. Mention various circumstances which may affect the quantity of carbonic acid exhaled from the lungs within a given period.
9. Describe the Casserian ganglion and the gustatory nerve.
10. Describe the relations of the stomach; its coats, vessels, and nerves.

SENIOR SCHOLARSHIP IN ANATOMY AND PHYSIOLOGY.—PRACTICAL ANATOMY.

Appendix B.

Examina-
tion Papers
for Scholar-
ships.

1. Describe the inferior and superior oblique muscles of the eye.
2. The tibio-fibular articulations and connecting ligaments.
3. The origin, insertion, and relations of the coccygeus muscle.
4. The tunica vaginalis and tunica albuginea testis.
5. Enumerate the posterior cervical, dorsal and lumbar muscles from the surface to the deepest layer.
6. The transversales abdominis muscles and the lumbar aponeuroses.
7. The inter-osseal or triangular ligament of the perineal region.
8. The os hyoides and the muscles and ligaments connected with it.
9. The maxillo-pharyngeal space and the superior constrictor of the pharynx.
10. The connexions of the inferior turbinated bone.
11. The ligaments of the uterus and the Fallopian tubes.
12. The axis thyroideus and its branches.

SENIOR SCHOLARSHIP IN ANATOMY AND PHYSIOLOGY.—ANATOMY AND PHYSIOLOGY.

1. State the experimental method adopted by Dr. Hales for calculating the force of the heart's contraction.
2. Give an outline of the experiments performed by M. Bernard on the sympathetic system of nerves.
3. Describe the pia mater of the brain and its principal processes.
4. Describe Meckel's ganglion and its branches.
5. Afford anatomical and physiological proofs with respect to the contractility of the bronchial tubes.
6. Referring briefly to the subject of ventilation, mention the amount of space, in cubic feet, which you would assign to every patient in the wards of an hospital.
7. Describe the vitreous body and hyaloid membrane of the eye.
8. State the effect of repeated venesections on the amount of fibrine in the blood.
9. Mention the experimental researches of Magendie on the subject of vomiting.
10. Describe the mucous membrane, glands and follicles of the small intestine.
11. Describe the olfactory nerves, and prove their special relation to the sense of smell.
12. Mention the lobules of the cerebellum and the disposition of the gray matter on the surface and interior of that organ.

J. H. CORBETT.

SCHOLARSHIPS OF THIRD YEAR.—MATERIA MEDICA.

1. Mention the chief alkaloids furnished by the natural family "Solana-
caceæ;" and contrast their physiological and therapeutical actions.
2. CROTON OIL—Latin name of plant; chemical constituents; adultera-
tions and tests; physiological action; therapeutical uses; doses and modes
of administration.
3. PEPSINE—Whence obtained; physiological action; therapeutical
uses; mode of administration.
4. Explain the preparation of: corrosive sublimate; valerianate of zinc;
chloroform; trisnitrate of bismuth; hyponitrous ether.

Appendix B.

Examina-
tion Papers
for Scholar-
ships.

5. Give the doses of ; laudanum ; castor oil ; acetate of lead ; strychnia ; morphia ; sulphate of zinc ; tartar emetic ; quinine.
6. ELECTRICITY—Mode of applying ; physiological action ; therapeutical uses.
7. IODINE—Preparations of ; tests of their purity ; physiological action ; therapeutical uses ; doses and forms of administration.

SENIOR SCHOLARSHIPS.—THERAPEUTICS.

1. What are the different modes of action of medicinal substances ? Explain each, and give your reasons for admitting or rejecting it.
2. How far do the therapeutical effects of medicinal agents depend on impressions made on the nervous system ?
3. What are the general rules which should guide us in the therapeutical application of tonics ?
4. Contrast the action of depressants with that of sedatives ; giving examples of each class.
5. Contrast the narcotic effects of opium, chloroform, and Indian hemp.
6. How does the sedative action of digitalis differ from that of prussic acid ?
7. Contrast the curative action of mercury with that of iodine, in syphilis.

PURCELL O'LEARY, *Professor.*

Appendix C.

Examina-
tion Papers
used at Ses-
sional Exa-
minations.

APPENDIX C.

SELECTION OF EXAMINATION PAPERS USED AT THE SESSIONAL EXAMINATIONS.

SENIOR GREEK CLASS.

Translate into Attic Greek :—

The river Selinus happened to flow through the middle of the estate.¹ In Ephesus, too, a river (called) Selinus flows by the side of the temple of Artemis, and fish and shells² are contained in both ; but in the estate at Scillus³ there is also game of every description. Out of the consecrated money, Xenophon erected an altar and a temple ; and ever afterwards he offered a sacrifice to the goddess *from the tithes of the produce*⁴ of the soil, when⁵ all the citizens and the men and women in the neighbourhood shared the feast. The goddess gave the guests *loaves of barley and of wheat*,⁶ wine, cakes,⁷ and a share of the offerings (drawn) from the consecrated pasture, and also of the game. For Xenophon's sons, and those of the other citizens, held a chase *to supply*⁷ the festival ; the men, too, who were disposed, joined,⁸ and there were taken partly from the sacred district itself, partly from Pholoe, wild boars, gazelles,⁹ and stags. The spot lies on the road which (visitors) travel from Lacedæmon to Olympia, about twenty stadia from the temple of Zeus, in Olympia. In the consecrated region there are meadow-land, groves, and hills full of trees, fit to rear wild boars, goats, sheep, and horses, so that the beasts-of-burden belonging to the *voluntaries* of¹⁰ the festival feed luxuriously.

¹χωρίον. ²κόγχοι. ³ἐν Σκιλλοῦντι. ⁴"Tithing the produce" (τὰ ὄραϊα).

⁵καί. ⁶ἄλφιτα—ἄρτοι. ⁷τραγήματα. ⁸εἰς. ⁹συνθηράω. ¹⁰δορκάδες.

¹⁰"Those going to."

Translate into Iambic verse :—

Hail, Rome, victorious in thy mourning weeds !
Lo, as the bark that hath discharged her freight,
Returns with precious lading to the bay,
From whence at first she weighed her anchorage,
Cometh Andronicus, bound with laurel boughs,
To resalute his country with his tears ;
Tears of true joy for his return to Rome.

Appendix C.

Examina-
tion Papers
used at Ses-
sional Exa-
minations.

JUNIOR GREEK CLASS.

Translate into Greek :—

1. I am glad that my friends are happy.
2. He told me that the eagle had a black head.
3. Let no one steal this hen.
4. He said that all the citizens ought to set about the task of conferring benefits on the state.
5. I should have died but for my faithful friend.
6. If you have anything, give it to this man.
7. If he had had four talents, he would have given them to the youngest son of his brother.
8. If the judge is here, we shall not escape with impunity.
9. Let us confer benefits not only on our friends, but also on our enemies.
10. He told me that the king would not arrive these ten days.
11. The more you have, the more you desire.
12. Would that all my friends were happy !

To be put into correct Greek, and formed into Iambic trimeter verses :—

For thus, O son, it is right to have in mind,
That all things stand after a father's will.
For, on this account, men boast having begotten
Obedient children, to have them in their houses,
That they may both repay the enemy with evils,
And may honour the friend on an equality with the father.

οὕτω γὰρ ὦ παῖς χρη ἔχω δια στερνων,
παντα ἰστημι (perf. contracted) ὀπισθεν γνωμη πατρωος.
οὐνεκα γὰρ οὗτος ἀνὴρ εὐχομαι γονη
κατηκοος φνω (1st aor. part.) ἔχω ἐν δομος
ὥς καὶ ἀνταμνομαι ὁ ἐχθρος κακος
καὶ τιμω ὁ φίλος ἐξ ἴσος πατηρ.

N.B.—Additional credit will be given for *correct* accentuation.

Translate :—

(B).—HOMER—*Iliad*, Book IV., vv. 422-445.

ὥς δ' ὅτ' ἐν αἰγιαλῷ πολυηχεῖ κῦμα θαλάσσης ὄρνυτ' ἐπασσύτερον, Ζεφύρου ὑπο κινήσαντος· πόντῳ μὲν τὰ πρῶτα κορύσσεται, αὐτὰρ ἔπειτα χέρσῳ ῥηγνύμενον μεγάλη βρέμει, ἀμφὶ δὲ τ' ἄκρας κυρτὸν ἐὼν κορυφούται, ἀποπτύει δ' ἄλός ἄχνην· ὥς τότ' ἐπασσύτεροι Δαναῶν κίνυντο φάλαγγες νωλεμέως πόλεμόνδε. κέλενε δὲ οἷσιν ἕκαστος ἡγεμόνων· οἱ δ' ἄλλοι ἀκὴν ἴσαν—οὐδὲ κε φαίης τόσσον λαὸν ἔπεσθαι ἔχοντ' ἐν στήθεσιν αὐδῆν-σιγῇ δευδιότες σημάντορας· ἀμφὶ δὲ πᾶσιν τεύχεα ποικίλ' ἔλαμπε, τὰ εἰμένοι ἐστιχόωντο. Τρῶες δ', ὥστ' οἷες πολυπάμονος ἀνδρὸς ἐν αὐλῇ μυρία ἐστήκασιν ἀμελγόμεναι γάλα λευκὸν, ἄζηχες μεμακῦναι, ἀκούουσαι ὅσα ἀρνῶν, ὥς Τρώων ἀλαλητὸς ἀνὰ στρατὸν ἐϋρὺν ὀρώρει· οὐ γὰρ πάντων ἦεν ὁμὸς θρόος οὐδ' ἴα γῆρυς, ἀλλὰ γλῶσσ' ἐμέμικτο, πολύκλητοι δ' ἔσαν ἄνδρες. ὦρσε δὲ τοὺς μὲν Ἄρης, τοὺς δὲ γλαυκῶπις Ἀθήνη, Δεῖμός τ' ἠδὲ Φόβος καὶ Ἔρις, ἄμοτον μεμαυῖα, Ἄρεος ἀνδροφόνιοι κασιγνήτη ἐτάρη τε, ἢ τ' ὀλίγη μὲν πρῶτα κορύσσεται, αὐτὰρ ἔπειτα οὐρανῷ ἐστήριξε κάρη καὶ ἐπὶ χθονὶ βαίνει. ἢ σφιν καὶ τότε νεῖκος ὁμοῖον ἔμβαλε μέσσω, ἐρχομένη καθ' ὅμιλον, ὀφέλλουσα στόνον ἀνδρῶν.

1. Parse the following words:—διάσχη, φθάσαι, ἐπέστησαν, ἀνεξεμπίμπλασαν, διέχον, πεντηκοστῆς, ἐπιπαρήσαν, ἔκπλεων, κορυφούται, εἰμένοι, ἐστιχόωντο, ὀρώρει, οἷσιν, ἴσαν, μεμακῦναι, ἀκὴν, πολυηχεῖ, ἴα.

2. Explain the following constructions in extract (A.):—

- (a). διαβαίνειν διάβασιν.
- (b). εὐεπίθετον ἦν τοῖς πολεμίοις
- (c). ἀνὰ ἑκατὸν ἄνδρας.
- (d). εἰ δέοι τι τῆς φάλαγγος.

3. Derive *ισόπλευρος*, *ἐνωμοτία*, *αἰγιαλός*, *πολυηχής*, *ἐπασσύτερος*, *Appendix C.*
πολυπάμων, *ἀλαλητός*, *πολύκλητος*.

4. Explain the principle of accentuation in each of the following words :
οἷσιν, *ἐπασσύτεροι*, *δειδιότες*, *χθονί*, *ἔκπλεων*, *οὐρανῷ*, *μεμανῖα*.

5. Of how many men did the *λόχος* and *ἐνωμοτία* respectively consist ?
Hence explain accurately the phrases, *κατὰ λόχους*, *κατὰ πεντήκοντα*, *κατὰ ἐνωμοτίας*.

6. Copy the first eleven lines of extract (B.), marking the scansion, and the principal cæsure in each. Also point out where the digamma seems to be required.

7. Quote, or refer to a passage in Virgil which appears to have been an imitation of that beginning *ἦ τ' ὀλίγη μὲν* in extract (B).

8. Explain the mode of fixing the dates, in Grecian history, by reference to Olympiads, and the rule for converting them to dates B.C., and *vice versa* ; illustrating by examples.

SENIOR LATIN CLASS.

CICERO—*In Verrem*, Actio Secunda, Lib. IV., c. 7.

Translate :—

Dicet aliquis: Quid? tu ista permagno aestimas? Ego vero ad meam rationem usumque meum non aestimo, verum tamen a vobis ita arbitror spectari oportere, quanti haec eorum iudicio, qui studiosi sunt harum rerum, aestimentur, quanti venire solcant, quanti haec ipsa, si palam libereque venirent, venire possent, denique ipse Verres quanti aestimet. Numquam, si denariis quadringentis Cupidinem illum putasset, commississet ut propter eum in sermonem hominum atque in tantam vituperationem veniret. Quis vestrum igitur nescit quanti haec aestimentur? In auctione signum aeneum non maximum HS XL milibus venire non vidimus? Quid, si velim nominare homines qui aut non minoris aut etiam pluris emerint, nonne possum? Etenim qui modus est in his rebus cupiditatis, idem est aestimationis. Difficile est enim finem facere pretio, si libidini non feceris. Video igitur Heium neque voluntate neque difficultate aliqua temporis nec magnitudine pecuniae adductum esse, ut haec signa venderet: teque ista simulatione emptionis vi, metu, imperio, fascibus ab homine eo, quem una cum caeteris sociis non solum potestati tuae, sed etiam fidei populus Romanus commiserat, eripuisse atque abstulisse.

1. Explain the words—*contemplor*, *considero*, *comperendino*.

2. Notice the chief points of difference between the earlier and later Attic Schools of Art.

tion Papers
used at Ses-
sional Exa-
minations,

3. Describe the construction of a Roman basilica.
4. What were the duties of the Canephori? Refer to some ancient representations of them.
5. Describe accurately the situation of Phaselis, Cibyra, Agrigentum, and Catina.

Translate into Latin :—

They buried him with military honours, as if he had died for his country, and not perished by his own hands. They received me with the greatest courtesy, nay rather kindly-feeling. If I must live after the example and custom of others, and not according to my own habit, what remains but that I should bid good-bye both to Rome and to Italy? He undertook the work with much rashness, or rather madness. If I were a stranger and not related to you by the ties of blood, I would load you with every kind of abuse.

He was now at open defiance with his crew, and his situation would have been desperate; but, fortunately, the manifestations of land on the following day were such as no longer to admit of doubt. A fish, such as keeps about rocks, swam by the ships; and a branch of thorn, with berries on it, floated by: they picked up, also, a reed, a small board, and, above all, a staff artificially carved. All gloom and murmuring was now at an end, and throughout the day each one was on the watch for the long sought land.

JUVENAL, XII., 111.

Translate :—

Nulla igitur mora per Novium, mora nulla per Histrum
Pacuvium, quin illud ebur ducatur ad aras
Et cadat ante lares Gallitæ victima sacra,
Tantis digna deis et captatoribus horum.
Alter enim, si concedas mactare, vovebit
De grege servorum magna et pulcherrima quæque
Corpora; vel pueris et frontibus ancillarum
Imponet vittas et, si qua est nubilis illi
Iphigenia domi, dabit hanc altaribus, etsi
Non sperat tragiciæ furtiva piacula cervæ.
Laudo meum civem, nec comparo testamento
Mille rates; nam si Libitinam evaserit aeger,
Delebit tabulas, inclusus carcere nassæ,
Post meritum sane mirandum, atque omnia soli
Forsan Pacuvio breviter dabit. Ille superbus
Incedet victis rivalibus. Ergo vides, quam
Grande operæ pretium faciat iugulata Mycenis.
Vivat Pacuvius, quaeso, vel Nestora totum;
Possideat, quantum rapuit Nero? montibus aurum
Exaequet; nec amet quemquam, nec ametur ab ullo!

1. Quote passages from Latin authors which show that Egyptian deities were worshipped at Rome.
2. Discuss some of the various readings in Juvenal's twelfth Satire.
3. Explain the words—*antennæ*, *bullæ*, and *fræmæ*.
4. Compare Juvenal and Horace, as satirists.
5. Give an account of the reign of Trajan.

Translate into Latin elegiacs:—

Not seldom, clad in radiant vest,
Deceitfully goes forth the morn :
Not seldom evening in the west
Sinks smilingly forsworn.

The smoothest seas will sometimes prove
To the confiding bark untrue ;
And if she trust the stars above,
They can be treacherous too.

The umbrageous oak in pomp outspread
Full oft, when storms the welkin rend,
Draws lightnings down upon the head
It promised to defend.

But thou art true, incarnate Lord,
Who didst vouchsafe for man to die ;
Thy smile is sure ; thy plighted word
No change can falsify.

 used at Ses-
 sional Exa-
 minations.

Translate into Latin :—

Inured by the rigour of their climate, or the poverty of their soil, to hardships which rendered their bodies firm, and their minds vigorous ; accustomed to a course of life which was a continual preparation for action ; and disdaining every occupation but that of war or of hunting ; the barbarous nations undertook and prosecuted their military enterprises with an ardour and impetuosity, of which men softened by the refinements of more polished times can scarcely form any idea.

B. LEWIS, Professor.

ENGLISH LITERATURE.

1. Give some account of Layamon's Brut and the Ormulum.
2. What is the character of Chaucer's poetry ? Give a brief abstract of the Prologue to his Canterbury Tales.
3. Account for the dearth of English poetry from Chaucer to Spenser.
4. Characterize the poetic genius of Spenser. Explain the construction of the stanza used by him in the Faerie Queene.
5. Distinguish between the Classical and Romantic schools of poetry.
6. Compare Shakespeare and Ben Jonson as dramatists.
7. Compare the prose style of Bacon, Hooker, and Milton.

ENGLISH COMPOSITION.

8. Define *simple*, *complex*, and *compound* sentences.
9. Criticise Roger Ascham's rule, "Speak as the common people do ; think as wise men do."
10. What cautions are to be observed in using "ordinary" words (τὰ κύρια), and "unusual" words (τὰ ξένα) ?
11. What are the principal rules and cautions with regard to the use of metaphorical language ?
12. Define the "continuous style" (ἡ εἰρομένη λέξις), and the "reflex style" (ἡ κατεστραμμένη λέξις). By what other name is the reflex style known ? What is meant by "antithesis" ? To what extent should anti-thetic forms be admitted in composition ?

SESSIONAL EXAMINATION.—HISTORY.

1. Give a general view of the Roman Empire under the Antonines. What is understood by the Roman municipal system ?
2. Show that many important institutions of the Franks and Saxons may be traced to the customs of the ancient Germans.
3. What were the two great Frankish dynasties in Northern Gaul ?

Appendix C.
Examina-
tion Papers
used at Ses-
sional Exa-
minations.

4. Give a brief account of the Anglo-Saxon constitution.
 5. In what respects did Anglo-Norman feudalism differ from that of the Continent?
 6. Describe the contest between the Crown and the Barons in the reign of King John.
 7. Trace the origin of Parliamentary Government in England.
 8. What was the nature of that revolution which ended in the deposition of Richard II.?
 9. State the leading events in the trial and divorce of Queen Catherine, wife of Henry VIII.
 10. Sketch the character of Cardinal Wolsey.
 11. What circumstances led to the dissolution (1) of the Smaller, (2) of the Larger monasteries, in the reign of Henry VIII.? Give a summary of the Acts of Parliament which ordained those dissolutions.
 12. Explain the allusions and references in the following passages:—
- (a). My conscience first received a tenderness,
Scruple, and prick, by certain speeches uttered
By the bishop of Bayonne, then French ambassador ;
Who had been hither sent on the debating
A marriage 'twixt the Duke of Orleans and
Our daughter Mary : i' th' progress of this business,
Ere a determinate resolution, he
(I mean the bishop) did require a respite ;
Wherein he might the king his lord advertise
Whether our daughter were legitimate,
Respecting this our marriage with the dowager,
Sometimes our brother's wife. This respite shook
The bosom of my conscience, entered me,
Yes, with a splitting power, and made to tremble
The region of my breast.
 - (b). Have I lived thus long—(let me speak myself,
Since virtue finds no friends)—a wife, a true one ?
A woman (I dare say, without vain-glory)
Never yet branded with suspicion ?
Have I with all my full affections
Still met the king ? loved him next heaven ? obeyed him ?
Been out of fondness, superstitious to him,
Almost forgot my prayers to content him ?
And am I thus rewarded ?
 - (c). Farewell, a long farewell, to all my greatness !
This is the state of man ; to-day he puts forth
The tender leaves of hope, to-morrow blossoms,
And bears his blushing honours thick upon him :
The third day, comes a frost, a killing frost ;
And, when he thinks, good easy man, full surely
His greatness is a-ripening, nips his root,
And then he falls, as I do.
 - (d). Cromwell, I charge thee, fling away ambition ;
By that sin fell the angels ; how can man, then,
The image of his Maker, hope to win by it ?
Love thyself last ; cherish those hearts that hate thee ;
Corruption wins not more than honesty.
Still in thy right hand carry gentle peace,
To silence envious tongues. Be just, and fear not :

Let all the ends thou aim'st at be thy country's,
Thy God's, and truth's ; then if thou fall'st, O Cromwell,
Thou fall'st a blessed martyr.

O Cromwell, Cromwell,
Had I but served my God with half the zeal
I served my king, he would not in mine age
Have left me naked to mine enemies.

Appendix C.

Examina-
tion Papers
used at Ses-
sional Exa-
minations.

ENGLISH LANGUAGE.

1. Distinguish between the External and the Internal evidence that we have in regard to the sources of the English Language.
2. Give a tabular view (1) of the Celtic, (2) of the Gothic languages.
3. Recount the Roman invasions, and ultimate subjugation of Britain.
4. What are our authorities respecting the Anglo-Saxon conquest of Britain ?
5. What is understood by the terms (1) Latin of the First Period, (2) Latin of the Second Period ?
6. Who were the Normans ? What language did they introduce into England ?
7. Distinguish between the *Langue d'oc* and the *Langue d'oïl*.
8. Describe the conflict between the Anglo-Saxon and the Norman French languages ; and show that our modern English is produced by an amalgamation of the two.
9. What were Layamon's Brut and the Ormulum ?
10. What were the works of Robert of Gloucester, and Robert of Brunne ?

QUESTIONS ON SHAKSPEARE'S JULIUS CÆSAR.

11. Explain the allusions in the following passages :—

- (a). Here wast thou bayed, brave hart ;
Here didst thou fall ; and here thy hunters stand,
Signed in thy spoil, and crimsoned in thy lethe.
- (b). You all do know this mantle : I remember
The first time ever Cæsar put it on ;
'Twas on a summer's evening, in his tent,
That day he overcame the Nervii.
- (c). What, shall one of us,
That struck the foremost man of all this world
But for supporting robbers, shall we now
Contaminate our fingers with base bribes,
And sell the mighty space of our large honours
For so much trash as may be grasped thus ?
I had rather be a dog, and bay the moon,
Than such a Roman.
- (d). For I can raise no money by vile means :
By Heaven ! I had rather coin my heart,
And drop my blood for drachmas, than to wring
From the hard hands of peasants their vile trash
By any indirection.

WILLIAM RUSHTON, Professor.

MODERN LANGUAGES.

Examina-
tion Papers
used at Ses-
sional Exa-
minations.

Translate into French :—

Our little habitation was situated at the foot of a sloping hill, sheltered with a beautiful underwood behind, and a prattling river before ; on one side a meadow, on the other a green. My farm consisted of about twenty acres of excellent land, having given a hundred pounds for my predecessor's good-will. Nothing could exceed the neatness of my little inclosures, the elms and hedgerows appearing with inexpressible beauty. My house consisted of but one story, and was covered with thatch, which gave it an air of great snugness ; the walls on the inside were nicely whitewashed, and my daughters undertook to adorn them with pictures of their own designing. Though the same room served us for parlour and kitchen, that only made it the warmer.—GOLDSMITH.

LETTER TO A MEMBER OF THE NATIONAL ASSEMBLY.

Effects of Prosperity on base and noble Minds.

It is in the relaxation of security, it is in the expansion of prosperity, it is in the hour of the dilatation of the heart, and of its softening into festivity and pleasure, that the real character of men is discerned. If there is any good in them it appears then or never. Even wolves and tigers, when gorged with prey, are safe and gentle. It is at such times that noble minds give all the reins to their good-nature. They indulge their genius even to intemperance, in kindness to the afflicted, in generosity to the conquered, forbearing insults, forgiving injuries, overpaying benefits. Full of dignity themselves, they respect dignity in others ; but they feel it sacred in the unhappy. But it is then, and basking in the sunshine of unmerited fortune, that low, sordid, ungenerous, and reptile souls swell with their hoarded poisons ; it is then that they display their odious splendour, and shine out in the full lustre of their native villany and baseness. It is in that season that no man of sense or honour can be mistaken for one of them.—BURKE.

1. How is the adverb *just* followed by a participle, rendered in French ?
2. State the use of the Imperfect and of the Preterite in French, comparing it to the Latin, and illustrate it by examples.
3. Give examples of conjunctions and verbs which govern the subjunctive mood in French.
4. When is the negative *ne* applied in French without there being a corresponding negative in English ? Give examples.
5. When is *that* omitted in English, and expressed in French ? Give examples.
6. Characterize the genius of Racine ; say which are considered his best plays.
7. Explain the idiom, *I would have you go*, and translate it.
8. What has been the influence of the reign of Francis I. on French Literature ?
9. Explain what is understood by Classical and Romantic Literature.
10. What are the characteristics of Bossuet's orations ?
11. State what you know of the life and genius of Corneille.
12. Mention some of the characteristics of the *Cid* of Corneille.

RAYMOND DE VERICOUR, *Professor.*

Translate into Irish :—

It was in the reign of Eremón, the son of Milidh, that the Cruithnigh—namely, the Picts, a people of Thrace—came to Erin, and landed at the mouth of the river Slaney, in the harbour of Wexford. Bede states that "the Pictish race happened to come from Scythia, in a few long ships over the sea by the blowing of the winds, into Ireland; and finding the Scotie race here before them, they asked a settlement for themselves, but this they did not obtain." Eremón informed them of a country north-east of Erin, and desired them to settle there. They departed for that country, now called Alba, where Cathluan was their first king. Some of them, however, remained in Erin after Cathluan, and obtained lands from Eremón, in the plain of Bregia, of Meath, where they were designated as the Cruithnigh of Erin for many centuries.

1. Describe the ancient principalities of Oirgiall and Brefney, and give the family names of the chiefs by whom they were governed.
2. Give the family names of those who ruled as provincial kings or princes in the territories of Meath, Ulster, Leinster, Desmond, Thomond, and Connaught.
3. What were the names of the sons of Oilioll Olum, from whom were descended the princes of Desmond and Thomond; and in what century of the Christian era did they live?
4. Give the derivations of the Irish names of Meath, Ulster, Leinster, Munster, and Connaught.

Appendix C.

Examina-
 tion Papers
 used at Ses-
 sional Exa-
 minations.

JUNIOR CLASS IN MATHEMATICS.

Morning.

1. If a straight line be divided into two equal and two unequal parts, the rectangle contained by the unequal parts, together with the square of the line between the points of the section, will be equal to the square of the half of the given line.

2. A line perpendicular to the extremity of a radius of a circle will be a tangent to the circle.

3. In a given right-angled isosceles triangle inscribe a square.

4. Extract the square root of 6849·2176. Explain the grounds of the rule for extracting the square root.

5. The radius of a cylinder is 3 feet, and its solid content is 1,000 feet; find its height.

6. Reduce to its simplest forms the algebraic expression—

$$\frac{x+y}{y} - \frac{2x}{x+y} + \frac{x^3-x^2y}{y^3-x^2y}$$

Calculate its value when $x=2\frac{1}{2}$, $y=3\frac{1}{2}$.

7. Find the compound interest of £350 for 3 years at 5 per cent. per annum. Investigate the general formula.

8. Solve the equations—

$$(1) a+x+\sqrt{a^2+x^2}=b$$

$$(2) \sqrt{a-x}+2\sqrt{a+x}=\sqrt{a-x}+\sqrt{ax+x^2}$$

9. Solve the simple equations—

$$x+y+z=6.$$

$$x+2y+3z=14.$$

$$-x-y+4z=10.$$

Prove that a system of simple equations admits of only one solution.

10. Solve the quadratic equations

$$(1) 3x^2-12x=-16$$

$$(2) \sqrt{a+x}+\sqrt{a-x}=\frac{12a}{5\sqrt{a+x}}$$

$$(3) \begin{cases} 2x+3y=118 \\ 5x^2-7y^2=4333. \end{cases}$$

In the last example determine all the possible solutions.

Appendix C.

Examina-
tion Papers
used at Ses-
sional Exa-
minations.

11. Explain the theory of logarithms, and demonstrate the principal theorems.

12. Find an expression for a number such that if it be divided into two parts in the ratio of m to n , the sum of the cubes of those parts shall be equal to a^3 .

13. Find an expression for the sum of the geometrical progression, $1 + \frac{1}{4} + \frac{1}{16} + \&c.$, to n terms, and calculate from the formula the sum of 5 terms of the series.

14. Prove that in a plane triangle

$$(1) c = \sqrt{a^2 + b^2 - 2ab \cos C}$$

$$(2) \frac{\sin A}{a} = \frac{\sin B}{b} = \frac{\sin C}{c}$$

$$(3) 2c : a + b :: a - b :: d,$$

where d represents the distance between the middle point of the side c , and the foot of the perpendicular from the opposite angle upon the side c .

15. Calculate the values of $\sin 30^\circ$, $\sin 45^\circ$, $\sin 60^\circ$, $\sin 120^\circ$, also of $\sin 15^\circ$ and $\sin 18^\circ$, radius being supposed unity.

16. Show how to determine by trigonometry, the distance of two objects—1st, when one of them is accessible and the other not; 2ndly, when both are inaccessible.

Afternoon.

1. The rectangle of two diagonals of a quadrilateral inscribed in a circle is equal to the sum of the two rectangles of the opposite sides.

2. In any triangle perpendiculars let fall upon the sides from the opposite angles will intersect in one point.

3. In a quadrilateral figure circumscribing a circle the sum of two opposite sides is equal to half the perimeter.

4. Solve the following algebraic equations:—

$$(1) x^2 - 4 + \frac{1}{x^2} = -\left(\frac{x^2 + 1}{x}\right)$$

$$(2) \sqrt{x} - \frac{8}{x} = \frac{7}{\sqrt{x-2}}$$

$$(3) \sqrt{ax+b} + \sqrt{cx+d} = \sqrt{ex+f}.$$

5. Solve by approximation the equations $x^3 + 7x^2 + x = 200$. Explain the general principle of methods of approximations.

6. The edges of a rectangular prism are to each other in the proportion of 3, 4, and $5\frac{1}{2}$, and the solid content is 11,089,567 cubic feet; find the edges.

7. Reduce the expressions—

$$\frac{2\sqrt{7} + 3\sqrt{5}}{2\sqrt{7} - 3\sqrt{5}}, \quad \frac{2\sqrt{2} + \sqrt{3}}{4 + \sqrt{6} - \sqrt{2}}$$

to forms which are not fractional.

8. Find a number such that if divided into any two parts, the square of the first part added to the second shall be equal to the square of the second part added to the first.

9. Investigate the general formula for the summation of Geometrical Progressions. Determine n in terms of a , r , and s .

10. Explain the application of Geometrical Progressions to annuities.

11. Prove that $\frac{n^2 - n + 1}{n^2 + n + 1}$ lies between 3 and $\frac{1}{3}$ whenever n is a real quantity.

12. Solve the equation

$$12x^4 - 104x^3 + 209x^2 - 104x + 12 = 0.$$

13. Define Harmonical Progression. Explain the origin of the term. Prove that if three numbers are in Harmonical Progression, their reciprocals are in Arithmetical Progression.

14. Prove the following theorems, viz. :—

15. The area of a quadrilateral inscribed in a circle is

$$\sqrt{(s-a)(s-b)(s-c)(s-d)},$$

where s is the semiperimeter, and a, b, c, d , are the sides.

16. Describe by what system of observations the height of a balloon in the air might be determined.

17. Prove that

$$\frac{2 \sin a - \sin 2a}{2 \sin a + \sin 2a} = \tan^2 \left(\frac{a}{2} \right)$$

$$\tan 7\frac{1}{2}^\circ = \frac{\sqrt{2}-1}{\sqrt{2}+\sqrt{3}}$$

SECOND YEAR'S CLASS.—MATHEMATICS.

Morning.

1. Solve the algebraic equations—

$$(1) \sqrt{a+x} + \sqrt{a-x} = b \sqrt{a^2-x^2}$$

$$(2) \begin{cases} \frac{x}{2} + \frac{y}{3} + \frac{z}{4} = 13 \\ \frac{x}{3} + \frac{y}{2} + \frac{z}{4} = 13 \\ \frac{x}{12} + \frac{y}{6} = \frac{z}{4} \end{cases}$$

2. Find a number such that whether it is divided into two or into three equal parts, the continued product of the parts shall be the same.

3. In a given semicircle inscribe a square. Investigate this problem geometrically and analytically.

4. Explain in what manner the coefficients of an algebraic equation depend upon its roots.

5. Calculate to four places of decimals a root of the equation

$$x^3 - 3x^2 - 2x + 5 = 0.$$

6. Expand $\sqrt[3]{1+x}$ by the binomial theorem.

7. Prove the following theorems :—

$$\sqrt{\frac{1+\sin A}{1-\sin A}} = \tan \left(45^\circ + \frac{A}{2} \right)$$

$$3 \sin A - \sin 3A = 4 \sin^3 A.$$

Express also $\operatorname{cosec} 2A + \cot 4A + \operatorname{cosec} 4A$ in terms of $\tan A$.

8. What is meant by the symbols $\sin^{-1}$, $\tan^{-1}$, &c. ? Prove that $\tan^{-1}\frac{1}{2}$

$$+ \tan^{-1}\frac{3}{4} = \frac{\pi}{4}.$$

9. Investigate the following theorem of spherical trigonometry :—

$$\cos \frac{1}{2}C = \sqrt{\frac{\sin s \sin(s-c)}{\sin a \sin b}}$$

Appendix C.

Examination Papers used at Sessional Examinations.

Appendix C.
Examina-
tion Papers
used at Ses-
sional Exa-
minations.

10. Prove that in a spherical triangle the sum of any two sides is greater than the third side.

11. Find the point of intersection, and the angle of intersection, of the two straight lines

$$\begin{aligned} 2y+3x-4 &= 0; \\ 3x-2y+5 &= 0. \end{aligned}$$

12. Investigate the equation of the tangent to a parabola without employing the differential calculus.

13. Find the equation to a plane, and show how an equation of the form $ax+by+cz=d$ may be interpreted.

14. The sphere $x^2+y^2+z^2=25$ is cut by a plane which makes equal angles with the co-ordinate axes, and of which the distance from the origin is 4; find the nature of the projection of the curve of intersection upon the plane xy .

15. Prove that the equation $\sqrt{x}+\sqrt{y}=1$ represents a parabola.

16. Prove that the semiperimeter of a parabola is a harmonic mean between the segments into which any chord is divided in the focus.

17. Discuss the general equation of the second degree in Analytical Geometry of two dimensions.

DIFFERENTIAL AND INTEGRAL CALCULUS.

Afternoon.

1. Deduce the differential coefficients of x^n , $\sin x$, and a^x , setting out from the definition of a differential coefficient as a limit.

2. Find $\frac{du}{dx}$ in the following cases, viz. :—

$$u = \frac{2}{3}(x+a)^{\frac{5}{2}} - \frac{2a}{3}(x+a)^{\frac{5}{2}}$$

$$u = a \operatorname{versin} \frac{-1}{a}x - \sqrt{2ax-x^2}$$

$$u = \log \left(\frac{\sqrt{x}}{\sqrt{a} + \sqrt{a+x}} \right)$$

3. A person being in a boat a miles from the nearest point of the beach, wishes to reach in the shortest time a point b miles from that point along the shore; supposing he can walk m miles an hour, and pull n miles an hour, where must he land?

4. Inscribe in an ellipse the greatest parallelogram, and in a sphere the greatest cone.

5. What sector must be taken out of a given circle that the remainder may form the curved surface of a cone of maximum volume?

6. Investigate the criteria for distinguishing a maximum from a minimum value. Apply them to the function $x - \frac{1}{x-a} - \frac{1}{x-b}$.

7. Of all rectangular prisms of a given surface the cube has the greatest volume; prove this.

8. Determine the lengths of tangent, normal and subnormal, in the ellipse

$$\frac{x^2}{a^2} + \frac{y^2}{b^2} = 1.$$

9. Find the equation of the normal in the last example.

10. Find the radius of curvature in the ellipse.

11. Show that the evolute to the cycloid $y = \sqrt{2ax - x^2} + a \text{ versin } \frac{x}{a}$

is a cycloid equal to the original one, but in a different position.

12. Integrate the following differentials :—

$$\frac{x^2 dx}{x^2 - a^2}, \quad \frac{x^2 dx}{x^3 + a^3}, \quad \frac{dx}{x^3 - 5x^2 + 6x}.$$

13. Integrate the following differentials, viz :—

$$\frac{dx}{x\sqrt{bx-a}}, \quad \frac{dx}{x\sqrt{bx+a}}, \quad \frac{x^2 dx}{\sqrt{1-x^2}}, \quad x \sin x dx.$$

14. Find by integration the volume and surface of the paraboloid.

GEORGE BOOLE, D.C.L.

Appendix C.

Examination Papers used at Sessional Examinations.

ENGINEERING PHYSICS.

1. How can the thermometer be applied to determine the difference of level of two places? and investigate the necessary formula.

2. Investigate a formula for determining the change of length in a metallic bar for a given change of temperature.

3. Knowing the pressure at which the steam enters the cylinder and the effective evaporation, show how to calculate the horse-power of the engine, supposing the steam to work at a constant pressure.

4. What quantity of steam, at 50 lbs. pressure, will be furnished by the evaporation of 10 cubic feet of water?

5. How much water, at 62° Fahrenheit, should be required to condense this quantity of steam, so that the water should have the temperature 100° Fahrenheit after condensation?

6. A diving-bell has the form of the frustum of a cone, the diameters of the top and bottom being 6 and 8 feet respectively, and the height 10 feet; to what height will the water rise in it when immersed to the depth of 20 feet?

PRACTICAL MECHANICS.

1. What should be the horse-power of an engine to raise 150 cubic feet of water per minute through a height of 200 feet, the modulus of the machine being .8?

2. Investigate the condition of equilibrium in the wheel and axle, taking into account friction.

3. Calculate the maximum pressure exerted by a bank of loose earth against a vertical wall, the upper surface of the earth being horizontal.

4. What must be the effective horse-power of a locomotive to pull, at an uniform speed of 30 miles an hour, a train weighing 70 tons, up an incline of 1 in 200, the resistance of the air at 10 miles an hour being 35 lbs., and friction 7 lbs. per ton?

5. Determine the centre of percussion of a rectangular bar moving round a horizontal axis at one of its extremities.

Appendix C.

Examination Papers used at Sessional Examinations.

6. Prove the following equations of rectilinear motion under the action of a constant force :—

$$v = V + ft$$

$$s = Vt + \frac{f}{2}t^2$$

$$v^2 = V^2 + 2fs.$$

7. Calculate the moment of inertia of a sphere round any diameter.
8. Show that in the impact of non-elastic spheres there is always a loss of *vis viva*, and determine its amount.
9. A carriage, which weighs 2 tons, moves in a circle of 800 feet radius with a velocity of 25 miles an hour ; calculate the centrifugal force.

NATURAL PHILOSOPHY.—JUNIOR DIVISION.

1. What is meant by the moment of a force with regard to a point ?
2. What is the condition of equilibrium in the lever ?
3. A weight of 5 cwt. is raised by a wheel and axle, the radius of the axle being 2 inches, and that of the wheel 25 inches ; what must be the force applied ?
4. In this case show that the *work done* by the moving power is equal to the work done by the resistance.
5. How is the distance passed over by a falling body in a given time ascertained ?
6. What are the properties of the pendulum which render it so valuable an instrument ?
7. What is meant by the principle of the composition of velocities ?
8. A body weighs 150 grains in air, and 80 in water ; what is its specific gravity ?
9. Explain the construction of the force-pump.
10. Enumerate the different forms of lenses.
11. What is meant by the focal length of a lens, and how may it be determined experimentally ?
12. What is meant by the focal centre of the eye ?
13. How is the quantity of heat necessary to produce a certain change of temperature in a given body determined ?
14. What is the usual plan adopted for the ventilation of mines ?
15. When a gold-leaf electroscope is charged, and a conductor is approached towards the plate of the electroscope, the leaves collapse ; explain this.
16. Enumerate the chief parts of the ordinary electrical machine, and point out the use of each.

SENIOR DIVISION.

A.

1. Explain the principle of the kaleidoscope.
2. In a telescope the object glass is of large aperture and considerable focal length ; in the microscope it is of small aperture and short focal length. Explain the reasons of the difference.
3. An object is placed before a convex speculum, of 8 inches radius, at a distance of 12 inches from it ; determine the position and nature of the image.

4. Do the same when the speculum is concave.
5. When is the image formed by a convex lens virtual, and when is it real?
6. Explain the construction and use of the Camera Lucida.
7. Explain the formation of the colours which appear when a thin film of oil floats on the surface of water.
8. Explain the accumulation of electricity in a Leyden jar.
9. Why does not gunpowder explode when the electric spark is passed through it?
10. What is meant by *diamagnetism*, and how is its existence shown?
11. What is meant by the magnetic equator?
12. By what means is the number of vibrations, necessary to produce a given musical tone, ascertained?
13. How is it experimentally shown that sound is ordinarily caused by the vibrations of the air?
14. By what experiments is it proved that the temperature of ebullition depends on the pressure?
15. What is meant by latent heat?
16. Explain some method of ascertaining the specific heat of a body.

B.

1. Prove the following formula for determining the focal length of a lens $\frac{1}{f} = (\mu - 1) \left(\frac{1}{r} - \frac{1}{r'} \right)$
2. Determine the focal length of a double convex lens, the radii of the surfaces being 6 and 4 inches respectively, the index of refraction being $\frac{3}{2}$.
3. Explain the construction and use of Rochon's micrometer.
4. How is the *dispersive power* of a transparent substance measured?
5. In the Leyden jar prove that the quantity of free electricity in the inner coating is proportional to the total charge.
6. How is the true dip of the magnetic needle ascertained?
7. Prove that Gay-Lussac's and Mariotte's laws may be expressed by the following formula :—

$$\frac{V}{V'} = \frac{p'}{p} \frac{460 + t}{460 + t'}$$

8. How is the latent heat of steam ascertained?

NATURAL PHILOSOPHY.—SENIOR DIVISION.

A.

1. Two parallel forces, one 18 lbs., the other 12 lbs., act at a distance of 15 inches from each other *in opposite directions*; find the point of application of their resultant.
2. A beam 12 feet in length, weighing 40 lbs., has a weight of 1 cwt. placed at 4 feet from one end, and is supported by props at its ends; find the pressure on each prop.
3. What is the least force which can sustain 1 ton on an inclined plane which rises 3 in 17?
4. The lever handle of a screw is 3 feet, and the breadth of the thread

Appendix C. 2 inches : if a man exert a force of 30 lbs. in turning the lever, what pressure will he produce?
 Examination Papers used at Sessional Examinations.

5. In the ordinary balance the arms must be of equal length, and the centre of gravity beneath the fulcrum; why must these conditions be fulfilled?

6. A heavy body falls in vacuo from a height of one mile; with what velocity will it reach the ground?

7. A body is projected vertically upward with a velocity of 150 feet per second; in what time will it again reach the ground?

8. Find the accelerating force on a body descending a plane which rises 5 in 19, and explain the meaning of the result.

9. How is Atwood's machine used to determine the laws of rectilinear motion?

10. How is it proved that the fixed stars are at very great distances from the earth?

11. How is the size of the earth ascertained?

12. It is found by experiment that the force of gravity is less at the equator than near the poles; how is this accounted for?

13. When Venus presents the form of a crescent as an evening star, how is it situated relatively to the sun and earth?

14. How is the distance of Jupiter from the sun ascertained?

15. How are the following facts with regard to the Moon proved:—

a. That it moves in an elliptical orbit, having the earth in one focus.

b. That it rotates on its axis in the same time as it moves round the earth?

16. Define the following terms:—Altitude, Azimuth, Right Ascension, Declination, Latitude, and Longitude.

17. A cube, each edge of which is 4 feet, is filled with water; determine the pressure on each side.

18. If this cube be divided by a diagonal plane passing through one of the upper edges, and the upper part filled with water, determine the pressure on the diagonal plane.

19. How is the specific gravity of a solid determined by means of the specific gravity bottle?

20. Describe the construction, and explain the principle, of the hydrostatic press.

B.

1. Determine the centre of gravity of the frustum of a cone.

2. A beam is moved over a rough horizontal plane by means of a cylindrical roller; show that the centre of gravity of the beam moves with twice the velocity of that of the roller.

3. Investigate the condition of equilibrium in the compound wheel and axle (or Chinese capstan).

4. In a simple pendulum determine the strain on the string when at the lowest point.

5. Determine the velocities of two perfectly elastic spheres after impact.

6. How is the local time of a place got by observing the Sun's altitude?

7. How are the effects of annual parallax distinguished from those arising from aberration?

8. What is meant by diurnal parallax? and prove that it is a maximum when the body is in the horizon.

9. How are the lunar ecliptic limits calculated?

PHYSICS.

Appendix C.

Examination Papers used at Sessional Examinations.

1. Assuming the truth of the undulatory theory of light, prove the truth of the law of ordinary refraction.

2. How does this theory account for the phenomena of interference? and state some experiment by which the length of a wave may be measured.

3. In accounting for the colours of *thin plates* by the undulatory theory, what difficulty presents itself, and how is it explained?

4. Explain what is meant by *diffraction*, and describe some experiment to illustrate it.

5. When a ray of ordinary light is transmitted through a crystal of Iceland spar it is divided into two, one called the ordinary ray, the other the extraordinary; how are they distinguished?

6. Describe the method of using the weight thermometer.

7. Describe Regnault's methods of determining the expansion of gases.

8. What is Newton's law of cooling?

9. The motion of a cube of copper rotating between the poles of a powerful electro-magnet is immediately arrested on the completion of the circuit; explain this.

10. How is the intensity of a current measured; and how is the quantity of electricity passing through a given circuit estimated?

MIXED MATHEMATICS.

1. Any number of forces act on a rigid body; state the conditions of equilibrium in each of the following cases:—

1. When the system is entirely free.

2. When it contains a fixed axis.

3. When it has a fixed part.

2. One end of an uniform beam is capable of moving on a hinge in a horizontal plane, the other end rests against a smooth vertical wall; determine the pressure against the wall.

3. An uniform rod, moveable about a smooth hinge at O, rests against a smooth sphere placed on a smooth horizontal plane passing through O, the sphere is attached to O by a string; determine the tension on the string.

4. Investigate the formula for determining the centre of gravity of a plane surface.

5. Determine the centre of gravity of the segment of a parabola intercepted between the vertex and any ordinate.

6. Determine the centre of gravity of a segment of a circle.

7. State the principle of vertical velocities, and prove it in the case of forces acting at a point.

8. Write the differential equations of rectilinear motion, and from them deduce the following, viz. :— $v^2 = V^2 + 2fs$.

9. A body acted on by a force, which varies directly as the distance from a fixed point, moves in a straight line towards the centre of force; determine the time in which it will reach the centre of force from a given point.

10. A body acted on by a vertical force describes the common catenary; determine the law of force.

JOHN ENGLAND, Professor.

Appendix C.

Examina-
tion Papers
used at Ses-
sional Exa-
minations.

CHEMISTRY.

Pass Questions.

1. Explain the difference between chemical and physical action. Give examples illustrative of each.
2. Write the symbols of sulphide and chloride of potassium, sulphite, hyposulphite, nitrite of potash, and sulphate and chlorate of potash.
3. Give the formulæ of the oxygen compounds of chlorine; and state how hypochlorous acid is formed.
4. Give the preparation and the properties of protoxide and binoxide of nitrogen.
5. What are the tests for HI, HCl, NO_2 , and SO_2 ?
6. How is ammonia prepared? Give its composition and properties.
7. What is meant by simple and double elective affinity? Illustrate by examples.
8. What is the composition of the atmosphere? By what means is its uniformity in composition maintained?
9. How is caustic potash prepared? What are its tests?
10. What are the tests for the salts of baryta, alumina, iron, copper, and mercury?
11. How are calomel and corrosive sublimate prepared?
12. Give the laws of combination.

Prize Questions.

(N.B.—Prizemen are not required to answer the Pass Questions.)

1. How is the rhombic dodecahedron derived from the regular octahedron? Give the notation of its faces.
2. Explain the law of combination by volumes.
3. What is meant by allotropy? How are the allotropic forms of oxygen and phosphorus produced? Give the properties of these two elements in their allotropic and in their ordinary condition.
4. Give the preparation and the properties of I and of HI.
5. Give the preparation, the properties, and the composition, by weight and by volume, of nitric and hydrochloric acid.
6. Give the formulæ of the oxygen compounds of phosphorus; and state the mode of preparation, the properties, and the tests of phosphoric acid.
7. Explain the binary theory of salts.
8. How has Graham shown that many basic salts can be regarded as really neutral salts?
9. How is lead extracted from its ores?
10. How may the salts of lead, iron, lime, and magnesia be separated from each other? Give the characteristic tests of these substances.
11. Six grains of an organic substance, containing C, H, O, give, on combustion with oxide of copper, 8.8 grains of CO_2 , and 4.2 of HO; calculate its per-centage composition.

J. BLYTH, *Professor*.

BOTANY.

1. Describe the structure and position of the reproductive organs in *Equisetum*.
2. Define the terms 'fibrous,' 'tuberous,' and 'adventitious,' as applied to roots.

3. Compare the fruits of the Blackberry, Strawberry, and Rose.
4. What is the arrangement of the stamens in *Fumariaceæ*?
5. How does the foliage of *Saxifragaceæ* vary? By what floral characters may the British genera of this family be distinguished from *Rosaceæ*?

Appendix C.

Examination Papers used at Sessional Examinations.

ZOOLOGY.

1. Explain the mechanism by which the water currents of Sponges appear to be produced.
2. Indicate the exact position of the organs of reproduction in the Sea-Anemone.
3. Describe the "tongue" of a cephaloporous Mollusk.
4. In what recent orders of the class *Echinodermata* are the ambulacral and antambulacral regions nearly equal?
5. To what order of Mammals would the following diagnosis apply,—*Placental, monophyodont or edentulous, with four unguiculate limbs*?

J. REAY GREENE, *Professor of Natural History.*

GEOLOGY AND MINERALOGY.

1. Describe the features which mark rocks resulting from aqueous agency.
2. What is the nature and composition of the minerals which form Igneous and Plutonic rocks?
3. What is the nature of the structure known as "false-bedding;" and from what does this originate?
4. Define the terms *dip*, *strike*, and *unconformability*; and indicate what deductions may be drawn from the latter.
5. Into what groups are the Devonian rocks of Devonshire and the Eifels divided?
6. In what part of England are the upper Jurassic rocks best developed, and what is the series of strata composing these?
7. What is the nature and age of the deposits which in Switzerland occupy the country between the Alps and the Jura?
8. Refer the following fossils to their respective formations, viz., *Spirifer macroptera*, *Lingula Davisii*, *Productos horridus*, *Rhynchonella acuminata*, *Terebratula vulgaris*, and *Terebratula maxillata*.
9. Name some of the Mammals which serve to characterize the Eocene.
10. Draw a section illustrating the occurrence of the *Mesozoic Rocks* of the North of Ireland, and their mode of association.
11. In a district likely to afford coal of the true Carboniferous age, what fossil plants would most probably occur?
12. Give a section showing the relation of the Devonian rocks of the South of Ireland to the deposits which underlie them.
13. What are the external characters of the mineral *Mica*?
14. To what system of crystals does Beryl belong, and what are its most prominent characters?
15. What feature serves best to distinguish copper pyrites from iron pyrites?

ROBERT HARKNESS, *Professor.*

Appendix C.

Examination Papers
used at Ses-
sional Exa-
minations.

CIVIL ENGINEERING.

1. Describe the different kinds of stone masonry used in engineering work.
2. Describe the different kinds of bond used in brickwork.
3. Write the clause in a specification referring to the making of hydraulic mortar.
4. Describe the ringing engine and crab engine for driving piles; describing also the work they are respectively adapted for.
5. What objections have been brought against Nasmyth's pile-driving engine?
6. Describe, in detail, the construction of a cofferdam in 6 feet of low water, rising to 14 feet of high water, on a clay bottom.
7. Describe the method adopted at the Victoria Bridge, Montreal, of getting down the cofferdam, describing the difficulties to be overcome.
8. Give the span and rise, thickness of arch at crown, and springing and form of arch, of any remarkable bridges with which you may be acquainted.
9. Describe the system of pavement at present recommended for streets where there is a great traffic.
10. What is the proportion of the draft to the load on earth roads, broken stone roads, and pavement?

 SURVEYING, &c.

1. Describe the divisions on the scale of a 5-inch theodolite and a sextant reading to 20''.
2. Describe the graduation of the eidograph, and prove the rule for setting it, when about to enlarge or reduce a plan.
3. Describe the different kinds of instruments used for plotting angles, noticing every adjustment they may require.
4. Describe the method of connecting the two members of the horizontal limb of a theodolite by a clamp and tangent screw.
5. How would you examine whether there were any index error in a sextant?
6. What are the two methods of plotting a traverse?
7. The angle subtended at a station A by two others, B and C, is found to be greater when measured by a sextant than when measured by a theodolite; explain this.
8. Explain the method of keeping a Level Field Book.
9. If a level were out of adjustment, so that it read too high, and that it were used to make a section up a steep rising ground, what would be the probable error in the difference of level?
10. In laying out a south line by two observations on the sun, at equal times before and after noon, how does the change of declination affect the position of the line?

 CIVIL ENGINEERING.

1. Describe some of the forms of iron permanent way which have been employed on railroads.
2. Compare the cost of these with that of a system in which wooden sleepers, &c., are used.

3. How is the amount of the direct pull of a locomotive limited? What is its amount? *Appendix C.*
4. Describe the construction of a Warren girder for a span of say 60 feet. *Examination Papers used at Sessional Examinations.*
5. Show how the strains on the various parts of it may be calculated.
6. Give a design for a wrought-iron plate girder bridge for a single line of railroad and span of 40 feet.
7. Give an expression for the breaking weight of a beam of given cross section and length.
8. Give an expression for the deflection of a beam of given length, and of a given uniform cross section, under a uniformly distributed load.
9. Why is it, that if the cross section of the beam be variable, the difficulty of finding its deflection is much increased?
10. How is the greatest external pressure determined which can be borne by a circular wrought-iron tube fixed at the ends?

ALEXANDER JACK, *Professor.*

LOGIC.

1. How far is the question as to the definition of logic a verbal one?
2. What is the defect of the first operation of the mind, and how does logic remedy it?
3. Why is species called the whole of comprehension?
4. State and illustrate the rules for good division.
5. What is the law of subaltern opposition?
6. How can O be converted?
7. Can E be converted "per accidens"?
8. Prove that two particular premises prove nothing.
9. Construct syllogisms in Camenes and Bokardo, and reduce "ostensively" and "per impossibile."
10. Is reduction necessary; and if so, why?
11. Special rules for fourth figure, with proofs.
12. What is a *sorites*? In what form are the special rules of the first figure applicable to it?
13. What is the defect in the spurious affirmative mode of hypotheticals?
14. What is meant when it is said that the quantification of the predicate has been neglected by logicians? How far is the statement correct?
15. What is the effect of the introduction of the new classes of propositions suggested by Sir William Hamilton, upon the special rules for the figures?
16. What is meant by "mathematical induction?" and in what respects does it differ from "induction proper?"
17. Give the canon of the "method of agreement," and discuss its probative force.
18. How does the operation of the "composition of causes" affect the applicability of the four "experimental methods?"
19. In how many senses is the expression "explanation of the laws of nature" used?
20. Why is it unnecessary to subdivide "fallacies of ratiocination?"

G. S. READ, *Professor.*

Appendix C. FIRST YEAR'S STUDENTS.—REAL PROPERTY AND CONVEYANCING.

Examina-
tion Papers
used at Ses-
sional Exa-
minations.

1. When was the power of alienation of land recognised by the law of England?
2. How far, and in what cases may conveyances be made with condition restraining the grantee's power of alienation?
3. Define a deed. What are the requisites of a deed in respect to the parties thereto, and the subject matter thereof?
4. What is necessary to complete the estate of a lessee?
5. Distinguish between the effect of covenants that "run with the land," and those that do not.
6. Give an outline of the most usual limitations and trusts in a marriage settlement of real estate.
7. Explain a "springing use." What limitation unknown to the common law can be effected through its medium?
8. Who were the proper parties to a deed creating a "tenant to the præcipe," and what was the distinction between a deed "leading" and a deed "declaring" the uses of a recovery?
9. In what different ways may estates be held in reference to the number and connexion of their owners?
10. Describe an "equity of redemption," and what are the rights of a person entitled to it?
11. Explain the meaning of the maxim, *Nemo est hæres viventis*; and what is the difference between an heir apparent and an heir presumptive?
12. How must a will be executed and attested?

SECOND YEAR'S STUDENTS.—EQUITY.

1. Give a general account of the distinction between common law and equity as administered in the Court of Chancery.
2. Describe the mode of procedure in Courts of Equity.
3. In what cases is land considered and treated as money in equity.
4. What is meant by the doctrine of Election in Equity? Give an illustration.
5. A mortgages Greenacre and Blackacre to B for £1,000, and Blackacre only to C for £1,000. If B enforces the payment of the debt out of Blackacre so as to destroy C's security, has the latter a right to any, and what relief in equity?

MEDICAL JURISPRUDENCE (*Legal Part*).

1. Distinguish the kind of questions which may be legally put to witnesses on the direct, from those which may be put on the cross and re-examination respectively.
2. How far may expert or skilled witnesses refresh their memory by referring to professional treatises?
3. Has a medical witness any privilege, exempting him from the disclosure in a court of law of admissions confidentially made to him by a patient? Refer to the authority of a leading case, in which the question was decided.
4. Describe the meaning in law of a "maim," a "wound," a "grievous bodily harm," and a "disabling," respectively.

5. State concisely the charge for which Hadfield was tried, and the ground on which his counsel rested mainly his right to an acquittal. Appendix C.

6. What is necessary for the valid execution of a will, with respect to signature, attestation, &c. ? In the consideration of a question of "testable capacity," what may be regarded as the best criterion of its existence at the time of the execution of the will ? Examination Papers used at Sessional Examinations.

MICHAEL BARRY, *Professor.*

ANATOMY AND PHYSIOLOGY.

1. State the changes produced in the blood by respiration.
2. Describe the changes of the air in respiration.
3. Give an account of the influence of the nervous system in the maintenance of respiration.
4. The structure and actions of the auriculo-ventricular and arterial valves of the heart.
5. Describe the structures entering into the coats of an artery.
6. State the cause of the arterial pulse.
7. Describe the hæmadynamometer invented by Poiseuille.
8. Describe the elementary structures of the nervous system.
9. Describe the spinal membranes—the ligamentum denticulatum and the connexions of the two roots of the spinal nerves with the medulla spinalis.
10. Describe the meso-cephalon, or pons Varolii.
11. Mention the structures composing the trachea and bronchial tubes.
12. Describe the soft palate and the several passages which communicate with the pharynx.

PRACTICAL ANATOMY.

1. Give a description of the clavicle.
2. Mention the muscles and ligaments connected with it.
3. Describe the right subclavian artery.
4. The temporal fascia, muscle, and vessels.
5. Describe the course, and state the branches of the internal maxillary artery.
6. The connexions of the pubic and iliac portions of the fascia lata.
7. The crural ring and the internal epigastric artery.
8. The external and internal abdominal rings, and the inguinal channel.
9. The course and branches of the brachial artery.
10. The connexions of the triangular ligament of the urethra.
11. The origin and course of the internal pudic artery.
12. The internal and external pterygoid muscles.

J. H. CORBETT, *Professor.*

SURGERY.

1. Describe the alterations which are observed in the corpuscles of blood circulating through an inflamed organ.
2. What effects are produced by direct intermixture of pus with the blood ?

Appendix C.
Examina-
tion Papers
used at Ses-
sional Exa-
minations.

3. State the symptoms of purulent absorption, and how you would distinguish between Pyæmia and Phlebitis.

4. Mention the several modes of operation suggested for the cure of Femoral Hernia.

5. Which operation would you adopt? and give your reasons for the preference.

6. In compound fracture of the foot, where the tarsal and metatarsal bones are crushed, the integuments of the instep lacerated, but the soft parts covering the Os calcis uninjured, what operation would you perform?

7. Describe Chopart's operation and Pirigoff's operation, and state your reasons for preferring theirs to Syme's.

8. What are the structural changes which take place in chronic periostitis?

9. Mention the various forms of cataract.

10. Describe the operation of extracting cataract.

DENIS B. BULLEN, M.D., *Professor of Surgery.*

MATERIA MEDICA.

1. Henbane: Latin name and natural family of plant furnishing it; physical properties; chemical characteristics; time of gathering and mode of preserving; physiological action; therapeutical applications; preparations, with their doses and mode of administration.

2. Castor oil: similar particulars respecting it.

3. Meadow saffron: do. do.

4. Gentian: do. do.

5. Acetate of lead: chemical characters; physiological action; therapeutical applications; dose and administration.

6. Doses of: laudanum; tincture of aconite; calomel; strychnia; corrosive sublimate; iodine.

Prize Questions.

7. Preparation of iron: relative value and characteristic differences.

8. Tonics: division of; general therapeutical uses, with examples.

9. Quinine: tests of; adulterations and mode of detecting; comparison with arsenic.

10. Tannic acid: trace its changes in the economy, from first entrance to final exit.

N.B.—Questions to be answered in order set down.

PURCELL O'LEARY, *Professor.*

MIDWIFERY.

1. Describe the ovary and its contained structures in the adult female. How is its condition affected by age?

2. Give the relations of the female urethra to the neighbouring parts within the vulva; and describe the method of introducing the catheter.

3. Define oviparous, viviparous, ovo-viviparous, and marsupial generation respectively. How is the oviduct of an oviparous, to be distinguished from that of a viviparous animal?

4. What is the membrana decidua: how is it formed; and what purposes does it serve?

5. At what period of gestation does abortion most frequently take place? Enumerate the principal causes likely to produce the occurrence?
6. Describe the principal changes which occur in the breasts, as a result of pregnancy. How soon do they begin to show themselves?
7. Explain the nature of the relation between the maternal and foetal portions of the human placenta.
8. What is understood by "Arrest" of the child's head during labour, and what by "Impaction"? How are they distinguished from each other?
9. What is the presenting part of the child's head in the fourth position, and how are the fontanelles placed?
10. A woman has been in labour for sixteen hours: the head has been immovably fixed for the last four hours, notwithstanding strong labour pains: it is elongated, and has an œdematous tumour on the presenting part; an ear cannot be felt; and the vagina is becoming hot and dry: what would be your course in this case?
11. Give the management of a case of twins.
12. What are after-pains? Give an outline of their pathology and treatment.

Appendix C.
Examination Papers
used at Ses-
sional Exa-
minations.

J. R. HARVEY, A.B., M.D., *Professor.*

PHYSIC.

1. Given a case of coma: what might be its cause, and what inquiries do you make to ascertain it?
2. In what periods of life do neuralgia and neuroses of motility most prevail? Explain the cause of this predominance.
3. What attitude would the body assume after the rigor mortis, if its influence were not interfered with? Can any explanation of the position of the limbs in spasmodic and paralytic affections be derived from an observation of this position?
4. Why is there less danger of injury to the brain in hysterical than in epileptic convulsions?
5. Judging from the countenance alone, could you distinguish a case of typhoid from one of typhus fever?
6. Compare scarlatina, rubeola, and variola, in their premonitory fever and sequela.
7. What are the several morbid changes found in the bronchi and air cells, and how may they be produced?
8. What are the usual situations of pneumonia, bronchitis, and pleuritis? If these diseases occur in any other situation, could any inference be drawn from the fact as to cause of the disease?
9. If called suddenly to a case of croup, how would you proceed to treat it? How a case of apoplexy,—keeping in view the age and previous habits of the patient?
10. What is the relation, as to cause and effect, between diseases of the heart and lungs?
11. Relate the symptoms of pericarditis, and the prognosis, both immediate and remote.
12. How does pneumothorax arise?
13. Give the various causes of hæmatemesis, with the treatment of each form.
14. Distinguish between delirium arising from irritation, inflammation, and congestion of the brain.

D. C. O'CONNOR, M.D., *Professor.*

Appendix D.

APPENDIX D.

List of
Students
who ob-
tained
Honors and
Prizes at
the Ses-
sional Exa-
minations.

LIST of the STUDENTS who obtained HONORS and PRIZES at the
SESSIONAL EXAMINATIONS held in the College in June, 1862.
for the Academic Year 1861-62.

At the Sessional Examinations, the following were awarded Prizes for
1861-62 :—

GREEK (Senior Class).		CELTIC (Junior Class).	
Ryan, Thomas, . . .	1st prize.	Walshe, Patrick, . . .	1st prize.
O'Brien, Michael, . . .	2nd prize.	Ryan, Thomas, . . .	2nd prize.
Beamish, James, . . .	3rd prize.	NATURAL PHILOSOPHY (Medicine).	
Connor, John, . . .	} 4th prize.	Heas, Patrick, . . .	1st prize.
Evans, Richardson, . . .		Long, Mark, . . .	2nd prize.
GREEK (Junior Class).		NATURAL PHILOSOPHY (Engineering).	
Burke, Michael, . . .	1st prize.	Bourke, George, . . .	1st prize.
Barry, Michael, . . .	3rd prize.	LOGIC.	
LATIN (Senior Class).		Michael O'Brien, . . .	1st prize.
O'Brien, Michael, . . .	1st prize.	Thomas Kelly, . . .	2nd prize.
Beamish, James, . . .	2nd prize.	GEOLOGY and MINERALOGY.	
Ryan, Thomas, . . .	} 3rd prize.	Quarry, William, . . .	1st prize.
Connor, John, . . .		Moore, G. H. . . .	2nd prize.
LATIN (Junior Class).		ENGINEERING (Senior Class).	
Burke, Michael, . . .	1st prize.	Bourke, George, . . .	1st prize.
Hannafin, James, . . .	2nd prize.	(First Year).	
FRENCH (Senior Arts and Engineering Class).		O'Neill, Henry, . . .	1st prize.
Buckley, Daniel, . . .	1st prize.	M'Loughlin, Joseph, . . .	2nd prize.
O'Donnell, Thomas F., . . .	2nd prize.	(Second Year).	
O'Callaghan, Gilbert, . . .	3rd prize.	Fogarty, Robert, . . .	1st prize.
FRENCH (Junior Arts Class).		LAW (First Year).	
Connor, John, . . .		Killen, James B., . . .	} 1st prize.
Evans, Richardson, . . .		O'Donnell, Thomas F., . . .	
O'Neill, Henry, . . .		(Second Year).	
FRENCH (Medical Class).		Kelly, Thomas, . . .	1st prize.
Horgan, John, . . .	1st prize.	ANATOMY and PHYSIOLOGY.	
Collins, William, . . .	} 2nd prize.	(First Year).	
Long, Mark, . . .		Heas, Patrick, . . .	1st prize.
HISTORY.		(Second Year).	
Gardiner, Edward B., . . .	1st prize.	Corban, Laurence, . . .	1st prize.
ENGLISH LITERATURE.		Cooke, Henry, . . .	2nd prize.
Babington, William, . . .		Foley, James, . . .	3rd prize.
ENGLISH LANGUAGE.		Kelly, James, . . .	4th prize.
Buckley, Daniel, . . .	1st prize.	Newman, John H., . . .	
Connor, John, . . .	} 2nd prize.	Gillespie, Henry, . . .	} 5th prize.
O'Donnell, Thomas F., . . .		Williams, Richard G., . . .	
O'Callaghan, Gilbert, . . .	3rd prize.	PRACTICAL ANATOMY (Senior).	
Evans, Richardson, . . .	4th prize.	Barry, James, . . .	1st prize.
CHEMISTRY.		Purcell, Ferdinand A., . . .	2nd prize.
Heas, Patrick, . . .	1st prize.	PRACTICAL ANATOMY (Junior).	
Unkles, Richard, . . .	2nd prize.	Corban, Laurence, . . .	1st prize.
Hartland, John F., . . .	3rd prize.	Cooke, Henry, . . .	2nd prize.
Shaw, William T., . . .	4th prize.	Foley, James, . . .	3rd prize.
O'Neill, Henry, . . .	5th prize.	SURGERY.	
Malone, John, . . .	6th prize.	Grattan, Nicholas, . . .	1st prize.
MATHEMATICS (Senior Class).		Barry, James, . . .	2nd prize.
Quarry, William, . . .	1st prize.	Purcell, Ferdinand A., . . .	3rd prize.
M'Sweeny, John, . . .	2nd prize.	PRACTICE OF MEDICINE.	
Richardson, Henry, . . .	3rd prize.	Dunbar, Frederick H., . . .	1st prize.
MATHEMATICS (Junior Class).		Haynes, William, . . .	2nd prize.
Buckley, Daniel, . . .	1st prize.	O'Sullivan, Stephen, . . .	3rd prize.
O'Neill, Henry, . . .	2nd prize.	MATERIA MEDICA.	
Connor, John, . . .	3rd prize.	Cooke, Henry, . . .	1st prize.
CELTIC (Senior Class).		Williams Richard G., . . .	2nd prize.
Walshe, David, . . .	1st prize.	Foley, James, . . .	3rd prize.

Orr, Adam, . . .	3rd prize.

Appendix D.

List of Students who obtained Honors and Prizes at the Sessional Examinations.

ROBERT J. KENNY, *Registrar.*

December 9, 1862.

APPENDIX E.

FORM of CIRCULAR from PRESIDENT and SPECIAL REPORTS of the PROFESSORS.

Appendix E.

Reports from Professors.

RETURN to be filled up by the Professor of——, and to be returned to the Registrar, so filled up, for the official information of the President, on or before the 8th instant, being for the Collegiate Session 1861–62.

A.—As to the course or courses of lectures given by the Professor. 1st. Duration and extent of the course; number of terms. 2nd. Number of weeks of lectures in each term. 3rd. Number of lectures weekly, and days and hours of lectures.

B.—The description or title of the course or courses of lectures delivered, and a general abstract of the subjects of instruction contained in the course, and the title of the text-books recommended.

C.—Whether the lectures are illustrated by reference to maps, diagrams, specimens, or experiments; and a general notice of the kind of illustrations used.

D.—Whether any method of tutorial, or other special instruction, is employed, as by setting out portions of text-books for lessons, by themes, or exercises in composition, or problems; and whether special class examinations are held, and at what time; or whether herborization excursions, or field exercises, are given.

E.—What faculties or division of students are those attending courses of lectures of the Professors making the return.

F.—The number of students attending each course, distinguishing matriculated and non-matriculated students; and the general regularity of attendance.

G.—The general conduct of students at the Professor's lectures, and the general state of discipline as regards the Professor's classes.

H.—The general condition of the department of which the Professor has charge, as to supplies, fitments, cleanliness, and accommodation, for the purposes of instruction.

The Professor, in making the above returns, is requested to mark the answers with the letter designating the portion of the form of return, as above, to which each answer refers.

Signed by order of the President,

ROBERT J. KENNY, *Registrar.*

REPORT of the PROFESSOR of GREEK.

A.—1. The course extended over three terms. 2. There were seven weeks of lectures in the first term, fourteen weeks in the second term, and two weeks and two days in the third term, the course having been interrupted by the fire at the College. 3. Ten lectures weekly, viz., two on each day, except Saturday.

Appendix E.

Reports
from
Professors.

B.—The Greek language and literature, the authors read being portions of Xenophon, Homer, Æschylus, Sophocles, Thucydides, Plato, Aristophanes.

C.—There were maps of reference on the walls of the lecture-room.

D.—Portions of the authors read were prepared by the student for each lecture, accompanied by exercises and composition in prose and verse.

E.—The Faculty of Arts exclusively.

F.—Fifty-four students attended the course, all belonging to the class of matriculated students.

G.—The general conduct of the students, and the general state of discipline were good.

H.—The general condition of the department, as to supplies, fitments, &c., was satisfactory.

JOHN RYALL.

REPORT of the PROFESSOR of LATIN.

A.—1. The course extended through three terms. 2. Junior class, four lectures weekly; Senior class, three lectures weekly; extra and third year's class, two lectures weekly.

B.—The Latin language. Text-books of lectures:—Junior class, Third Book of the Æneid, and part of the Fourth Book of Livy; Senior class, 12th and 13th Satires of Juvenal, and part of the Fourth Book of Cicero's Verrine Orations; extra and third year's class, the Phormio of Terence.

C.—Maps hung on the walls of the lecture-room were used for illustration of the lectures. Frequent reference was also made to electrotype copies of ancient coins and gems, and to other objects of art.

D.—The students prepared a portion of the text-book for each lecture; they also wrote Latin exercises in prose and verse.

E.—Students in Arts.

F.—Sixty; all matriculated.

G.—Satisfactory.

H.—Satisfactory.

P.S.—I am unable to make a complete return, because the class-roll was destroyed in the fire at the College last May.

December 5, 1862.

B. LEWIS.

REPORT of the PROFESSOR of ENGLISH LITERATURE and HISTORY.

A.—On History, English Literature, and the English Language. 1. Two terms. 2. Eight in first term; thirteen in second term. 3. Six in first term:—History, three—Monday, Wednesday, Friday, 1–2: English Literature, three—Tuesday, Thursday, Saturday, 12–1. Nine in second term, History, three—Monday, Wednesday, Friday, 1–2: English Literature, three—Tuesday, Thursday, Saturday, 12–1: English Language, three—Tuesday, Thursday, Saturday, 11–12.

B.—History, Modern Europe; English Literature; Craik's Literature; English Constitutional History; English Language; Craik's Outlines.

C.—Illustrated by Major Bell's Historical Tables and Von Spruner's Hand Atlas.

D. Written exercises, (1) on the subjects discussed in lecture; (2) original composition.

E.—Arts.

F.—History, three. English Literature, six. English Language, forty.—Attendance, good.

G.—Good.

H.—Burnt.

WILLIAM RUSHTON.

RETURN of the PROFESSOR of MODERN LANGUAGES.

A.—1. Three courses of lectures on the French Language and Literature. The duration of each course was of nearly three terms. 2, 3. Lectures delivered three days in the week, from 12 to 3; and daily to the Junior class during February and March.

B.—The subjects of instruction consist of translations, exercises, reading, and lectures on literature and comparative grammar. *Appendix E.*

C.—Lectures not illustrated by anything.

D.—Lectures combine the tutorial with the professorial method.

E.—Students attending the department of Modern Languages, belong to the Faculties of Medicine, of Arts, and to the Engineering School.

F.—The number of students attending the class of *Medical French*, was thirty-six; the number of lectures given, seventy-two. *Senior French* of Arts and Engineering students: number of students, thirty-seven; number of lectures, seventy-two. *Junior French* of Arts and Engineering students: number of students, twenty-eight; number of lectures, eighty-six.

G.—The conduct of the students was excellent.

Reports
from
Professors.

R. DE VERICOUR.

December 5, 1862.

REPORT of the PROFESSOR of CELTIC.

A.—I lectured the second term from about the 6th of January to the 10th of April, during which time I lectured almost every day of the week, and on some days twice. The hours were changeable, to suit the convenience of the students,

B.—The lectures comprised Irish history and topography; the grammatical construction of the Irish language, exercises, and conversation. The text-books were Keating's History of Ireland, by Haliday; the volume on the Bards of Ireland, and portions of the Annals of the Four Masters.

E.—The students were of the Faculties of Arts and Medicine.

F.—Three students, one of the Faculty of Arts, and two of the Faculty of Medicine; their attendance at my lectures was regular.

G.—The conduct of the students at my lectures was exceedingly good.

H.—The attention paid to the lecture-room was very commendable.

OWEN CONNELLIAN.

December 6, 1862.

REPORT of the PROFESSOR of LOGIC and METAPHYSICS.

A.—On Logic and Metaphysics. 1. Logic, one term; Metaphysics, two terms. 2. Two terms, nineteen weeks; one term, thirteen weeks. 3. Logic Tuesdays and Thursdays, at two o'clock; Saturdays, at nine. Metaphysics, Tuesdays and Thursdays, at one o'clock; Saturdays, at ten o'clock.

B.—Logic, Deductive and Inductive—Aldrich, parts of Mill, Baynes, &c. Metaphysics, History of Philosophy and Psychology; History of Philosophy of the University of France.

C.—No illustrations are used, except such as are drawn or written on the board during the course of the lectures.

D.—Both the tutorial and professorial systems are used.

E.—Logic, second year's students in Arts; Metaphysics, third year's students in Arts.

F.—Logic, sixteen; Metaphysics, one—all matriculated. Attendance very satisfactory.

G.—Conduct of students in the class-rooms unexceptionable.

H.—The lecture-room assigned to the Mental Sciences was consumed by the fire which destroyed the left wing of the College. The working of the classes has not, however, been any way impeded thereby.

G. S. READ.

REPORT of the PROFESSOR of MATHEMATICS.

A.—Each course of lectures extends over three terms. The number of weekly lectures is nine. The lectures are delivered on Monday, Wednesday, and Friday, at 12, 2, and 3 o'clock.

B.—Pure Mathematics: the text-books recommended are Potts' School Euclid; Hinds' Arithmetic; Todhunter's Algebra, Conic Sections, Differential and Integral Calculus; Thomson's Trigonometry; Boole's Differential Equations, &c.

Appendix E.

Reports
from
Professors.

- C.—Lectures are illustrated by diagrams and apparatus.
 D.—Portions of text-books are pointed out and recommended.
 E.—Arts and Engineering.
 F.—In the junior class about fifty-five; in the second year's class about sixteen; in the extra class one.
 G.—Good.
 H.—Satisfactory.

GEORGE BOOLE.

REPORT of the PROFESSOR of NATURAL PHILOSOPHY.

A.—Five courses. 1. Each course continued three terms. 2. In the first term, lectures were delivered during seven weeks; in the second, during fourteen weeks; and in the third, during four weeks. 3. In the senior class of Experimental Physics, three lectures were given in each week—viz., on Mondays, Wednesdays, and Fridays, from 11 to 12 o'clock. In the junior class of Experimental Physics, two lectures in each week—viz., on Tuesdays and Thursdays, from 11 to 12 o'clock. In the class of Engineering Physics, three lectures in each week—viz., Tuesdays, Thursdays, and Saturdays, from 1 to 2 o'clock; in the class of Mathematical Physics, two lectures in each week—viz., Wednesday and Friday, from 12 to 1 o'clock; in the class of Physics (honor course), two lectures each week—viz., on Mondays and Fridays, from 12 to 1 o'clock.

B.—In the classes of Physics, the subjects were Mechanics, Hydrostatics, Optics, Astronomy, Heat, Magnetism, and Electricity. Text-books, Galbraith and Haughton's Manuals; Newth's Mechanics; Ganot's *Traite de Physique*. In Mathematical Physics, Duhamel's *Cours de Mecanique*; Walton's *Mechanical Examples*; Lloyd's *Optics*; Brinkley's *Astronomy*. In Engineering Physics, Tate's *Exercises in Mechanics*; Selections from Moseley's *Mechanics*; De Pambour's *Theory of the Steam Engine*. Physics (honor course), Pouillet's *Traite de Physique*.

C.—The lectures on Physics were illustrated by experiments and diagrams.

D.—In Mathematical and Engineering Physics, the tutorial method of instruction was used, and problems proposed as exercises.

E.—The senior class of Experimental Physics was attended by students of the second year in Arts, and the second year in Engineering. The class of Mathematical Physics, by students of the third year in Arts, and third year in Engineering. The class of Engineering Physics by students of the second and third year in Engineering. The class of Physics (honor) by students of the third year in Arts. The junior class of Experimental Physics by students of the first year in Medicine.

F.—Senior class of Experimental Physics, thirty students; junior class of Experimental Physics, thirty-eight; Mathematical Physics, three; Engineering Physics, seven; Physics (honor course), one. The attendance was regular in all the classes.

G.—The conduct of the students was very satisfactory.

H.—The lecture-room and physical cabinet totally destroyed by fire, but the apparatus, diagrams, &c., preserved, having sustained but little damage.

JOHN ENGLAND.

REPORT of the PROFESSOR of CHEMISTRY.

A.—Chemistry and Practical Chemistry. 1. Theoretical course of three terms. 2. Seven weeks in first term, fourteen weeks in second term, and three weeks in third term. 3. Three lectures a week, on Monday, Wednesday, and Friday, at 11, A.M. The practical course extended through three months, the instructions being given on Monday and Wednesday at 2, and on Tuesday and Thursday at 3.

B.—The theoretical course embraced the laws of combination; the history and properties of the metallic and non-metallic substances; the theories of organic chemistry; and the description of organic compounds. The practical course was devoted to instructions in the laboratory, in chemical manipulation, analysis, and testing for poisons. In addition to this, the laboratory was open,

under certain regulations, to other students desirous of pursuing a more extended course of analysis. *Appendix E.*

C.—The theoretical course was abundantly illustrated by diagrams, specimens, and experiments. *Reports from Professors.*

D.—The professorial system was followed, but questions were from time to time put to the students, and ample opportunity was afforded after each lecture for the discussion of difficulties and for explanations.

E.—Chiefly Medical and Engineering students; students in Arts having now the liberty of choosing old subjects, attend chemistry in small numbers only. Three Arts students selected chemistry.

F.—Sixty-one matriculated and eleven non-matriculated in the theoretical course. Twenty-five matriculated and three non-matriculated in the practical class.

G.—The general conduct of the students was good, and the state of discipline excellent.

H.—The lecture-room, laboratories, public and private, and balance-room, have been burnt to the ground, with a considerable part of their contents.

J. BLYTH, M.D.

REPORT of the PROFESSOR of NATURAL HISTORY.

A.—One course on Zoology and Botany. 1. The course consisted of sixty-three lectures, and extended over three terms. 2. The first term included seven; the second, eleven; and the third, three weeks of lectures. 3. Three lectures weekly, at 3, P.M., on Mondays, Wednesdays, and Fridays.

B.—The course embraced lectures on the Principles of Zoology and Botany, and on the Structure and Classification of Plants and Animals. The text-books used were Dallas's Natural History of the Animal Kingdom, or Knox's translation of Milne Edwards' Zoology; together with Hefrey's Elementary Course of Botany. Bentham's Handbook of the British Flora; Lindley's Descriptive Botany; and Carpenter's Principles of Comparative Physiology, were also recommended.

C.—The lectures were illustrated by reference to specimens and diagrams.

D.—The professorial method of instruction was chiefly employed.

E.—The lectures were attended by students of the third year in the Faculty of Arts, of the first year in the Department of Agriculture, and of the first year in the Faculty of Medicine.

F.—Two students in the Faculty of Arts, one in the Department of Agriculture, thirty-three in the Faculty of Medicine, and six non-matriculated students were present during the course. Two of these were disqualified for insufficient attendance.

G.—The conduct of most of the students was satisfactory.

H.—The general condition of the department of which the Professor has charge is efficient. The Professor is still much in want of a private room, wherein to prepare himself to meet his class. The present Natural History lecture-room is too small, but it is proposed to build a larger one opening into the museum, so that transference of such specimens as are required for illustration of the course may be freely effected, without any risk of injury.

J. REAY GREENE.

REPORT of the PROFESSOR of GEOLOGY and MINERALOGY.

A.—The course of lectures on Geology and Mineralogy, including Physical Geography, extended over the three terms of the session, and commenced on the 28th of October, 1861, and ended on the 21st of May, 1862. The number of weeks in the first term amounted to *eight*, in the second term to *thirteen*, and in the third term to *four*.

The weekly number of lectures was three; the days being Mondays, Wednesdays, and Fridays, and the hours from one to two, p.m. The total number of lectures given in the course was seventy-three.

B.—The title of the course was Geology and Mineralogy, and the subjects embraced therein were, Physical Geography, so far as this had reference to

Appendix E. Geology, Physical Geology and Palæontology; and also a description of the properties and characters of the most important and most common minerals.

Reports
from
Professors.

The text-books referred to were Somerville's Physical Geography; Hughes's Outlines of Physical Geography; Page's Introductory Text-book of Geology; Lyell's Manual; Lyell's Principles of Geology; and Nicol's Manual of Mineralogy.

C.—The lectures were illustrated by maps, diagrams, sections and specimens.

D.—The lectures were of a professorial character, and practical illustrations in the field were given during the latter part of the course.

E.—The students attending the course, with the exception of one, an Arts student, belonged to the Department of Engineering.

F.—The number of students attending the lectures amounted to *nine*, and the character of their attendance was very satisfactory.

G.—The conduct of the students during lecture was such as to meet with the entire approval of the Professor.

H.—As concerning fitments, cleanliness, and accommodation, these were in every respect what the Professor could desire. The dampness already alluded to in previous reports still exists in the lecture-room, and has of late much increased, in consequence of the whole of the west side of the tower wall being exposed, from the result of the late fire.

December 6, 1862.

ROBERT HARKNESS.

REPORT of the PROFESSOR of CIVIL ENGINEERING.

A.—There were three courses of lectures given, and one course of office work during the session of 1861-62, each lasting during the three terms, and being given on three days in the week.

B.—First year.—Monday, Wednesday, and Friday: subject of lectures—Orthographic Projection; Descriptive Geometry; Shadows; Isometric Projection; Perspective. Second year.—Tuesday, Thursday, and Saturday: subject of lectures—first term, Instruments used by the Engineer in Surveying; second term, Surveying and Levelling; third term, Principles of Architecture—Materials used in construction. Third year.—Tuesday, Thursday, and Saturday: Construction of Bridges, Roads, Railways, Canals, &c., &c.; Strength of Materials; Hydraulic Engineering: principles of the Construction of the different Machines employed by the Engineer. Drawing Office, attended by all the classes, Tuesday, Thursday, and Saturday. The first year's class are chiefly employed in drawing the problems given at lectures, and a few easy examples for their application. The second and third year's classes, in making working drawings of examples of the subjects of lectures, and in mapping.

C.—The lectures were illustrated by reference to drawings and instruments.

D.—Both the professorial and tutorial methods were adopted, as the subject of lecture required, and instruction in the field was given.

E.—Students in Civil Engineering.

F.—Thirty-five altogether.

G.—Good.

H.—This department was, during the session, well supplied with the requisite fitments.

December 5, 1862.

ALEXANDER JACK.

REPORT of the PROFESSOR of AGRICULTURE.

I beg to report that only one student, Mr. James O'Brien, entered my department in the Session 1861-2; that he attended, very irregularly, the first and a portion of the second term only.

December 8, 1862.

EDMUND MURPHY.

REPORT of the PROFESSOR of JURISPRUDENCE and POLITICAL ECONOMY.

A.—Four courses of lectures:—Political Economy for Arts students of the third year; Jurisprudence for Law students of the first year; Civil Law for Law students of the second year; Constitutional and International Law for Law

students of fourth year. 1. Arts students, two terms. Two first-mentioned classes of Law students, two terms. Constitutional Law, one term. 2. Three. 3. Four. The number of lectures delivered on Political Economy, Jurisprudence, and Civil Law, respectively, were twenty-four lectures in each course. The number of lectures delivered on Constitutional and International Law were eleven.

Appendix E.
—
Reports
from
Professors.

B.—Jurisprudence.—Elements of the subject; Principles of Criminal Law. Requisites for fair penal trial; Trial by Jury; Direct and Circumstantial Evidence; History of rights of Testamentary Bequest; proper functions of Government and Centralization; Representative Government, &c. Political Economy.—Nature and distribution of wealth; Principles which regulate rent, wages, and profits. Principles of Commerce, of Taxation, of the Funding System, and of Currency and Banking. Adam Smith's Wealth of Nations; Senior's Political Economy; Longfield's ditto; Longfield's Lectures on Commerce; Huskisson—The Question Stated; Reddie—Inquiries in the Science of Law; John Stuart Mill's Political Economy; Lord Bacon's Tract on Universal Justice, by D. C. Heron; Institutes of Justinian; Grapnel on the Roman Law; Hallam's Constitutional History.

C.—None.

D.—In Jurisprudence, from the scarcity of text-books, there is very little tutorial instruction, except by examination, from time to time, in the lectures delivered by the Professor. In Political Economy, the course is commenced with examinations in prescribed portions of the text-books; the continuance of this mode of instruction depends on the attainments and capabilities of the class. The lectures delivered by the Professor are then proceeded with, and there is daily a considerable amount of tutorial instruction by examination and discussion of the various topics connected with the subject. In Civil Law, the lectures consist almost wholly in examination in prescribed text-books. In Constitutional and International Law, the course consisted of lectures delivered by the Professor.

E.—Political Economy, third year's Arts; Jurisprudence, first year's Law; Civil Law, second year's Law; Constitutional and International Law, fourth year's Law.

F.—Political Economy, four, matriculated; Jurisprudence, six, matriculated; Civil Law, two, matriculated; Constitutional and International Law, one, matriculated.

G.—Very good.

H.—Sufficient.

December 9, 1862.

R. H. MILLS.

REPORT of the PROFESSOR of ENGLISH LAW.

A.—There were four classes. The course prescribed for the first, second, and third classes comprised twenty-four lectures, which were given in the months of October and December, 1861, and in the months of February, March, and April, 1862. They occupied two weeks in the first, and four in the second and third College terms. Four lectures were delivered to each class weekly, on Tuesday, Wednesday, Thursday, and Friday, at the hours of eleven, twelve, and three, respectively.

B.—In the class of the first year, the course comprised instruction in the elementary law of Real Property and Principles of Conveyancing; the text-book used was Williams on Real Property. The first volume of Blackstone's Commentaries (Stephen's edition), and the second volume (Kerr's edition), were recommended for perusal.

The course prescribed for the class of the second year comprised instruction in the law of Personal Property, Equity, and Bankruptcy, and in the application of precedents. The text-books used were Williams on Personal Property; Smith's Manual of Equity; Adams on Bankruptcy and Insolvency, Blackstone, Smith on Contracts, Smith on Mercantile Law, were recommended for perusal. The course for the class of the third year comprised Common and Criminal Law. The text-books used were Broom's Common Law; Smith's Leading Cases; Broom's Maxims. Roscoe on Evidence, Civil and Criminal; Taylor on Evidence, &c., were recommended for perusal.

Appendix E. C and D.—The several subjects were explained by the perusal in class of abstracts of title, mootings, and by requiring the students to draft from precedents, &c., and to write on assumed cases.

Reports
from
Professors.

E.—Students in Arts and Law, and one non-matriculated student.

F.—Ten : six in the class of the first year, two in the class of the second, one in the class of the third, and one in the class of the fourth year.

G.—The conduct and discipline of the students were unexceptionable.

H.—I have to report to the President the benefit arising to the classes from a better supply of books in this department, and I have the satisfaction of stating that the students availed themselves of the facilities afforded to them.

December, 1862.

MICHAEL BARRY.

REPORT of the PROFESSORS in charge of the COURSE of LECTURES on MEDICAL JURISPRUDENCE.

A.—Three months' course. Three lectures weekly, on Tuesday, Thursday, and Friday, at two o'clock.

B.—Subjects of course were, toxicology, infanticide, injuries, wounds, the rules regulating the admission of evidence in legal procedure. The text-books recommended—Taylor's Medical Jurisprudence, and Taylor on Poisons, Beck's Medical Jurisprudence; with the perusal of leading cases reported—for example, Lord Ferrer's case, Hadfield's case, the Gardner and Douglas Peerage cases, Palmer's case, &c.

C.—The course was illustrated by experiments when necessary.

D.—By lectures alone.

E.—Students of the Faculty of Medicine attended.

F.—Fourteen matriculated students.

G.—Conduct and discipline excellent.

H.—The department of Medical Jurisprudence continues to be dependent on that of Chemistry for the apparatus and materials necessary for illustrating the toxicological portion of the course.

J. BLYTH, M.D.

MICHAEL BARRY, B.L.

REPORT of the PROFESSOR of ANATOMY and PHYSIOLOGY.

A.—Two courses delivered daily during the Medical Session; Anatomy and Physiology at one o'clock; Anatomical Demonstrations at twelve o'clock, examinations being held on Saturdays at same hours. In addition to the lectures and demonstrations at the above-mentioned hours, a special course was delivered on the Anatomy and Physiology of the Eye, Ear, &c., at four o'clock, P.M.

B.—One course is entitled Anatomy and Physiology; the other course, Anatomical Demonstrations and Dissections or Practical Anatomy. The dissections performed by the students are constantly superintended during many hours daily throughout the session by the Professor of Anatomy and Physiology, and by his assistant, Dr. Shinkwin, Demonstrator of Anatomy.

The course of Anatomy and Physiology comprehends the following subjects:—

1. Nature of life and organization; general description of the vital functions; general and special description of the textures of the human frame; development of tissues, and all other branches of Histology; structure and composition of the fluids, viz., the blood, lymph, chyle, saliva, gastric juice, bile, &c.

2. Physiological Anatomy of the organs of support and locomotion, circulation, respiration, digestion, chyfication, absorption, secretion, excretion, reproduction; the spinal cord and its membranes; the brain and its membranes; the ganglia and nerves; the organs of touch, smell, vision, hearing, taste; organ of voice, &c.

3. The course comprehends all branches of Human Physiology; various subjects comprised in it are elucidated by reference to Comparative Anatomy and Physiology.

The course of Anatomy, Histology, and Physiology is illustrated by the constant use of the microscope.

The course of Anatomical Demonstrations includes the special description of

the bones, joints, ligaments, arteries, veins, nerves, relative anatomy of viscera, membranes and fasciæ; it also embraces Regional and Surgical Anatomy. *Appendix E.*

The text-books are the following, viz.:—Todd and Bowman on Physiological Anatomy; Carpenter's Physiology; Valentin's Physiology; Kirke's Handbook of Physiology; Quain's Anatomy, by Drs. Sharpey and Ellis; Harrison's Anatomy; Wilson's Vade Mecum; Gray's Anatomy; Ellis's Demonstrations; Corbett on the Arteries; Köllicker, Gerber, Quickett, and Hassal on Microscopic Anatomy.

Reports
from
Professors.

C.—The lectures are illustrated by recent and prepared dissections, by charts, plates, diagrams, and anatomical preparations. Minute Anatomy of the tissues is illustrated by microscopical preparations.

The principles of Physiology are elucidated by experiments instituted upon animals when deemed necessary.

D.—The students are examined, *vivâ voce*, upon the subjects treated of in the course; examinations are held on Saturday, in order that there should be no loss of lectures on other days of the week. Written replies to questions proposed in those classes have been resorted to only at the Examinations held in October for Medical Scholarships, and at the Sessional Examinations, which take place in May.

E.—Attended by students of Medicine and Surgery.

F.—Total number of Anatomical Students, one hundred and three, viz.:—Matriculated, eighty-nine; non-matriculated, fourteen. The course of Anatomy and Physiology was attended by eighty students; matriculated, seventy-two; non-matriculated, eight. The course of Practical Anatomy by sixty-three students; matriculated, fifty-two; non-matriculated, eleven.

G.—The students have attended the Professor's lectures with great regularity.

H.—The anatomical preparations lodged in the Clarendon building are valuable, but not sufficient in number for all the purposes of instruction. It would be most desirable that additions should be made as soon as possible, so as to increase the means of illustrating various branches of Human and Comparative Anatomy. Unfortunately that portion of the collection deposited in the Pathological Museum has been destroyed by the recent fire.

The supply of charts, plates, and diagrams is good. The rooms are kept in a state of cleanliness.

In reference to the President's question, as to the accommodation of the department, it becomes necessary to state that the Professor is compelled, under existing circumstances, to use the Anatomical Theatre for all the purposes of a laboratory, Microscopical Demonstrations, private dissecting room, &c., in consequence of the want of suitable apartments. Former reports contain explanations with respect to the state of the dissecting room; that apartment could not properly accommodate more than twenty-five students. A large class, and a considerable number of dead bodies are compressed into a limited space; and it is deplorable that no relief has been afforded in order to improve the condition of this important and practical department.

December 8, 1862.

J. H. CORBETT.

REPORT of the PROFESSOR of SURGERY.

A.—1, 2. The Medical Session. 3. Mondays, Wednesdays, Fridays, at three o'clock.

B.—The Principles and Practice of Surgery. The text-books are the various works upon the special branches of Surgical Science.

C.—The lectures were illustrated by diagrams, plates, models, casts, specimens, and on the recent subject.

D.—The instruction was not tutorial.

E.—The students of the Faculty of Medicine.

F.—Thirty-one students. The attendance was regular.

G.—The general conduct of the students was good, and the discipline satisfactory.

Appendix E. H.—The burning of the College on the 15th of May destroyed the supplies and fittings of the Department of Surgery.

Reports
from
Professors.

DENIS BRENNAN BULLEN, M.D.

December 5, 1862.

REPORT of the PROFESSOR of PRACTICE of MEDICINE.

A.—From the first week in November to the last week in April, consisting of two terms; seven weeks in the first term; second term is variable. Three lectures weekly, delivered from three to four o'clock on Tuesday, Thursday, and Saturday.

B.—Lectures on the Theory and Practice of Physic. Text-books—Watson's Practice of Physic; Aitken's Science and Practice of Medicine; Simon's Pathology.

C.—Illustrated by reference to plates and morbid specimens.

D.—Special examinations are held once each week from a portion of one of the text-books, and also on the subject of the previous lectures.

E.—The students of the Medical Faculty solely.

F.—The students were—matriculated, twenty; non-matriculated, two. The attendance was generally very regular.

G.—The conduct and discipline of this class was most exemplary.

H.—Owing to the fire which took place in the College, the entire of the Pathological specimens and casts were destroyed. The present lecture-room is only temporary.

D. C. O'CONNOR.

REPORT of the PROFESSOR of MIDWIFERY.

A.—Midwifery. Six months' course. Over sixty. Three lectures weekly, Monday, Wednesday, Friday, four o'clock.

B.—Midwifery. Physiology of the functions of reproduction and gestation; Parturition and its various bearings, theoretical and practical. Diseases of child-bed, and of infants.

C.—Diagrams, models, casts, preparations, &c.

D.—

E.—Medical.

F.—Matriculated, 19; non-matriculated, 4=23. General attendance good.

G.—Good.

H.—Good.

J. R. HARVEY.

REPORT of the PROFESSOR of MATERIA MEDICA.

A.—Course of lectures extends over one Medical Session, consisting of twenty-six weeks. During each week three lectures are delivered on Tuesday, Thursday, and Friday, from two to three, P.M.

B.—The course consists of lectures on Materia Medica and Therapeutics, embracing Jamatolgy in general, Pharmacognosy, Pharmacology, Pharmacy, Posology, Formulation, Therapeutics and Hygiène. The text-books recommended are—Pereira's Materia Medica; Christison's Dispensatory; Forbes and Royle's Manuals; Bouchardat's Matière Médicale; Soubeiran's Pharmacie; Oesterlens' Heilmittellehre; Bucheim's Arzneimittellehre; and Schroff's Pharmacognosie.

C.—Lectures illustrated by diagrams; schematic figures on the board; specimens from the College Botanical Garden and Herbarium; chemical and microscopical demonstrations.

D.—The practical instructions consist of the above-mentioned exercises.

E.—Students of Medicine.

F.—Number of students, forty-two, two of whom are non-matriculated.

G.—The conduct of the students was very good. The attendance and attention left nothing to be desired.

H.—The Museum is at present in a merely temporary condition, but sufficient for purposes of instruction.

PURCELL O'LEARY.

APPENDIX F.

Appendix F.

LIST of UNIVERSITY DEGREES, DIPLOMAS, and HONORS obtained by CANDIDATES from QUEEN'S COLLEGE, CORK, at the COMMENCEMENT in JUNE, and in OCTOBER, 1862. List of successful Candidates.

NOMINAL RETURN of the CANDIDATES from Queen's College, Cork, on whom Degrees, Diplomas, or Certificates were conferred by the Senate of the Queen's University, after the Examinations of the year 1862.

DEGREE OF M. D.

Second Class, with Honors:
Thomas F. O'Dwyer.
Third Class, without Honors:
John D. Ambrose.
Richard Carroll.
Daniel Donovan.
Frederick Heisch Dunbar.
William Haynes, M.A.
Robert D. Joyce.
William M'Dermot, B.A.
Joseph O'Kelly.
Stephen O'Sullivan.
Adam Orr.
*Robert Potter.
Abram A. Stewart.
Robert James Swanton.

DEGREE OF M. A.

Second Class, with Honors:
Robert R. Kane.
Third Class:
Robert J. Orr.
Third Class, without Honors:
John J. Barry.
James Swanton.

DEGREE OF B. A.

William Babington.
Edward B. Gardiner.
Patrick O'Connell.
John Wall.
David Walsh.

CELTIC HONORS.

David J. Walsh, first.

DIPLOMA IN CIVIL ENGINEERING.

George Burke.	Henry J. Richards.
Matthew A. Purcell.	

FIRST UNIVERSITY EXAMINATION IN ARTS.

William Babington.	Patrick O'Connell.
Edward B. Gardiner.	David Walsh

FIRST UNIVERSITY EXAMINATION IN MEDICINE.

Pierce J. Power.	James Kelly.
Richard G. Williams.	William M'Dermot.
James Barry.	Eugene M'Sweeney.
Albert J. Clapp.	Eugene R. O'Brien.
Henry Cooke.	Thomas F. O'Dwyer.
Laurence Corban.	Joseph O'Kelly.
John T. Hartland.	Abram A. Stewart.
William Haynes, M.A.	William Starkie.
Robert D. Joyce.	

FIRST EXAMINATION IN ENGINEERING.

First Class:	Second Class—continued.
George J. Burke.	William Grant.
Henry J. Richards.	Michael J. Mullins.
Second Class:	Matthew Purcell.
William F. Madden.	Henry Shanahan.
Robert Fair.	

NOMINAL RETURN of CANDIDATES from Queen's College, Cork, on whom Honors were conferred, for distinguished answering, by the Senate of the Queen's University.

With the Degree of M.D. :—

Thomas F. O'Dwyer.

With the Degree of M.A. :—

Robert R. Kane. Second class in Logics, History, and Political Economy.

Robert J. Orr. Third class in Natural Science.

* Robert Potter, partly in Queen's College, Cork, and partly in Queen's College, Galway.

Appendix F. First University Examination in Medicine with Honors:—

Second Class:—Pierce J. Power; Richard G. Williams.

List of
successful
Candidates.

First University Examination in Engineering with Honors:—

First Class:

George J. Burke.

Henry J. Richards.

Second Class:

William F. Madden.

EXHIBITIONS FROM THE PEEL FUND, 1862.

Thomas Ryan, £60. Exhibition in Arts.

William Quarry, £30. Exhibition in Engineering.

Appendix G.

Regulations
regarding
Competition
for the
Special
Prizes.

RESOLUTION OF COUNCIL, REGULATIONS, and PAPERS of QUESTIONS for the SPECIAL PRIZE EXAMINATION.

ORDER of COUNCIL, October 29, 1861.—That £80 be appropriated for Prizes, on the same conditions as agreed to on the 24th of November, 1860, viz.:—

Three prizes of £40, £25, and £15 respectively, will be offered for competition during the Session 1860-61 to Matriculated Students of the Queen's Colleges, of not less than two and not more than five years' standing.

The examination will include all the literary and scientific subjects of the Arts undergraduate course; marks being assigned to the several subjects such that the aggregate shall not exceed 6,100, of which 3,000 will be assigned to literary and 3,100 to scientific subjects.

In order to qualify a candidate for the prize of £40, he shall have obtained an aggregate of at least 2,000 marks. The qualification for the prize of £25, will be an aggregate of at least 1,750 marks, and for the prize of £15 an aggregate of at least 1,500 marks.

Unless a candidate shall obtain at least one-sixth of the number of marks assigned to any subject, he shall not obtain any credit for that subject in the aggregate of his marks.

The examination for these prizes will take place towards the close of the second term of Session 1861-62. Every candidate for any of these prizes shall at the time of competition be a *bonâ fide* student of the Queen's College, Cork, *i.e.* shall have been in attendance during the previous part of the Session on at least *one* course of lectures.

SCALE of MARKS for SPECIAL PRIZES.

	Marks.		Marks.
Mathematics, pure and mixed,	1,000	English Literature,	300
Physics,	300	Mediæval History,	300
Chemistry,	300	English Language and Composi-	
Zoology and Botany,	300	tion,	300
Geology and Mineralogy,	300	Greek Language, Literature, and	
Logic,	300	History,	600
Metaphysics,	300	Roman Language, Literature, and	
Political Economy,	300	History,	600
		German Language,	300
Total,	3,100	Italian Language,	300
		French Language,	300
		Total,	3,000

(A). HOMER—*Iliad*, Book IX., vv. 495–523.

ἀλλ', Ἀχιλεῦ, δάμασον θυμὸν μέγαν· οὐδὲ τί σε χροὴ
νηλεὲς ἤτορ ἔχειν· στρεπτοὶ δὲ τε καὶ θεοὶ αὐτοί,
τῶν περ καὶ μείζων ἀρετὴ τιμὴ τε βίη τε,
καὶ μὲν τοὺς θνέεσσι καὶ εὐχολῶς ἀγανῆσιν
λοιβῇ τε κνίσῃ τε παρατρωπῶσ' ἄνθρωποι
λίσσόμενοι, ὅτε κέν τις ὑπερβῇ καὶ ἀμάρτυρ.
καὶ γάρ τε λυταὶ εἰσι Διὸς κοῦραι μεγάλοι,
χωλαὶ τε ῥυσαί τε παραβλώπεις τ' ὀφθαλμῶ,
αἱ ῥά τε καὶ μετόπισθ' Ἀτῆς ἀλέγουσι κιοῦσαι.
ἡ δ' Ἀτὴ σθεναρὴ τε καὶ ἀρτίπος, οὐνεκα πάσας
πολλὸν ὑπεκπροθέει, φθάνει δὲ τε πᾶσαν ἐπ' αἶαν
βλάπτουσ' ἀνθρώπους· αἱ δ' ἐξαέονται ὀπίσσω.
ὅς μὲν τ' αἰδέσεται κοῦρας Διὸς ἄσπον ἰούσας,
τὸν δὲ μέγ' ὤνησαν καὶ τ' ἐκλυον εὐχομένοιο·
ὃς δὲ κ' ἀνήνηται καὶ τε στερεῶς ἀποείπῃ,
λίσσονται δ' ἄρα ταί γε Δία Κρονίωνα κιοῦσαι
τῷ ἄτην ἅμ' ἔπεσθαι, ἵνα βλαφθεὶς ἀποτίσῃ.
ἀλλ', Ἀχιλεῦ, πόρε καὶ σὺ Διὸς κούρησιν ἔπεσθαι
τιμὴν, ἥ τ' ἄλλων περ ἐπιγνάμπτει νόον ἐσθλῶν.
εἰ μὲν γὰρ μὴ δῶρα φέροι, τὰ δ' ὀπισθ' ὀνομάζοι
Ἀτρεΐδης, ἀλλ' αἶεν ἐπιζαφελῶς χαλεπαίνουι,
οὐκ ἂν ἔγωγέ σε μῆνιν ἀπορρίψαντα κελόιμην
Ἀργείοισιν ἀμνύμεναι, χατέουσί περ ἔμπτῃς·
νῦν δ' ἅμα τ' αὐτίκα πολλὰ διδοῖ, τὰ δ' ὀπισθεν ὑπέστη,
ἄνδρας δὲ λίσσεσθαι ἐπιπροέηκεν ἀρίστους
κρινάμενος κατὰ λαὸν Ἀχαικόν, οἳ τε σοὶ αὐτῷ
φίλτατοι Ἀργείων· τῶν μὴ σὺ γε μῦθον ἐλέγξῃς
μηδὲ πόδας· πρὶν δ' οὗ τι νεμεσσητὸν κεχολώσθαι.

(B). HESIOD—*Opera et Dies*, vv. 276–292.

ᾧ Πέρση, σὺ δὲ ταῦτα μετὰ φρεσὶ βάλλεο σῆσι,
καὶ νῦ δίκης ἐπάκου, βίης δ' ἐπιλήθεο πάμπαν.
τόνδε γὰρ ἀνθρώποισι νόμον διέταξε Κρονίων,
ἰχθύσι μὲν καὶ θηρσὶ καὶ οἰωνοῖς πετεηνοῖς,
ἔσθιν ἀλλήλους, ἐπεὶ οὐ δίκη ἐστὶν ἐπ' αὐτοῖς.
ἀνθρώποισι δ' ἔδωκε δίκην, ἥ πολλὸν ἀρίστη
γίγνεται· εἰ γὰρ τίς κ' ἐθέλῃ τὰ δίκαι' ἀγορεύειν
γιγνώσκων, τῷ μὲν τ' ὄλβον διδοῖ εὐρύοπα Ζεὺς·
ὃς δὲ κε μαρτυρίῃσιν ἐκὼν ἐπίορκον ὁμόσας
ψεύσεται, ἐν δὲ δίκην βλάβας, νήκεστον ἄσθην,
τοῦδ' ἅμα αὐροτέρῃ γενεῇ μετόπισθε λείπεται·
ἄνδρὸς δ' εὐόρκου γενεῇ μετόπισθεν ἀμείνων.
σοὶ δ' ἐγὼ ἐσθλὰ νόεων ἐρέω, μέγα νήπιε Πέρση·
τὴν μὲν τοι κακότητα καὶ ἱλαδὸν ἐστὶν ἐλέσθαι
ῥηΐδιος· λείη μὲν ὁδός, μάλα δ' ἐγγύθι ναίει.
τῆς δ' ἀρετῆς ἰδρῶτα θεοὶ προπάροιθεν ἔθικαν
ἀθάνατοι· μακρὸς δὲ καὶ ὄρθιος οἶμος ἐπ' αὐτήν,
καὶ τρηχὺς τὸ πρῶτον· ἐπὶν δ' εἰς ἄκρον ἵκηαι,
ῥηΐδι' ὃν ἔπειτα πέλει, χαλεπὴ περ ἐοῦσα.

1. Explain *fully* the allusions in extract (C).
2. Compare the dialect of Pindar with that of Homer.

Translate into trimeter iambic verse :—

“He who is prosperous never ought to think
 With him benignant Fortune will remain
 Invariably ; for that capricious goddess,
 If goddess we must call her, loathes to dwell
 Perpetually beneath one roof. The wealth
 Of mortals is but mortal ; e'en the proud,
 And they who from the present moment form
 Their judgment of hereafter, to their cost
 Are taught by Fortune's self the mournful truth.”

Translate the following passages ; adding a short note, wherever a word, a construction, or an allusion, may seem to require it :—

(A). PLATO—*The Republic*, Book VII.

Μετὰ ταῦτα δὴ, εἰπον, ἀπεικασον τοιοῦτον πάθει τὴν ἡμετέραν φύσιν παιδείας τε περὶ καὶ ἀπαιδευσίας. ἰδὲ γὰρ ἀνθρώπους οἷον ἐν καταγείῳ οἰκῆσαι σπηλαιώδει, ἀνα-
 πεπταμένην πρὸς τὸ φῶς τὴν εἰσοδὸν ἐχούσῃ μακρὰν παρ' ἅπαν τὸ σπήλαιον, ἐν
 ταύτῃ ἐκ παίδων δυνατὰ ἐν δεσμοῖς καὶ τὰ σκέλη καὶ τοὺς ἀνχένας, ὥστε μένουν τε
 αὐτοῦ εἰς τὸ πρόσθεν μόνον ὄρεῖν, κύκλῳ δὲ τὰς κεφαλὰς ὑπὸ τοῦ δεσμοῦ ἀδυνάτους
 περιάγειν, φῶς δὲ αὐτοῖς πυρὸς ἄνωθεν καὶ πόρρωθεν καόμενον ὀπισθεν αὐτῶν, μεταξὺ

τοῦ δ' ἐπιγιγνομένου θέρους Διῆς τε οἱ ἐν Ἄθῳ ἀπίστησαν Ἀθηναίων πρὸς Χυλκιδέας,
 καὶ Λακεδαιμόνιοι τὰ ἐν Ἀχαΐᾳ οὐκ ἐπιτηδείως πρότερον ἔχοντα καθίσταντο. καὶ
 Ἀργείων ὁ δῆμος κατ' ὀλίγον ξυνιστάμενός τε καὶ ἀναθαρσήςας ἐπέθεντο τοῖς ὀλίγοις,
 τηρήσαντες αὐτὰς τὰς γυμνοπαιδίας τῶν Λακεδαιμονίων. καὶ μάχης γενομένης ἐν τῇ
 πόλει ἐπεκράτησεν ὁ δῆμος, καὶ τοὺς μὲν ἀπέκτεινε, τοὺς δὲ ἐξήλασεν. οἱ δὲ Λακεδαι-
 μόνιοι, ἕως μὲν αὐτοὺς μετεπέμποντο οἱ φίλοι, οὐκ ἦλθον ἐκ πλείονος ἀναβαλλόμενοι δὲ
 τὰς γυμνοπαιδίας ἐβόθουν. καὶ ἐν Τεγέᾳ πυθόμενοι ὅτι νενίκηται οἱ ὀλίγοι, προσελ-
 θεῖν μὲν οὐκέτι ἠθέλησαν δεομένων τῶν διαφευγόντων, ἀναχωρήσαντες δὲ ἐπ' οἶκου
 τὰς γυμνοπαιδίας ἤγον. καὶ ὕστερον ἐλθόντων πρέσβειων ἀπὸ τε τῶν ἐν τῇ πόλει
 [ἀγέλων] καὶ τῶν ἔξω Ἀργείων, παρόντων τε τῶν ζυμμάχων, καὶ ῥηθέντων πολλῶν
 ἂφ' ἐκατέρων, ἔγνωσαν μὲν ἀδικεῖν τοὺς ἐν τῇ πόλει, καὶ ἔδοξεν αὐτοῖς στρατεῦν ἐς
 Ἄργος, διατριβαὶ δὲ καὶ μελλήσεις ἐγίγνοντο. ὁ δὲ δῆμος τῶν Ἀργείων ἐν τούτῳ
 φοβούμενος τοὺς Λακεδαιμονίους καὶ τὴν τῶν Ἀθηναίων ζυμμαχίαν πάλιν προσαγόμε-
 νός τε καὶ νομίζων μέγιστον ἂν σφᾶς ὠφελήσεν, τειχίζει μακρὰ τεῖχη ἐς θάλασσαν,
 ὅπως, ἦν τῆς γῆς εἰργωνται, ἢ κατὰ θάλασσαν σφᾶς μετὰ τῶν Ἀθηναίων ἐπαγωγῇ
 τῶν ἐπιτηδείων ὠφελῇ. ξυνήδεσαν δὲ τὸν τειχισμόν καὶ τῶν ἐν Πελοποννήσῳ τινές
 πόλεων. καὶ οἱ μὲν Ἀργεῖοι πανδημί, καὶ αὐτοὶ καὶ γυναῖκες καὶ οἰκέται, εἰτέχιζον·
 καὶ ἐκ τῶν Ἀθηναίων αὐτοῖς ἦλθον τέκτονες καὶ λιθουργοί. καὶ τὸ θέρος ἐτελεύτα.

Translate into Attic prose :—

"Now, as Alexander had begun to change his conditions after the taking of Persepolis; so at this time his prosperity had so much overwrought his virtue, that he accounted clemency to be but baseness, and the temperance which he had used all his lifetime, but a poor and dejected humour, rather becoming the instructors of his youth than the condition and state of so mighty a king as the world could not equal. For he persuaded himself that he now represented the greatness of the gods; he was pleased that those who came before him should fall to the ground and adore him; he wore the robes and garments of the Persians, and commanded that his nobility should do the like; he entertained in his court and camp the same shameful rabble of worthless persons that Darius had done; and imitated in all things the proud, voluptuous, and detested manners of the Persians whom he had vanquished. So licentious is felicity, as notwithstanding he was fully persuaded that the gods, detesting the vices of the invaded, assisted him in all attempts against them, he himself, contrary to the religion he professed (which how idolatrous soever it were, could not but be fearful unto him by neglecting it), became by imitation, and not by ignorance or education, a more foul and fearful monster than Darius, from whose tyranny he vaunted to have delivered so many nations."—SIR W. RALEIGH.

CICERO—*De Officiis*, I., 42.

Iam de artificiiis et quaestibus, qui liberales habendi, qui sordidi sint, haec fere accepimus. Primum improbantur ii quaestus, qui in odia hominum incurrunt, ut portitorum, ut feneratorum. Illiberales autem et sordidi quaestus mercenariorum omnium, quorum operae, non quorum artes emuntur : est enim in illis ipsa merces auctoramentum servitutis. Sordidi etiam putandi qui mercantur a mercatoribus quod statim vendant : nihil enim proficiant, nisi admodum mentiantur, nec vero est quidquam turpius vanitate. Opificesque omnes in sordida arte versantur : nec enim quidquam ingenuum habere potest officina. Minimeque artes hae probandae, quae ministrae sunt voluptatum,

Cetarii, lanii, coqui, fartores, piscatores,

ut ait Terentius. Adde huc, si placet, unguentarios, saltatores totumque ludum talarium.

VIRGIL—*Eclogues*, III., 32.

De grege non ausim quidquam deponere tecum :
Est mihi namque domi pater, est iniusta noverca,
Bisque die numerant ambo pecus, alter et haedos.
Verum id, quod multo tute ipse fatebere maius-
Insanire libet quoniam tibi-, pocula ponam
Fagina, caelatum divini opus Alcimedontis,
Lenta quibus torno facili superaddita vitis
Diffusos hedera vestit pallente corymbos.
In medio duo signa, Conon, et quis fuit alter,
Descripsit radio totum qui gentibus orbem,
Tempora quae messor, quae curvus arator haberet ?
Necdum illis labra admovi, sed condita, servo.

1. How did the Romans reckon interest ?
2. Explain the following metres :—Bacchiac, Saturnian, Ionic a minori, and Choriambic Asclepiad. Quote examples.
3. What is meant by *ambitus* ? Give an account of the Roman legislation on this subject, with references to Cicero's speeches.
4. Describe the situation of the Subura, the Pantheon, the Colosseum, the Arch of Titus, and the Theatre of Marcellus.
5. Give the meanings of *re* in composition with verbs.
6. What are the dates of the institution of the Censorship, the commencement of the first Punic War, and the murder of Cæsar ?

Translate into Latin—

Such was the process by which he became confessedly the greatest orator among the people by whom eloquence was cultivated as it has never since been by any nation upon earth. He brought it to its highest stage of perfection, as Sophocles the tragic drama, by the harmonious union of excellencies which before had only existed apart. The quality in his writings which excited the highest admiration of the most intelligent critics among his countrymen in the later critical age, was the Protean versatility with which he adapted his style to every theme, so as to furnish the most perfect examples of every order and kind of eloquence.

B. LEWIS, *Professor*.

LOGIC AND METAPHYSICS.

Appendix G.

1. Can all hypothetical syllogisms be reduced to a categorical form, and how?
2. What is the especial province of each of the four figures? Is reduction necessary?
3. Effect of the new classes of propositions introduced by Sir W. Hamilton upon opposition.
4. Canon and probative force of the method of residues.
5. Can induction be properly defined as the colligation of facts under appropriate conception?
6. Explain the composition of causes.
7. How do fallacies of non-observation differ from those of mal-observation?
8. What are the principal forms of fallacies *a priori*?
9. What are the Idola of Bacon; and with which of Mills' fallacies do they coincide?
10. Explain the doctrine of occasional cause. To explain what imaginary difficulty was it invented?
11. Mention some of the arguments by which Berkeley endeavours to establish his system.
12. Examine Hume's Theory of Causation.
13. Are Reid's arguments a sufficient answer to Hume?
14. What are synthetical *a priori* propositions?
15. What is Brown's Theory of Perception? Is it identical with Reid's?
16. What is Sir W. Hamilton's classification of the Cognitive Faculties?

G. S. READ.

ENGLISH LANGUAGE AND COMPOSITION.

1. What practical advantages are obtained by studying the history of the English language?
2. How far is it true that English is a mixture of broken Dutch and broken Latin? Mention some English forms and idioms derived from the Anglo Saxon which are quite at variance with the rules of Anglo-Saxon grammar.
3. Consider the practice of translating from the Greek and Latin classics as an exercise in English composition.
4. Define *simple*, *complex*, and *compound* sentences. What practical benefit results from studying the grammatical and logical analysis of sentences?
5. What are the rules and cautions to be observed, (1) in the use of "ordinary" and "unusual" words; (2) in the employment of metaphorical language?
6. Compare the "continuous" style with the "reflex" or "periodic." Within what limits may antithesis be employed?
7. To what extent may rhythm be admitted in prose?
8. Consider the prose of Hooker and of Milton in respect of rhythm.

HISTORY.

1. Compare the Frankish invasion of Gaul with the Anglo-Saxon invasion of Britain, especially in reference to the condition of the conquered populations.
2. Can any of the Anglo-Saxon and Frankish institutions be traced to the customs of the ancient Germans?

Appendix G.

Special
Prizes.

3. Describe the contests of the Anglo-Norman kings, (1) with the Church ; (2) with the Barons.

4. Discuss the rise and progress of Parliamentary Government in England, comparing the Parliaments under the Plantagenets with those under the Tudors.

5. What principles were involved in the question of divorce between Henry VIII. and Queen Catherine ?

6. What was the policy of Henry VIII. with regard to the monastic institutions ?

7. Narrate the circumstances which led to civil war between Charles I. and the Parliament. What was the Grand Remonstrance ?

ENGLISH LITERATURE.

8. Trace the ancient British legends from Geoffrey of Monmouth to Spenser and Shakespeare.

9. Characterize the poetic genius of Spenser ; and explain the construction of the Spenserian stanza.

10. Distinguish between the classical and the romantic schools of poetry. Apply the distinction to Shakespeare and Jonson as dramatists.

11. Give some account of English prose writers in the period 1580-1660.

12. Mention the principal compositions of Milton, (1) in poetry ; (2) in prose.

WILLIAM RUSHTON, *Professor.*

PHYSICS.

1. Describe some method of ascertaining the elastic force of the vapour of water at a temperature below the freezing point.

2. Describe Regnault's Hygrometer, and show how, from knowing the elastic force, to deduce the weight of vapour in a given volume of air.

3. What is meant by the spheroidal state of a liquid ? Give Boutigneg's explanation of this phenomenon.

4. Describe the batteries of Smee, Groves, and Daniel, and point out their relative advantages.

5. How is the velocity of electricity ascertained ? Why is it retarded in submarine cables ?

6. When a copper plate is caused to rotate near a magnet, the magnet will also rotate. How does Faraday explain this ?

7. Describe some experiment to show the action of the earth on a closed current.

8. State the laws of *thin plates*, as given by Newton ; and explain them on the wave theory.

9. Describe the phenomena of diffraction which occurs when light passes a sharp edge, and state what account the undulatory theory gives of them.

10. How does this theory account for the laws of reflection and refraction ?

11. How is a circularly polarized ray experimentally distinguished from a plane polarized ray ?

12. Under what circumstances do two polarized rays interfere ?

PHYSICAL GEOGRAPHY, GEOLOGY, AND MINERALOGY.

Appendix G.

1. How does the velocity of water affect the nature of mineral matter deposited? Special Prizes.
2. What is the meaning of *co-tidal lines*? How and by what circumstances are these modified?
3. Name some of the *rainless* regions of the earth, and refer to the cause of this feature of climate.
4. What forms do igneous rocks assume, and what is the nature of their particles?
5. Draw a section showing an *anticlinal* and a *synclinal axis*, a *fault*, and an instance of *unconformability*.
6. What is the nature of the fossil contents of the *bone beds* of the Upper Ludlows?
7. What fossil occurs in the greatest profusion in connexion with coal seams?
8. To what group of reptiles do the Saurians of the Muschelkalk generally appertain?
9. In what form of rock is Labradorite most abundant?
10. What is the usual crystalline form of iron pyrites?

ROBERT HARKNESS.

BOTANY.

1. How is true reproduction effected in most Cryptogams?
2. Describe the development of adventitious roots in Monocotyledons.
3. Compare the minute structure of the woody stem in Gymnosperms with that of ordinary Exogens.
4. Describe the inflorescence of *Lemna*.
5. What is peculiar in the flower of *Myosurus*?
6. What British phænogams, besides *Compositæ*, present examples of syngenesious anthers?

ZOOLOGY.

1. Give some account of the development of the *Gregarinida*.
2. What characters distinguish *Crinoidea* from other orders of *Echinodermata*?
3. Display, in two artificial tabular views, the monæcious and diæcious forms of the sub-kingdom *Mollusca*.
4. How do the vertebræ of *Lepidosteus* differ from those of fishes in general?
5. Compare the dental formula of Marmosets with that of Platyrrhines proper.
6. What is a vascular gland? State briefly what are the principal functions supposed to be effected in the liver.

J. REAY GREENE, *Professor of Natural History.*

the Curator
of the
Museum.

APPENDIX H.

REPORT of the CURATOR of the MUSEUM.

REPORT of the CURATOR of the MUSEUM for the official information of the PRESIDENT, for the Session 1861-62.

1. The following are the departments connected with the Museum :— First, Zoology ; second, Botany ; third, Geology ; fourth, Palæontology ; and fifth, Mineralogy.

2. The number and general nature of the objects in these departments remain as before, with the exception of the following additions of :—

3. In the zoological department a few small Osteological specimens have been purchased ; and Mr. Arthur Hackett, a student of this College, contributed to the same department skins of an eagle, a pelican, and a lizard of the genus *Cyclodus*, all from Australia. The department of geology has also received still further additions from the Irish Geological Survey.

4. No other objects of special interest have been added to the Museum since the last report.

5. The walls of the Museum still continue damp ; and the stoves frequently emit such a quantity of smoke as to require the fires to be put out. The heating of the room is still very inefficient.

6. With reference to fitments and cases, some of those formerly applied for have not yet been received.

7. The conduct of the students in the Museum has, in almost every case, been unexceptionable.

8. As respects cleanliness and attendance, these have been such as to meet with the approval of the Curator.

ROBERT HARKNESS, *Curator*.

December 8, 1862.

Report of
Librarian.

REPORT of the LIBRARIAN for Session 1861-62.

The number of volumes in the library at the date of this report is 15,630. They are classified as nearly as possible in the following manner :—

	Vols.		Vols.
Mathematics	483	Foreign Literature	1,131
Natural Philosophy	511	History	2,224
Chemistry, including Mineralogy	863	Biography	490
Military Science and History	197	Antiquities	220
Geology, Palæontology, &c.	500	Geography, Voyages, and Travels	542
Botany, Zoology, &c.	1,205	Engineering and Architecture	294
Medicine	1,718	Agriculture	166
Theology and Moral Philosophy	306	Fine Arts	178
Logic and Metaphysics	391	Industrial Arts	64
Political Economy and Jurisprudence	411	General Encyclopædias	81
Education	147	——— Reviews	479
Law	665	Bibliography	78
Ancient Classical Literature	1,116		
Celtic Literature	48	Total	15,630
English do.	1,062		

Thirty volumes were presented during the past session. A separate catalogue of books presented to the College, and containing the names of the donors, is kept in the library.

In the annual scrutiny made during the summer vacation, two volumes (Bowman's Medical Chemistry, and Vol. I. of Dale's Translation of Thucydides) were found missing, and could not be accounted for. In addition to this, fifty-six volumes, the property of the library, were destroyed in the recent fire ; the particulars of this loss I subjoin in an Appendix.

The inconveniences arising from deficient heating and ventilation, as reported by me last year, have not as yet been remedied. All available space in most departments of the library has long since been filled up, there is in consequence some confusion in the arrangement and classification of books newly received. Appendix H.
Report of Librarian.

Discipline is good. I have had on one occasion only to call the attention of the Vice-President to any serious breach of the library regulations.

The attention and promptitude of the College booksellers (Messrs. Hodges and Smith, of Dublin) continue as usual to give every satisfaction.

MATTHIAS O'KEEFE, Librarian.

December 9, 1862.

APPENDIX to REPORT of LIBRARIAN, giving the particulars of the loss suffered by the Library in the recent Fire.

Though the fire did not extend to any portion of the library buildings a considerable amount of library property was destroyed by it, this property being at the time in the custody of professors or students, and kept by them in that portion of the College which was burned down. The following is a list of books so destroyed :—

In the custody of the Professor of Civil Engineering :—

Humber on Iron Bridges, two volumes.
Public Works of the United States, one volume.
Aide Memoir to the Military Sciences, Vol. III.
Rennie on Harbours, Vol. I.
Civil Engineer and Architect's Journal, volumes for 1851, 1853, 1858, 1861.
Dempsey's Examples of Iron Roofs, first and second series.
Wooden Roofs.
Professional Papers of Royal Engineers, Vols. I. and V.
Fairbairn on Cast and Wrought Iron.
Atlas to Life of Telford.
Minutes of Proceeding of Civil Engineers, Vols. VI., X., XIII., XIV., XV., XVII. XVIII.

In the custody of Professor of English Literature and History :—

A View of Universal History and Historic Tables, by Major Bell, one volume, folio.
Theory and Thrift of Historic Memory, by Major Bell.
First-sight Phenomena of Historic Time, by Major Bell.
Atlas Antiquus, by J. Sprüner.
Historische-Geographische Hand-Atlas, by Karl Von Sprüner.
Grammaire de la langue d'Oïl, by G. F. Burguy, three volumes.
Brut d'Angleterre, par Wace, one volume.
Layamon's Brut, by Sir F. Madden, three volumes.
Masson's Life of Milton, one volume.
Estoire des Engles, par Geffres Gaimar ; edited by T. Wright ; one volume.
Biographia Britannica Literaria, Anglo-Saxon period, by T. Wright ; one volume.
Roman de Rou, par Wace, three volumes.
Monumenta Historica Britannica, one volume, folio.
Bosworth's Anglo-Saxon Dictionary.
Vernon Anglo-Saxon Guide.

In the custody of the Professor of Latin :—

Doctrina Nummeorum Veterum, Vols. I.—IV.
Introduction to Latin Prose Composition, T. K. Arnold.
Verse

In the custody of the Professor of Materia Medica :—

Hoppe J. Die Nervenwirkungen der Heilmittel Therapeutisch-Physiologische Arbeiten, volume one.
Falck C. P. Handbuch der diätetischen Heilmittellehre, one volume.

In the custody of Students :—

Hamilton's Conic Sections.
Turner's Chemistry, Vol. I.
Arnold's Latin and Greek Prose Composition, two volumes.
Kingsley's Westward Ho.

Appendix I.

Copies

REPORT of VICE-PRESIDENT ON DISCIPLINE, PUNISHMENTS, and of the DEANS of RESIDENCES.

RETURN to be filled up by the VICE-PRESIDENT and sent into the REGISTRAR, for the official information of the PRESIDENT, on or before the day of , for the Collegiate Session 1861-62.

A.—As to the state and efficiency of all the several departments of the College, to which the constant supervision of the Vice-President is directed by the Statutes.

B.—As to the state of order and discipline in the College, to which the particular attention of the Vice-President is directed by the Statutes.

Signed by order of the President,

Registrar.

REPORT of the VICE-PRESIDENT.

A.—Satisfactory.

B.—Only one case of infraction of College discipline came under the notice of the College Authorities, in which a small money fine was considered a sufficient punishment.

JOHN RYALL, Vice-President.

RETURN of PUNISHMENTS inflicted by the COLLEGE COUNCIL in the Academic Year 1861-62.

Offence.	Punishment.
Wilful injury to College property.	Fined 10s.
(Signed)	ROBERT J. KENNY, Registrar.

REPORT of DEAN of RESIDENCES for STUDENTS of the CHURCH of ENGLAND.

As far as I had any opportunity of observing the conduct of the students of the Queen's College, Cork, who belong to the Established Church, I am able to say everything in their favour. Under very great difficulties, twenty-nine young gentlemen attended my lectures in the Chapter-room of the Cathedral; and no doubt I should have had many more, if these lectures were permitted within the walls of the College. I regret to report that two of the students who attended my lectures died during the year.

GEORGE WEBSTER,
Dean of Residences.

December 8, 1862.

REPORT of the WESLEYAN DEAN of RESIDENCE.

Cork, 3, Duke Parade, December 9, 1862.

MY DEAR SIR ROBERT,—In presenting a report of the students under my care, I feel assured they are correct and gentlemanly in their conduct, diligent and successful in their studies.

This gives me much pleasure, especially as some of them are away from under the care of their parents and guardians, and much exposed to the dissipating pleasures and vices of this large city.

For this state of exposure, provision has been made in the appointment of Deans of Residences; and when this office is taken into the consideration of Government, and treated as it should be, it cannot fail to be much more beneficial to the students.

I remain, dear Sir Robert,

Yours very truly,

RICHARD T. TRACY.

Sir Robert Kane, President, Queen's College, Cork.

Appendix K. REPORT of the DEAN of RESIDENCES for the STUDENTS of the PRESBYTERIAN CHURCH.

Reports on
Discipline,
Punish-
ments, and
of the
Deans of
Residences.

Cork, December 6, 1862.

SIR,—The Presbyterian students in attendance on the Queen's College, Cork, during the session 1861–62, were young men of respectability and good character, so far as known to me. I have further to state that some of them were attentive to their religious duties. I may add my impression, that unless the office of Dean is put on a footing much more practical and influential, it would be as well to abolish it, and thus sever the only link that connects the Colleges with the ecclesiastical communities of the country.

I am, yours very truly,

Sir Robert Kane.

W. MAGILL.

REPORT of DEAN of RESIDENCES for STUDENTS of the NON-SUBSCRIBING PRESBYTERIAN COMMUNION.

Cork, December 6, 1862.

DEAR SIR ROBERT,—I have to report that the conduct of the students under my care during the session 1861–62 has been in every respect most exemplary.

W. WHITELEGGE, M.A.,

*Non-Sub. Presbyterian Dean of Residences,
Queen's College, Cork.*

To Sir R. Kane, President, Queen's College, Cork.

APPENDIX L.

Appendix L.

Official
Letter of
the Presi-
dent.

OFFICIAL LETTER of the PRESIDENT, and ESTIMATE found by the COUNCIL of the amount of the Injury caused by the Fire at Queen's College, Cork.

Queen's College, Cork,
May 15, 1862.

SIR,—I have the honour to report for the information of his Excellency the Lord Lieutenant, that about six o'clock this morning, a fire was observed in the room of the Materia Medica Museum, which spread so rapidly, in spite of all the exertions made to arrest its progress, that the entire of that (west) wing of the College was destroyed, only the walls being left standing. Fortunately the fire was arrested by the gate-tower; and all the parts of the College to the east of the tower, including the Libraries, Natural History Museum, Examination Hall, and other buildings remain perfectly safe. The building of the Medical Faculty is also untouched. The collection of the Physical and Chemical Apparatus, although contained in the part of building destroyed, were removed by timely exertions in perfect safety.

The College Council held at once an inquiry into the origin of the fire, in which they were assisted by Mr. Orme, R.M. From the evidence there is no doubt but the fire was malicious, and contrived with elaborate ingenuity: attempts were made to set on fire, by means of heaps of matches, paper, and in one case, apparently tar, four separate doors in the cloisters of the west wing, which is open, and accessible to the College-square. In three of these cases the heaps of combustibles burned out, after only charring the door to a small extent; but in the fourth case, that of the Materia Medica Room, the ceiling being continuous from end to end of that wing, the extension of the fire was extremely rapid. Great difficulty

was at first found in obtaining a supply of water, but after some time engines and water were obtained and worked with very useful effect.

The Council having concluded that the fire was beyond doubt malicious, I communicated, at their request, with the Local Crown Solicitor, Mr. O'Connell; and at three o'clock an inquiry was held at the Magistrates' office, at which informations were formally sworn. Mr. Orme and Mr. O'Connell will of course report on their own behalf; and I have now the honour to enclose copies of such of the informations as I could obtain copies of, before post hour, the others shall be forwarded in due course.

Mr. O'Connell, Crown-Solicitor, has requested me to represent the necessity of having a large reward at once offered, in order to obtain the conviction of the authors of this outrage; he states his belief, that if a reward sufficient to provide for a family out of this country—say £500—be offered, he thinks that evidence would probably be obtained, which would serve to prevent such outrages in future. On this point, therefore, I beg to request you may communicate with him or Mr. Orme.

The College property destroyed, independent of the building and fittings, are as follows, so far as I have as yet ascertained:—

- 1st. The Museum of Materia Medica.
- 2nd. Pathological Museum.
- 3rd. The greatest part of the collection of objects of Classical Art.
- 4th. The Models and Instruments of the Engineering School.
- 5th. Some Maps and Plans.
- 6th. Collections of specimens of the Professor of Agriculture.

Fortunately as the Session was within a short time of the closing of the lectures, no material interference will occur in the educational business of the College. The examination, which would principally occupy the remainder of the Session, will be carried on in the ordinary way.

I beg to state that all the officers and porters, and also the students of the College, exerted themselves in the highest degree for the preservation of the College property, and that we are much indebted to the military under Colonel Smith; the Constabulary, and the officers of the county gaol, which adjoins the College, afforded most useful aid.

I have the honour to be, Sir,

Your obedient servant,

Sir Thomas Larcom, K.C.B.,
Under-Secretary.

ROBERT KANE, *President.*

May 19th, 1862.

RESOLUTION of COUNCIL.

“That the following estimates of the losses resulting from the recent fire be approved, and that the Local Crown-Solicitor be requested to act on same, in preparing the notices of claims for compensation for malicious injury.”

THE REPORT
OF THE
PRESIDENT
OF
QUEEN'S COLLEGE, GALWAY,
FOR
THE ACADEMIC YEAR 1861-62.

Presented to both Houses of Parliament by Command of Her Majesty.

DUBLIN:
PRINTED BY ALEXANDER THOM, 87 & 88, ABBEY-STREET.
FOR HER MAJESTY'S STATIONERY OFFICE.

1863.

[Price 1d.]

THE REPORT

OF THE

PRESIDENT OF QUEEN'S COLLEGE, GALWAY,

FOR

THE YEAR 1861-62.

TO THE QUEEN'S MOST EXCELLENT MAJESTY.

MAY IT PLEASE YOUR MAJESTY—

In submitting to your Majesty the Report of the Queen's College, Galway, for the Session 1861-62, I am again enabled to announce its continued and satisfactory progress. The number of Students attending lectures in the Session 1861-62 exceeded by 9 the number in attendance in 1860-61, though the latter Session showed an increase of 26 on that which preceded it. In the Session in which I write (1862-63) a further increase of 11 has taken place. There has then, in the last three Sessions, been an increase of 46 in the number of the College Students.

The number of those who have entered and that of those who have attended lectures in each Session, since the opening of the College, will be found in Tables I. and II.

The number of Students attending the several classes, and the number of lectures given by each Professor, will be found in Tables III. and IV.

I.—NUMBERS and RELIGIOUS PERSUASIONS of STUDENTS who have entered the Queen's College, Galway, in each year from its opening.

Session.	Matri- culated Stu- dents.	Non- Matri- culated Stu- dents.	Total.	Mem- bers of Estab- lished Church.	Roman Catho- lics.	Presby- terians.	Wes- leyan Metho- dists.	Inde- pend- ents.	Va- rious.	Total.

In a former Report I ventured to state that, in estimating the progress of the College, it would evidently be fallacious to compare the entrances of any subsequent Session with those of the first Session; that the entrances of the first year naturally exceeded those of the succeeding years—first, because of the accumulation of candidates for entrance, which had taken place in the interval that necessarily elapsed between the establishment of the Colleges and their opening; and next, because the entire sum now distributed in scholarships among the Students of the first, second, third, and fourth years, was on that occasion confined to those of the first year. For these reasons I suggested that the second year would be that with which all subsequent Sessions should be compared, in order to form a just estimate of the progress of the College. Comparing, then, the entrances and attendances of the second with those of the last Session, and of that in which I write, it will be seen that the entrances have increased from 26 in 1850–51, to 62 in 1861–62, and to 64 in the present Session (1862–63); and that the numbers attending the College lectures have increased from 63 in 1850–51 to 153 in 1861–62, and to 165 in the present Session (1862–63.)

It will further be found that, notwithstanding the exceptional circumstances which swelled the number of entrances in the first year, that number has been all but reached, in the ordinary course, by the entrances of the last and present Session.

The increase of Students is thus distributed among the several religious persuasions:—Roman Catholics have increased from 28 in

* Exclusive of 72 lectures to extra classes.

† Exclusive of a Course of Lectures given by the Senior Scholar.

‡ These Lectures were open to the public.

§ Owing to an alteration in the Ordinances of the University, no Lectures on Mineralogy and Geology were delivered this Session.

|| Exclusive of Anatomical Demonstrations.

1850-51 to 91 in 1861-62, and to 95 in 1862-63; members of the Established Church from 22 in 1850-51 to 39 in 1861-62, and to 33 in the present Session; Presbyterians, from 13 in 1850-51 to 19 in Session 1861-62, and to 32 in the present Session.

By a return obtained from the Queen's University, it appears that 790 Students are in the present Session attending lectures in the three Queen's Colleges; of these 214 are of the Established Church, 214 are Roman Catholics, 278 are Presbyterians, 84 are of other persuasions. When the circumstances with which the Colleges have had to deal are remembered; that they were opened simultaneously, at a period when the country was plunged in a destitution such as never yet had prostrated a people; that they have enforced from the outset a strict attendance on lectures—a system novel in this country, and imposing a large expense on the students; that the same opposition and calumnies which met them at their foundation have pursued them in their course with unflagging zeal—when these things are remembered, the presence in the class-rooms of the Colleges, within fourteen years of their opening, of 790 Students, representing in just proportions every religious persuasion in the country, will be regarded by every candid man as a complete justification of the policy which founded the Colleges, and a proud testimony to that zeal for knowledge which has ever characterized the people of this country, as well as to their determination to uphold united education.

How far each College has contributed to the general success which the numbers above given attest, may be estimated by the following Table, which gives the numbers of the principal religious denominations in each province, and the number of members belonging to each attending the provincial College:—

TABLE V.

	PROVINCES.		
	Ulster.	Connaught.	Munster.
ROMAN CATHOLIC CHURCH:			
Number of Members of, in Province,	963,687	864,472	1,416,171
Number attending Provincial College— 1862-63,	24	95	95
ESTABLISHED CHURCH:			
Number of Members of, in Province,	390,130	40,000	76,692
Number attending Provincial College— 1862-63,	51	33	120
PRESBYTERIAN CHURCH:			
Number of Members of, in Province,	551,375	3,025	3,685
Number attending Provincial College— 1862-63,	237	32	9

The success of three of the Students of this College at the last examination for the Indian Civil Service, on distinguished answering, has been a source of extreme satisfaction to the College authorities, and is a sufficient earnest of what might be achieved but for the hindrances which still cramp the utility of the College. The want of classical schools that exists, and the insufficient pre-

paration exhibited by many of the Students on entering the College, have been repeatedly dwelt upon in these Reports, and the attention of the Government has been implored to a matter of such vital importance to the progress and efficiency of the College and to the completion of our educational system. In each province in which a Queen's College has been founded a similar deficiency has been discovered, and the establishment of preparatory schools demanded as essential to its full development. From no part of the country has the call for intermediate schools been more urgent or continued than from the prosperous province of Ulster. When, then, I state that the numbers attending classical schools in the town of Belfast alone exceed by several hundreds those attending classical schools in the entire province of Connaught, some idea may be formed of the barren condition of the province in this respect, and of the serious barrier which such a state of things opposes to the full success and utility of the provincial College.

An allusion to this difficulty naturally leads me to another not less formidable, to which the attention of the Government has also been repeatedly invited in the Reports from this College; I mean the want of suitable and comfortable residences, where the Students coming from a distance could reside at an expense proportionate to their means. The system of collegiate instruction, which enforces on every Student attendance on lectures, necessitates his residing near the College for a considerable portion of the year, and imposes on him an expense which numbers anxious for collegiate instruction find it impossible to meet. The Commissioners appointed by your Majesty to inquire into the condition of the Colleges recognised the necessity of diminishing the cost of attending the College by the establishment of these residences, and strongly urged the adoption of such a measure. I only share the opinion of every member and friend of the College who is acquainted with the circumstances of the province, in anticipating a large and rapid increase of Students, should the recommendation of the Commissioners be carried into effect.

That the cost imposed by the necessity of residing near the College, which can only be diminished by the establishment of these boarding houses, prevents large numbers of Students from joining it, may be concluded from the numbers who avail themselves of the College instruction when not subjected to this expenditure. The town of Galway contains but few inhabitants, and exhibits as yet but faint signs of prosperity or wealth; nevertheless 56 Students from the town and its immediate neighbourhood attend at present the College lectures. I see no reason for thinking that the inhabitants of the towns throughout the province, with their adjacent districts, are less desirous of collegiate instruction than those of the town of Galway, and I have no doubt that they would avail themselves far more largely of its advantages than they can do at present, were the cost of attending the College brought more within their reach.*

Having referred to the impediments which still, to a great degree,

* By the Census Returns, it appears that the population of the province of Connaught in 1861 amounted to 1,010,031; that of the town of Galway to 16,786

cripple the progress of this institution, I may now be permitted to bear my grateful testimony to the extraordinary impetus which some recent proceedings have given to the cause of united education, and to the high and, I believe, impregnable position in which they have placed the Colleges.

The appointment of its present holder to the office of Chief Secretary of Ireland naturally led to the hope that in the son of the great founder of our Colleges these institutions would find a friend and patron. Little time had elapsed when the hope became a certainty, and the institution of a national subscription to increase the aids of learning in the Colleges, by a munificent donation from Sir Robert Peel of £1,200, has been found even less serviceable to them than the strength which they have derived from his able advocacy of their interests and his unhesitating adoption of the great principle they represent.

When the Chief Secretary called upon the country to mark its emphatic approval of the Colleges by contributing to the fund he had instituted, considerable anxiety was felt for the result by even the sanguine friends of education. The clouds of misrepresentation and detraction with which their opponents had enveloped the Colleges naturally induced a fear that the country, blinded by these calumnies, might be slow in responding to the appeal. A few days were sufficient to dispel these apprehensions. The response of the country was as prompt and decided as the appeal had been bold and unexpected. A subscription of £10,000, raised in a few weeks, has given a large and sensible increase to the aids held forth to learning by the Colleges, while the array of splendid and venerable names that appear in the list of subscribers attests, in a voice that cannot be misunderstood, the wide-spread and deep-rooted devotion of the country to the cause of liberal and unsectarian education.

The debates in the past session of Parliament on the subject of the Colleges, if they have not silenced the cry of failure, have, at least, deprived it of any force, and the handsome testimony borne by men of every party to their useful progress has had its due weight with the country.

Of still greater importance than the circumstances I have mentioned has been the satisfactory arrangement of a matter which had long occupied the attention of the Government, and had begun to cause great discontent among the Professors. For several years the Presidents have been compelled to allude, in their annual Reports, to the inadequate payment of the Professors, and to press upon the Government the claims for increased remuneration of men to whose laborious services and eminent abilities the Colleges owe so much. The impossibility of obtaining, at the present time, an increased grant from Parliament, threw great difficulties in the way of a satisfactory settlement of this question. By the assistance of the Irish Government a satisfactory settlement has been just accomplished. Certain changes have been made, at its suggestion, in the Colleges, which, while they impair in no wise their efficiency, have increased the incomes of the Professors to an extent which has caused the most lively satisfaction in this as well as, I believe, in

all the Colleges. This increase of the Professors' salaries, I may add, has been made without imposing any additional expense on the country.

In the Appendix to this Report will be found a vote of thanks, passed by this College to the Chief Secretary, which sufficiently shows the satisfaction which the wise measure to which I have alluded has excited here.

There is then, with some drawbacks, much reason for congratulation in the present condition of the Queen's Colleges. The incidents which I have reviewed—the valuable increase which the national subscription, instituted by Sir Robert Peel, has given to the rewards of learning held forth by the Colleges, the unmistakable declaration of the country in their favour, the result of the debates in Parliament, and lastly, the improved condition of the Professors, and the contentment consequent thereon, have, as I believe, placed the Colleges in a position which no amount of opposition can shake.

EDWARD BERWICK, *President.*

QUEEN'S COLLEGE, GALWAY,
March 26, 1863.

APPENDIX.

MINUTE of PROCEEDINGS of a MEETING of the PRESIDENT and PROFESSORS of QUEEN'S COLLEGE, GALWAY, held on the 10th day of FEBRUARY, 1863.

A letter from the Chief Secretary for Ireland, the Right Hon. Sir Robert Peel, bart., to the President, dated the 6th of February, 1863, having been read, it was unanimously resolved that—

“The President and Professors of the Queen's College, Galway, have the honour to acknowledge Sir Robert Peel's letter of the 6th instant, containing the plan which has been sanctioned by the Treasury for increasing the salaries of the Professors.

“The President and Professors entirely approve of the plan announced in Sir Robert Peel's letter, and feel deeply grateful for the very satisfactory manner in which it provides for the interests of the Professors.

“The President and Professors beg to offer to Sir Robert Peel their cordial thanks for the zeal and energy with which he has effected the new arrangement—an arrangement which, while it gives to the salaries of the Professors a large and substantial augmentation, neither impairs the efficiency nor lowers the position of the College.

“The President and Professors cannot let this opportunity pass without expressing their grateful sense of the numerous and important services rendered by Sir Robert Peel to the Queen's Colleges, and to the cause of united education; of the munificence with which he instituted the National Subscription to increase the aids of learning in the Colleges; of the proud demonstration in their favour which he evoked from every portion of the community; and of the manly eloquence with which, both in and out of Parliament, he has advocated and upheld their interests.”

REPORT.

TO HIS EXCELLENCY THE EARL OF CARLISLE, K.G.,

LORD LIEUTENANT-GENERAL AND GENERAL GOVERNOR OF IRELAND.

Queen's University, Dublin Castle,
December 31, 1862.

May it please your Excellency,

In the absence of the Earl of Clarendon, Chancellor of the Queen's University in Ireland, it becomes my duty as Vice-Chancellor, in compliance with the provisions of Her Majesty's Charter, to furnish to your Excellency the Report of the Condition and Progress of the University since the 1st December, 1861.

The General University Examinations of the current year commenced on the 30th of September, 1862, and terminated on the 28th of October. Examinations for Degrees in the Faculty of Medicine were also held in June, and first University Examinations in Arts and Engineering were also held in May. At these various Examinations 221 Candidates presented themselves. Lists of those who were successful are annexed. App. II.

In addition to these Examinations for Members of the University, the first Middle-class Examinations for the Examination of Candidates who are not Members, were held simultaneously in the month of June last at Dublin, Belfast, and Galway, in accordance with the provisions of the Ordinance of the 30th of January, 1860, as printed in the Appendix to my last Report; 34 Candidates presented themselves for Middle-class Certificates. Lists of those who were successful are annexed. App. II.

A public meeting of the University, to confer degrees and diplomas, and distribute prizes, was held in St. Patrick's Hall, Dublin Castle, on the 16th of October last. Your Excellency was graciously pleased to honour this meeting with your presence. An account of the proceedings is appended to this Report. App. I.

At the public meeting of the University, held in 1861, Sir Robert Peel declared his intention to devote £1,200 to the augmentation

of the small prizes offered in the Queen's Colleges; at the public meeting of the year 1862, he was able to announce that this sum has been raised to nearly £10,000 by public subscription.

The following papers relating to the University are annexed for your Excellency's information:—

- App. III. The Estimate for the current year.
- App. IV. The Cash Account for the year ended 31st of March, 1862.
- App. V. A List of the Examiners for the current year.
- App. VI. A return of the several Meetings of the Senate since my last Report.

I have the honour to be,

Your Excellency's

Obedient and faithful Servant,

MAZIERE BRADY, C.

Vice-Chancellor.

APPENDIX.

APPENDIX I.

Appendix.

PUBLIC MEETING of the QUEEN'S UNIVERSITY in IRELAND, held in St. Patrick's Hall, Dublin Castle, on the 16th October, 1862.

I.
Public
Meeting.

AFTER the close of the examinations of the year 1862, a public meeting of the Queen's University was held in St. Patrick's Hall, Dublin Castle, on the 16th of October, 1862, for conferring degrees and diplomas.

A large number of distinguished persons having taken their places in the Examination Hall, the Vice-Chancellor and Senate of the University, the Professors and Examiners, and the Candidates, entered it in procession.

The VICE-CHANCELLOR, attended by the Secretary, proceeded to the entrance of the Hall, and conducted his Excellency the LORD LIEUTENANT to the chair set apart for him.

The VICE-CHANCELLOR then opened the meeting in the following speech :—

At our last annual meeting in this hall to confer the degrees and honors of the Queen's University in Ireland, I was able to announce that the numbers of those students who had passed our several examinations for the year 1861 considerably exceeded those of any former year—they were in all 98. On the present occasion I have the gratification of being able to state that the numbers who have passed the same examinations in the last academic year are still more in advance—they amount to 116. In the year ending in October, 1861, 119 students presented themselves for examination, in the past year 141. The Senate has already, at a special meeting in the month of June last, conferred the degree of Doctor of Medicine on six students, who then passed their examinations. We are now about to confer the same degree on twenty-eight of those who have passed examinations, some in June, the others in the recent examinations; thirty-six have passed the first Medical examination; thirty-six have qualified themselves to receive the degree of Bachelor of Arts, and nine have succeeded in attaining that of Master in the same faculty; one candidate has attained the degree of Doctor, and two that of Bachelor of Laws, and three have been successful in the examination for the Diploma in Engineering.

The first University examination in Arts under the new ordinances was passed by thirty-seven students, of whom nearly all have passed the degree examination, and are included in the number which I have already mentioned, and eight candidates have also passed a first examination in Engineering. Two degrees of Doctor of Laws of this University are to be conferred under the powers of our charter on gentlemen having the same degree in other universities. The announcement of these details constitutes in itself the principal statement which I have to make upon the present occasion. They are the patent evidence of the continuous progress of the University from its first public meeting ten years since, on the 14th of October, 1852. They do not, however, entirely exhibit the national advantages of the whole institution, consisting as it does not

Appendix. merely of a senatorial body crowning the studies and rewarding the progress of the select, and, from various causes, still limited number of those who seek the degrees and honors it is able to confer, but also of the three Queen's Colleges with which the Senate is associated and over which it presides.

I.
Public
Meeting.

This is not the place or the occasion for discussions of political controversy, or the examination of the character and prospects of other and more exclusive systems of education. Suffice it for us to congratulate ourselves and the country on the substantial results of that enlightened system of united education which those Colleges and the Queen's University have been established to foster and promote; and I am able to point to the actual condition of the Colleges as indicating a steady advance in the numbers of attending students. In the Collegiate Session of 1858 and 1859 the total number of those attending in all the Colleges was 493; in the session of 1859 and 1860 it rose to 546; in 1860 and 1861, to 657; and in the sessions of 1861 and 1862, which closed in the month of June last, the attending numbers have been 745; exceeding by 252 the entire of the classes of students in the session of 1858 and 1859—a rate of increase in the brief period of four academic years at which those interested in the success of these institutions may well feel abundant satisfaction—years, it may be added, in which the whole system, principles, and working of the Colleges have been exposed to more than ordinary criticism and question. My answer to those attacks is given in the statement I have just read, and I am very confident that each succeeding year will, in like manner, give additional testimony to the soundness of the principles on which the Queen's Colleges have been founded, and to the excellence of the teaching which they direct. Of the 745 students in attendance during the last session, 203 are members of the Established Church, 200 Roman Catholics, 247 Presbyterians, and ninety-five are members of various other religious denominations. I may add to these details of the state of the Colleges, that the number of annual entrances in them has increased from 196 in the session of 1858–59, to 312 in the last session—a number almost identical with those who entered the ancient University of Trinity College.

The competitive examinations which have been holden for candidates for employment in the public service continue to exhibit proofs of the success of students from the Queen's Colleges who have entered the lists for competition. Seven of these students have been successful in the examinations for the Civil Service of India, three were successful candidates for the Indian Engineering Service, and two have obtained the important appointments of Inspectors of National Schools. Others have also been successful in the Army, Naval, and other competitions. Middle class examinations of candidates, not members of the University, pursuant to our ordinance of 1861, were holden in the course of the year. This class of examinations must still be spoken of as experimental—the numbers attending them have not yet attained any proportion of magnitude; they have, in fact, been fewer than in the year 1861; and perhaps some years must elapse before the full benefits will result from those examinations to the cause of general education which the Senate anticipated from their institution.

Our last annual meeting was happily distinguished by the delivery of an address by the Chief Secretary, the Right Hon. Sir Robert Peel. There must be many here to-day who were then gratified by listening to the eloquent and impressive language of that address—by the warm, the generous interest it exhibited in the origin and progress of our Colleges, recalling to our recollection in the most forcible manner the name and services of the illustrious statesman under whose auspices and during

whose administration they had been established. In the course of his address Sir Robert Peel gave practical proof of the sincerity of his attachment to these institutions, and of his desire to promote their further advancement, by announcing his intention to establish three scholarships of £40 a-year each—one for each college—for the space of ten years. The Senate gratefully accepted the munificent endowment. The imitation and the example of Sir Robert Peel have, in the course of the year, stimulated many other persons to aid in its augmentation; and I am happy to be able to announce that now the aggregate value of the subscriptions amounts to the sum of £8,750, in addition to several sums, amounting to £125 a-year, promised for the lives of the respective donors. A scheme for the allocation of the fund has been submitted to the Senate by Sir Robert Peel, and approved of, by which it is arranged that for the next ten years an annual sum of £575 shall be applicable to the foundation of various scholarships and prizes attainable by the students at different stages of their collegiate and university career; and at the end of that period it is calculated that there will remain invested at least a sum of £3,000 to be thenceforward devoted to the permanent establishment of similar honors, though not so considerable in amount. It is unnecessary at present to go more fully into the details of this scheme; they will be published with our printed ordinances and annual calendar. On the part of the University, and of the presidents, professors, and students of the Queen's Colleges, I have the happiness of thus publicly tendering their most grateful acknowledgments to the originator of this important endowment, trusting that its success in encouraging the collegiate studies of the youth of Ireland will bear the highest testimony to the sagacity of the design, and amply reward his generous intentions.

Appendix.
I.
Public
Meeting.

Since we were last assembled in this hall the hand of Providence has deprived the Senate of one of its most eminent members, the Right Hon. Sir Thomas Wyse. His continued absence on the public service as Ambassador to Greece prevented his giving us the benefit of his assistance in conducting the business of the University; but it was most fitting that one of the earliest and most persevering of the advocates of education for all classes in Ireland, and of the establishment of these very seats of learning, should be associated with the governing body of the institutions to the creation of which his early labours had been so zealously directed. Once only—it is but two years since—in the year 1860, we had the advantage of his presence; and in this hall he then gave utterance to the satisfaction, the joy, with which he witnessed the progress of education among us. On that occasion, my Lord, and once before at our meeting in the year 1855, your Excellency spoke of Sir Thomas Wyse, and of his exertions in the cause of the Queen's Colleges in Ireland, in language of eloquent eulogy, which I should in vain attempt to follow. I can but express in sincere, though humble terms, the regret which is, I doubt not, shared by many who hear me, for the loss of an illustrious and accomplished Irishman.

Her Majesty has been graciously pleased to supply the vacancy thus caused in the Senate of the University by the nomination of Sir Robert Peel. The interest he has shown in the fortunes of the University and the Colleges well justifies the belief that the charge could not be entrusted to any individual more anxious for their well-being—more likely to promote their success. I shall now proceed, as Vice-Chancellor, in the absence of our Chancellor, the Earl of Clarendon, officially to confer upon the successful candidates the degrees and diplomas to which they are respectively entitled. His Excellency the Lord Lieutenant has graciously acceded to our request, that he would present to the more distinguished students the medals and prizes of the University.

The candidates were then called up in order, and the VICE-CHANCELLOR

Appendix. conferred upon each the degree or diploma which had been conferred by the Senate.

I. His Excellency the LORD LIEUTENANT was graciously pleased to distribute to those to whom prizes had been awarded the distinctions which they had won.

Public Meeting.

The ceremony having concluded, the VICE-CHANCELLOR addressed his Excellency as follows:—

There remains to me now, my Lord, but to discharge the pleasing duty of tendering to your Excellency the thanks of the Senate of the Queen's University for the countenance and kind assistance you have given to their proceedings on the present occasion, and for the uniform attention and consideration you have bestowed on every request and recommendation which they have presented to you respecting the important matters committed to their charge. I am happy in recording that this is the seventh occasion on which our meeting has been honoured by your Excellency's presence; and I feel confident that the progress which, from meeting to meeting, we are able to announce in the condition and prospects of the University and its Colleges, has been deeply interesting to you. The presidents, officers, and professors of the Colleges have here received many testimonials of your good wishes in the friendly and encouraging language in which on those occasions you have been pleased to address us—they are satisfied that in your Excellency those institutions have a sincere friend, a constant as well as a powerful protector; and for them also, for every member of the University, and every student of its Colleges, I return you the most grateful thanks.

The LORD LIEUTENANT said—Mr. Vice-Chancellor and Gentlemen, I once again meet this distinguished body, the Vice-Chancellor, the Senate, the Presidents, the Professors, the Candidates and Students of the Queen's University in Ireland with the same pleasure that I have formerly felt, and which so far from palling upon me from length of experience and comparative want of novelty, receives a material increase from the accounts I have received of the continued growth and welfare of this our still young institution. This has been in a most marked manner the case on the present occasion. You have alluded, sir, to this being the seventh time of discharging the present function, so we may look on it as a sort of sabbatical celebration.

From the interesting and important statement of figures which you have yourself laid before us, it will be perceived that there has been within the last year a considerable positive increase in the number of the students at the respective Colleges; it seems indeed to proceed at the rate of at least an additional hundred every year. There is also a considerable increase in the number of candidates for degrees. But what is perhaps a still more gratifying point is what I hear from sources on which I can entirely rely, that in respect of quality there is a decided improvement in the character of the examinations. This I believe is in some degree owing to the operation of the new ordinance which has established what we of the older universities were in the custom of calling the "little go"—or half way examination in the middle of the academical career—thus setting free students who were examined in the various branches of the minor examination for the more specific studies to which they might feel inclined to devote their after labours. Much of this improvement no doubt is due to the spirit of activity and progress which incites both the older and more modern systems, alike the most venerable and the freshest and youngest bodies into the noble arenas of intellectual activity and competition. The results, as have been already stated, of the Indian and Civil Service Examinations show that in these useful fields of competition the Queen's University in Ireland has borne no undistinguished part.

Among the other incentives to the exertion and progress of our young generation, we may, as the Vice-Chancellor has already forcibly reminded us, gratefully include the handsome provision which, mainly by the impulse, example, and exertion of Sir Robert Peel, has been added to the original stock. I gladly leave to him who is best entitled to furnish them, any explanations of the arrangements which it is proposed to establish regarding this newly-acquired fund; and I have a sanguine hope that the benefits which may be expected to be derived from it will be more and more increased and recognised as we proceed further from the original date, and have opportunity and leisure to count up the fertile products.

I have the satisfaction of being able to inform you that her Majesty's Treasury has assented to the proposition of the Irish Government, pressed upon them originally by Mr. Cardwell, who was zealously followed by Sir Robert Peel, by which a certain addition will be made to the existing salaries of the able and distinguished professors. In this pleasing retrospect I ought not to omit what is certainly the most important circumstance of all, the pleasure I derive from hearing that the general conduct and moral bearing of the students of the Colleges are equally entitled to commendation with their intellectual and scholarlike acquirements. It is, indeed, most pleasing to perceive the symptoms of honourable, and not unfriendly, competition pervade alike all of our aggregated Colleges. Long may our territorial contests be of this description. If we must pit our North against our South—if Cork holds the same relative geographical position which New Orleans does on the American Continent—if Belfast is here what Boston is there—if Galway may represent the Far West, happily these fair cities do not send forth their several children to fighting fields and premature graves. Our struggles for intellectual supremacy are carried on in peaceful halls and are crowned with bloodless laurels.

And now, my young friends, I believe I might say all of you are about shortly to enter upon the busy stage of mature life and the arduous work of independent action. Whatever your separate spheres of employment and duty may be, I trust that you will import into them the same spirit of diligence and study which has procured for you such honourable notice here. Still more do I hope that you will maintain throughout your entire careers that strength of character and that tenacity of principle which will alone give real value and dignity to your future lives. I trust that your lot will be cast in times alike of tranquillity and of progress—equally removed from disturbance and from stagnation—affording the best conditions for the enjoyment of your existence and the development of your powers; and if some circumstances in our age and country, entirely without any onesided or exclusive reference—if some circumstances should suggest any more specific wish, I trust that the world in which you have to play your future parts will have grown wise enough not to feel it essential, while we exhibit a conscientious and unswerving adherence to our own sense of right, at the same time to think that it is any part of our duty to make ourselves offensive or disagreeable to those who hold a different set of opinions. Every year, every day passes over my head convinces me more and more not only of the entire wrongfulness, but also of the utter unreasonableness of intolerance—intolerance in any matter, especially in matters of religion. When we look around us, and consider that it has pleased the Almighty to permit the various creeds and churches of Christendom to be supported and advocated by such men as Luther, Bossuet, Fenelon, Jeremy Taylor, Bishop Butler, John Wesley, Robert Hall, Chalmers, and Channing—men with the fire of Divine eloquence on their lips and the fervour of Divine piety in their hearts—surely there can be none of us who must not think how likely it is that in many points he may be wrong—how impossible it is that in all points

Meeting.

Appendix. he can be right. My young friends, may the favour and guidance of Heaven ever rest upon you, and consecrate your lives to works of usefulness done in the spirit of faith and love.

I.
Public Meeting.

SIR ROBERT PEEL said—I cannot adequately thank you for the kind manner in which you have welcomed my name; and I feel peculiar gratification in receiving such a manifestation of welcome from this company, particularly as it emanates from those who on this occasion and by their successful studies represent what I may fairly call the rising intellect of the youth of Ireland. A year has elapsed since I last had the privilege of addressing an assembly similar to the present. On that occasion I suggested that an attempt should be made to place upon a more satisfactory footing, corresponding with what existed in other Universities, the endowment of the Queen's Colleges; and I am happy to say that that suggestion has borne fruit of more abundant promise than even the most sanguine expectation would have ventured to anticipate. But when I made that suggestion last year, I knew, I felt, that in advocating here, in the bold and simple language of an unprejudiced mind, the cause of liberal education—that is to say, the cause of liberal education upon the broad basis of religious equality—I should touch a chord which would vibrate through the hearts of many, and which would at once rally to us the best friends of enlightened progress in this country. I have not been disappointed.

I can say it with perfect truth, there never was any one of my predecessors in the office I fill who has ever been honoured as I have been with the confidence of moderate men, of all parties, to such a degree as is conspicuous in this matter. The hope I ventured to express last year, that my example would be followed by those who have a more direct interest in the welfare and prosperity of this country than I can have, has elicited such a spontaneous, such a practical illustration of the value which is attached to the character and the influence of this University as at once to have placed it in the estimation of public opinion upon a par with the most useful and most valued institutions of Ireland. Now I take pleasure and an honest pride in telling my young friends here—the students of this University—the interest which has been felt in them, the desire to promote their success in what may be called their first struggles in life.

You recollect that this time last year I made an appeal to the public on behalf of this University. There were then four other subscriptions before the public, to which their attention was strongly invited. But the fund for endowing the Queen's Colleges, in the brief space of three months, not only exceeded the amount that was contributed to the other subscriptions, but was greater than any sum that has been collected in this country for the promotion of any work during the last ten years. Was not that satisfactory? We determined to succeed. We met with hardly any opposition. I believe there were some half dozen who did protest against the course that was so successfully pursued; but I could hardly believe they were in earnest. There were some who, even after the distinguished support which we received, went so far as to assert that it was dangerous to the morals and to the character of young men to enter the University. Dangerous to character and morals! Why, precisely the same thing was said three hundred years ago. Not of this University, it is true; but I was reading the other day that about three hundred years ago the moving of the earth and the heliocentric system was first mooted. The first Authorities of the Church were in consternation at it, they said the authority of the Bible and the morals and the character of the people would be destroyed. The Bible still, however, exists, and the only man who suffered at the time was poor Galileo, who suffered for the cause of truth; but the morals or character of the people were not deteriorated.

I say that we must not attach too much importance to those opinions. There are many who hold different opinions on the subject, but, above all things, whatever opinions we may hold, let us, at all events, be national in our sentiments; let us endeavour to do good to the country, and lay aside all other considerations. I never could, and never will believe that there is any party in this country who would wish to deprive the laity, of the middle classes in particular, of those benefits and advantages which they are now, in the middle of the nineteenth century, so justly entitled to enjoy.

Appendix.
I.
Public Meeting.

We, therefore, submitted our plan to the country. Our plan was, that we should endeavour to place the endowments of the Queen's Colleges, which were evidently inadequate, upon a footing similar to that of other Universities; and we availed ourselves of this opportunity to test the popularity of this University by the public verdict. We went to the public and inquired if the objections to it were based upon any fair representation, and I think the list of names—I can't read through them all—but I think the mere narration of a few of the names in this list will convince you and the public that we have met with powerful support.

In that list appears the name of one who cordially assented to the plan and supported it—one who is a true friend to Ireland—your noble Chancellor, the Earl of Clarendon. This proposal was assented to and subscribed to by one of whom every Irishman, in particular, must feel especially proud, by their distinguished countryman, one who is at this moment foremost in the councils of his Sovereign—Lord Palmerston. This plan was assented to by one who always takes the deepest possible interest in the welfare of this University, and who for seven years, as the Vice-Chancellor has said, has presided on occasions such as this—one whose support adds to the intrinsic value of his approval—the present Viceroy. This suggestion was also approved by one who in this country stands first in his order—one who holds a position not more exalted than the exalted character that distinguishes his mind—his Grace the Duke of Leinster; and this proposal was assented to by a veteran statesman of our country, who was fifty years ago a Cabinet Minister of England, Lord Lansdowne. I will, if you permit me, read a most gratifying proof of the estimation of Lord Lansdowne. In his letter he says:—"My only anxiety respecting your most liberal plan for adding to the endowment of the Queen's Colleges in Ireland has been that it should not be thwarted in its commencement and deprived of a good start by any possible prejudices or captious objections. Your list of Irish subscribers gives me confidence on this subject, and I shall willingly subscribe £125 to the plan." It was also received by a man whose memory is revered by every Protestant, and whose character was respected by every man in this country, no matter what his creed was—I mean the late Lord Archbishop of Armagh and Primate of Ireland. Did he refuse to give his approval to the course we have adopted in these Colleges? No; his Grace the Lord Primate gave his entire approval so far to this system, that he actually offered me £1,000 if I should establish another subscription in order to carry out completely the clauses of the Colleges' Act. But at that moment, being engaged on these prizes, I was of course unable to start another subscription; but this shows what was the feeling of that eminent and most venerated character, when he wrote to me a few days before his death, saying, that united education, on the broad basis of religious equality, was an object which should have his noble and generous support. Well, gentlemen, these are great names. There are others of the most distinguished men of the country, the gallant Commander-in-Chief, who, although a veteran soldier, knows how to admire and respect the energy and competition of youth—General Sir George Brown, and a number of others—and all these names, and whatever others may be

Appendix.

I.
Public
Meeting.

added, shall be engrossed on vellum, and handed down in the archives of the University, as a testimony of the liberal support given to the Queen's Colleges in 1861.

If I may be permitted by this assembly, I will now tell you how that fund will be applied—and my friend, Mr. Stoney, deserves the chief credit, not I, in carrying out this plan. The sum subscribed is £8,749—that is to say, when I started the subscription I was determined to get £10,000. I started with a paltry £40, but in three months it grew to the prodigious dimensions of £10,000. The result was a subscription of £8,749, besides £125 a-year, to be paid during the lifetimes of the donors. Besides that, there is a magnificent donation from another person, which, I understand, is likely to be given to one of the Colleges; but which I am not at present at liberty to mention. We propose to give £575 a-year, for ten successive years, to students of this University. That sum will leave a balance of £3,000, which, with the accumulated interest and capital, will be left as a reserve fund to be applied as may be determined on. I have limited the subscriptions to ten years, because after that there may, perhaps, be other means of serving the interests we have in view. We mean to have three exhibitions of £60 each in the faculty of Arts; also three others of £45 each, and two of £30 each. We mean to have two exhibitions of £40 and £30 each in the faculty of Medicine; and two others of £40 and £30 each in the Engineering department—all those to be held with any of the small scholarships to which candidates may become entitled in the Colleges. And we propose to allot £60 a-year in special prizes. That is how we propose to distribute this magnificent fund which Irishmen have contributed to place at our disposal. That is the Queen's College endowment fund which I have the satisfaction of announcing to you; and I now take the liberty of expressing my sincere thanks for the very kind and handsome manner in which allusions was made by the Vice-Chancellor to my presence on a former occasion. I especially value a compliment from the lips of one who is so distinguished from his position and character, and I shall long preserve the memory of that flattering allusion.

Both the Viceroy and Vice-Chancellor have alluded to the progress made in this University. It has been most satisfactory, and I think it was the Vice-Chancellor who referred to the success which has attended the public competition in competitive examinations. Now it may not be misplaced if this audience would allow me to refer to the success of the Queen's Colleges at public examinations. These competitive examinations were introduced in 1855, and twenty-six appointments in the East India Civil Service have been won by students of the Queen's Colleges. One of these was the best answerer on the whole course of his year, another the second, and two others the fourth of their respective years. It deserves to be remembered in the history of the Queen's College, Belfast, that in 1857 it was able to carry off, in competition with all the Universities of the kingdom, the first, the fourth, and the tenth of the twelve Indian appointments of that year. Now, I think it is also very much to the credit of the Queen's Colleges of Cork and Galway, that when in 1855 this competitive system was introduced, and these valuable appointments thrown open to public competition, the education given at them, at that time, without any special preparation, was at once able to secure a successful candidate from each. No one can look at this success without feeling how you are in your own persons carrying out the wishes of the best friends of education in this country.

The Vice-Chancellor has alluded in touching terms to the presence, on a former occasion, of a gentleman who is now removed from this scene—I mean Sir Thomas Wyse. He attended in 1860 the meeting of this University. He was a member of the Senate. He had been Member for

Waterford; and was one of those Roman Catholic Members of Parliament who were most anxious for the establishment of these Colleges in Ireland. His expressions have been alluded to by the Vice-Chancellor, therefore, I need not refer to them, but to show how great was the interest he took in the Colleges. I will just repeat an extract from what he said—"I take the greatest joy in witnessing the progress which Ireland has made, and the time is not far distant when the Colleges will bear the most ample fruits. In your efforts, in your exertions, in all your rewards I have continually taken the most intense interest." That was the language of Sir Thomas Wyse, the last time he was in this hall. This language is very encouraging, when we recollect the time that he fought, in former years, the battle which led to the endowment of the Queen's Colleges.

Appendix.
I.
Public
Meeting.

But we must recollect that Sir Thomas Wyse was not the only distinguished Irishman who was in favour of the system we now see working so advantageously. The great O'Connell himself was in favour of it. Ay, I am glad to call him great, because I think any man great, who for years of his life conducts public opinion, and who is able by the energy of his character to lead to the great object he had in view, in removing what ought long ago to have been removed in the public arrangements of this country. O'Connell was strongly in favour of this system, and in 1839 made a most remarkable speech in the House of Commons, in which he strongly advocated the establishment of this system, referring to other countries, and pointing to them as an example of what we ought to do in this country. That was in 1839, and I wish he had lived to see the realization of his wish.

Even in Limerick, in 1839, a movement was got up for the purpose of procuring a system of united secular education—that is to say, about seven or eight years before the Queen's Colleges were established—and the requisition was signed by three bishops of the Roman Catholic Church, Dr. Egan, Dr. Ryan, and Dr. Kennedy; therefore, I say, that this system which we have now established in this country is one which the best and greatest men of past times have been anxious to see carried out.

Let me allude to the fact referred to by our noble Viceroy, that we have succeeded in obtaining an increase, a necessary increase, in the salaries which the Professors of the Colleges had hitherto received. Two years ago the Viceroy declared in this hall that they were manifestly underpaid, and now I am happy to say that, acting on the representation of the Irish Government, the Treasury so far acceded to their desire—that, without increasing the burdens on the public Exchequer, they have made arrangements which will materially increase the remuneration of the Professors. Well, I think we have to congratulate ourselves on the flourishing condition of this University. I think its prospects are of the very best kind; and I hope that you will not forget that in 1859 it was used as a reproach to you, that the proportion of persons receiving collegiate education and academic honors in this country, in proportion to its population, was less than in any other country in Europe. Now, this ought not to be; it shall not be in future, if you and those whom you represent come forward in this University. Why should Scotland, with half the population of Ireland, have four Universities and three or four hundred students? Why should England have the immense academic advantages she has, and Ireland not have these advantages in a corresponding degree? There are 53,000 or more places in the public service, embracing every variety which you can compete for. There are forty-five departments in the State open to competition, and I put it to you whether you should not equally have the advantages which this system of competitive examination has supplied?

Appendix.

I.
Public
Meeting.

I only hope that the future may be as prosperous as the past. It is now firmly and universally acknowledged in this country that the system of education established in the Queen's Colleges is entitled to our cordial support. All the talent, all the intelligence—I may say all the religion in the country has supported it. O'Connell, Sir Thomas Wyse, the late Archbishop of Armagh, the late Dr. Murray, all united in giving their support to the system of education established in this University; and the public have now given their adhesion to it, and they and we have done so because we believe that this system of education is best calculated to heal the wounds, or rather I should say to wipe away the last disgraces and grievances of the past, and because this system of education is best calculated to draw together the ties of association and reciprocal interest which are daily uniting and knitting together all classes of society in defence of those great principles of constitutional freedom—religious liberty and intellectual progress—upon which are based the political influence and moral power of the country.

The proceedings then terminated.
